# TABLE OF CONTENTS

|                                                                                                                                                          |            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>ANOMALY DETECTION FOR INDUSTRY PRODUCT QUALITY INSPECTION BASED ON GAUSSIAN RESTRICTED BOLTZMANN MACHINE .....</b>                                    | <b>1</b>   |
| <i>Yi Zhang ; Peng Peng ; Chongdang Liu ; Heming Zhang</i>                                                                                               |            |
| <b>PROGNOSTICS FOR ROTATING MACHINERY USING VARIATIONAL MODE DECOMPOSITION AND LONG SHORT-TERM MEMORY NETWORK .....</b>                                  | <b>7</b>   |
| <i>Chongdang Liu ; Linxuan Zhang ; Jiahe Niu ; Rong Yao ; Cheng Wu</i>                                                                                   |            |
| <b>INVESTIGATING STACKED ENSEMBLE MODEL FOR OIL RESERVOIR CHARACTERISATION.....</b>                                                                      | <b>13</b>  |
| <i>Pallabi Saikia ; Rashmi Dutta Baruah</i>                                                                                                              |            |
| <b>EXPLAINABLE MACHINE LEARNING IN INDUSTRY 4.0: EVALUATING FEATURE IMPORTANCE IN ANOMALY DETECTION TO ENABLE ROOT CAUSE ANALYSIS.....</b>               | <b>21</b>  |
| <i>Mattia Carletti ; Chiara Masiero ; Alessandro Beghi ; Gian Antonio Susto</i>                                                                          |            |
| <b>DENSITY PEAK-BASED PRE-CLUSTERING SUPPORT VECTOR MACHINE FOR MULTI-CLASS IMBALANCED CLASSIFICATION.....</b>                                           | <b>27</b>  |
| <i>Zonglin Di ; Qi Kang ; Daogang Peng ; Mengchu Zhou</i>                                                                                                |            |
| <b>APPLYING LOGISTIC REGRESSION FOR CLASSIFICATION IN SINGLE-CHANNEL SSVEP-BASED BCIS .....</b>                                                          | <b>33</b>  |
| <i>Giovanni Acampora ; Pasquale Trinchese ; Autilia Vitiello</i>                                                                                         |            |
| <b>LOCATION-SENSITIVE RESOURCE OPTIMIZATION FOR PROFIT MAXIMIZATION IN DISTRIBUTED DATA CENTERS.....</b>                                                 | <b>39</b>  |
| <i>Haitao Yuan ; Jing Bi</i>                                                                                                                             |            |
| <b>A NOVEL MOBILE ROBOT LOCALIZATION METHOD VIA FINITE MEMORY FILTERING BASED ON REFINED MEASUREMENT .....</b>                                           | <b>45</b>  |
| <i>Sang Su Lee ; Dhong Hun Lee ; Dong Kyu Lee ; Hyun Ho Kang ; Choon Ki Ahn</i>                                                                          |            |
| <b>STORAGE CONSTRAINED SMART METER SENSING USING SEMI-TENSOR PRODUCT.....</b>                                                                            | <b>51</b>  |
| <i>Amit Joshi ; Amol Yerudkar ; Carmen Del Vecchio ; Luigi Glielmo</i>                                                                                   |            |
| <b>EXPLORING THE ROLE OF SIMULATION-BASED DESIGN PRINCIPLES IN SUPPORT OF TRANSPORTATION AND MATERIAL HANDLING ACTIVITIES FOR THE LUNAR MISSION.....</b> | <b>57</b>  |
| <i>Lynzi Hochberg ; Jose Mulino ; David Phillips ; Christian Griffith ; Avinash Gupta ; J. Cecil ; Armando Lopez-Aramburo</i>                            |            |
| <b>MINING TIME FOR TIMED REGULAR SPECIFICATIONS.....</b>                                                                                                 | <b>63</b>  |
| <i>Apurva Narayan ; Sebastian Fischmeister</i>                                                                                                           |            |
| <b>A NEW HEURISTIC ALGORITHM FOR 2-OPTIMALITY CONSENSUS DETERMINATION .....</b>                                                                          | <b>70</b>  |
| <i>Dai Tho Dang ; Ngoc Thanh Nguyen ; Dosam Hwang</i>                                                                                                    |            |
| <b>GRAMMAR-BASED TREE SWARM OPTIMIZATION.....</b>                                                                                                        | <b>76</b>  |
| <i>David Griñán ; Alfredo Ibas ; Manuel Nùñez</i>                                                                                                        |            |
| <b>INDEPENDENCY ASPECT AS A VITAL FEATURE OF INTELLIGENT COLLECTIVES.....</b>                                                                            | <b>82</b>  |
| <i>Rafal Palak ; Ngoc Thanh Nguyen</i>                                                                                                                   |            |
| <b>DEVELOPMENT OF A DECISION SUPPORT TOOL FOR INTELLIGENT MANUFACTURING USING CLASSIFICATION AND CORRELATION ANALYSIS .....</b>                          | <b>88</b>  |
| <i>Dariusz Król ; Jan Skowronski ; Maciej Zareba ; Krzysztof Barteczki</i>                                                                               |            |
| <b>A GENERIC FRAMEWORK FOR COLLABORATIVE RECOMMENDATION IN A SCIENTIFIC NETWORK.....</b>                                                                 | <b>95</b>  |
| <i>Bernadetta Maleszka</i>                                                                                                                               |            |
| <b>AUTONOMOUS ROBOT PHOTOGRAPHER SYSTEM BASED ON AESTHETIC COMPOSITION EVALUATION USING YOHAKU .....</b>                                                 | <b>101</b> |
| <i>Kai Lan ; Kosuke Sekiyama</i>                                                                                                                         |            |
| <b>ENERGY-OPTIMAL DISTURBANCE FEEDFORWARD CONTROL FOR CONSTRAINED DEFORMABLE MIRRORS WITH THERMOELASTIC ACTUATION .....</b>                              | <b>107</b> |
| <i>Kevin Schmidt ; Thomas Graf ; Marwan Abdou Ahmed ; Oliver Sawodny</i>                                                                                 |            |
| <b>STANDARDIZED FRAMEWORK FOR EVALUATING CENTRALIZED AND DECENTRALIZED CONTROL SYSTEMS IN MODULAR ASSEMBLY SYSTEMS.....</b>                              | <b>113</b> |
| <i>Sebastian Mayer ; Christian Arnet ; Dennis Gankin ; Christian Endisch</i>                                                                             |            |
| <b>ADAPTIVE PRODUCTION CONTROL WITH NEGOTIATING AGENTS IN MODULAR ASSEMBLY SYSTEMS.....</b>                                                              | <b>120</b> |
| <i>Sebastian Mayer ; Dennis Gankin ; Christian Arnet ; Christian Endisch</i>                                                                             |            |

|                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
