**Volume 11163**

Proceedings of SPIE 0277-786X, V. 11163

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Emerging Imaging and Sensing Technologies for Security and Defence IV*, edited by Gerald S. Buller, Richard C. Hollins, Robert A. Lamb, Martin Laurenzis, Proceedings of SPIE Vol. 11163 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

---

**SESSION 1      ADVANCED IMAGING**

---

- 11163 04      **Approaches to solve inverse problems for optical sensing around corners (Invited Paper)**  
[11163-3]
- 11163 05      **Evaluation of super-resolution algorithms for mosaic hyperspectral imagery** [11163-4]

---

**SESSION 2      ADVANCED DETECTORS**

---

- 11163 07      **Design of a 16 x 16 fast-gated SPAD imager with 16 integrated shared picosecond TDCs for non-line-of-sight imaging (Invited Paper)** [11163-6]
- 11163 08      **High-speed fully-integrated electronics for high-performance measurements with single photon avalanche diode arrays (Invited Paper)** [11163-7]
- 11163 09      **Resonant cavity enhanced photodetectors for the mid-wave infrared** [11163-8]

---

**SESSION 3      ADVANCED COMPONENTS**

---

- 11163 0A      **Flat optics and ultrathin optical devices with unusual functionalities (Invited Paper)** [11163-9]
- 11163 0C      **Lithium niobate-based programmable micro-diffraction device for wavelength-selective switching applications** [11163-11]
- 11163 0E      **Resonator micro-optical gyroscope with Mach-Zehnder modulator** [11163-13]

---

**SESSION 4      NOVEL SYSTEMS**

---

- 11163 0F      **Bi-focal unattended ground sensor concept for high resolution and wide field-of-view real-time situational awareness (Invited Paper)** [11163-14]
- 11163 0G      **Analysis of measurement matrices for a single-pixel-camera based on both theoretical and practical performance** [11163-15]

11163 0H **Hyperspectral compressive sensing: a comparison of embedded GPU and ARM implementations** [11163-16]

**POSTER SESSION**

---

11163 0I **Modeling nonlinear image processing algorithms using a processor based on the sorting node** [11163-17]

11163 0J **Rank differences of signals by weighing-selection processing method for implementation of multifunctional image processing processor** [11163-18]

11163 0K **Research application possibility of the optimized body form with the minimal force of aerodynamic drag for heat sink** [11163-20]

11163 0L **Analysis of the influence of technological parameters on electrophysical and frequency characteristics of RF MEMS** [11163-21]

11163 0N **Electric field distribution modelling of the distributing system 5-beam APAR in time area** [11163-23]
