Volume 11027

Proceedings of SPIE 0277-786X, V. 11027

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum Optics and Photon Counting 2019*, edited by Ivan Prochazka, Roman Sobolewski, Ralph B. James, Peter Domokos, Adam Gali, Proceedings of SPIE Vol. 11027 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1 QUANTUM STATES AND PHOTON COUNTING I

11027 04	Timing properties of superconducting nanowire single-photon detectors (Invited Paper) [11027-2]
----------	---

SESSION 2 QUANTUM STATES AND PHOTON COUNTING II

11027 07	Towards absolute all optical satellite range finding by photon counting (Invited Paper) [11027-6]
11027 08	Lunar laser ranging utilizing a highly efficient solid-state detector in the near-IR [11027-7]
11027 09	Photon counting detector package optimized for space debris optical tracking [11027-8]
11027 0B	Sub-nanosecond gating of InGaAs/InP SPAD (Invited Paper) [11027-10]

SESSION 3 QUANTUM STATES AND PHOTON COUNTING III

11027 0D	Multiuser optical information authentication using photon counting in spiral phase transform domain [11027-13]
11027 0F	Distance accuracy evaluation of airborne ghost image via sparsity constraints LiDAR system [11027-15]

SESSION 4 QUANTUM STATES AND PHOTON COUNTING IV

11027 0H	Efficient entanglement generation in exciton-polaritons using quantum control [11027-12]
----------	---

POSTER SESSION

- 11027 OK **A high-performance thermoelectric single-photon detector for telecom wavelengths**
[11027-21]
- 11027 OL **Radiation hardness of semiconductor single photon detection structure** [11027-22]
- 11027 OO **Quantum control of entanglement in coupled spins using shortcuts to adiabaticity and optimal control** [11027-25]
