CONTENTS

The future of FEA: A study on the use of Dirichlet function for FEA*

J. J. Payappilly, Oshima Shipbuilding Co. Ltd, Japan

Artificial intelligence in early ship design

U. R. Gadekari, SeaTech Solutions International Pte. Ltd., Singapore

A. Padmanabhan, SeaTech Solutions Europe GmbH, Germany

Harnessing publicly available information with data science to extract the operational profile of a vessel

R. Bakker, B.T.W. Mestemaker and J.T.M. Wijnands, Royal IHC, the Netherlands

Integrating virtual reality software into the early stages of ship design

C. Cassar, N. Bradbeer and G. Thomas, University College London, UK R. James Simpson, BMT, UK

Enabling the digital thread for shipbuilding and shipping

M. Grau, C. Gresens, S. Vettermann and L. Wagner, PROSTEP AG, Germany

Accurate and timely ship design proposal development using product lifecycle management

B.A. Ulstein, Ulstein Design & Solutions AS, Norway

D. Gillikin, Marine, PLM Consultant, USA

The use of functional analysis to ensure value for money in complex engineering projects

M. Courts, BAE Systems Maritime - Naval Ships, UK

Simulation of hull panel logistics improvement in a shipyard

A. K. Dev and Z. K. Fung, Newcastle University in Singapore, Singapore

A suggestion of digital platform for shipbuilding industries

J.H. Park, HM Lee, S.R. Yoon, H.S. Ahn, J.S. Park, J.G. Park, S.J. Cho and J.U. Choi, Samsung Heavy Industries, South Korea

Experimental analysis to control welding deformation in thin plate

A. M. Taha, Damen Shipyard Galati and University of Liege, Belgium

Development of work support system of press work for sheet metal forming

K. Matsuo and M. Takezawa, National Maritime Research Institute, Japan

Augmented reality for the visual inspection of pipes

J. Brisset and Y. Bouju, Naval Group, France S. Bourgeois, CEA List, France

COLREGS-compliant multi-ship collision avoidance via deep reinforcement learning

L. Zhao, H. Zhang, Norwegian University of Science and Technology (NTNU), Norway M. I. Roh, H. W. Lee, D. H. Chun, S. J. Lee and J. B. Lee, Seoul National University, South of Korea

Image-based object detection and tracking method for ship navigation

S. J. Lee, M I Roh, Y S Seok, W J Lee and J B Lee, Seoul National University, South of Korea
M. J. Oh, University of Ulsan, South of Korea
H. S. Kim, Daewoo Shipbuilding and Marine Engineering, South of Korea

Virtual reality: tool or toy for shipbuilding?

J. Martin, SAMOSC Ltd., UK

Virtual reality in shipbuilding: three use cases in a cruise ship design process

M. Schiavon, A. Cossutta and L. Ambrosio, Fincantieri S.p.A., Italy M. Keber, Fincantieri Oil & Gas S.p.A., Italy A. Zini, CETENA S.p.A., Italy M. Jez, Arsenal S.r.l., Italy

A digital twin is not a digital twin is not a digital twin: an attempt to clear the fog

J. Esteve, Bureau Veritas, France

Digital continuity

O. Chouche, Dassault Systèmes, France

The visual digital twin for shipbuilding

G. England, Virtalis, UK

Are we using the engineering data efficiently through the rest of the process?

M. Veldhuizen, Hexagon PPM/Nestix Oy, the Netherlands

Achieving the digital ship: from design to operation

J. A. Muñoz and A. Ramirez, SENER Ingeniería y Sistemas S.A, Spain

* Unavailable at time of going to press

International Conference on Computer Applications in Shipbuilding (ICCAS 2019)

Rotterdam, The Netherlands 24-26 September 2019

Volume 2 of 3

ISBN: 978-1-5108-9539-3

CONTENTS

- Introducing operational information into early stage ship design using queueing networks
 K. Droste, J J Hopman and A. A. Kana, Delft University of Technology, the Netherlands B. J. van Oers, Defence Materiel Organisation, the Netherlands
- ASNET A simulation framework to support the early stage design of naval ships
 F. Perra, CETENA, Italy
 M. Paolucci, University of Genoa, Italy
- 19 Lidar technology development applied to ship motion prediction (QPP) and air wake over-deck definitions using simulation and at sea analysis

Prof. B Ferrier, Hoffman Engineering, Dynamic Interface Laboratory, USA Prof. J Duncan and Mr. J. Duncan, Defence Equipment & Support, MOD, UK Prof. M. R. Belmont and Dr. J. T. Christmas, Exeter University, UK

29 Sticking paint replacement films on ship hull surface based on lines of curvature M. Takezawa and K. Matsuo, National Maritime Research Institute, Japan

