Volume 11160

Proceedings of SPIE 0277-786X, V. 11160

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Electro-Optical Remote Sensing XIII*, edited by Gary W. Kamerman, Ove Steinvall, Proceedings of SPIE Vol. 11160 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

ACTIVE IMAGING AND MAPPING

11160 02	Detection and jamming resistance of quantum ghost imaging for remote sensing (Invited Paper) [11160-1]
11160 03	Range-intensity profile of a SWIR laser gated-viewing system for varying temporal response of in-pixel amplification [11160-2]
11160 04	Development of a novel low-cost NIR gated-viewing sensor for maritime search and rescue applications [11160-3]
11160 05	Lidar-based positioning in forest environments [11160-4]

PRESENT AND PAST IMAGING RESEARCH AT ISL

11160 07	60 years of advanced imaging at ISL: from the Cranz-Schardin camera to non-line-of-sight imaging (Invited Paper) [11160-6]
11160 08	Reconstruction of density fields of supersonic flows using an improved Schlieren technique [11160-7]
11160 09	Active and passive computational imaging for tracking and prediction of three-dimensional MUAV flight paths [11160-8]
11160 0A	Illumination-invariant change detection for the protection of vehicle convoys [11160-9]
11160 0B	SWIR imaging through strong atmospheric turbulence: comparing a focal-plane-array camera and a compressive sensor [11160-10]

TECHNOLOGY AND MEASUREMENT TECHNIQUES

11160 0D	Research on LDV stray light suppression technology based on four-wave hybrid interference [11160-12]
11160 0E	Development of a compact gas sensor system using an ECDL by laser Raman spectroscopy [11160-13]
11160 0F	Transfer learning on GPR data for IED detection in various environments [11160-14]

11160 OG **Design of light receiver system for measurement of resonance Raman spectra in deep ultraviolet wavelength region** [11160-15]

IMAGING THROUGH SCATTERING MEDIA

11160 OI **Underwater depth imaging using time-correlated single-photon counting at video frame rates (Invited Paper)** [11160-17]

11160 OJ **Optical sensing during low visibility conditions** [11160-18]

SIGNAL AND IMAGE PROCESSING

11160 OK **A new target identification measurement based on multi-spectral imaging** [11160-19]

11160 OL **Application of Sentinel-1 and Sentinel-2 data to conduct reconnaissance analyses** [11160-20]

11160 OM **Automatic scene understanding and object identification in point clouds** [11160-21]

11160 ON **Research on image information extraction and analysis method of space-based space debris detection system** [11160-22]

POSTER SESSION

11160 OO **Optimal conditions for distance determination by the range-intensity correlation methods using range-gated viewing system with nonrectangular pulses** [11160-24]

11160 OR **Evaluation of tunable deep UV lasers for remote identification of hazardous substances** [11160-27]

11160 OS **Measurement of diffusion behavior of hydrogen leaked from buried pipe using Raman imaging** [11160-28]
