41st Annual Meeting of the Cognitive Science Society (CogSci 2019)

Creativity + Cognition + Computation

Montreal, Canada
24-27 July 2019

Volume 1 of 5

ISBN: 978-1-5108-9155-5

Printed from e-media with permission by:

Curran Associates, Inc.

Table of Contents

Workshops

Heuristics, hacks, and habits: Boundedly optimal approaches to learning, reasoning and decision making 1
Ishita Dasgupta, Eric Schulz, Jessica Hamrick, and Josh Tenenbaum

Cognitive Science Society Workshop: Guided Playful Learning 3
Emily Daubert and Patrick Shafto

Using replication studies to teach research methods in cognitive science 5
Josh de Leeuw, Janet Andrews, Ken Livingston, Michael Franke, Joshua K. Hartshorne, Robert Hawkins, and Jordan Wagge

Measuring Creativity - Workshop 7
Ana-Maria Olteteanu, Richard Hass, and Evangelia G. Chrysikou

Predicting Individual Human Reasoning: The PRECORE-Challenge 9
Marco Ragni, Nicolas Riesterer, and Sangeet Khemlani

Everyday Activities 11
Holger Schultheis and Richard Cooper

Beyond the Ivory Tower: Non-Academic Career Paths for Cognitive Scientists 13
Vanessa Simmering and Carissa Shafto

Tutorials

Daylong data: Raw audio to transcript via automated & manual open-science tools 15
John Bunce, Elika Bergelson, Anne Warlaumont, and Marisa Casillas

EMHMM: Eye Movement Analysis with Hidden Markov Models and Its Applications in Cognitive Research 17
Janet Hsiao and Antoni Chan

Optimizing the Design of an Experiment using the ADOpy Package: An Introduction and Tutorial . . 19
Jay Myung, Mark Pitt, Jaeyeong Yang, and Woo-Young Ahn

Full Day Tutorial on Quantum Theory in Cognitive Modeling 21
Emmanuel Pothos, James Yearsley, Zheng Wang, Peter Kvam, and Jerome Busemeyer

Symposia

Individual Differences in Spatial Representations and Wayfinding 23
Thackery Brown, Alina Nazareth, Maria Brucato, Veronique Bohbot, Nora Newcombe, Andrea Frick, Daniel Voyer, Lucy Huang, Qiliang He, Jon Starnes, Sarah Goodroe, and Timothy McNamara

What makes a good explanation? Cognitive dimensions of explaining intelligent machines 25
Roberto Confalonieri, Tarek Besold, Tillman Weyde, Kathleen Creel, Tania Lombrozo, Shane Mueller, and Patrick Shafto

How Does Current AI Stack Up Against Human Intelligence? 27
Ken Forbus, Dedre Gentner, John Laird, Thomas Shultz, Ardavan S. Nobandegani, and Paul Thagard

In Vivo Studies of Solo and Team Performance 29
Wayne Gray, Ray Perez, Jerad Moxley, David Mendonca, and Jamie Gorman

Cognitive Network Science: Quantitatively Investigating the Complexity of Cognition 31
Yoed Kenett, Nichol Castro, Elisabeth Karuza, and Michael Vitevitch

Symposium in Memory of Jeff Elman: Language Learning, Prediction, and Temporal Dynamics 33
Jay McClelland and Ken McRae

Understanding interactions amongst cognitive control, learning and representation 35
Sebastian Musslick, Abigail Novick Hoskin, Taylor Webb, Steven Frankland, Jonathan Cohen, Rebecca Jackson, Matthew Lambon Ralph, Lang Chen, Timothy Rogers, Randall O'Reilly, and Alexander Petrov

Beyond Number: Towards a unified view of dimensional reasoning in perception, cognition and language 37
Pooja Paul, Anna Papafragou, Jessica Cantlon, Stella Lourenco, and Lauren Aulet

Extending Rationality 39
Emmanuel Pothos, Jerome Busemeyer, Tim Pleskac, James Yearsley, Josh Tenenbaum, Noah Goodman, Michael Tessler, Tom Griffiths, Falk Lieder, Ralph Hertwig, Thorsten Pachur, Christina Leuker, and Richard Shiffrin

Insight and the Genesis of New Ideas 41
Frederic Vallee-Tourangeau, Linden Ball, Anna Abraham, Carola Salvi, Ut Na Sio, and Margaret Webb

Publication-based Talks

Logicist Computational Cognitive Modeling of Infinitary False Belief Tasks 43
Selmer Bringsjord, Naveen Sundar Govindarajulu, and Christina Elmore

Modeling Human Creative Cognition using AI Techniques 45
Steve DiPaola

A Cultural Evolution Framework for Human Creativity 47
Liane Gabora

From Design Cognition to Design Neurocognition 49
John Gero

Towards emotion based music generation: A tonal tension model based on the spiral array 52
Dorien Herremans and Elaine Chew

Cognitive Chrono-Ethnography (CCE): A Behavioral Study Methodology Underpinned by the Cognitive Architecture, MHP/RT 54
Muneo Kitajima

Warning: The Exemplars in Your Category Representation May Not Be the Ones Experienced During Learning 56
Kenneth Kurtz and Daniel Silliman

Concept Learning with Energy-Based Models 58
Igor Mordatch

On the nature of creative processes: performativity as a missing algorithm 60
Antonio Pennisi, Gessica Fruciano, and Giovanni Pennisi

Why sociality affects creativity: lessons from autism 63
Paola Pennisi and Laura Giallongo

Language and event recall in memory for time 66
Yaqi Wang and Silvia Gennari

Evolution and efficiency in color naming: The case of Nafaanra 68
Noga Zaslavsky, Karee Garvin, Charles Kemp, Naftali Tishby, and Terry Regier

Papers with Oral Presentations

Evaluating Theories of Collaborative Cognition Using the Hawkes Process and a Large Naturalistic Data Set 69
Mohsen Afrasiabi, Mark G. Orr, and Joseph Austerweil

Measuring Programming Competence by Assessing Chunk Structures in a Code Transcription Task . 76
Noorah Albehaijan and Peter Cheng

The Role of Information in Visual Word Recognition: A Perceptually-Constrained Connectionist Account 83
Raquel G. Alhama, Noam Siegelman, Ram Frost, and Blair Armstrong

Rapid Trial-and-Error Learning in Physical Problem Solving 90
Kelsey Allen, Kevin Smith, and Josh Tenenbaum

Self-Organized Division of Cognitive Labor 91
Edgar Andrade and Robert Goldstone

A friend, or a toy? Four-year-olds strategically demonstrate their competence to a puppet but only when others treat it as an agent 98
Mika Asaba, Xiaoqian Li, Wei Quin Yow, and Hyowon Gweon

Modifying social dimensions of human faces with ModifAE 105
Chad Atalla, Amanda Song, and Garrison Cottrell

Comparing Gated and Simple Recurrent Neural Network Architectures as Models of Human Sentence Processing 112
Christoph Aurnhammer and Stefan Frank

(In-)definites, (anti-)uniqueness, and uniqueness expectations 119
Nadine Bade and Florian Schwarz

