

4th International Symposium on Design, Performance and Use of Self-Consolidating Concrete (SCC'2018-China)

RILEM Proceedings Pro 122

Changsha, China
10 - 13 May 2018

Editors:

**Caijun Shi
Zuhua Zhang**

ISBN: 978-1-5108-9531-7

Contents

PREFACE

XXII

I Keynote lectures

- 1. Mixture design of concrete based on rheology** 3
Caijun Shi, Dengwu Jiao and Qiang Yuan
- 2. Pumping behaviour of modern concrete – characterisation and prediction** 16
Egor Secrieru and Viktor Mechtcherine
- 3. Effect of incorporating nanosilica on properties of self compacting architectural mortars prepared with waste glass** 26
Jianxin Lu and Chi Sun Poon
- 4. Is 3D printing technique sign the end of SCC?** 27
Sofiane Amzianea
- 5. Smart casting of concrete structures by active rheology and stiffening control (ERC advanced grant project)** 29
Geert De Schutter
- 6. Workability design of fresh concrete based on numerical flow simulation** 31
Zhuguo Li
- 7. Analytical approach to predict SCC pressure Loss during pumping** 33
Kamal H. Khayat, Rami Khatib and Dimitri Feys
- 8. Pumping process of high strength self-consolidating concrete in the construction of skyscraper** 34
Peiyu Yan, Jianguo Han and Mengyuan Li
- 9. Structural behaviour of a 10-m pre-stressed slab made with basalt fibre reinforced polymer bars (BFRP) and fibre reinforced self-compacting concrete (FRSCC)** 35
Mohammed Sonebi, Bruno Dal Lago, Su Taylor, Peter Deegan, Liberato Ferrara, Philip Crosset and Andrea Pattarini

II Raw materials and mix proportion design for SCC

10. Effects of coarse aggregate content on the paste rheological thresholds of self-compacting concrete	39
Jingbin Zhang and Xuehui An	
11. Effect of condensed silica fume on the viscosity of cement-based materials	60
Yun Yang, Chuanhe Fan and Jueshi Qian	
12. Effect of metakaolin on the structural build-up of cement paste	69
Dajun Zhou, Qiang Yuan, Haomin Jiang, Jianwei Peng, Zhonghan Wang and Yang Liu	
13. The effect of gravel content on fluidity and mechanical properties of RPC	83
Ding Yahong, Xu Haibin, Long Baobin	
14. Effect of wrapping treatment of lightweight aggregate on the homogeneity of concrete	90
Xianwei Ma, Xin Yu, Jina Wang and Zhixin Li	
15. An investigation on structural build-up of cement paste containing superplasticizers and fly ash under different temperatures	100
Wenkai Shen, Caijun Shi, Kamal Khayat, Qiang Yuan, Rong Zeng , Youwu Wu and Lilin Lao	
16. Impermeability of self - compacting concrete with low cementitious materials content	113
Yanbin Tan, Lu Yang, Kang Li and Linxiang Li	
17. The correlation between surface activity and retardation effect on cement hydration of non-ionic cellulose ethers	122
Zhihua Ou, Yi Xiao, Hui Cao and Longmin Jiang	
18. Effect of fly ash microsphere on the rheological properties of alkali-activated fly ash/slag pastes	129
T. Yang, Z. Zhang, X. Gao, H. Zhu	
18. Relationship between rheology and fiber dispersion of FRC with different fibers	148
Mingli Cao, Yaqian Mao and Wen Si	
19 .Study on the mix proportion optimization of phosphorus slag self-compacting rock-fill concrete and its engineering application	161
Jiangwei Li, Weiguo Shen, Yongfu Zhang, Shiyong Xu , Xiaoli Ji and Mingju Bai	
20. Synthesis of a new polycarboxylate at room temperature and it's influence on the properties of cement pastes with different supplementary cementitious materials	174
Shuncheng Xiang and Caijun Shi	
21. Investigation on transport properties of internally cured self-compacting concrete with pre-wetted lightweight aggregate	192
Jiuwen Bao, Saili Yang and Licheng Wang	

- 22. Estimating rheological models using rheological parameters and coefficient of determination for hybrid fiber reinforced cementitious composites** **203**
 Mingli Cao, Wen Si and Yaqian Mao

III Workability of SCC

- 23. A new rotation speed-torque transformation equation for Herschel-Bulkley model in wide-gap coaxial cylinders rheometer and its applications for fresh concrete** **215**
 Yu Liu, Caijun Shi, Qiang Yuan, Xiaopeng An, Dengwu Jiao, Lingli Zhu and Huang Li
- 24. Influence of vibration induced instability at fresh state on performance degradation of hardened concrete** **230**
 Xiaojian Gao, Yue Su and Junyi Zhang
- 25. A 3D numerical modelling of self-compacting concrete flows based on a particle method** **239**
 Jingjun Li, Liuchao Qiu, Lei Tian and Yongsen Yang
- 26. A methodology to assess robustness of self-compacting concrete based on a paste rheological threshold theory** **246**
 Ding Nie and Xuehui An
- 27. Combined effects of water film thickness and polypropylene fibre factor on fresh properties of mortar** **264**
 L.G. Li, J. Zhu and A.K.H. Kwan
- 28. Influencing factors on the plastic viscosity of high-strength concrete** **271**
 Lu Yang, Yanbin Tan, Yongjiang Xie and Linxiang Li

IV Properties of hardened SCC

- 29. Early age free shrinkage of fiber reinforced expansive self-consolidating concrete** **284**
 Quanqing Gao, Qi Cao and Mingli Cao
- 30. Study on correlation of electrical properties and impermeability of fresh concrete** **295**
 Yanbin Tan, Yongjiang Xie, Kang Li, Lu Yang and Linxiang Li
- 31. Research on preparation and construction performance of steel-shell submerged tunnel used self-compacting concrete** **309**
 Junjie Zeng, Huang Lv, Shengnian Wang, Zhihong Fan and Jianbo Xiong

V Properties of UHPC

- | | |
|--|------------|
| 32. Pilot study of non-steel reinforced concrete beam using ultra-high performance strain-hardening cementitious composites (UHP-SHCC) | 321 |
| Ziwei Cai and Zhoudao Lu | |
| 33. Mechanical properties of printable ultra-high performance engineered cementitious composites (UHP-ECC) incorporating recycle micro-powder | 332 |
| Ziwei Cai and Zhoudao Lu | |
| 34. Microstructures and mechanical properties of ultra-high performance engineered cementitious composites (UHP-ECC) incorporating limestone powder | 343 |
| Ziwei Cai, Zhoudao Lu and Kequan Yu | |
| 35. The influence of mineral admixtures on ultra-high performance concrete | 354 |
| Xuexue Lugu and Caijun Shi | |