35 **Study on hull line fairing based on CATIA** *Y. Liu, Y. Hu and C. Huang, Wuhan University of Technology, China*

41 Distributed ship service systems architecture in the early stages of physically large and complex products

M. H. Mukti, R. J. Pawling, C. Savage and D. J. Andrews, University College London, UK

- An interactive layout exploration and optimisation method for early stage ship design
 B. Igrec, R. Pawling and G. Thomas, University College London, UK
 A. Sobey, University of Southampton, UK
 J. Rigby, BMT, UK
- 77 Semi-automated approach for detailed layout generation during early stage surface warship design

J.J. le Poole, J.J. Hopman and A.A. Kana, Delft University of Technology, the Netherlands E.A.E. Duchateau and B.J. van Oers, Defence Materiel Organisation, the Netherlands

N/A Smartship – Increased performance of ship operations with new digital solutions* G. Stonestreet and A. Retamero, AVEVA, UK

- 89 **The optimization of ship coastal routing based on the ocean environment** W. Lee, G. Choi and T. Kim, Seoul National University, South Korea S. Ham, Changwon National University, South Korea
- N/A Game Engines the real heart of Digital Twins?* D. Thomson, AVEVA, UK
- Maritime applications of air-wake prediction using doppler LIDAR
 J. Christmas and M. R. Belmont, University of Exeter, UK
 J. M. Duncan and J. Duncan, Ministry of Defence Equipment and Support HQ, UK
 B. Ferrier, Hoffman Engineering, Dynamic Interface Laboratory, USA
- 99 The impact of emission tax scenarios on the economic viability of advanced ship designs C. Norden and S. Wurst, BALance Technology Consulting GmbH, Germany M.B. Goncalves Castro and B.T.W. Mestemaker, Royal IHC, the Netherlands
- N/A Trusted point-clouds for ship retrofit* G. Stonestreet, AVEVA, UK
- 107 Development of a data-driven paint management application
 E. Celik, A. Ruitenberg and S. Knegt, Damen Schelde Naval Shipbuilding, the Netherlands
- 115 **The future reality of the digital twin as a cross-enterprise marine asset** D. Morais and G. Goulanian, SSI, Canada N. Danese, NDAR, France
- 121 Research on multi-index evaluation of ship construction process based on data mining K. Li, M. T. Liu and Z. C. Zhao, Dalian University of Technology, China
- Simulation model for project duration estimation considering impacts of delay and rework
 K. Hiekata and R. Wang, The University of Tokyo, Japan
 T. Mitsuyuki, Yokohama National University, Japan
- An agent-based simulation model for the crowd on passenger ships
 Y. Li, Wuhan University of Technology, China and Delft University of Technology, the Netherlands
 A. A. Kana and B. Atasoy, Delft University of Technology, the Netherlands
 W. Cai, Wuhan University of Technology, China
- 143 **Vibrational analysis of cutter suction dredger** *C. R. Barik and K. Vijayan, Indian Institute of Technology, Kharagpur, India*

- 151 About importance of input devices in virtual reality, used in CAD environment G. Sikic, Lina et al, USCS, Croatia
- N/A Implementing Virtual Reality Tools for Ship Design and Build* K. Goh, Knud E Hansen Australia, Australia
- 159 Ship data driven propulsion models & energy saving technology assessments J. E. Buckingham, D. R. Pearson, and E. Storey, BMT Defence and Security UK Ltd.
- 165Assessment of machine learning algorithms for active heave compensationT. Holzki and G. Holbach, Technical University of Berlin, Germany

171 Planning tools for quiescent periods

M. Al-Ani, M.R. Belmont and J. Christmas, University of Exeter, UK J. M. Duncan and J. Duncan, Ministry of Defence Equipment and Support HQ, UK

177 The development of speeds (smart platform of enhanced engineering data for shipping and shipbuilding) and innovative use of ship 3D data across borders using CADs

K. Hamada, Hiroshima University, Japan T. Hiraki, Mitsubishi Shipbuilding Co., Ltd., Japan Y. Sasaki, Class N.K., Japan M. Ozaki, NTT Data Engineering Systems Corporation, Japan

185 Optimizing inventory strategy for modular shipbuilding

T. van der Beek, J. T. van Essen, J. Pruyn, K. Aardal and H. Hopman, Delft University of Technology, the Netherlands

- 193 Holistic ship design enabling holistic thinking across organisations with digital components T.-H. Wölke (Stachowski), M. Slagsvold and H. Kjeilen, Digitread AS, Norway
- Development of product model data exchange between different 3D CAD systems for hull designing T. Hiraki and K. Obata, Mitsubishi Shipbuilding Co., Ltd., Japan S. Shiroyama, DI Square Corp., Japan
- 205 Applications & advantages of employing digital ship design tools for newbuilding, retrofit and conversion projects