Fanning Creative Thought: Semantic Richness Impacts Divergent Thinking 126
Roger Beaty, Yoed Kenett, and Richard Hass

Relative Evaluation of Location: How Spatial Frames of Reference Affect What We Value 132
Andrea Bender, Sarah Teige-Mocigemba, Annelie Rothe-Wulf, Miriam Seel, and Sieghard Beller

Building individual semantic networks and exploring their relationships with creativity 138
Matthieu Bernard, Yoed Kenett, Marcela Ovando Tellez, Mathias Benedek, and Emmanuelle Volle

The Importance of Morally Satisfying Endings: Cognitive Influences on Storytelling in Gillian Flynn's Gone Girl 145
Sarah Binau, Robin Melnick, and Jack I. Abecassis

Integrating Common Ground and Informativeness in Pragmatic Word Learning 152
Manuel Bohn, Michael Tessler, and Michael Frank

Conversation Transition Times: Working Memory & Conversational Alignment 159
Julie Boland

An Insight into Language: Investigating Lexical and Morphological Effects in Compound Remote Associate Problem Solving 166
Alexander Bower, Andrew Burton, Mark Steyvers, and William Batchelder

Efficiency and Flexibility of Individual Multitasking Strategies - Influence of Between-Task Resource Competition 174
Jovita Bruening, Marie Mückstein, and Dietrich Manzey

How Real is Moral Contagion in Online Social Networks? 175
Jason Burton, Nicole Cruz, and Ulrike Hahn

Politically Motivated Causal Evaluations of Economic Performance 182
Zachary Caddick and Benjamin Rottman

Speech Processing does not Involve Acoustic Maintenance 189
Spencer Caplan, Alon Hafri, and John Trueswell

The emergence of monotone quantifiers via iterated learning 190
Fausto Carcassi, Shane Steinert-Threlkeld, and Jakub Szymanik

"Natural concepts" revisited in the spatial-topological domain: Universal tendencies in focal spatial relations 197
Alexandra Carstensen, George Kachergis, Noah Hermalin, and Terry Regier

The shape of language experience in two traditional communities 204
Marisa Casillas

The Role of Basal Ganglia Reinforcement Learning in Lexical Priming and Automatic Semantic Ambiguity Resolution 205
Jose Ceballos, Andrea Stocco, and Chantel Prat

Environmental effects on parental gesture and infant word learning 212
Rachael W Cheung, Calum Hartley, and Padraic Monaghan

Task Goals Structure Conceptual Acquisition 219
Seth Chin-Parker and Eric Brown

The first crank of the cultural ratchet: Learning and transmitting concepts through language 226
Sahil Chopra, Michael Tessler, and Noah Goodman

Generating normative predictions with a variable-length rate code 233
S. Thomas Christie and Paul Schrater

The everyday statistics of objects and their names: How word learning gets its start 240
Elizabeth Clerkin and Linda Smith

Frequency Effects in Decision-Making are Predicted by Dirichlet Probability Distribution Models ... 247
Astin Cornwall, Darrell Worthy, and Hilary Don

Differences in learnability of pantomime versus artificial sign: Iconicity, cultural evolution, and linguistic structure 254
Tania Delgado and Seana Coulson

Contextualizing Conversational Strategies: Backchannel, Repair and Linguistic Alignment in Spontaneous and Task-Oriented Conversations 261
Christina Dideriksen, Riccardo Fusaroli, Kristian Tylen, Mark Dingemanse Dingemanse, and Morten Christiansen

The Goal Bias in Memory and Language: Explaining the Asymmetry 268
Monica Do, Anna Papafragou, and John Trueswell

A rational model of word skipping in reading: ideal integration of visual and linguistic information 275
Yunyan Duan and Klinton Bicknell

If it's important, then I am curious: A value intervention to induce curiosity 282
Rachit Dubey, Tom Griffiths, and Tania Lombrozo

A New Probabilistic Explanation of the Modus Ponens–Modus Tollens Asymmetry 289
Ben Eva, Stephan Hartmann, and Henrik Singmann

Children's overextension as communication by multimodal chaining 295
Renato Ferreira Pinto Junior and Yang Xu

Do Children Ascribe the Ability to Choose to Humanoid Robots? 302
Teresa Flanagan, Joshua Rottman, and Lauren Howard

Children, more than adults, rely on similarity to access multiple meanings of words 309
Sammy Floyd, Casey Lew-Williams, and Adele Goldberg

Metaphors we teach by: A method for mapping metaphorical lay theories 316
Stephen Flusberg and Bridgette Hard

Phoneme learning is influenced by the taxonomic similarity of the semantic referents 323
Abdellah Fourtassi and Emmanuel Dupoux

When Graph Comprehension Is An Insight Problem 330
Amy Fox, James Hollan, and Caren Walker

The interaction between structure and meaning in sentence comprehension: Recurrent neural networks and reading times 337
Stefan Frank and John Hoeks

Subjectivity-based adjective ordering maximizes communicative success 344
Michael Franke, Gregory Scontras, and Mihael Simonic

Simulating Explanatory Coexistence: Integrated, Synthetic, and Target-Dependent Reasoning 351
Scott Friedman and Micah Goldwater

Stereotypes of Transgender Categories: Attributes and Lay Theories 358
Natalie Gallagher and GALEN BODENHAUSEN

Incorrect Guesses Boost Retention of Novel Words in Adults but not in Children 359
Chiara Gambi, Martin J. Pickering, and Hugh Rabagliati

Sleep Does not Help Relearning Declarative Memories in Older Adults 360
Emilie Gerbier, Guillaume Vallet, Thomas Toppino Ph.D., and Stéphanie Mazza

At the Zebra Crossing: Modelling Complex Decision Processes with Variable-Drift Diffusion Models 366
Oscar Giles, Gustav Markkula, Jami Pekkanen, Naoki Yokota, Naoto Matsunaga, Natasha Merat, and Tatsuru Daimon

Evidence of error-driven cross-situational word learning 373
Chris Grimmick, Todd Gureckis, and George Kachergis

A comprehensive examination of preschoolers' probabilistic reasoning abilities 380
Samantha Gualtieri and Stephanie Denison

Looking Patterns during Analogical Reasoning: Generalizable or Task-Specific? 387
Katharine Guarino, Robert Morrison, Lindsey Richland, and Elizabeth Wakefield

The Social Network Dynamics of Category Formation 393
Douglas Guilbeault, Andrea Baronchelli, and Damon Centola

Evaluating Models of Human Behavior in an Adversarial Multi-Armed Bandit Problem 394
Marcus Gutierrez, Jakub Cerny, Noam Ben-Asher, Efrat Aharonov-Majar, Branislav Bosansky, Christopher Kiekintveld, and Cleotilde Gonzalez

Character-based Surprisal as a Model of Reading Difficulty in the Presence of Errors 401
Michael Hahn, Frank Keller, Yonatan Bisk, and Yonatan Belinkov

Idea Generation and Goal-Derived Categories 408
Richard Hass, Colin Long, and Joshua Pierce

Disentangling contributions of visual information and interaction history in the formation of graphical conventions 415
Robert Hawkins, Megumi Sano, Noah Goodman, and Judith Fan

