SPIE

Volume 11115

Proceedings of SPIE 0277-786X, V. 11115

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *UV/Optical/IR Space Telescopes and Instruments: Innovative Technologies and Concepts IX*, edited by Allison A. Barto, James B. Breckinridge, H. Philip Stahl, Proceedings of SPIE Vol. 11115 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
xi	<i>Conference Committee</i>

Session 1 **INSTRUMENTATION AND DETECTORS I**

11115 02	WFIRST wide field instrument optical mechanical assembly design overview [11115-1]
11115 04	Science capabilities enabled by the CETUS NUV multi-object spectrometer and NUV/FUV camera and the driving technologies [11115-3]
11115 05	Raman laser spectrometer flight model assembly and integration verification: end-to-end functional tests for thermal strap assembly procedure redefinition [11115-4]
11115 06	Design of a sky brightness spectrograph with 2.5-5μm band for sky brightness measurements [11115-5]

Session 2 **INSTRUMENTATION AND DETECTORS II**

11115 07	First test results on SWIR subsystem optical breadboards: optical mounting characterization, first slit homogenizer, and immersed grating for space applications [11115-6]
11115 08	Planetary transits and oscillation of stars (PLATO) focal plane assembly (FPA): prototype assembly and integration verification [11115-7]
11115 09	Development and focal ratio degradation optimisation of integral field units on Hector [11115-8]
11115 0A	Characterization of a silicon photomultiplier for the Ultra-Fast Astronomy telescope [11115-9]

Session 3 **INSTRUMENTATION AND DETECTORS III**

11115 0C	The silicon lattice defects in proton and gamma irradiated n-channel CCDs [11115-11]
11115 0D	CCD camera and operational software for CSTAR2 [11115-13]

Session 4 **INNOVATIVE CONCEPTS AND DESIGNS**

- 11115 OF **NPS sparse aperture testbed** [11115-15]
- 11115 OH **ExoPlanet Optics: conceptual design processes for stealth telescopes** [11115-17]
- 11115 OI **A new Newtonian architecture** [11115-18]
- 11115 OK **Picometer level spatial metrology for next generation telescopes** [11115-50]

Session 5 **DECADAL LARGE MISSION CONCEPTS AND TECHNOLOGY I: JOINT SESSION WITH CONFERENCES 11115, 11116, 11117, AND 11118**

- 11115 OM **The Habitable Exoplanet Observatory (HabEx)** [11115-21]
- 11115 ON **Technology maturity update for the Habitable-zone Exoplanet Imaging Observatory (HabEx) concept** [11115-22]
- 11115 OO **Telling the story of life in the cosmos: the LUV OIR telescope concepts** [11115-23]
- 11115 OP **The Large UV/Optical/Infrared (LUV OIR) surveyor: engineering design and technology overview** [11115-24]

Session 6 **DECADAL LARGE MISSION CONCEPTS AND TECHNOLOGY II: JOINT SESSION WITH CONFERENCES 11115, 11116, 11117, AND 11118**

- 11115 OQ **The Origins Space Telescope** [11115-25]
- 11115 OR **Large ultra-stable telescope system study** [11115-27]
- 11115 OS **Dynamic wavefront error and line-of-sight performance predictions for the 15-meter segmented Large Ultraviolet/Optical/Infrared Surveyor (LUV OIR) with non-contact vibration isolation** [11115-28]

Session 7 **HABEX DESIGN AND INSTRUMENTATION**

- 11115 OV **A Habitable Exoplanet Observatory (HabEx) starshade-only architectures** [11115-31]
- 11115 OW **The HabEx Ultraviolet Spectrograph (UVS): design and science drivers** [11115-32]

Session 8 LUVOIR DESIGN AND INSTRUMENTATION

- 11115 0X **Overview of the optomechanical design of the LUVOIR instruments** [11115-33]
- 11115 0Y **Optical instrument thermal control on the Large Ultraviolet/Optical/Infrared Surveyor** [11115-34]
- 11115 10 **Thermal frequency case study for LUVOIR ULTRA** [11115-36]
- 11115 11 **Evolving management strategies to improve NASA flagship's cost and schedule performance: LUVOIR as a case study** [11115-37]
- 11115 12 **Fast steering mirror disturbance effects on overall system optical performance for the Large Ultraviolet/Optical/Infrared Surveyor (LUVOIR) concept using a non-contact vibration isolation and precision pointing system** [11115-47]

POSTER SESSION

- 11115 13 **Optical design of the Origins space telescope** [11115-26]
- 11115 14 **Spectral response of the stereo imaging channel of SIMBIO-SYS on-board the ESA BepiColombo Mission** [11115-38]
- 11115 16 **The impact of fiber fusion on the focal ratio degradation and transmission** [11115-40]
- 11115 17 **Design and improvements of the control system for LAMOST spectrographs** [11115-41]
- 11115 19 **Rapid-prototyping a tabletop integral field spectrograph** [11115-43]
- 11115 1A **MVIC engineering array characterization in the SwRI detector calibration lab** [11115-44]
- 11115 1E **Radiation tolerant, photon counting, visible and near-IR detectors for space coronagraphs and starshades** [11115-49]