A. Borczyk and M. P. Singh, NED-Project sp. z o.o., Poland

* Unavailable at time of going to press

International Conference on Computer Applications in Shipbuilding (ICCAS 2019)

Rotterdam, The Netherlands 24-26 September 2019

Volume 3 of 3

ISBN: 978-1-5108-9539-3

CONTENTS

- 1 Agnostic G¹ hull form generation from curve network for 3D ship CAD W. Jang, W. Lee and T. W. Kim, Seoul National University, South Korea
- 7 Introduction to buckling assessment software for CSR requirement J.O. Kim and H.G. Park, Korean Register, South Korea
- 13 An efficient approach at holistic ship design's service for structural optimisation A. Bayatfar and P. Rigo, University of Liege, Belgium
- 21 Smart optimization of a self-propelled passenger ferry based on adaptive grid refinement and design space analysis

K. Vidal, B. Mallol and C. Hirsch, NUMECA International, Belgium

27 Model-based approval - the open class 3d exchange (OCX) standard

- O.C. Astrup and O. Aae, DNV GL, Norway T. Kuś, DNVGL, Poland O. Uyanik and B. Biterling, AVEVA, Sweden
- T. Bars, Chantiers de l'Atlantique, France
- M. Polini, Hexagon PPM, USA.
- G. Vijaya, Hexagon Capability Centre, India
- K. Yu, Siemens, China
- L. Juttu, NAPA, India

41 New relations between professional and work's organizations introduced by computer applications, special vessel case study

- V. Ruggiero, Engineering Department, University of Messina, Italy
- A. Giallanza and G. Marannano, Engineering Department, University of Palermo, Italy
- F. Morace, Liberty Lines S.p.a., Italy
- C. Strasser, Schiffbautechnische Versuchsanstalt, Austria
- 49 **New calculation method and software for enhanced efficiency of container stowage** V. Wolf, H. Eisen and M. O. Wobig, DNV GL, Germany

57 Process integration of structural design promoted by 3D model based approval

Y. Shimakawa and Y. Miura, Japan Marine United Corporation, Japan

T. Masui, Napa Japan, Japan

T. Hayashi and M. Sakagami, ClassNK, Japan

69 Platform-based modular product family design

R. Audoire, Dassault Systèmes, France

Machine learning applications in the smart monitoring system for shipbuilding
 R. Takenaka, M. Irie, K. Oizumi and K. Aoyama, School of Engineering, The University of Tokyo, Japan

N/A Collaboration in Virtual Reality: Designing Better Ships* R. Spencer, Stirling Labs, Australia

91 Research on the two-dimensional PSO based method for sub-assembly identification in ship block building

B. Liu, R. Li and S. Li, Dalian University of Technology, China

97 A simulation for block lifting using flexible multibody dynamics

- T. Arai, Altair Engineering, Inc., Japan
- Y. Uno, Shin Kurushima Dockyard Co., Ltd., Japan
- K. Kuroda, Sanoyas Shipbuilding Corporation, Japan
- T. Nakamori, Namura Shipbuilding Co., Ltd., Japan
- T. Mori, Kitanihon Shipbuilding Co., Ltd., Japan

105 Multiboat. evolution of ship series and implications in design applications

P. Martín and R. Pérez Fernández, SENER, Madrid, Spain

113 Empowering the workforce of the future with a culture of knowledge and know-how enabled by digital experience platforms

A. Tew-Kai, Dassault Systèmes, France

117 Global digital hull

R. Lanet and Thierry Le Gal, NAVAL Group, France

125 A position estimation system making use of signal strength of wireless LAN in a shipyard

H. Kimura, Kyushu University, Japan N. Iwauchi, Tsuneishi Shipbuilding Co. Ltd., Japan

- Y. Yoshida, Kawasaki Heavy Industries Ltd., Japan
- 131 Glimpse to the future. technological trends in the shipbuilding CAD world R. Pérez Fernández and E. Péter Cosma, SENER, Spain

155 Enabling best tool in class for shipbuilding

M. Grau, C. Gresens and C. Zerbst, PROSTEP AG, Germany

- 163 A development of web application for viewing speeds format using X3D*K. Murata and H. Kimura, Kyushu University, Japan*
- 169 **Escape & evacuation (E&E) during ship construction an alternative use of E&E software** *N. Brophy, A. Headrick, D Linton, and M. A. Way, Babcock International Group, UK*
- Application of computing technology in ship recycling
 Y. R. Kamath and Dr. K. Sivaprasad, Cochin University of Science and Technology, India
 Dr. S. Jayaram, Consultant Naval Architect, Cochin, India
- 183 **Practical use cases of artificial intelligence in the shipdesign stage** Dr. R. de Góngora, SENER, Spain

* Unavailable at time of going to press