Efficient use of ambiguity in an early writing system: Evidence from Sumerian cuneiform 422
Noah Hermalin and Terry Regier

Productivity depends on communicative intention and accessibility, not thresholds 428
Alexia Hernandez, Sammy Floyd, and Adele Goldberg

Linguistic syncopation: Alignment of musical meter to syntactic structure and its effect on sentence processing 435
Courtney Hilton and Micah Goldwater

Iconicity and Structure in the Emergence of Combinatoriality 442
Matthias Hofer and Roger Levy

Separating object resonance and room reverberation in impact sounds 449
Jennifer Hu, James Traer, and Josh McDermott

Dark Forces in Language Comprehension: The Case of Neuroticism and Disgust in a Pupillometry Study 450
Isabell Hubert and Juhani Järvikivi

Detecting social transmission in the design of artifacts via inverse planning 457
Ethan Hurwitz, Timothy F. Brady, and Adena Schachner

Individual Differences in Judging Similarity Between Semantic Relations 464
Nicholas Ichien, Hongjing Lu, and Keith Holyoak

The impact of anecdotal information on medical decision-making 471
Sara Jaramillo, Zachary Horne, and Micah Goldwater

Controlling Attention in a Memory-Augmented Neural Network To Solve Working Memory Tasks. . 478
T.S. Jayram, Younes Bouhadjar, Tomasz Kornuta, Ryan L. Macavoy, Alexis Asseman, and Ahmet Ozcan

Pedagogical Questions Empower Exploration 485
Anishka Jean, Emily Daubert, Yue Yu, Patrick Shafto, and Elizabeth Bonawitz

Targeted Mathematical Equivalence Training Lessens the Effects of Early Misconceptions on Equation Encoding and Solving 492
Kristen Johannes and Jodi Davenport

Moral Reputation and the Psychology of Giving: Praise Judgments Track Personal Sacrifice Rather Than Social Good 499
Samuel Johnson

Predictions from Uncertain Moral Character 506
Samuel Johnson, Gregory Murphy, Max Rodrigues, and Frank Keil

Individual Differences in Self-Recognition from Body Movements 513
Akila Kadambi and Hongjing Lu

Statistical Learning Supports Word Learning and Memory 520
Ferhat Karaman, Jill Lany, and Jessica Hay

How do infants start learning object names in a sea of clutter? 521
Hadar Karmazyn Raz, Drew Abney, David Crandall, Chen Yu, and Linda Smith

Do people use gestures differently to disambiguate the meanings of Japanese compounds? 527
Kei Kashiwadate, Tetsuya Yasuda, and Harumi Kobayashi

The Decision Science of Voting: Behavioral Evidence of Factors in Candidate Valuation 532
Janne Kauttonen and Jyrki Suomala

Season naming and the local environment 539
Charles Kemp, Alice Gaby, and Terry Regier

Tuning to Multiple Statistics: Second Language Processing of Multiword Sequences Across Registers 546
Elma Kerz, Daniel Wiechmann, and Morten Christiansen

Comparing Alternative Computational Models of the Stroop Task Using Effective Connectivity Analysis of fMRI Data 553
Micah Ketola, Linxing Jiang, and Andrea Stocco

Modeling individual performance in cross-situational word learning 560
Yung Han Khoe, Amy Perfors, and Andrew Hendrickson

A Unified Model of Fatigue in a Cognitive Architecture: Time-of-Day and Time-on-Task Effects on Task Performance 567
Ehsan Khosroshahi, Dario Salvucci, Glenn Gunzelmann, and Bella Veksler

Congenitally Blind Individuals' Theories and Inferences About Object Color 574
Judy Kim, Lindsay Yazzolino, Brianna Aheimer, Verónica Montané Manrara, and Marina Bedny

I know what you did last summer (and how often). Epistemic states and statistical normality in causal judgements 575
Lara Kirfel and David Lagnado

Modelling Emotion Based Reward Valuation with Computational Reinforcement Learning 582
Can Koluman, Christopher Child, and Tillman Weyde

The Effects of Embodiment and Social Eye-Gaze in Conversational Agents 589
Dimosthenis Kontogiorgos, Gabriel Skantze, Andre Pereira, and Joakim Gustafson

Illusory Body Perception and Experience in Furries 596
Alexander Kranjec, Louis Lamanna, Erick Guzman, Courtney Plante, Stephen Reysen, Kathy Gerbasi, Sharon Roberts, and Elizabeth Fein

Implicit Evaluations Reflect Causal Information 603
Benedek Kurdi, Adam Morris, and Fiery Cushman

Unexpectedness makes a sociolinguistic variant easier to learn: An alien-language-learning experiment 604
Wei Lai, Péter Rácz, and Gareth Roberts

Human few-shot learning of compositional instructions 611
Brenden Lake, Tal Linzen, and Marco Baroni

On Formal Verification of ACT-R Architectures and Models 618
Vincent Langenfeld, Bernd Westphal, and Andreas Podelski

Without Conceptual Information Children Miss the Boat: Examining the Role of Explanations and Anomalous Evidence in Scientific Belief Revision 625
Nicole Larsen, Vaunam Venkadasalam, and Patricia Ganea

Children Learn Words Better in Low Entropy 631
Ori Lavi-Rotbain and Inbal Arnon

Active Learning for a Number-Line Task with Two Design Variables 638
Sang Ho Lee, Dan Kim, John Opfer, Mark Pitt, and Jay Myung

Who is better? Preschoolers infer relative competence based on efficiency of process and quality of outcome. 639
Julia Leonard, Grace Bennett-Pierre, and Hyowon Gweon

Algebraic Patterns as Ensemble Representations 646
Anna Leshinskaya, Enoch Lambert, and Sharon Thompson-Schill

Parents Calibrate Speech to Their Children's Vocabulary Knowledge 651
Ashley Leung, Alexandra Tunkel, and Dan Yurovsky

A Conceptual Model of Self-Adaptive Systems based on Attribution Theory 657
Nianyu Li, Zhengyin Chen, Zi-Long Li, and Wenpin Jiao

Inquiry, Theory-Formation, and the Phenomenology of Explanation 664
Emily Liquin and Tania Lombrozo

Hard choices: Children's understanding of the cost of action selection 671
Shari Liu, Fiery Cushman, Samuel Gershman, Wouter Kool, and Elizabeth Spelke

People's perception of others' risk preferences 678
Shari Liu, John McCoy, and Tomer D. Ullman

Verb Frequency Explains the Unacceptability of Factive and Manner-of-speaking Islands in English 685
Yingtong Liu, Rachel Ryskin, Richard Futrell, and Edward Gibson

Unflinching Predictions: Anticipatory Crossmodal Interactions are Unaffected by the Current Hand Posture 692
Johannes Lohmann and Martin Butz

Developmental changes in the ability to draw distinctive features of object categories 699
Bria Long, Judith Fan, Zixian Chai, and Michael Frank

Unconscious Number Discrimination in the Human Visual System 706
Che Lucero, Geoffrey Brookshire, Roberto Bottini, Susan Goldin-Meadow, Edward Vogel, and Daniel Casasanto

