

18th International Conference on Sheet Metal (SHEMET 2019)

**New Trends and Developments
in Sheet Metal Processing**

Procedia Manufacturing Volume 29

Leuven, Belgium
15-17 April 2019

Editors:

**Joost R. Duflou
Yannick Carette
Livan Fratini**

**Fabrizio Micari
Marion Merklein
Hinnerk Hagenah**

ISBN: 978-1-7138-0099-6

Table of Contents

Editorial

Joost R. Duflo	1
----------------	---

Incremental Sheet Forming

1. Knowledge-based incremental sheet metal free-forming using probabilistic density functions and voronoi partitioning Christoph Hartmann, and Wolfram Volk	4
2. Experimental investigation and finite element modelling of residual stress control in disc springs made of metastable austenitic stainless steel (MASS) using incremental sheet forming (ISF) Fawad Maqbool, Ramin Hajavifard, Frank Walther, and Markus Bambach	12
3. Heat supported single point incremental forming of hybrid laminates for orthopedic applications Amar Al-Obaidi, Alexander Graf, Verena Kräusel, and Maik Trautmann	21
4. Multi-step incremental forming using local feature based toolpaths Yannick Carette, Hans Vanhove, and Joost R. Duflo	28
5. Evaluation and simulation on deformation instability mechanism in laminated sheet incremental forming Renhao Wu, Meng Li, Qi Hu, Sheng Cai, Zhiheng Wang, and Jun Chen	36
6. The numerical method for predicting failure in single point incremental forming using a new anisotropic ductile fracture model Xuepeng Zhan, Qi Hu, Zhiheng Wang, Sheng Cai, and Jun Chen	45
7. Influence of tool path strategies on the residual stress development in single point incremental forming Fabian Maaß, Marlon Hahn, Mateus Dobecki, E. Thannhäuser, A. Erman Tekkaya, and Walter Reimers	53
8. Experimental and finite element investigation of over-bending phenomenon in Double-Sided Incremental Forming (DSIF) of aluminium sheets Wenxuan Peng, Meng Li, Bin Lu, Jun Chen, Adib Becker, and Hengan Ou	59
9. Automated parameterization of local support at every toolpath point in robot-based incremental sheet forming Denis Störkle, Peter Altmann, Dennis Möllensiep, Lars Thyssen, and Bernd Kuhlenkötter	67
10. An explorative study on the influence of an elliptical tool on incremental forming Hans Vanhove, Yannick Carette, and Joost R. Duflo	74
11. SPIF of tailored sheets to optimize thickness distribution along the shaped wall Giuseppina Ambrogio, Francesco Gagliardi, Giuseppe Serratore, Ernesto Ramundo, and Luigino Filice	80
12. Improving the accuracy of double-sided incremental forming simulations by considering kinematic hardening and machine compliance Dohyun Leem, Newell Moser, Huaqing Ren, Mojtaba Mozaffar, Kornel F. Ehmann, and Jian Cao	88
13. Prediction of cracks within cones processed by single point incremental forming Ehssen Betaieb, Sibó Yuan, Carlos Felipe Guzman, Laurent Duchêne, and Anne-Marie Habraken	96
14. Incremental sheet metal forming on the example of car exterior skin parts Sören Scheffler, Alexander Pierer, Peter Scholz, Sebastian Melzer, Dieter Weise, and Zdeněk Rámbousek	105

15. Manufacture of an aerospace component by single point incremental forming Pranav Gupta, and Jacob Jeswiet.....	112
16. The effect of process parameters on forming forces in single point incremental forming Maheshwar Dwivedy, and Vinayak Kalluri.....	120
17. Haptic metal spinning Iacopo M. Russo, Christopher J. Cleaver, and Julian M. Allwood.....	129
18. Processing maps for wrinkle free and quality enhanced parts by shear spinning Thomas Childerhouse, and Hui Long.....	137
19. An investigation of mandrel-free spinning Kishore Jawale, and Evripides G. Loukaides	145
Bending	
20. Enhanced springback prediction for bending of high-strength spring steel using material data from an inverse modelling approach Chris Mertin, Thomas Stellmacher, Roman Schmitz, and Gerhard Hirt.....	153
21. Physics of large radius air bending Richard Aerens, Vitalii Vorkov, and Joost R. Duflou	161
22. On the forming mechanisms of frictionally engaged linear processes under consideration of incremental swivel bending (ISB) Peter Frohn, Linda Borchmann, and Bernd Engel	169
23. Data-driven prediction of air bending Vitalii Vorkov, Alberto Tomás García, Gonçalo Costa Rodrigues, and Joost R. Duflou.....	177
24. Springback prediction and elasticity modulus variation Richard Aerens, Vitalii Vorkov, and Joost R. Duflou	185
Deep drawing and Stamping	
25. Investigation on friction behaviour of deep drawing radii using volatile media as lubricant substitutes Gerd Reichardt, and Mathias Liewald.....	193
26. Experimental investigation of tool-sided surface modifications for dry deep drawing processes at the tool radii area Kim Krachenfels, Benedict Rothhammer, Stephan Tremmel, and Marion Merklein	201
27. Influence of binder pressure zones on the robustness of restraining forces in sheet metal forming Salvatore Leocata, Thomas Senner, Jean-Marc Saubiez, and Alexander Brosius.....	209
28. New process design for reduction of springback by forming with alternating blank draw-in Ranko Radonjic, and Mathias Liewald	217
29. Removal of thin oxide scale by ultrasonic cleaning with diluted hydrochloric acid in hot stamping of bare 22MnB5 sheet using resistance heating Tomoyoshi Maeno, Ken-ichiro Mori, Tomoki Ogihara, and Tomohiro Fujita.....	225
Presses and Press tools	
30. Sheet metal bending with flexible tools Veronica Geraldine Zaragoza, Matteo Strano, Lorenzo Iorio, and Michele Monno.....	232
31. Closed-loop control of eccentric presses based on inverse kinematic models Florian Hoppe, Clemens Pihan, and Peter Groche	240
32. A contribution to multi-channel sheet hydroforming Viorel Paunoiu, Virgil Teodor, Nicusor Baroiu, and Catalina Maier.....	248

