2019 IEEE 11th International Conference on Advanced Infocomm Technology (ICAIT 2019)

Jinan, China
18 – 20 October 2019
Table of Contents

Message from the Conference Chair ........................................ vii
Organizing Committees ......................................................... viii

◆ Image Processing

A Deep Convolutional Neural Network Learning Transfer to SVM-Based Segmentation Method for Brain Tumor ................................................................. 1

Bin Cui, Mingchao Xie, Chunxing Wang

An Improved Sauvola Approach on QR Code Image Binarization ........................................... 6

Yu He, Yang Yang

Research on Image Super-resolution Based on Improved Convolutional Neural Network .......... 11

Xiaodong Jiang, Zhizheng Yang, Chunxing Wang

De-noising of 3D Pulse Images by Channel-Weighted Robust Principal Component Analysis .... 19

Lang He, Ching-Hsing Luo, Xiaohua Xie, Bo Peng

Image Caption Method Combining Multi-angle with Multi-modality ........................................ 24

Yang Zhenyu, Zhang Jiao

Brain Tumor Segmentation from MRI Using Pre-segmentation Based on Superpixels and Fully Convolutional Neural Networks ......................................................... 31

Jiining Wang, Chunhui Zhang, Jun Gao, Liren Zhang

Structure Importance-Aware Hidden Images ............................................................................. 36

Hui Du, Lianqing Shu

ESPI Images Denoising Based on Improved Total Variation ...................................................... 43

Ying Xing, Huamei Xin, Cancan Wu
Radar Emitter Signal Detection with Time-Frequency Image Processing and Convolutional Neural Network........................................................................................................................................48

Zhenrong Liu, Yankun Shi, Yuan Zengy, Yi Gong

◆ Pattern Recognition and Classification
Detection and Classification of Cervical Exfoliated Cells Based on Faster R-CNN*........................................52

Jun Du, Xueyu Li, Qinghua Li
Facial Expression Sequence Interception Based on Feature Point Movement.................................................58

Jizheng Yi, Yi Sima, Mengna Zhou, Jieqiong Yang
Epileptic EEG Identification Based on Deep Bi-LSTM Network ........................................................................63

Xinmei Hu, Qi Yuan
Cross-Domain Variational Autoencoder for Recommender Systems ..........................................................67

Jiarui Shi, Quanmin Wang
Epileptogenic Region Detection Based on Deep CNN with Transfer Learning ...........................................73

Guiguo Qu, Qi Yuan
An Effective Personnel Detection System Based on Radio Frequency Identification ....................................78

Zhijun Wang, Qian Zhang, Hao Jia, Xueming Duan, Xinyu Huo, Zhaoxin Zhang, Peng Lan, Fenggang Sun
Reassembly of Two-Dimensional Irregular Fragments by Improved Polygon Feature Matching ..................82

Qifeng Zhang, Ling Li, Ranran Fang, Huamei Xin
Pulmonary Nodules Detection Based on CNN Multi-scale Feature Fusion ................................................86

Hui Shi, Zhenwei Peng, Honglin Wan

◆ Wireless Communication and Networking
5G Small Cell Detection Method ...................................................................................................................91

Xin Gao
Average Associating Rate Modeling in Hyper-Dense Heterogeneous Wireless Cell Networks ..................96

Shuguang Fang, Rizhao Tang, Haibo Li, Yan Li
Research on the Model of 5G Front-Haul Network ....................................................................................101

Yan Jiang, Xinjian Yang
Deep Investigation of Coherent Integral Acquisition Algorithm of GNSS Signals ..................................105

Faqin Gao
The Application of the Internet of Things Technology in Apple Production ............................................109

Zhijun Wang, Yucun Wang, Peng Lan, Fenggang Sun
Single Image Super-Resolution Based on Cascaded Recursive Residual Convolutional Neural Network .......................................................................................................................................................... 113

Chao Wang, Wen Gao, Xiaorui Guo, Jianping Qiao, Chunxing Wang

A Simulation Platform for Software Defined Integrated Space Ground Network ....................... 118

