2019 18th IEEE International Conference On Trust, Security And Privacy In Computing And Communications/13th IEEE International Conference On Big Data Science And Engineering (TrustCom/BigDataSE) **TrustCom/BigDataSE 2019**

Table of Contents

Message from IEEE TrustCom 2019 General Chairs	xix
<i>Ryan Ko (The University of Queensland), Liqun Chen (The University of Surrey), and Liming Zhu (Data61, CSIRO)</i>	
Message from the IEEE TrustCom 2019 Program Chairs	xx
<i>Surya Nepal (Data61, CSIRO), Willy Susilo (The University of Wollongong), Yang Xiang (Swinburne University of Technology), and Chandramouli Ramaswamy (NIST)</i>	
TrustCom 2019 Committees	xxi
Message from IEEE BigData 2019 Program Chairs	xxviii
<i>Ju Ren (Central South University), Shadi Ibrahim (INRIA), and Xiaokang Zhou (Shiga University)</i>	
Message from IEEE BigData 2019 General Chairs	xxix
<i>Xuemin (Sherman) Shen (University of Waterloo), Yaoxue Zhang (Central South University), and Beniamino Di Martino (University of Campania Luigi Vanvitelli)</i>	
BigDataSE 2019 Committees	xxx

TrustCom 2019: The 18th IEEE International Conference on Trust, Security, and Privacy in Computing and Communications

TrustCom Trust Track

Building Trust in Container Environment	1
<i>Yunlong Guo (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences), Aimin Yu (Institute of Information Engineering, Chinese Academy of Sciences), Xiaoli Gong (School of Cyber Security, Nankai University), Lixin Zhao (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences), Lijun Cai (Institute of Information Engineering, Chinese Academy of Sciences), and Dan Meng (Institute of Information Engineering, Chinese Academy of Sciences)</i>	
Trustworthy Privacy-Preserving Service Compositions	10
<i>Kevin Theuermann (E-Government Innovation Center)</i>	
A Unified Measurable Software Trustworthy Model Based on Vulnerability Loss Speed Index	18
<i>Gul Jabeen (Tsinghua University; Karakoram International University, Pakistan) and Luo Ping (Tsinghua University)</i>	
MicroTEE: Designing TEE OS Based on the Microkernel Architecture	26
<i>Dongxu Ji (Capital Normal University), Qianying Zhang (Capital Normal University), Shijun Zhao (Institute of Software Chinese Academy of Sciences), Zhiping Shi (Capital Normal University), and Yong Guan (Capital Normal University)</i>	
Trust and Reputation in Vehicular Networks: A Smart Contract-Based Approach	34
<i>Nisha Malik (University of Technology Sydney), Priyadarsi Nanda (University of Technology Sydney), Xiangjian He (University of Technology Sydney), and RenPing Liu (University of Technology Sydney)</i>	
Optimal File Dissemination Scheduling Under a General Binary Tree of Trust Relationship	42
<i>Yun-Ping Tien (National Tsing Hua University), Wei-Chen Lin (National Tsing Hua University), Jan-Ming Ho (Academia Sinica), and Wing-Kai Hon (National Tsing Hua University)</i>	
Horcruxes for Everyone - A Framework for Key-Loss Recovery by Splitting Trust	50
<i>Felix Hörandner (Graz University of Technology) and Christof Rabensteiner (Graz University of Technology)</i>	
HyperMI: A Privilege-level VM Protection Approach against Compromised Hypervisor	58
<i>Kunli Lin (University of Chinese Academy of Sciences), Wenqing Liu (University of Chinese Academy of Sciences), Kun Zhang (University of Chinese Academy of Sciences), and Bibo Tu (University of Chinese Academy of Sciences)</i>	

TrustCom Security Track

The Deviation Attack: A Novel Denial-of-Service Attack Against IKEv2	66
<i>Tristan Ninet (Inria & Thales SIX GTS France), Axel Legay (U.C. Louvain), Romaric Maillard (Thales SIX GTS France), Louis-Marie Traonouez (Inria), and Olivier Zendra (Inria)</i>	

