Volume 11195

Proceedings of SPIE 0277-786X, V. 11195

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum and Nonlinear Optics VI*, edited by Qihuang Gong, Guang-Can Guo, Byoung Seung Ham, Proceedings of SPIE Vol. 11195 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Symposium Committees</i>
xi	<i>Conference Committee</i>

QUANTUM NONLINEAR OPTICS I

11195 06	Schrödinger's cat and his timeless ($t = 0$) quantum worlds (Invited Paper) [11195-5]
----------	---

QUANTUM NONLINEAR OPTICS II

11195 08	Laminar and turbulent generation states of different parity-time symmetry properties in coupled Raman fiber lasers (Invited Paper) [11195-7]
----------	---

ADVANCED QUANTUM TECHNOLOGIES II

11195 0G	Fiber-based high-dimensional quantum communications (Invited Paper) [11195-16]
11195 0J	Light propagation in two-dimensional cold atomic clouds with positional correlations [11195-19]

INTEGRATED PHOTONIC QUANTUM TECHNOLOGIES

11195 0P	Electro-optic modulators for photonic quantum information processing (Invited Paper) [11195-24]
11195 0S	Nonlinear frequency conversion and manipulation of vector beams in a Sagnac loop [11195-27]

POSTER SESSION

11195 0V	Mid-infrared vector beams in selenide photonic crystal fiber with small hollow core and its application on supercontinuum generation [11195-30]
11195 0X	Generation of frequency-bin entangled two-photon state via cascaded second-order nonlinear processes [11195-32]

- 11195 0Y **Features of a CPT-based atomic clock with pumping by different-order sidebands of a VCSEL's frequency [11195-33]**
- 11195 10 **Numerical modeling and simulations on splitting of chirped optical pulses in heavily doped thulium fiber amplifiers through modal instability analysis [11195-35]**