Limits on the Use of Simulation in Physical Reasoning 707
Ethan Ludwin-Peery, Neil Bramley, Ernest Davis, and Todd Gureckis

Cognitive Aging Effects on Language Use in Real-Life Contexts: A Naturalistic Observation Study . 714
Minxia Luo, Gerold Schneider, Mike Martin, and Burcu Demiray

Role of Working Memory on Strategy Use in the Probability Learning Task 721
Mahi Luthra and Peter Todd

Sensorimotor Norms: Perception and Action Strength norms for 40,000 words 728
Dermot Lynott, Louise Connell, Marc Brysbaert, James Brand, and James Carney

Does predictive processing imply predictive coding in models of spoken word recognition? 735
James Magnuson, Monica Li, Sahil Luthra, Heejo You, and Rachael Steiner

Individual differences in reading experiences: The roles of mental imagery and fantasy 741
Marloes Mak and Roel M. Willems

Hands in mind: learning to write with both hands improves inhibitory control, but not attention ... 742
Mukesh Makwana, Biswajit Boity, Prasanth Chandran, Amogh Sirnoorkar, and Sanjay Chandrasekharan

Something about "us": Learning first person pronoun systems ... 749
Mora Maldonado and Jennifer Culbertson

The Acquisition of French Un ... 756
Elisabeth Marchand and David Barner

The complex system of mathematical creativity: Modularity, burstiness, and the network structure of how experts use inscriptions ... 763
Tyler Marghetis, Kate Samson, and David Landy

Navigating the "chain of command": Enhanced integrative encoding through active control of study 770
Doug Markant

Model-based Approach with ACT-R about Benefits of Memory-based Strategy on Anomalous Behaviors ... 776
Shota Matsubayashi, Kazuhisa Miwa, and Hitoshi Terai

Modeling Children's Early Linguistic Productivity Through the Automatic Discovery and Use of Lexically-based Frames ... 782
Stewart McCauley and Morten Christiansen

Multiword Units Predict Non-inversion Errors in Children's Wh-questions: "What Corpus Data Can Tell Us?" ... 789
Stewart McCauley, Colin Bannard Bannard, Anna Theakston, Michelle Davis, Thea Cameron-Faulkner, and Ben Ambridge

Applying Deep Language Understanding to Open Text: Lessons Learned ... 796
Marjorie McShane, Stephen Beale, and Irene Nirenburg

Generic noun phrases in child speech ... 803
Samarth Mehrotra and Amy Perfors

Online Phonetic Training Improves L2 Word Recognition ... 809
Gerda Ana Melnik and Sharon Peperkamp

Explanatory Considerations Guide Pursuit ... 815
Patricia Mirabile and Tania Lombrozo

What information shapes and shifts people's attitudes about capital punishment? ... 822
Olivia Miske, Nick Schweitzer, and Zachary Horne

How much to purchase? - A cognitive adaptive decision making account ... 829
Percy Mistry

Action prediction during real-time social interactions in infancy ... 836
Claire Monroy, Chi-hsin Chen, Derek Houston, and Chen Yu

Eye See What You're Saying: Beat Gesture Facilitates Online Resolution of Contrastive Referring Expressions in Spoken Discourse ... 843
Laura Morett, Scott Fraundorf, and James McPartland

A Mechanistic Account of Constraints on Control-Dependent Processing: Shared Representation, Conflict and Persistence 849
Sebastian Musslick and Jonathan Cohen

The effect of stimulus presentation time on bias: A diffusion-model based analysis 856
Jeremy Ngo and Chris Donkin

A Resource-Rational Mechanistic Approach to One-shot Non-cooperative Games: The Case of Prisoner's Dilemma 863
Ardavan S. Nobandegani, Kevin da Silva-Castanheira, Thomas Shultz, and A. Ross Otto

A Resource-Rational Process-Level Account of the St. Petersburg Paradox 870
Ardavan S. Nobandegani, Kevin da Silva-Castanheira, Thomas Shultz, and A. Ross Otto

Toward a Formal Science of Heuristics 877
Ardavan S. Nobandegani and Thomas Shultz

The Evolutionary Dynamics of Cooperation in Collective Search 883
Alan Novaes Tump, Charley Wu, Imen Bouhlel, and Robert Goldstone

Absolute Spatial Frames of Reference in Bilingual Speakers of Endangered Ryukyuan Languages: An Assessment via a Novel Gesture Elicitation Paradigm 890
Rafael Nunez, Kenan Celik, and Natsuko Nakagawa

Designing good deception: Recursive theory of mind in lying and lie detection 897
Lauren Oey, Adena Schachner, and Ed Vul

Imagining the good: An offline tendency to simulate good options even when no decision has to be made 904
Joan Danielle Ongchoco, Julian Jara-Ettinger, and Joshua Knobe

Risk is Preferred at Lower Causal Depth 911
Jeffrey Parker

The interactions of rational, pragmatic agents lead to efficient language structure and use 912
Benjamin Peloquin, Noah Goodman, and Michael Frank

Why do echo chambers form? The role of trust, population heterogeneity, and objective truth 918
Amy Perfors and Danielle Navarro

Benefits of Active Control of Study in Autistic Children 924
Nicholas Perri, Valentina Fantasia, Doug Markant, Costanza De Simone, Gianni Valeri, and Azzurra Ruggeri

Deception in evidential reasoning: Willful deceit or honest mistake? 931
Toby Pilditch, Alexander Fries, and David Lagnado

Zero-sum reasoning in information selection 938
Toby Pilditch, Alice Liefgreen, and David Lagnado

The effect of semantic relatedness on associative asymmetry in memory 944
Vencislav Popov, Qiong Zhang, Griffin Koch, Regina Calloway, and Marc Coutanche

Word frequency affects binding probability not memory precision 945
Vencislav Popov, Matt So, and Lynne Reder

Exploring the role that encoding and retrieval play in sampling effects 946
Keith Ransom and Amy Perfors

Modeling Human Syllogistic Reasoning: The Role of "No Valid Conclusion" 953
Nicolas Riesterer, Daniel Brand, Hannah Dames, and Marco Ragni

Event Participants and Verbal Semantics: Non-Discrete Structure in English, Spanish and Mandarin 960
Lilia Rissman, Kyle Rawlins, and Barbara Landau

Parametric control of distractor-oriented attention 967
Harrison Ritz and Amitai Shenhav

A Definition of Memory for the Cognitive Sciences 974
Brett Ross and Luis H. Favela

Asking goal-oriented questions and learning from answers 981
Anselm Rothe, Brenden Lake, and Todd Gureckis

Elvis Has Left the Building: Correlational but Not Causal Relationship between Music Skill and Cognitive Ability 987
Giovanni Sala and Fernand Gobet

Do cross-linguistic patterns of morpheme order reflect a cognitive bias? 994
Carmen Saldana, Yohei Oseki, and Jennifer Culbertson

Cumulative cultural evolution in a non-copying task in children and Guinea baboons 1001
Carmen Saldana, Joel Fagot, Simon Kirby, Kenny Smith, and Nicolas Claidiere

Bee-ing In the World: Phenomenology, Cognitive Science, and Interactivity in a Novel Insect-Tracking Task 1008
Guilherme Sanches de Oliveira, Chris Riehm, and Colin Annand