A Survey of Research on CAPTCHA Designing and Breaking Techniques	75
<i>Yang Zhang (Xidian University), Haichang Gao (Xidian University), Ge Pei (Xidian University), Sainan Luo (Xidian University), Guoqin Chang (Xidian University), and Nuo Cheng (Xidian University)</i>	
AVOCAD: Adaptive Terrorist Comms Surveillance and Interception using Machine Learning	85
<i>Omaru Maruatona (La Trobe University), Ahmad Azab (La Trobe University), and Paul Watters (La Trobe University)</i>	
Malware Detection with Malware Images using Deep Learning Techniques	95
<i>Ke He (University of Canterbury) and Dong-Seong Kim (University of Queensland)</i>	
IoT Device Identification via Network-Flow Based Fingerprinting and Learning	103
<i>Salma Abdalla Hamad (Macquarie University, Sydney), Wei Emma Zhang (Macquarie University, Sydney), Quan Z. Sheng (Macquarie University, Sydney), and Surya Nepal (Data61, CSIRO, Sydney)</i>	
Phishing URL Detection via CNN and Attention-Based Hierarchical RNN	112
<i>Yongjie Huang (Sun Yat-sen University), Qiping Yang (Sun Yat-sen University), Jinghui Qin (Sun Yat-sen University), and Wushao Wen (Sun Yat-sen University)</i>	
STDeepGraph: Spatial-Temporal Deep Learning on Communication Graphs for Long-Term Network Attack Detection	120
<i>Yepeng Yao (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China), Liya Su (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China), Zhigang Lu (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China), and Baoxu Liu (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China)</i>	
Continuous Authentication of Embedded Software	128
<i>Karl Ott (Texas A&M) and Rabi Mahapatra (Texas A&M)</i>	
CCGA: Clustering and Capturing Group Activities for DGA-Based Botnets Detection	136
<i>Zhicheng Liu (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences), Xiaochun Yun (National Computer Network Emergency Response Technical Team/Coordination Center of China; Institute of Information Engineering, Chinese Academy of Sciences), Yongzheng Zhang (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences), and Yipeng Wang (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences)</i>	
Real-Time Detection of Malware Activities by Analyzing Darknet Traffic Using Graphical Lasso	144
<i>Chansu Han (National Institute of Information and Communications Technology), Jumpei Shimamura (clwit Inc.), Takeshi Takahashi (National Institute of Information and Communications Technology), Daisuke Inoue (National Institute of Information and Communications Technology), Masanori Kawakita (Kyushu University), Jun'ichi Takeuchi (Kyushu University), and Koji Nakao (National Institute of Information and Communications Technology)</i>	

A Worst-Case Entropy Estimation of Oscillator-Based Entropy Sources: When the Adversaries Have Access to the History Outputs	152
<i>Shaofeng Zhu (Trusted Computing and Information Assurance Laboratory, Institute of Software, Chinese Academy of Sciences, Beijing China; University of Chinese Academy of Sciences), Hua Chen (Trusted Computing and Information Assurance Laboratory, Institute of Software, Chinese Academy of Sciences, Beijing, China), Wei Xi (Electric Power Research Institute, China Southern Power Grid, Guangzhou, China), Meihui Chen (Trusted Computing and Information Assurance Laboratory, Institute of Software, Chinese Academy of Sciences, Beijing, China; University of Chinese Academy of Sciences), Limin Fan (Trusted Computing and Information Assurance Laboratory, Institute of Software, Chinese Academy of Sciences, Beijing, China), and Dengguo Feng (Trusted Computing and Information Assurance Laboratory, Institute of Software, Chinese Academy of Sciences, Beijing, China)</i>	
Power-Grid Controller Anomaly Detection with Enhanced Temporal Deep Learning	160
<i>Zecheng He (Princeton University), Aswin Raghavan (SRI International), Guangyuan Hu (Princeton University), Sek Chai (SRI International), and Ruby Lee (Princeton University)</i>	
When are Opaque Predicates Useful?	168
<i>Lukas Zobernig (The University of Auckland), Steven D. Galbraith (The University of Auckland), and Giovanni Russello (The University of Auckland)</i>	
An Ant Colony Algorithm Based Content Poisoning Mitigation in Named Data Networking	176
<i>Wenjing Cui (Institute of Information Engineering, Chinese Academy of Sciences & School of Cyber Security, University of Chinese Academy of Sciences), Yang Li (Institute of Information Engineering, Chinese Academy of Sciences & School of Cyber Security, University of Chinese Academy of Sciences), Yan Zhang (Institute of Information Engineering, Chinese Academy of Sciences & School of Cyber Security, University of Chinese Academy of Sciences), Chang Liu (Institute of Information Engineering, Chinese Academy of Sciences & School of Cyber Security, University of Chinese Academy of Sciences), and Mengqi Zhan (Institute of Information Engineering, Chinese Academy of Sciences & School of Cyber Security, University of Chinese Academy of Sciences)</i>	
A Heuristic Method for Network Modification Against Cyber Epidemic Attacks	184
<i>Dingyu Yan (Institute of Information Engineering, Chinese Academy of Sciences) and Feng Liu (Institute of Information Engineering, Chinese Academy of Sciences)</i>	
Tracking Sensitive Information and Operations in Integrated Clinical Environment	192
<i>Zhangtan Li (TCA Lab, Institute of Software, Chinese Academy of Sciences/University of Chinese Academy of Sciences), Liang Cheng (TCA Lab, Institute of Software, Chinese Academy of Sciences), and Yang Zhang (TCA Lab, Institute of Software, Chinese Academy of Sciences)</i>	
Distributed Quantitative Information Flow Evaluation for Service Composition in Clouds	200
<i>Ning Xi (Xidian University), Cong Sun (Xidian University), Jianfeng Ma (Xidian University), and Jing Lv (Xidian University)</i>	
A Topic-Based Unsupervised Learning Approach for Online Underground Market Exploration	208
<i>Shin-Ying Huang (Institute for Information Industry) and Tao Ban (National Institute of Information and Communications Technology)</i>	