33. Process monitoring and real time algorithmic for hot stamping lines Robert Vollmer, and Christian Palm	256
Joining	
34. Increasing flexibility of self-pierce riveting using numerical and statistical methods Tobias Falk, and Mathias Jäckel.....	264
35. Process development for self-pierce riveting with solid formable rivet of boron steel in multi-material design Thomas Grimm, and Welf-Guntram Drossel.....	271
36. Numerical simulation of high-speed joining of sheet metal structures Gerson Meschut, David Hein, and Michael Gerken	280
37. Joining by forming of lightweight sandwich composite panels T.R.M. Contreiras, J.P.M. Pragana, I.M.F. Bragança, C.M.A. Silva, L.M. Alves, and P.A.F. Martins	288
38. Combined deep drawing and fusion bonding of structural FRP-metal hybrid parts Behrens Bernd-Arno, Klaus Dilger, Kristian Lippky, Lukas Kaempf, Sven Hübner, Sven Hartwig, Yunus Altun, Max Gabriel, Ehsan Farahmand, and Moritz Micke-Camuz.....	296
39. A comparison of resistance spot weld quality assessment techniques Cameron Summerville, Paul Compston, and Matthew Doolan	305
40. Investigation of the effects of femtosecond laser metal surface texturing on bonding of PA 6 to steel Victoria Zinnecker, Christopher Stokes-Griffin, Steve Madden, Andrei Rode, and Paul Compston.....	313
41. Steel-CF/PA 6 hybrids manufactured by a laser tape placement process: Effect of first-ply placement rate on lap shear strength for garnet blasted substrates Chris Stokes-Griffin, Andreas Kollmannsberger, Paul Compston, and Klaus Drechsler.....	321
42. Analysing resistance element welding with upset auxiliary joining steel-elements under shear load Mario Meinhardt, Martin Endres, Michael Graf, Michael Lechner, and Marion Merklein	329
43. Assessing the influence of fieldshaper material on magnetic pulse welded interface of Al/Cu joints Jishuai S. Li, Rija Raelison, Thaneshan Sapanathan, Guillaume Racineux, and Mohamed Rachik.....	337
Cutting	
44. Warm and cold blanking of manganese-boron steel 22MnB5 with different tool geometries Franz Ferdinand Neumayer, Simon Vogt, Marc Gueffroy, Gerhard Jesner, Reiner Kelsch, Marc Geile, Andreas Sommer, Roland Golle, and Wolfram Volk.....	345
45. An analytical approach for the determination of the temperature distribution in the cross section of a sheet metal caused by inductive heating Ingo Felix Weiser, Robby Mannens, Andreas Feuerhack, Daniel Trauth, and Thomas Bergs.....	353
46. Shearing clearance and shaving allowance to minimize die-roll formation in shaving process Arkarapon Sontamino, and Sutasn Thipprakmas	361
47. Fast laser cutting of thin metal Andreas Wetzig, Patrick Herwig, Jan Hauptmann, Robert Baumann, Peter Rauscher, Michael Schlosser, Thomas Pinder, and Christoph Leyens	369
48. Diagnostics for laser cutting efficiency using computational fluid dynamics Julien Christophe, and Philippe Planquart.....	375
49. Thickness validation of modeling tools for laser cutting applications Gonçalo Costa Rodrigues, Nikita Levichev, Vitalii Vorkov, and Joost R. Duflou	383