Sources of knowledge in children's acquisition of the successor function 1014
Rose Schneider, Kaiqi Guo, and David Barner

Examining the multimodal effects of parent speech in parent-infant interactions 1015
Sara Schroer, Linda Smith, and Chen Yu

Spatial Memory of Immediate Environments 1022
Holger Schultheis

An Integrated Trial-Level Performance Measure: Combining Accuracy and RT to Express Performance During Learning 1029
Florian Sense, Tiffany Jastrzembski, Michael Krusmark, Siera Martinez, and Hedderik van Rijn

Patterns of coordination in simultaneously and sequentially improvising jazz musicians 1035
Matthew Setzler and Robert Goldstone

Interaction between Idea-generation and Idea-externalization Processes in Artistic Creation: Study of an Expert Breakdancer 1041
Daichi Shimizu, Masaya Hirashima, and Takeshi Okada

Partitioning the Perception of Physical and Social Events Within a Unified Psychological Space ... 1048
Tianmin Shu, Yujia Peng, Hongjing Lu, and Song-Chun Zhu

Seeing the big picture: Do some cultures think more abstractly than others? 1055
Amritpal Singh, Qi Wang, and Daniel Casasanto

Measuring Creative Ability in Spoken Bilingual Text: The Role of Language Proficiency and Linguistic Features 1056
Stephen Skalicky, Scott Crossley, Danielle McNamara, and Kasia Muldner

What's Lagging in our Understanding of Interruptions?: Effects of Interruption Lags in Sequential Decision-Making 1063
Jennifer Sloane, Christopher Donkin, Ben Newell, and Garston Liang

Asymmetric Switch Costs as a Function of Task Strength 1070
Markus Spitzer, Sebastian Musslick, Michael Shvartsman, Amitai Shenhav, and Jonathan Cohen

Go with Plan A: Backup Plans Help the Powerful but Distract the Powerless 1077
Leila Straub and Petra C. Schmid

Ain't that a shame: An exploration into "academic" shame and STEM learning 1078
Jeremiah Sullins, Collin Phillips, Lucy Grace Camp, Kailey Thornton, and Ashlyn Wilson

Jessie and Gary or Gary and Jessie?: Cognitive Accessibility Predicts the Order in English and Japanese 1083
Karina Tachihara, Miah Pitcher, and Adele Goldberg

Neural dynamic concepts for intentional systems 1090
Jan Tekülve and Gregor Schöner

The Intentional Stance Toward Robots: Conceptual and Methodological Considerations 1097
Sam Thellman and Tom Ziemke

Articulatory features of phonemes pattern to iconic meanings: evidence from cross-linguistic ideophones 1104
Arthur Thompson, Nicolas Collignon, and Youngah Do

Inductive Biases Constrain Cumulative Cultural Evolution 1111
Bill Thompson and Tom Griffiths

Towards a neural-level cognitive architecture: modeling behavior in working memory tasks with neurons 1118
Zoran Tiganj, Nathanael Cruzado, and Marc Howard

Semantic influences on episodic memory distortions 1124
Alexa Tompary and Sharon Thompson-Schill

Rapid Presentation Rate Negatively Impacts the Contiguity Effect in Free Recall 1131
Claudio Toro-Serey, Ian Bright, Brad Wyble, and Marc Howard

The Disappearing "Advantages of Abstract Examples in Learning Math" 1136
Dragan Trninic, Manu Kapur, and Tanmay Sinha

Prosodic cues signal the intent of potential indirect requests 1142
Sean Trott, Stefanie Reed, Victor Ferreira, and Benjamin Bergen

To Catch a Snitch: Brain potentials reveal knowledge-based variability in the functional organization of (fictional) world knowledge during reading 1149
Melissa Troyer and Marta Kutas

Environmental Regularities Shape Semantic Organization throughout Development 1156
Layla Unger and Vladimir Sloutsky

Impatient to Receive or Impatient to Achieve: Goal Gradients and Time Discounting 1163
Oleg Urminsky and Indranil Goswami

Structural Thinking about Social Categories: Evidence from Formal Explanations, Generics, and Generalization 1164
Nadya Vasilyeva and Tania Lombrozo

Onomatopoeias, gestures, actions and words: How do caregivers use multimodal cues in their communication to children? 1171
Gabriella Vigliocco, Margherita Murgiano, Yasamin Motamedi, Elizabeth Wonnacott, Chloe Marshall, Iris Milán-Maillo, and Pamela Perniss

Modeling Ungrammaticality: A Self-Organizing Model of Islands 1178
Sandra Villata, Jon Sprouse, and Whitney Tabor

The End's in Plain Sight: Implicit Association of Visual and Conceptual Boundedness 1185
Jonathan Wehry, Alon Hafri, and John Trueswell

Individual differences in bodily attention: Variability in anticipatory mu rhythm power is associated with executive function abilities and processing speed 1192
Staci Meredith Weiss, Rebecca Laconi, and Peter J. Marshall

What Syntactic Structures block Dependencies in RNN Language Models? 1199
Ethan Wilcox, Roger Levy, and Richard Futrell

An ACT-R approach to investigating mechanisms of performance-related changes in an interrupted learning task 1206
Maria Wirzberger, Jelmer Borst, Josef F. Krems, and Günter Daniel Rey

Modality Effects in Vocabulary Acquisition 1212
Merel Wolf, Alastair Smith, Caroline Rowland, and Antje Meyer

Under pressure: The influence of time limits on human exploration 1219
Charley Wu, Eric Schulz, Kimberly Gerbaulet, Timothy Pleskac, and Maarten Speekenbrink

Preschoolers jointly consider others' expressions of surprise and common ground to decide when to explore 1226
Yang Wu and Hyowon Gweon

A predictability-distinctiveness trade-off in the historical emergence of word forms 1227
Aotao Xu, Christian Ramiro, and Yang Xu

Explaining intuitive difficulty judgments by modeling physical effort and risk 1233
Ilker Yildirim, Basil Saeed, Grace Bennett-Pierre, Tobias Gerstenberg, Josh Tenenbaum, and Hyowon Gweon

Tensions Between Science and Intuition in School-Age Children 1234
Andrew Young, Isabel Geddes, Claire Weider, and Andrew Shtulman

Perceived Area Plays a Dominant Role in Visual Quantity Estimation 1241
Sami Yousif, Emma Alexandrov, Elizabeth Bennette, and Frank Keil

Statistical learning generates implicit conjunctive predictions 1247
Ru Qi Yu and Jiaying Zhao

Semantic categories of artifacts and animals reflect efficient coding 1254
Noga Zaslavsky, Terry Regier, Naftali Tishby, and Charles Kemp

Sampling to learn words: Adults and children sample words that reduce referential ambiguity 1261
Martin Zettersten and Jenny Saffran

Availability-Based Production Predicts Speakers' Real-time Choices of Mandarin Classifiers 1268
Meilin Zhan and Roger Levy

Why do people reject mixed gambles? 1275
Wenjia Joyce Zhao, Lukasz Walasek, and Sudeep Bhatia