The Weakest Link of Certificate Transparency: Exploring the TLS/HTTPS Configurations of Third-Party Monitors	N/A
<i>Bingyu Li (Chinese Academy of Sciences), Dawei Chu (Chinese Academy of Sciences), Jingqiang Lin (Chinese Academy of Sciences), Quanwei Cai (Chinese Academy of Sciences), Congli Wang (Chinese Academy of Sciences), and Lingjia Meng (Chinese Academy of Sciences)</i>	
Hybrid Logical Clocks for Database Forensics: Filling the Gap between Chain of Custody and Database Auditing	224
<i>Denys A. Flores (Escuela Politécnica Nacional) and Arshad Jhumka (University of Warwick)</i>	
MURITE-Detector: Identifying User-Role in Information Theft Events of Mobile Network	232
<i>Zhenyu Cheng (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, Beijing, China), Xunxun Chen (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, Beijing, China), Yongzheng Zhang (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, Beijing, China), Shuhao Li (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, Beijing, China), and Jian Xu (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, Beijing, China)</i>	
AIMED: Evolving Malware with Genetic Programming to Evade Detection	240
<i>Raphael Labaca Castro (Research Institute CODE - Universität der Bundeswehr München), Corinna Schmitt (Research Institute CODE - Universität der Bundeswehr München), and Gabi Dreo (Research Institute CODE - Universität der Bundeswehr München)</i>	
FloT: Detecting the Memory Corruption in Lightweight IoT Device Firmware	248
<i>Lipeng Zhu (Xidan University, China; University of Chinese Academy of Sciences), Xiaotong Fu (Xidan University, China), Yao Yao (Xidan University, China; University of Chinese Academy of Sciences), Yuqing Zhang (University of Chinese Academy of Sciences; Xidan University, China), and He Wang (Xidan University, China)</i>	
A Signature-Based Assistant Random Oversampling Method for Malware Detection	256
<i>Ying Pang (University of Jinan), Zhenxiang Chen (University of Jinan), Lizhi Peng (University of Jinan), Kun Ma (University of Jinan), Chuan Zhao (University of Jinan), and Ke Ji (University of Jinan)</i>	
A Security Framework for IoT Authentication and Authorization Based on Blockchain Technology	264
<i>M. A. Rashid (Massey University) and Houshyar Honar Pajoo (Massey University)</i>	
Selective Adversarial Learning for Mobile Malware	272
<i>Mahbub Khoda (Federation University Australia), Tasadduq Imam (CQUniversity Australia), Joarder Kamruzzaman (Federation University Australia), Iqbal Gondal (Federation University Australia), and Ashfaqur Rahman (Data61, CSIRO)</i>	
Credit Card Fraud Detection in E-Commerce	280
<i>Utkarsh Porwal (eBay Inc) and Smruthi Mukund (eBay Inc)</i>	

Security and Performance Assessment of IP Multiplexing Moving Target Defence in Software Defined Networks	288
<i>Cole Dishington (University of Canterbury), Dilli P. Sharma (University of Canterbury), Dong Seong Kim (University of Queensland), Jin-Hee Jin-Hee (Virginia Tech), Terrence J. Moore (Army Research Laboratory), and Frederica F. Nelson (Army Research Laboratory)</i>	
Deep Android Malware Classification with API-Based Feature Graph	296
<i>Na Huang (Hangzhou Dianzi University), Ming Xu (Hangzhou Dianzi University), Ning Zheng (Hangzhou Dianzi University), Tong Qiao (Hangzhou Dianzi University), and Kim-Kwang Raymond Choo (The University of Texas at San Antonio)</i>	
Context-Aware Authentication Using Co-Located Devices	304
<i>Hidehito Gomi (Yahoo Japan Corporation), Shuji Yamaguchi (Yahoo Japan Corporation), Wataru Ogami (Yahoo Japan Corporation), Teruhiko Teraoka (Yahoo Japan Corporation), and Tatsuru Higurashi (Yahoo Japan Corporation)</i>	
Understanding the Influence of Graph Kernels on Deep Learning Architecture: A Case Study of Flow-Based Network Attack Detection	312
<i>Liya Su (School of Cyber Security, University of Chinese Academy of Sciences), Yepeng Yao (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China), Zhigang Lu (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China), and Baoxu Liu (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China)</i>	
Thermal Covert Channels Leveraging Package-on-Package DRAM	319
<i>Shuai Chen (Southeast University), Wenjie Xiong (Yale University), Yehan Xu (Southeast University), Bing Li (Southeast University), and Jakub Szefer (Yale University)</i>	
Continuous Authorization in Subject-Driven Data Sharing Using Wearable Devices	327
<i>Mohammad Javed Morshed Chowdhury (La Trobe University), Alan Colman (Swinburne University of Technology), Muhammad Ashad Kabir (Charles Sturt University), Jun Han (Swinburne University of Technology), and Paul Sarda (Swinburne University of Technology)</i>	
A Secure User-Centric Framework for Dynamic Service Provisioning in IoT Environments	334
<i>Amartya Sen (Oakland University), Kenneth Fletcher (University of Massachusetts Boston, USA), and Sanjay Madria (Missouri University of Science and Technology)</i>	
Laughter in the Wild: A Study Into DoS Vulnerabilities in YAML Libraries	342
<i>Shawn Rasheed (Massey University), Jens Dietrich (Victoria University of Wellington), and Amjed Tahir (Massey University)</i>	