Kexin Li, Bingli Guo, Shangguo Huang, Xiang Guo, Tao Dong, Jie Yin, Zhihui Liu, Tingting Zhang, Junting Du

Machine Learning for Fiber Nonlinearity Mitigation in Long-Haul Coherent Optical Transmission Systems .................................................................................................................................... 124

Yifan Liu, Bowei Yang, Tianhua Xu

A Novel Nuclei Segmentation Algorithm Based on Convolutional Neural Network .................. 128

Xiaorui Guo, Wen Gao, Chao Wang, Chunxing Wang

Application of Internet of Things Positioning System Based on LoRa System to Community Correction ............................................................................................................................................. 133

Qingran Lin, Jianping Zeng

Hybrid System of Convolutional Neural Networks and SVM for Multi-class MIEEG Classification 137

Xiaqing Shi, Jimin Yang

Design of Localization System Based on Ultra-Wideband and Long Range Wireless............... 142

Zhengdong Li, Xiuling Li, Gang Mou, Decai Jiang, Xingzong Bao, Yulin Wang

An Efficient Broadcast Relay in Support of FANETs ........................................................................ 147

Hang Zhang, Hao Lu, Liren Zhang

◆ Computer Science

Zhiqing Sun, Yan Li, Weiyan Zhang

An Empirical Evaluation on Word Embeddings Across Reading Comprehension ...................... 157

Yingjie Gu, Xiaolin Gui, Yi Shen, Dong Liao

Automatic Generation of Pulmonary Radiology Reports with Semantic Tags .......................... 162

Mengdan Gu, Xin Huang, Yu Fang

Model Research on Forecast of Second-Hand House Price in Chengdu Based on XGboost Algorithm ........................................................................................................................................ 168

Zhen Peng, Qiang Huang, Yincheng Han

Privacy Preserving Distributed Data Mining Based on Secure Multi-party Computation ........... 173

Yu Zhou, Yuan Tian, Fang Liu, Jun Liu, Yan Zhu
Comprehensive Evaluation of Fire Risk for High-Rise Civil Buildings Based on Fuzzy Analytic Hierarchy Process .................................................................................................................................. 179

Ying Li, Ya Li, Qian Wu, Xiaowei Lu, Lei Han

Detection of Dibutyl Phthalate (DBP) Content in Liquor Based on Near Infrared Technology ... 186

Bin Zhang, Guobing Sun, Panxiang Rong, Xiangfa Zhao

Research on Evaluation Model for Transportation Efficiency of Equipment Based on Subjective and Objective Combination Weighting Method .............................................................................. 191

Wu Qian, Li Ya, Li Ying, Xu Yingcheng, Lu Xiaowei

iReportMo: An Emergency Report Android Mobile Application for Metro Manila ....................... 199

Joie Ann Maghanoy

Prediction and Analysis of Pseudomonas Aeruginosa Promoters Based on Sequence Features ................................................................................................................................................................. 203

Xiao Liu, Zhirui Guo, Ting He, Meixiang Ren

Experimental Investigation of Light Distribution and Fluctuation Characteristics under Different Weather Conditions in Xi’an Area ........................................................................................................................................... 207

Wu Pengfei, Li Teng, You Guangyu, Jia Zhijuan

Applying Deep Learning to Balancing Network Intrusion Detection Datasets .............................. 213

Po-Jen Chuang, Dong-Ye Wu

A Study on the Effects of Distance Learning and the Application of 5G Technology ..................... 218

Lu Zhongmei, Huang Yu-Che, Bangjun Cui

FPGA-Based Rapid Electroencephalography Signal Classification System ................................... 223

Xingguang Ma, Wenkai Zheng, Zujian Peng, Jimin Yang

Real-Time Data Processing in Sparse SAR Imaging ........................................................................... 228

Hui Bi, Guoan Bi, Bingchen Zhang, Wen Hong

Author Index