Towards a space of contextual effects on choice behavior: Insights from the drift diffusion model .. 1282
Wenjia Joyce Zhao, Aoife Coady, and Sudeep Bhatia

Does Video Content Facilitate or Impair Comprehension of Documentaries? The Effect of Cognitive Abilities and Eye Movement Strategy 1283
Yueyuan Zheng, Xinchen Ye, and Janet Hsiao

Conceptualization of Cultural Diversity for Efficient and Flexible Manufacturing Systems of the Future 1290
Kashif Zia, Alois Ferscha, and Dari Trendafilov

Papers with Poster Presentations

The price of knowledge: Children infer epistemic states and desires from exploration's cost 1296
Rosie Aboody, Caiqin Zhou, and Julian Jara-Ettinger

Ignorance = doing what is reasonable: Children expect ignorant agents to act based on prior knowledge 1297
Rosie Aboody, Caiqin Zhou, Madison Flowers, and Julian Jara-Ettinger

Mathematics Skills and Executive Functions Following Preterm Birth: A Longitudinal Study of 5- to 7-Year Old Children 1304
Julia Adrian, Frank Haist, and Natacha Akshoomoff

Decision-Making in a Social Multi-Armed Bandit Task: Behavior, Electrophysiology and Pupillometry 1311
Julia Adrian, Siddharth Siddharth, Zain Baquar, Tzyy-Ping Jung, and Gedeon Deak

Using Machine Learning to Guide Cognitive Modeling: A Case Study in Moral Reasoning 1318
Mayank Agrawal, Joshua Peterson, and Tom Griffiths

Quantifying the Conceptual Combination Effect on Word Meanings 1324
Nora Aguirre Celis and Risto Miikkulainen

Numerosity capture of attention 1331
Santiago Alonso Diaz and Jessica Cantlon

Intrinsic whole number bias in an indigenous population 1336
Santiago Alonso Diaz, Jessica Cantlon, and Steven Piantadosi

Distinguishing learned categorical perception from selective attention to a dimension: Preliminary evidence from a new method 1342
Janet Andrews, Josh de Leeuw, Rebecca Andrews, Cole Landolt, and Chrissy Griesmer

Distant Concept Connectivity in Network-Based and Spatial Word Representations 1348
Abhilasha Ashok Kumar, David Balota, and Mark Steyvers

Garnering Support for Number and Area as Integral Dimensions 1355
Lauren Aulet and Stella Lourenco

A computational model of feature formation, event prediction, and attention switching 1356
Eman Awad and Fintan Costello

Transferability of calibration training between knowledge domains 1362
Christopher Babadimas, Christopher Boras, Nicholas Rendoulis, Matthew Welsh, and Steve Begg

Efficient Data Compression Leads to Categorical Bias in Perception and Perceptual Memory 1369
Christopher Bates and Robert Jacobs

Representing lexical ambiguity in prototype models of lexical semantics 1376
Barend Beekhuizen, Chen Xuan Cui, and Suzanne Stevenson

Are all Remote Associates Test equal? An overview and comparison of the Remote Associates Test in different languages 1383
Jan Philipp Behrens and Ana-Maria Olteteanu

Investigating the Use of Word Embeddings to Estimate Cognitive Interest in Stories 1388
Morteza Behrooz, Justus Robertson, and Arnav Jhala

Multimodal Event Knowledge in Online Sentence Comprehension: the Influence of Visual Context on Anticipatory Eye Movements 1395
Valentina Benedettini, Alessandro Lenci, Ken McRae, and Pier Marco Bertinetto

Where Do Heuristics Come From? 1402
Marcel Binz and Dominik Endres

Predicting Learned Inattention from Attentional Selectivity and Optimization 1409
Nathaniel Blanco and Vladimir Sloutsky

Translation Tolerance in Vision 1416
Ryan Blything, Ivan Vankov, Casimir Ludwig, and Jeff Bowers

Is It Better to Be in Shape or on Top of It? The Impact of Control, Valence, and Expectedness on Non-Spatial Uses of in and on 1422
Brooke Breaux, Jessi LaSalle, Peyton Lute, Catherine Brousse, and Claudia Mijares

Children's exploration as a window into their causal learning 1429
Sophie Bridgers, Yvonne Wang, and Daphna Buchsbaum

Elicitation of Quantified Description Under Time Constraints 1436
Gordon Briggs, Christina Wasylyshyn, and Paul Bello

Mapping visual features onto numbers 1443
Erik Brockbank and Ed Vul

When do people use containment heuristics for physical predictions? 1450
Erik Brockbank, Ed Vul, and Kevin Smith

Simplicity and Probability in Human Judgment 1457
Tyler Brooke-Wilson, Jonathan S. Rosenfeld, Matthias Hofer, Junyi Chu, and Josh Tenenbaum

Memory maintenance of gradient speech representations is mediated by their expected utility 1458
Wednesday Bushong and T. Florian Jaeger

Executive Functions in Aging: An Experimental and Computational Study of the Wisconsin Card Sorting Task 1464
Andrea Caso and Richard Cooper

Taxonomic and Whole Object Constraints: A Deep Architecture 1465
Mattia Cerrato, Edoardo Arnaudo, Valentina Gliozzi, and Roberto Esposito

Simulating Bilingual Word Learning: Monolingual and Bilingual Adults' Use of Cross-Situational Statistics 1472
Kin Chung Jacky Chan and Padraic Monaghan

Modeling Delay Discounting using Gaussian Process with Active Learning 1479
Jorge Chang, Jiseob Kim, Byoung-Tak Zhang, Mark Pitt, and Jay Myung

Influence of linguistic tense marking on temporal discounting: From the perspective of asymmetric tense marking in Japanese 1486
Qixiang Chen, Hidehito Honda, and Kazuhiro Ueda

The Goal-Dependent Nature of Automatic Semantic Priming 1493
Lin Khern Chia and Jon Willits

The Explanatory Value of Mathematical Information in Everyday Explanations 1499
Seth Chin-Parker, Sam Cowling, and May Mei

Problem Difficulty in Arithmetic Cognition: Humans and Connectionist Models 1506
Sungjae Cho, Jaeseo Lim, Chris Hickey, and Byoung-Tak Zhang

Observing child-led exploration improves parents' causal inferences 1513
Koeun Choi, Milagros Grados, and Elizabeth Bonawitz

Query-guided visual search 1520
Junyi Chu, Jon Gauthier, Roger Levy, Josh Tenenbaum, and Laura Schulz

Female advantage in visual working memory capacity for familiar shapes but not for abstract symbols 1521
Adam Chuderski and Jan Jastrzebski

Using transcranial Direct Current Stimulation (tDCS) to modulate the face inversion effect on the N170 ERP component. 1527
Ciro Civile, Brad Wooster, Adam Curtis, R.P. McLaren, IPL McLaren, and Aureliu Lavric

Reinforcement Learning and Insight in the Artificial Pigeon 1533
Thomas Colin and Tony Belpaeme

Epistemic drive and memory manipulations in explore-exploit problems 1540
Nicolas Collignon and Chris Lucas

Kinematic Specification of Intention in Full-body Motion 1547
Sierra Corbin, Charles Moore, Gaurav Patil, Lillian Rigoli, Kevin Shockley, Tehran Davis, and Tamara Lorenz