TrustCom Privacy Track

HSDC-Net: Secure Anonymous Messaging in Online Social Networks	350
<i>Mohammad Reza Nosouhi (University of Technology, Sydney), Shui Yu (University of Technology), Keshav Sood (Deakin University), and Marthie Grobler (CSIRO's Data61, Melbourne, Australia)</i>	
Automatic Anonymization of Textual Documents: Detecting Sensitive Information via Word Embeddings	358
<i>Fadi Hassan (Universitat Rovira i Virgili), David Sánchez (Universitat Rovira i Virgili), Jordi Soria-Comas (Universitat Rovira i Virgili), and Josep Domingo-Ferrer (Universitat Rovira i Virgili)</i>	

A Generic Information and Consent Framework for the IoT	366
<i>Victor Morel (Univ Lyon, Inria, INSA Lyon, CITI), Mathieu Cunche (Univ Lyon, INSA Lyon, Inria, CITI), and Daniel Le Métayer (Univ Lyon, Inria, INSA Lyon, CITI)</i>	
Poisoning Attack in Federated Learning using Generative Adversarial Nets	374
<i>Jiale Zhang (Nanjing University of Aeronautics and Astronautics), Junjun Chen (Beijing University of Chemical Technology), Di Wu (University of Technology Sydney), Bing Chen (Nanjing University of Aeronautics and Astronautics), and Shui Yu (University of Technology Sydney)</i>	
Trustworthy Distributed Computations on Personal Data Using Trusted Execution Environments.	381
<i>Riad Ladjel (Inria, UVSQ), Nicolas Anciaux (Inria, UVSQ), Philippe Pucheral (Inria, UVSQ), and Guillaume Scerri (Inria, UVSQ)</i>	
Privacy-Preserving Outsourcing Computation of QR Decomposition in the Encrypted Domain	389
<i>Yonghong Zhang (Sun Yat-Sen University), Peijia Zheng (Sun Yat-Sen University), and Weiqi Luo (Sun Yat-Sen University)</i>	
A Robust Watermarking Scheme for Encrypted JPEG Bitstreams with Format-Compliant Encryption	397
<i>Wenhao Chen (Sun Yat-Sen University), Bohang Zeng (Sun Yat-Sen University), and Peijia Zheng (Sun Yat-Sen University)</i>	

TrustCom Forensics and Analytics Track

Evolved Similarity Techniques in Malware Analysis	404
<i>Paul Black (Federation University), Iqbal Gondal (Federation University), Peter Vamplew (Federation University), and Arun Lakhotia (University of Louisiana at Lafayette)</i>	
A Robust and Reversible Watermarking Technique for Relational Dataset Based on Clustering ..	411
<i>Heyan Chai (Harbin Institute of Technology, ShenZhen), Shuqiang Yang (Harbin Institute of Technology, ShenZhen), Zoe L. Jiang (Harbin Institute of Technology, ShenZhen), and Xuan Wang (Harbin Institute of Technology, ShenZhen)</i>	
TRIM, Wear Levelling and Garbage Collection on Solid State Drives: A Prediction Model for Forensic Investigators	419
<i>Alastair Nisbet (Auckland University of Technology) and Rijo Jacob (Auckland University of Technology)</i>	
TwinPorter - An Architecture For Enabling the Live Migration of VMI-Based Monitored Virtual Machines	427
<i>Benjamin Taubmann (University of Passau), Alexander Böhm (University of Passau), and Hans P. Reiser (University of Passau)</i>	
Defeating Fake Food Labels Using Watermarking and Biosequence Analysis	435
<i>Vijay Naidu (Auckland University of Technology) and Manoranjan Mohanty (University of Auckland)</i>	
Finding Rats in Cats: Detecting Stealthy Attacks using Group Anomaly Detection	442
<i>Aditya Kuppa (University College Dublin, Ireland, Symantec Corporation, Ireland), Slawomir Grzonkowski (Symantec Corporation, Ireland), Muhammad Rizwan Asghar (The University of Auckland, New Zealand), and Nhien-An Le-Khac (University College Dublin, Ireland)</i>	