Materials and Testing

50. Using image processing on Erichsen cup test machine to calculate anisotropic property of sheet metal Thanapat Sangkharat, and Surangsee Dechjarern	390
51. Digital image correlation and optical strain measuring in bendability assessment of ultra-high strength structural steels Anna-Maija Arola, Antti Kaijalainen, Vili Kesti, A-P. Pokka, and Jari Larkiola	398
52. Cross-profile deep drawing of magnesium alloy AZ31 sheet metal for springback analysis under various temperatures Sebastian Suttner, Harald Schmid, and Marion Merklein	406
53. Open hole tensile tests for the determination of the edge-crack sensitivity of sheared holes dependent on specimen geometry, cutting parameters, and the notch factor Martin Feistle, Isabella Pätzold, Roland Golle, and Wolfram Volk	412
54. A semi-analytical model for inverse identification of cyclic material data from measured forces during roller levelling Markus Grüber, and Gerhard Hirt	420
55. Numerical modeling of the 22MnB5 formability at high temperature Giulia Venturato, Stefania Bruschi, Andrea Ghiotti, and Xiao Chen	428
56. Analysis of mechanical behaviour of AA6082-T6 sheets deformed at low temperatures Stefania Bruschi, Rachele Bertolini, Enrico Simonetto, and Andrea Ghiotti.....	435
57. Experimental and numerical characterization method for forming behavior of thermoplastics reinforced with woven fabrics Bernd-Arno Behrens, Alexander Chugreev, and Hendrik Wester	443
58. Stress-state dependent fracture characterisation and modelling of an AZ31 magnesium sheet alloy at elevated temperatures Bernd-Arno Behrens, Alexander Chugreev, and Matthäus Dykiert	450
59. Damage characterization on heterogeneous tensile tests Niklas Küsters, and Alexander Brosius	458
60. Approach for modelling the Taylor-Quinney coefficient of high strength steels Bernd-Arno Behrens, Alexander Chugreev, Florian Bohne, and Ralf Lorenz	464
61. Experimental and numerical studies on formability of tailor welded blanks of high strength steel Vijay Gautam, and Arvind Kumar.....	472
62. Thermo-mechanical forming procedure of high strength aluminum sheet with improved mechanical properties and process efficiency Emad Scharifi, Ruben Knoth, and Ursula Weidig	481
63. Temperature-based determination of the onset of yielding using a new clip-on device for tensile tests Simon Vitzthum, Christoph Hartmann, Matthias Eder, and Wolfram Volk.....	490
64. The deformation behavior of steel SPHC during ferrite rolling in CSP process Yazheng Liu, Xuewen Hu, Guoning He, Bo Jiang, and Chaolei Zhang	498

Modelling techniques

65. Surface roughness influences on localization and damage during forming of DP1000 sheet steel Sebastian Münstermann, Peerapon Wechsuanmanee, Wenqi Liu, and Junhe Lian.....	504
66. Friction in sheet metal forming: influence of surface roughness and strain rate on sheet metal forming simulation results Mats Sigvant, Johan Pilthammar, Johan Hol, Jan Harmen Wiebenga, Toni Chezan, Bart Carleer, and Ton van den Boogaard.....	512

67. Load path modelling in single-step deep drawing of rotationally symmetric cups Matthias Nick, Robby Mannens, Daniel Trauth, and Thomas Bergs	520
68. Formability prediction of advanced high-strength steel sheets by means of combined experimental and numerical approaches Sansot Panich, Komkamol Chongbunwatana, and Maitri Kamonrattapisud	528
69. An analytic solution for bending under tension of a two-layer strip of strain hardening materials Sergei Alexandrov, Elena Lyamina, and Moslemi Naeini.....	536
Manufacturing systems	
70. On course to smart large-diameter pipe production Mario Thome, and Susanne Zeller	544
71. New compensation strategy for car bonnet assemblies Felix Schuler, Mathias Liewald, and Diego Marques Bezerra.....	552
72. Aluminium sheet metal scrap recycling through friction consolidation Dario Baffari, Gianluca Buffa, Giuseppe Ingarao, Attilio Masnata, and Livan Fratini	560
73. Software development for cutting tool routing problems Tatiana Makarovskikh, Anatoly Panyukov, and Egor Savitsky.....	567
74. Nesting in the sheet metal industry: dealing with constraints of flatbed laser-cutting machines Frederick Struckmeier, and Fernando Puente León	575
75. Data quality assessment for improved decision-making: a methodology for small and medium-sized enterprises Lisa C. Günther, Eduardo Colangelo, Hans-Hermann Wiendahl, and Christian Bauer	583
Quality and Reliability	
76. Sensitivity analysis of the rotary draw bending process as a database of digital equipping support Linda Borchmann, Christopher Kuhnhen, Peter Frohn, and Bernd Engel	592
Surface conditioning	
77. Investigation of different surface treatment parameters in the context of roll bonding processes Sandra Schödel, Jürgen Herrmann, and Marion Merklein	600
78. Surface structuring using multi-stage grinding strategies based on geometric physically-based process simulations Tobias Siebrecht, Nils Potthoff, Petra Wiederkehr, and Dirk Biermann	608