Working Memory and Co-Speech Iconic Gestures 1553
Seana Coulson and Ying Choon Wu

Subtle differences in language experience moderate performance on language-based cognitive tests 1559
Maury Courtland, Aida Mostafazadeh Davani, Melissa Reyes, Leigh Yeh, Jun Yen Leung, Brendan Kennedy, Morteza Dehghani, and Jason Zevin

Efficiency of Learning in Experience-Limited Domains: Generalization Beyond the Wug Test 1566
Christopher Cox, Matthew Cooper Borkenhagen, and Mark Seidenberg

Iconic Prosody is Rooted in Sensori-Motor Properties: Fundamental Frequency and the Vertical Space 1572
Aleksandra Cwiek and Susanne Fuchs

Sample-Based Variant of Expected Utility Explains Effects of Time Pressure and Individual Differences in Processing Speed on Risk Preferences 1579
Kevin da Silva-Castanheira, Ardavan S. Nobandegani, and A. Ross Otto

Lifting the Curse of Knowing: How Feedback Improves Readers' Perspective-Taking 1586
Debby Damen, Marije van Amelsvoort, Per van der Wijst, and Emiel Krahmer

Abstract concepts and the suppression of arbitrary episodic context 1592
Charles Davis, Pedro M. Paz-Alonso, Gerry T. M. Altmann, and Eiling Yee

Rapid learning of word meanings from distributional and morpho-syntactic cues 1599
Margherita De Luca and Gary Lupyan

Eye Blink Rate Predicts and Dissociates Effective Execution of Early and Late Stage Creative Idea Generation 1606
Alwin de Rooij, Ruben D. Vromans, and Matthijs Dekker

What is a good question asker better at? From no generalization, to overgeneralization, to adults-like selectivity across childhood 1613
Costanza De Simone and Azzurra Ruggeri

Distinguishing Two Types of Prior Knowledge That Support Novice Learners 1620
Anita Delahay and Marsha Lovett

Parents' Linguistic Alignment Predicts Children's Language Development 1627
Joseph Denby and Dan Yurovsky

Nested Sets and Natural Frequencies 1633
Stephen Dewitt, Anne Hsu, David Lagnado, Saoirse Connor Desai, and Norman Fenton

Predicting Bias in the Evaluation of Unlabeled Political Arguments 1640
Nicholas Diana, John Stamper, and Ken Koedinger

Building blocks of computational thinking: Young children's developing capacities for problem decomposition 1647
Griffin Dietz, James Landay, and Hyowon Gweon

A Familiarity-dependent Retrieval Threshold in ACT-R 1654
Cvetomir Dimov

Decoding Affirmative and Negated Action-Related Sentences in the Brain with Distributional Semantic Models 1660
Vesna Djokic, Jean Maillard, Luana Bulat, and Ekaterina Shutova

How time spent on feedback influences learning and gaze in categorization training 1661
Katerina Dolguikh, Jordan Barnes, Tyrus Tracey, and Mark Blair

Reinforcing Rational Decision Making in a Risk Elicitation task through Visual Reasoning 1662
Stella Doukianou, Damon Daylamani-Zad, Petros Lameras, and Ian Dunwell

Adaptation Aftereffects as a Result of Bayesian Categorization 1669
Marina Dubova and Arsenii Moskvichev

Modeling socioeconomic effects on the development of brain and behavior 1676
Selma Dündar-Coecke and Michael Thomas

Working memory for object concepts relies on both linguistic and simulation information 1683
Agata Dymarska, Louise Connell, and Briony Banks

How can I help? Developmental change in the selectivity of two to four-year-olds' attempts to alleviate others' distress 1690
Regina Ebo and Laura Schulz

Decomposing Human Causal Learning: Bottom-up Associative Learning and Top-down Schema Reasoning 1696
Mark Edmonds, Siyuan Qi, Yixin Zhu, James Kubricht, Song-Chun Zhu, and Hongjing Lu

Moral Reasoning with Multiple Effects: Justification and Moral Responsibility for Side Effects 1703
Neele Engelmann and Michael R. Waldmann

Learning a smooth kernel regularizer for convolutional neural networks 1710
Reuben Feinman and Brenden Lake

Mapping Space: A Comparative Study 1717
Michele Feist and Yuan Zhang

An Experimental Protocol to Derive and Validate a Quantum Model of Decision-Making 1724
Lauren Fell, Shahram Dehdashti, Peter Bruza, and Catarina Moreira

Exploring the use of overhypotheses by children and capuchin monkeys 1731
Elisa Felsche, Patience Stevens, Christoph Voelter, Daphna Buchsbaum, and Amanda Seed

Individual differences in fluency with idea generation predict children's beliefs in their own free will 1738
Teresa Flanagan and Tamar Kushnir

Children master the cardinal significance of one-to-one correspondence after they learn to count .. 1745
Madison Flowers, Lindsay Stoner, and Julian Jara-Ettinger

Toddlers recognize multiple polysemous meanings and use them to infer additional meanings 1752
Sammy Floyd, Adele Goldberg, and Casey Lew-Williams

Do Neural Language Representations Learn Physical Commonsense? 1753
Maxwell Forbes, Ari Holtzman, and Yejin Choi

Continuous developmental change can explain discontinuities in word learning 1760
Abdellah Fourtassi, Sophie Regan, and Michael Frank

Extracting and Utilizing Abstract, Structured Representations for Analogy 1766
Steven Frankland, Taylor Webb, Alexander Petrov, Randall O'Reilly, and Jonathan Cohen

Learning Cross-linguistic Word Classes through Developmental Distributional Analysis 1773
Daniel Freudenthal, Julian M. Pine, and Fernand Gobet

The Stream of Spatial Information: Spanning the Space of Spatial Relational Models 1780
Paulina Friemann, Jelica Nejasmic, and Marco Ragni

Testing the limits of non-adjacent dependency learning: Statistical segmentation and generalization across domains 1787
Rebecca Frost, Erin Isbilen, Morten Christiansen, and Padraic Monaghan

Reframing Convergent and Divergent Thought for the 21st Century 1794
Liane Gabora

From Deep Learning to Deep Reflection: Toward an Appreciation of the Integrated Nature of Cognition and a Viable Theoretical Framework for Cultural Evolution 1801
Liane Gabora

Selectivity metrics provide misleading estimates of the selectivity of single units in neural networks 1808
Ella Gale, Ryan Blything, Nicholas Martin, Jeff Bowers, and Anh Nguyen

A rational model of syntactic bootstrapping 1815
Jon Gauthier, Roger Levy, and Josh Tenenbaum

Privileged computations for closed-class items in language acquisition 1822
Heidi Getz and Elissa Newport

Cross-cultural differences in playing centipede-like games with surprising opponents 1829
Sujata Ghosh, Rineke Verbrugge, Harmen de Weerd, and Aviad Heifetz

Understanding language about other people's actions. 1836
Tom Gijssels, Marianna Zhang, Che Lucero, Marc G. Berman, and Daniel Casasanto

Social Consequences of Information Search: Seeking evidence and explanation signals religious and scientific commitments 1837
Maureen Gill and Tania Lombrozo