Learning Wear Patterns on Footwear Outsoles Using Convolutional Neural Networks	450
<i>Xavier Francis (Unitec Institute of Technology), Hamid Sharifzadeh (Unitec Institute of Technology), Angus Newton (Institute of Environmental Science and Research (ESR)), Nilufar Baghaei (Otago Polytechnic Auckland Campus (OPAIC)), and Soheil Varastehpour (Unitec Institute of Technology)</i>	
Anomaly Detection in Network Traffic Using Dynamic Graph Mining with a Sparse Autoencoder .	458
<i>Guanbo Jia (The Centre of Security Information Technologies, Queen's University Belfast, UK), Paul Miller (The Centre of Security Information Technologies, Queen's University Belfast, UK), Xin Hong (The Centre of Security Information Technologies, Queen's University Belfast, UK), Harsha Kalutarage (School of Computing Science and Digital Media, Robert Gordon University, UK), and Tao Ban (Information Security Research Centre, National Institute of Information and Communications Technology, Japan)</i>	
Characterizing the Limitations of Forensic Event Reconstruction Based on Log Files	466
<i>Tobias Latzo (Friedrich-Alexander University Erlangen-Nürnberg (FAU)) and Felix Freiling (Friedrich-Alexander University Erlangen-Nürnberg (FAU))</i>	
Framework for the Retrieval of Social Media and Instant Messaging Evidence from Volatile Memory	476
<i>Ranul Deelaka Thantilage (University College Dublin) and Nhien An Le Khac (University College Dublin)</i>	

TrustCom Emerging Technologies Track

PURE: Generating Quality Threat Intelligence by Clustering and Correlating OSINT	483
<i>Rui Azevedo (LASIGE, Faculdade de Ciências, Universidade de Lisboa, Portugal), Ibéria Medeiros (LASIGE, Faculdade de Ciências, Universidade de Lisboa, Portugal), and Alysson Bessani (LASIGE, Faculdade de Ciências, Universidade de Lisboa, Portugal)</i>	
AgentChain: A Decentralized Cross-Chain Exchange System	N/A
<i>Dawei Li (Beihang University, China), Jianwei Liu (Beihang University, China), Zongxun Tang (Beihang University, China), Qianhong Wu (Beihang University, China), and Zhenyu Guan (Beihang University, China)</i>	
An Adaptive Physical Layer Key Extraction Scheme for Smart Homes	499
<i>Hong Zhao (Fujian Normal University), Yuexin Zhang (Swinburne University of Technology), Xinyi Huang (Fujian Normal University), and Yang Xiang (Swinburne University of Technology)</i>	
Evaluating DAG-Based Blockchains for IoT	N/A
<i>Liangrong Zhao (Beijing Jiaotong University) and Jiangshan Yu (Monash University)</i>	
Making Monero Hard-to-Trace and More Efficient	514
<i>Qingyi Liu (Shanghai Jiao Tong University and Shanghai Viewsource Information Science & Technology Co. Ltd), Zhen Liu (Shanghai Jiao Tong University), Yu Long (Shanghai Jiao Tong University), Zhiqiang Liu (Shanghai Jiao Tong University), Zhimei Sui (East China Normal University), Shifeng Sun (Shanghai Jiao Tong University), Shuyang Tang (Shanghai Jiao Tong University), and Dawu Gu (Shanghai Jiao Tong University)</i>	

PIT: A Probe Into Internet of Things by Comprehensive Security Analysis	522
<i>Vinay Sachidananda (Singapore University of Technology and Design), Suhas Bhairav (Singapore University of Technology and Design), Nirnay Ghosh (Singapore University of Technology and Design), and Yuval Elovici (Singapore University of Technology and Design)</i>	
A Probability Prediction Based Mutable Control-Flow Attestation Scheme on Embedded Platforms	530
<i>Jianxing Hu (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences), Dongdong Huo (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences), Meilin Wang (China Information Technology Security Evaluation Center), Yazhe Wang (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences), Yan Zhang (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences), and Yu Li (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences)</i>	
A Secure and Practical Blockchain Scheme for IoT	538
<i>Hongyang Liu (Shanghai Jiao Tong University; Viewsource Information Science & Technology Co., Ltd), Feng Shen (Shanghai Jiao Tong University), Zhiqiang Liu (Shanghai Jiao Tong University), Yu Long (Shanghai Jiao Tong University), Zhen Liu (Shanghai Jiao Tong University), Shifeng Sun (Shanghai Jiao Tong University), Shuyang Tang (Shanghai Jiao Tong University), and Dawu Gu (Shanghai Jiao Tong University)</i>	
A Typo-Tolerant Password Authentication Scheme with Targeted Error Correction	546
<i>Xin Chen (Fujian Normal University), Xinyi Huang (Fujian Normal University), Yi Mu (Fujian Normal University), and Ding Wang (Peking University)</i>	
A Correctable Public Blockchain	554
<i>Alexander Marsalek (IAIK, Graz University of Technology) and Thomas Zefferer (A-SIT Plus GmbH)</i>	
A Logic for Secure Stratified Systems and its Application to Containerized Systems	562
<i>Hagen Lauer (Monash University / CSIRO's Data61), Amin Sakzad (Monash University), Carsten Rudolph (Monash University), and Surya Nepal (CSIRO's Data61)</i>	
A Secure Decentralized Trustless E-Voting System Based on Smart Contract	570
<i>Jiazhao Lyu (Harbin Institute of Technology, Shenzhen), Zoe L. Jiang (Harbin Institute of Technology, Shenzhen), Xuan Wang (Harbin Institute of Technology, Shenzhen), Zhenhao Nong (Harbin Institute of Technology, Shenzhen), Man Ho Au (The Hong Kong Polytechnic University), and Junbin Fang (Junbin Fang)</i>	
(Linkable) Ring Signature from Hash-Then-One-Way Signature	578
<i>Xingye Lu (The Hong Kong Polytechnic University), Man Ho Au (The Hong Kong Polytechnic University), and Zhenfei Zhang (Algorand)</i>	
Constructing Strong Designated Verifier Signatures from Key Encapsulation Mechanisms	586
<i>Borui Gong (The Hong Kong Polytechnic University), Man Ho Au (The Hong Kong Polytechnic University), and Haiyang Xue (IIE, CAS, Beijing, China; The Hong Kong Polytechnic University)</i>	

