PROCEEDINGS OF SPIE

AOPC 2019: Nanophotonics

Zhiping Zhou Xiaocong Yuan Daoxin Dai Editors

7–9 July 2019 Beijing, China

Sponsored by Chinese Society for Optical Engineering (China)

Cosponsored by SPIE

Organized by Chinese Society for Optical Engineering (China) Photoelectronic Technology Committee, Chinese Society of Astronautics (China) Science and Technology on Low-light-level Night Vision Laboratory (China) Science and Technology on Electro-Optical Information Security Control Laboratory (China) Academy of Opto-Electronics of Electronics Technology of China (China) Infrared and Laser Engineering (China)

Published by SPIE

Volume 11336

Proceedings of SPIE 0277-786X, V. 11336

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in AOPC 2019: Nanophotonics, edited by Zhiping Zhou, Xiacong Yuan, Daoxin Dai, Proceedings of SPIE Vol. 11336 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510634442 ISBN: 9781510634459 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- v Authors
- vii Conference Committee
- ix Introduction

NANOPHOTONICS

- 11336 02 Calcium fluoride whispering gallery mode microdisk resonator with ultra-high-Q for microwave photonic applications [11336-1]
- 11336 03 A comparative study on reflection of broadband EUV multilayer mirrors basing on Levenberg-Marquardt algorithm [11336-2]
- 11336 04First principles calculations of the electronic structure of GaAs in (001), (011) and (111) electric
field directions [11336-3]
- 11336 05 Theoretical comparison of sensitivity enhancement of various metals based nearly guided wave surface plasmon resonance biosensors designed by genetic algorithm [11336-5]
- 11336 06 Effect of Ar plasma treatment on the photoelectric characteristics of GaAs nanowire-based infrared photodetector [11336-6]
- 11336 07 A sensitive "turn-on" sensor based on FRET between FITC and gold nanoparticles for glutathione [11336-8]
- 11336 08 Broadband achromatic meta-lens based on height variation in the near-infrared spectrum [11336-9]
- 11336 09 Generation of a hollow-tube array with prescribed characteristics [11336-10]
- 11336 0A Ultra-smooth silver nanoneedles as nanofocusing waveguides [11336-11]
- 11336 OB Zero-crosstalk multiplanar imaging properties of Fibonacci sieve [11336-12]
- 11336 0C Polarization resolved light splitting of single plasmonic nanowire emission [11336-13]
- 11336 0D **Template-free sol-gel preparation of antireflection films with adjustable refractive index** [11336-15]
- 11336 0E High-density and uniform-size GaN/Al_{0.5}GaN self-assembled quantum dots grown by metalorganic chemical vapor deposition [11336-17]

11336 OF	Design of multilayer film polarization-independent gratings [11336-18]
11336 0G	Development of three-dimensional gradient photonic crystal structure by umbrella-like double-cone interferometry [11336-20]
11336 OH	Solution-processed photodetector based on Br incorporated perovskite materials [11336-21]
11336 01	Effects of quantum confinement on optical properties of InN/GaN quantum dots [11336-22]
11336 OJ	Optimization of InGaN/GaN heterostructure solar cell with incorporation of GaN interlayer [11336-23]
11336 OK	Refractive index sensor based on multilayer semicircular slot structure [11336-24]
11336 OL	Tunable subwavelength slit lenses based on the manipulation of refractive index of medium [11336-25]
11336 0M	Size-dependent nonlinear absorption properties and ultrafast dynamics of ag nanoparticles [11336-26]
11336 ON	Optical properties of gold nano-triangular prisms [11336-27]
11336 0O	Design and fabrication of optofluidic sensor with double-layered metal nano-grating [11336-28]
11336 OP	Resonance modes of plasmonic nanorod metamaterials and their applications [11336-29]
11336 0Q	A terahertz metamaterial absorbers with wide absorption bandwidth [11336-30]
11336 OR	Study of in situ laser modification of Ga-droplets [11336-31]
11336 OS	An aeroengine measurement system based on high-precision turntable [11336-32]
11336 OT	Rutile TiO ₂ nanorods arrays grew by solution-processed for high efficiency solid state Perovskite solar cells [11336-33]
11336 OU	Ultra-narrow photonic nanojets formed by a micro/nanofiber array [11336-34]
11336 0V	Surface error consistency coefficient based on cross-correlation for evaluating the consistency of surface error measurement methods [11336-35]