Event cognition from the perspective of cognitive development 1844
Vladimir Glebkin, Ekaterina Olenina, and Nikita Safronov

Book Design, Attention, and Reading Performance: Current Practices and Opportunities for Optimization 1851
Karrie Godwin, Cassondra Eng, Grace Murray, and Anna Fisher

Effects of Induced Affective States on Decisions under Risk with Mixed Domain Problems 1858
Rui Gong and James E. Corter

Learning deep taxonomic priors for concept learning from few positive examples 1865
Erin Grant, Joshua Peterson, and Tom Griffiths

A Surprising Density of Illusionable Natural Speech 1871
Melody Y. Guan and Gregory Valiant

Stopping Rules In Information Acquisition At Varying Probabilities And Consequences: An Integrated Psychophysiological Measures Approach 1872
Roberto Guedes de Nonohay, Gustavo Gauer, Richard Gonzalez, and Guilherme Lannig

Resource-Rich versus Resource-Poor Assessment in Introductory Computer Science and its Implications on Models of Cognition: An in-Class Experimental Study 1873
Tobias Halbherr, Hermann Lehner, and Manu Kapur

Investigating sound and structure in concert: A pupillometry study of relative clause attachment . 1880
Jesse Harris, Alexandra Lawn, and Marju Kaps

What are you talking about?: A Cognitive Task Analysis of how specificity in communication facilitates shared perspective in a confusing collaboration task 1887
Yugo Hayashi and Ken Koedinger

An Ontology of Decision Models 1894
Lisheng He, Wenjia Joyce Zhao, and Sudeep Bhatia

Rapid Unsupervised Encoding of Object Files for Visual Reasoning 1895
Rachel Heaton and John Hummel

Norms and the meaning of omissive enabling conditions 1901
Paul Henne, Paul Bello, Sangeet Khemlani, and Felipe DeBrigard

Grammatical Generalisation in Statistical Learning: Is it implicit and invariant across development? 1908
Amanda Hickey, Emma Hayiou-Thomas, and Jelena Mirković

The Computational Structure of Unintentional Meaning 1915
Mark Ho, Joanna Korman, and Tom Griffiths

How can diverse memory improve group decision making? 1922
Hidehito Honda, Itsuki Fujisaki, Toshihiko Matsuka, and Kazuhiro Ueda

A Model-Based Investigating of the Biological Origin of Human Social Perception of Faces 1929
Jingya Huang, Jianling Liu, Dalin Guo, Chaitanya Ryali, Jinyan Guan, and Angela Yu

The Impact of Meta-memory Judgments on Undergraduate's Learning and Memory Performance. 1936
Salwa Humsani, Ciro Civile, and IPL McLaren

Does incorporating social media messages into television programs affect the validation of incorrect arguments? 1942
Miwa Inuzuka, Yuko Tanaka, and Mio Tsubakimoto

Wait for it! Stronger influence of context on categorical perception in Danish than Norwegian 1949
Byurakn Ishkhanyan, Anders Højen, Riccardo Fusaroli, Christer Johansson, Kristian Tylen, and Morten Christiansen

Measuring how people learn how to plan. 1956
Yash Raj Jain, Frederick Callaway, and Falk Lieder

Interacting physically with insight problems does not affect problem solving process 1963
Jan Jastrzebski, Hanna Kucwaj, and Adam Chuderski

When Is Science Considered Interesting and Important? 1970
Samuel Johnson, Amanda Royka, Peter McNally, and Frank Keil

IMPACT OF CHESS TRAINING ON CREATIVITY AND INTELLIGENCE 1977
Ebenezer Joseph, Veena Easvaradoss, David Chandran, and Suneera Abraham

Exploring informal science interventions to promote children's understanding of natural categories 1978
George Kachergis, Todd Gureckis, and Marjorie Rhodes

Does Children's Shape Knowledge Contribute to Age-Related Improvements in Selective Sustained Attention Measured in a TrackIt Task? 1984
Emily Keebler, Jaeah Kim, Erik Thiessen, and Anna Fisher

Curious Topics: A Curiosity-Based Model of First Language Word Learning 1991
Daan Keijser, Lieke Gelderloos, and Afra Alishahi

The consistency of durative relations 1998
Laura Kelly and Sangeet Khemlani

Thinking through the implications of neural reuse for the additive factors method 2005
Luke Kersten

Polysemy and Verb Mutability: Differing Processes of Semantic Adjustment for Verbs and Nouns . 2011
Daniel King and Dedre Gentner

Getting Insight by Talking to Others – Or Loosing Insight by Talking Too Much? 2018
Sachiko Kiyokawa and Zoltan Dienes

A Bayesian model of memory in a multi-context environment 2024

Language in Math Problem Solving 3605
Renee Whittaker, Chang Xu, Jo-Anne LeFevre, Helena P. Osana, Jill Turner, Heather Douglas, Anne Lafay, and Sheri-Lynn Skwarchuk

Using low-level sensory mechanism to bootstrap high order thinking in EFL reading 3606
HingYi Wong, Duo Liu, and Zi Yan

Semantic structure of infant first-person scenes changes with development 3607
Ziyu Xiang, Linda Smith, and David Crandall

Abstract Syntactic Knowledge or Limited-Scope Formulae: A Computational Study of Children's Early Utterances 3608
Qihui Xu, Martin Chodorow, Virginia Valian, and Xiaomeng Ma

The effects of object motion observations on physical prediction 3609
Moyuru Yamada, Kevin Smith, and Josh Tenenbaum

Commonality search shares processes with alternative categorization 3610
Mayu Yamakawa and Sachiko Kiyokawa

Minimal but meaningful: Probing the limits of randomly assigned social identities 3611
Xin Yang and Yarrow Dunham

Corpus-based topic modeling for the cognitive study of the 21st century sociocultural challenges . . 3612
Vera Zabotkina, Boris M. Velichkovsky, Artemy Kotov, Dmitry Orlov, Alexander Piperski, and ELENA POZDNYAKOVA

Communicative need and color naming 3613
Noga Zaslavsky, Charles Kemp, Naftali Tishby, and Terry Regier

Constructing a category prototype from statistical regularities under uncertainty 3614
Haiyun Zeng, John Trueswell, and Sharon Thompson-Schill

Interpretation of Generic Language is Dependent on Listener's Background Knowledge 3615
Xiuyuan Zhang and Dan Yurovsky

Deep Learning of Chinese Characters 3616
Xiaowei Zhao

Bayesian Inference Causes Incoherence in Human Probability Judgments 3617
Jianqiao Zhu, Adam Sanborn, and Nicholas Chater

A resource-rational model of physical abstraction for efficient mental simulation 3618
Tina Zhu, Jessica Hamrick, Kevin McKee, Raphael Koster, Jan Balaguer, Peter Battaglia, and Matthew Botvinick

Modeling of Complex Communicative Behavior for F-2 Companion Robot 3619
Anna Zinina, Nikita Arinkin, Liudmila Zaidelman, and Artemy Kotov

A Visual Remote Associates Test and its Initial Validation 3620
Faheem Zunjani and Ana-Maria Olteteanu