MedBloc: A Blockchain-Based Secure EHR System for Sharing and Accessing Medical Data	594
<i>Jack Huang (The University of Auckland, New Zealand), Yuan Wei Qi (The University of Auckland, New Zealand), Muhammad Rizwan Asghar (The University of Auckland, New Zealand), Andrew Meads (The University of Auckland, New Zealand), and Yu-Cheng Tu (The University of Auckland, New Zealand)</i>	
CloudSafe: A Tool for an Automated Security Analysis for Cloud Computing	602
<i>Seongmo An (Korea Aerospace University), Taehoon Eom (Korea Aerospace University), Jong Sou Park (Korea Aerospace University), Jin Bum Hong (University of Western Australia), Armstrong Nhlabatsi (Qatar University), Noora Fetais (Qatar University), Khaled M. Khan (Qatar University), and Dong Seong Kim (University of Queensland)</i>	
Security and Performance Modeling and Optimization for Software Defined Networking	610
<i>Taehoon Eom (Korea Aerospace University), Jin Bum Hong (University of Western Australia), SeongMo An (Korea Aerospace University), Jong Sou Park (Korea Aerospace University), and Dong Seong Kim (University of Queensland)</i>	
A Dynamic Access Control Policy Model for Sharing of Healthcare Data in Multiple Domains	618
<i>Ahmad Salehi Shahraki (Monash University), Carsten Rudolph (Monash University), and Marthie Grobler (CSIRO's Data61)</i>	
Tackling Data Inefficiency: Compressing the Bitcoin Blockchain	626
<i>Alexander Marsalek (A-SIT), Thomas Zefferer (A-SIT Plus GmbH), Edona Fasllija (Graz University of Technology), and Dominik Ziegler (Know-Center GmbH)</i>	

BigDataSE 2019: The 13th IEEE International Conference on Big Data Science and Engineering

Identifying High Value Users in Twitter Based on Text Mining Approaches	N/A
<i>Yibing Yang (Carleton University) and M. Omair Shafiq (Carleton University)</i>	
ZSAL: Zero Shot Augmentation Learning for Medical Imaging	N/A
<i>Tao Luo (Central South University), Kehua Guo (Central South University), and Yan He (Central South University)</i>	
A Secure Private Charging Pile Sharing Scheme with Electric Vehicles in Energy Blockchain	648
<i>Yuntao Wang (Xi'an Jiaotong University, China), Zhou Su (Xi'an Jiaotong University, China; Shanghai University), and Kuan Zhang (University of Nebraska-Lincoln)</i>	
An Object-Pair Driven Approach for Top-k mCK Query Problem by Using Hilbert R-Tree	655
<i>Yuan Qiu (Xi'an University of Technology), Xinhong Hei (Xi'an University of Technology), Tadashi Ohmori (The University of Electro-Communications), and Hideyuki Fujita (The University of Electro-Communications)</i>	
Feature Extraction Optimization for Bitstream Communication Protocol Format Reverse Analysis	662
<i>Xinhong Hei (Xi'an University of Technology), Binbin Bai (Xi'an University of Technology), Yichuan Wang (Xi'an University of Technology), Li Zhang (Xi'an University of Technology), Lei Zhu (Xi'an University of Technology), and Wenjiang Ji (Xi'an University of Technology)</i>	

