

# **Combined Proceedings, International Plant Propagators' Society 2018**

Abstracts from papers presented at the conferences held annually in each of the IPPS regions around the world.

IPPS Volume 68

## **Editors:**

**Robert L. Geneve  
Clive Larkman  
Charles W. Heuser Jr.  
Spencer Gunn**

**Hadyen Foulds  
Elsa du Toit  
Fred T. Davies Jr.  
Gene K. Blythe**

ISBN: 978-1-5108-9398-6

**Printed from e-media with permission by:**

## Table of Contents

### Southern Africa Region

*Dermot Molloy* 1-3  
Where propagating can take you

*Gavin Schafer* 4-7  
The role of soil surveys in land use evaluation and planning

*Paul Fourie and Vaughan Hattingh* 8-9  
The role of nurseries in preserving citrus biosecurity in Southern Africa

### New Zealand Region

*Paul Fisher* 10-12  
Technology innovation for plant propagation in New Zealand

*Rosanna Freyre, Sofia Flores and Paul R. Fisher* 13-16  
Grow superfoods in containers: Ginger and turmeric

*Dharini Marinkovich and Keith Hammett* 17-20  
International Plant Propagators' Society New Zealand – Western Region Exchange 2017

*Craig McGill, Kate Nolan, Jessica Schnell, Marion MacKay, Cristina Winkworth, Georgina Aubia and Vivienne McGlynn* 21-29  
Seed banking (conservation) in New Zealand: Supporting in situ conservation

*Marie Taylor* 30-33  
Rescuing Hawke's Bay's wild kakabeak

### Japan Region

*Masahiko Fumuro* 34-44  
Comparison of growth, yield, and fruit quality between trees grafted onto rootstocks propagated by air layering and trees grafted onto seedling in mango 'Aikou' pot culture

|                                                                                                                                                                                                      |         |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| <i>Shota Miyahara, Takaaki Maeda, and Katsuya Ozaki</i><br>Dormancy period of pawpaw ( <i>Asimina triloba</i> (L.) Dunal) trees in Miyazaki Prefecture, Japan                                        | 45-47   |
| <i>Arisa Noguchi, Yuta Ito and Hiroko Nakatsuka</i><br>Effect of soil moisture on the yield and quality of rhizome in turmeric ( <i>Curcuma longa</i> )                                              | 48-52   |
| <i>Hiroaki Ohashi</i><br>Trying to layer cherry blossom tree ‘Somei-yoshino’                                                                                                                         | 53-56   |
| <i>Syo Takeda, Arisa Noguchi, Wakanori Amaki, Yoshiki Takahashi, Takashi Norimoto, Kiyohisa Kawakami and Akemi Mizutani</i><br>Effects of light quality on the growth of tissue cultured transplants | 57-61   |
| <b>Eastern Region – North America</b>                                                                                                                                                                |         |
| <i>Sinclair Adam</i><br>Biocontrol for propagation greenhouses                                                                                                                                       | 62-69   |
| <i>Darrel Apps</i><br>Coming up short: groundcover reblooming daylilies                                                                                                                              | 70-75   |
| <i>Eugene K. Blythe and James T. Ray</i><br>Alcohol-based rooting hormones: do they burn cuttings?                                                                                                   | 76-79   |
| <i>Barbara L. Bullock</i><br>The United States National Arboretum and its azaleas: The last ten years                                                                                                | 80-84   |
| <i>Neil Diboll</i><br>Propagation of herbaceous native perennials                                                                                                                                    | 85-95   |
| <i>Winston Dunwell, Dwight Wolfe, Edwin Ritchey, Virginia Travis, and Christine Bradley</i><br>Hog compost as a substrate amendment: Preliminary report                                              | 96-98   |
| <i>John Frett</i><br>Cold Hardiness: Successes and failures at the University of Delaware Botanic Garden                                                                                             | 99-107  |
| <i>John Friel</i><br>Nomenclature: The game of the name                                                                                                                                              | 108-115 |

|                                                                                                                                                                                                                                                                    |         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| <i>Robert Geneve and Sharon Kester</i><br>Seed germination in swamp privet ( <i>Forestiera acuminata</i> )                                                                                                                                                         | 116-117 |
| <i>Lindsey Hatch</i><br>Propagation down under - back to basics new zealand style, nothing too fancy - it's just the way we do it                                                                                                                                  | 118-125 |
| <i>C. Dale Hendricks</i><br>The big picture: plants, soil, climate + work that matters                                                                                                                                                                             | 126-130 |
| <i>Clive Larkman</i><br>Evolution of edibles in plant retailing                                                                                                                                                                                                    | 131-136 |
| <i>Trilby Libhart</i><br>Spotted lanternfly: our latest threat                                                                                                                                                                                                     | 137-139 |
| <i>Robert E. Lyons</i><br>The trial gardens at the University of Delaware Botanic Gardens                                                                                                                                                                          | 140-144 |
