Volume 11189

Proceedings of SPIE 0277-786X, V. 11189

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optical Metrology and Inspection for Industrial Applications VI*, edited by Sen Han, Toru Yoshizawa, Song Zhang, Benyong Chen, Proceedings of SPIE Vol. 11189 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*

ix *Symposium Committees*

xiii *Conference Committee*

OPTICAL METROLOGY METHODS I

11189 02 **How can a plenoptic camera be used as a metrology tool? (Invited Paper)** [11189-1]

11189 03 **A spin self-sustaining atomic magnetometer for high-precision measurements in large magnetic fields** [11189-2]

11189 04 **In-situ detection and evaluation of wear state of micro-powder diamond wheel in optics grinding** [11189-3]

11189 05 **Interferometric and deflectometric flatness metrology with nanometre measurement uncertainties for optics up to 1 metre at PTB (Invited Paper)** [11189-4]

11189 06 **A three-dimension high-precision and non-contact dynamic angular displacement measurement system based on heterodyne interference** [11189-5]

OPTICAL METROLOGY METHODS II

11189 07 **Transmission measurement by using different wavelengths than designed wavelength (Invited Paper)** [11189-6]

11189 08 **Phase unwrapping and range enlargement in phase-shifting dual-wavelength digital holography** [11189-7]

11189 09 **Microscopic fringe projection profilometry comparison based on stereoscopic microscope and telecentric lenses** [11189-8]

11189 0A **Temporal phase unwrapping using multi-scale deep neural networks (Invited Paper)** [11189-9]

11189 0B **High-speed 3D shape measurement with the multi-view system using deep learning** [11189-10]

11189 0C **Detect curing extent of conformal coating using speckle variance optical coherence tomography** [11189-11]

OPTICAL METROLOGY METHODS III

11189 0D **Improve 3D shape reconstruction with dual-camera measurement fusion (Invited Paper)** [11189-12]

11189 0F **Detection and recognition of water quality based on UV-visible spectroscopy in different living areas of Urumqi** [11189-14]

OPTICAL METROLOGY METHODS IV

11189 0I **Two-wavelengths digital holography for erosion measurements inside the ITER Tokamak** [11189-73]

11189 0J **The application of Ag+ detection based on porous silicon SERS substrates** [11189-18]

OPTICAL METROLOGY METHODS V

11189 0L **Multilateration with laser tracker applied in large-scale coordinate calibration** [11189-22]

11189 0M **Exploratory study on rapid identification of arsenic in water based on Raman spectroscopy** [11189-23]

OPTICAL METROLOGY METHODS VI

11189 0N **Development and characterization of nanometer film thickness standards (Invited Paper)** [11189-24]

11189 0O **Discontinuity-induced measurement artifact reduction of structured light system based on a deconvolution method** [11189-27]

11189 0P **Research on full-aperture surface shape in-situ measurement technology for grinding large diameter optics** [11189-28]

OPTICAL METROLOGY METHODS VII

11189 0Q **High accurate three-dimensional shape measurement of discontinuous specular surfaces by stereo direct phase-measuring deflectometry (Invited Paper)** [11189-29]

11189 0S **Optical metrology for the morphological characterization of surfaces: limitations, innovations, registration and new directions (Invited Paper)** [11189-31]

OPTICAL METROLOGY APPLICATIONS I

11189 0W **Random two-step phase estimation based on Lissajous ellipse fitting method with light source intensity instability** [11189-35]

11189 0X **A new method for fringe order error correction in fringe projection profilometry** [11189-40]

OPTICAL METROLOGY APPLICATIONS II

11189 0Y **High-speed 3D measurements at 20,000Hz with deep convolutional neural networks (Invited Paper)** [11189-37]

11189 0Z **Fringe projection profilometry for the 3D shape measurement of objects with three-dimensional movements** [11189-38]

11189 10 **Optical cryptosystem with complementary masks (Invited Paper)** [11189-39]

11189 11 **Experimental study on defect detection method for spherical surface** [11189-41]

11189 12 **Prediction of the angle of rotation to be caused by optical rotation phenomenon in optical active materials and observation of resultant changes in visible colors of transmitting light beams** [11189-42]

POSTER SESSION

11189 14 **A planar pattern based calibration method for high precision structured laser triangulation measurement** [11189-21]

11189 16 **A novel calibration transfer method of NIR spectra to identify ultra-low concentration of pesticide residues** [11189-43]

11189 18 **Method for evalutating strength of photogrammetry network based on attenuation factor** [11189-45]

11189 19 **Defect detection of optical elements surfaces using curvelet transform** [11189-46]

11189 1A **System construction and uncertainty evaluation of absolute measurement of infrared spectral radiance** [11189-47]

11189 1B **Partial reconstruction of phase of interference pattern based on a generalized discrete Fourier transform** [11189-48]

11189 1C **Inversion algorithm for detection of H_2S gas concentration by differential absorption spectroscopy** [11189-49]

11189 1D **Odorous emission monitoring based on differential optical absorption spectroscopy** [11189-50]

11189 1E **Ultra-low flue gas emission monitoring based on differential optical absorption spectroscopy** [11189-51]

11189 1G **An automatic metrology using the laser displacement sensor for the corrugation height of corrugated plate** [11189-53]

11189 1H **Study of vehicle exhaust detection based on TDLAS** [11189-54]

11189 1I **Phase correction method for dynamic 3D measurement based on fringe projection** [11189-55]

11189 1J **New calibration approach for 3D measurement system based on the light-source-stepping method** [11189-56]

11189 1L **Thickness measurement opaque material by swept source optical coherence tomography** [11189-58]

11189 1M **Colored Ronchi pattern for fringe projection profilometry** [11189-59]

11189 1N **Temperature compensation for LED filament standard lamps** [11189-60]

11189 1P **Single-shot 3D shape measurement with spatial frequency multiplexing using deep learning** [11189-62]

11189 1Q **Realization of high-intensity focusing ultrasound pressure and detection of sound field** [11189-63]

11189 1R **Space-time adaptive: system, resolution, and configuration** [11189-64]

11189 1S **Research on nondestructive measurement of spectral responsivity of photovoltaic modules** [11189-65]

11189 1T **Spectral responsivity measurements of monolithic GaInP$_2$/InGaAs/Ge triple-junction solar cells** [11189-66]

11189 1V **Uncertainty evaluation of colour correction factor using Monte Carlo method in LED photometry measurement** [11189-68]

11189 1W **Implementation of moving target detection and tracking algorithms based on FPGA** [11189-69]

11189 1X **Research on 24-h forecasting of solar irradiance based on multilayer perceptron model** [11189-70]

11189 1Y **Lucky imaging system on FPGA by using ethernet transmission** [11189-71]