DPNN-CNN: A Novel Approach For Network Traffic Classification Using Deep Learning	N/A
<i>Kai Gao (Changsha University of Science & Technology), Jing Cai (Hunan Normal University), Zheng Yao (Hunan Normal University), Pingping Dong (Hunan Normal University), Jingyun Xie (Hunan Normal University), Shuo Li (Changsha University of Science & Technology), and Fu Jiang (Central South University)</i>	
Diffusion Convolutional Recurrent Neural Network with Rank Influence Learning for Traffic Forecasting	678
<i>Yujun Huang (Sun Yat-Sen University), Yunpeng Weng (Sun Yat-Sen University), Shuai Yu (Sun Yat-Sen University), and Xu Chen (Sun Yat-Sen University)</i>	
A Remaining Useful Life Prediction Method with Automatic Feature Extraction for Aircraft Engines	N/A
<i>Kunyuan Deng (Central South University, P.R. China), Xiaoyong Zhang (Central South University, P.R. China), Yijun Cheng (Central South University, P.R. China), Zhiyong Zheng (Central South University, P.R. China), Fu Jiang (Central South University, P.R. China), Weirong Liu (Central South University, P.R. China), and Jun Peng (Central South University, P.R. China)</i>	
A Differential Privacy-Based Protecting Data Preprocessing Method for Big Data Mining	693
<i>Ran Mo (Central South University, P.R. China), Jianfeng Liu (Central South University, P.R. China), Wentao Yu (Central South University of Forestry and Technology, P.R. China), Fu Jiang (Central South University, P.R. China), Xin Gu (Central South University, P.R. China), Xiaoshuai Zhao (Central South University, P.R. China), Weirong Liu (Central South University, P.R. China), and Jun Peng (Central South University, P.R. China)</i>	
A Cooperative Edge Computing Scheme for Reducing the Cost of Transferring Big Data in 5G Networks	700
<i>Bo Yin (Illinois Institute of Technology), Yu Cheng (Illinois Institute of Technology), Lin X. Cai (Illinois Institute of Technology), and Xianghui Cao (Southeast University, China)</i>	
Lightweight Deep Learning Model For Facial Expression Recognition	N/A
<i>Laha Ale (Texas A&M University-Corpus Christi), Xiaojie Fang (Harbin Institute of Technology, P.R. China), Dajiang Chen (University of Electronic Science and Technology of China, P.R. China), Ye Wang (Harbin Institute of Technology (Shenzhen) and Pengcheng Laboratory), and Ning Zhang (Texas A&M University-Corpus Christi)</i>	

SECSOC-2019: The 3rd International Workshop on Secure Smart Society In Next Generation Networking Paradigm

Hierarchy Feature Learning for Face Recognition	N/A
<i>Jiwei Zhang (Beijing University of Posts and Telecommunications) and Xiaodan Yan (Beijing University of Posts and Telecommunications)</i>	
Access Control Architecture for Smart City IoT Platform	717
<i>Takayuki Sasaki (NEC Corporation), Yusuke Morita (NEC Platforms, Ltd.), and Astha Jada (NEC Corporation)</i>	

A LSTM-Based Method for Comprehension and Evaluation of Network Security Situation	723
<i>Shixuan Li (College of Computer and Cyber Security, Hebei Normal University and Hebei Key Laboratory of Network and Information Security) and Dongmei Zhao (College of Computer and Cyber Security, Hebei Normal University and Hebei Key Laboratory of Network and Information Security)</i>	
A Security Analysis of Collaboration Network Based on Blockchain	N/A
<i>Peng Li (Yantai Vocational College) and Ying Zheng (Qufu Normal University)</i>	
Uncertainty-Aware Resource Provisioning for Workflow Scheduling in Edge Computing Environment	734
<i>Hao Cao (Nanjing University of Information Science and Technology), Xiaolong Xu (Nanjing University of Information Science and Technology; Jiangsu Collaborative Innovation Center of Atmospheric Environment and Equipment Technology (CICAEET)), Qingxiang Liu (Nanjing University of Information Science and Technology), Yuan Xue (Nanjing University of Information Science and Technology), and Lianyong Qi (Qufu Normal University, China)</i>	
Accuracy-Aware Service Recommendation with Privacy	740
<i>Xiaoxiao Chi (Qufu Normal University), Chao Yan (Qufu Normal University), Huaizhen Kou (Qufu Normal University), and Lianyong Qi (Qufu Normal University)</i>	
Mutual Information on Tensors for Measuring the Nonlinear Correlations in Network Security.....	746
<i>Liangfu Lu (Tianjin University), Xiaohan Ren (Tianjin University), Chenming Cui (Southern Methodist University), Yun Luo (University of Technology, Sydney), Yongheng Jia (Tianjin University), and Yinong Xu (Tianjin Nankai High School)</i>	
One-Shot Malware Outbreak Detection using Spatio-Temporal Isomorphic Dynamic Features	751
<i>Leo Zhang (Trend Micro), Iqbal Gondal (University of Federation), Joarder Kamruzzaman (University of Federation), and Leo Zhang (Trend Micro)</i>	
A Multi-channel Visualization Method for Malware Classification Based on Deep Learning	757
<i>Yanchen Qiao (Pengcheng Laboratory, China), Qingshan Jiang (Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences), Zhenchao Jiang (Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences), and Liang Gu (Sangfor Technologies Inc., Shenzhen, China)</i>	
Privacy and Security Analysis of PACE GM Protocol	763
<i>Mirosław Kutylowski (Wrocław University of Science and Technology) and Przemysław Kubiak (Wrocław University of Science and Technology)</i>	
Automatic Device Selection and Access Policy Generation Based on User Preference for IoT Activity Workflow	769
<i>Mohammed Al-Shaboti (Victoria University of Wellington), Aaron Chen (Victoria University of Wellington), and Ian Welch (Victoria University of Wellington)</i>	
Measuring Trustworthiness of IoT Image Sensor Data Using Other Sensors' Complementary Multimodal Data	775
<i>Mohammad Manzurul Islam (Federation University Australia), Gour Karmakar (Federation University Australia), Joarder Kamruzzaman (Federation University Australia), and Manzur Murshed (Federation University Australia)</i>	

SST-ITS 2019: The 2019 International Workshop on Safety, Security, and Trust in Intelligent Transportation System

Differentially Private Streaming to Untrusted Edge Servers in Intelligent Transportation System	781
<i>Soheila Ghane Ezabadi (The University of Melbourne), Alireza Jolfaei (Macquarie University, Federation University Australia), Lars Kulik (The University of Melbourne), and Ramamohanarao Kotagiri (The University of Melbourne)</i>	
Trusted Autonomous Vehicle: Measuring Trust using On-Board Unit Data	787
<i>Abdullahi Chowdhury (Federation University Australia), Gour Karmakar (Federation University Australia), and Joarder Kamruzzaman (Federation University Australia)</i>	
Secure Data Streaming to Untrusted Road Side Units in Intelligent Transportation System	793
<i>Alireza Jolfaei (Macquarie University), Krishna Kant (Temple University), and Hassan Shafei (Temple University)</i>	
Protecting Code Injection Attacks in Intelligent Transportation System	N/A
<i>Hussein Alnabulsi (Charles Sturt University, Australia) and Rafiqul Islam (Charles Sturt University, Australia)</i>	
Big Data Security Frameworks Meet the Intelligent Transportation Systems Trust Challenges	807
<i>Feras Awaysheh (CiTIUS research center, the University of Santiago de Compostela), José Carlos Cabaleiro (CiTIUS research center, the University of Santiago de Compostela), Tomás Fernández Pena (University of Santiago de Compostela (CiTIUS)), and Mamoun Alazab (Charles Darwin University)</i>	
Common Security Criteria for Vehicular Clouds and Internet of Vehicles Evaluation and Selection	814
<i>Mohammad Aladwan (University of Santiago de Compostela), Feras Awaysheh (CiTIUS research Center, the University of Santiago de Compostela), José Cabaleiro (CiTIUS research Center, the University of Santiago de Compostela), Tomás Pena (CiTIUS research Center, the University of Santiago de Compostela), Hamzeh Alabool (Amman Arab University), and Mamoun Alazab (Charles Darwin University)</i>	

DSPFT 2019: 2019 Workshop on Data Security, Privacy, Forensics and Trust

Joint RSS and CSI Based Access Point Authentication Scheme in WiFi Networks via XGBoost ..	N/A
<i>Di Wu (Institute of Information Engineering, Chinese Academy of Sciences), Dali Zhu (Institute of Information Engineering, Chinese Academy of Sciences), Yinlong Liu (Institute of Information Engineering, Chinese Academy of Sciences), and Luping Ma (Institute of Information Engineering, Chinese Academy of Sciences)</i>	
Anonymous State Pinning for Private Blockchains	827
<i>Peter Robinson (Protocol Engineering Group and Systems, ConsenSys) and John Brainard (Protocol Engineering Group and Systems, ConsenSys)</i>	
Lock Picking in the Era of Internet of Things	835
<i>Edward Knight (University of Kent, United Kingdom), Sam Lord (University of Kent, United Kingdom), and Budi Arief (University of Kent, United Kingdom)</i>	

CHTDS: A CP-ABE Access Control Scheme Based on Hash Table and Data Segmentation in NDN .
843

Zhijun Wu (Civil Aviation University of China), Enzhong Xu (Civil Aviation University of China), Liang Liu (Civil Aviation University of China), and Meng Yue (Civil Aviation University of China)

On the Effectiveness of Electric Network Frequency (ENF) as a Source of Randomness 849

*Girish Revadigar (Huawei International Pte. Ltd., Singapore), Chitra Javali (Institute for Infocomm Research (I2R), A*STAR, Singapore), Yang Li (Shenzhen University, China), and Sreejaya Viswanathan (Advanced Digital Sciences Centre (ADSC), Illinois at Singapore Pte. Ltd., Singapore)*
