2019 IEEE 31st International Conference on Tools with Artificial Intelligence (ICTAI)

ICTAI 2019

Table of Contents

General Chair's Foreword ..... **xxxviii**
Message from the ICTAI Program Chair ..... **xxxix**
ICTAI 2019 Conference Committees ..... **xl**
Program Area Chairs ..... **xli**
Program Committee ..... **xlii**

SATISFIABILITY - 1

Benchmarking Symbolic Execution Using Constraint Problems - Initial Results 1
Sahil Verma (IIT Kanpur, India) and Roland H.C. Yap (National University of Singapore, Singapore)

On Solving Exactly-One-SAT 10
Yazid Mohamed Boumarafi (CRIL- Artois University CNRS) and Yakoub Salhi (CRIL- Artois University CNRS)

Guaranteed Diversity & Quality for the Weighted CSP 18
Manon Ruffini (Institut National de la Recherche Agronomique), Jelena Vucinic (Institut National de la Recherche Agronomique), Simon de Givry (Institut National de la Recherche Agronomique), George Katsirelos (MIA-Paris UMR518), Sophie Barbe (LISBP, Université de Toulouse), and Thomas Schiex (Institut National de la Recherche Agronomique)

Automating Elevator Design with Satisfiability Modulo Theories 26
Stefano Demarchi (Università di Sassari), Marco Menapace (Università di Genova), and Armando Tacchella (University of Genoa)

Synthesis of Boolean Networks from Biological Dynamical Constraints using Answer-Set Programming 34
Stéphanie Chevalier (Université Paris-Sud, France), Christine Froidevaux (Université Paris-Sud, France), Loïc Paulevé (CNRS, France), and Andrei Zinovyev (Institut Curie, France)

Exploiting Data Mining Techniques for Compressing Table Constraints 42
Soufia Bennai (University of Bejaia, Algeria), Kamal Amroun (University of Bejaia, Algeria), and Samir Loudni (University of Caen Normandy Caen, France)

SATISFIABILITY - 2

Combining Constraint Languages via Abstract Interpretation 50
Pierre Talbot (Université de Nantes, LS2N), David Cachera (Univ Rennes, Inria, CNRS, IRISA), Éric Monfroy (Université de Nantes, LS2N), and Charlotte Truchet (Université de Nantes, LS2N)

Centrality Heuristics for Exact Model Counting 59
Bernhard Bliem (University of Helsinki) and Matti Järvisalo (University of Helsinki)

Memory Efficient Parallel SAT Solving with Inprocessing 64
Markus Iser (Karlsruhe Institute of Technology, Germany), Tomás Balyo (Karlsruhe Institute of Technology, Germany), and Carsten Sinz (Karlsruhe Institute of Technology, Germany)

Refining Constraint Weighting 71
Hugues Wattez (CRIL, CNRS UMR 8188 - Université d'Artois), Christophe Lecoutre (CRIL, CNRS UMR 8188 - Université d'Artois), Anastasia Paparrizou (CRIL, CNRS UMR 8188), and Sébastien Tabary (CRIL, CNRS UMR 8188 - Université d'Artois)

A Survey on Applications of Quantified Boolean Formulas 78
Ankit Shukla (Johannes Kepler University Linz, Austria), Armin Biere (Johannes Kepler University Linz, Austria), Luca Pulina (University of Sassari, Italy), and Martina Seidl (Johannes Kepler University Linz, Austria)

PLANNING

Intention Interleaving Via Classical Replanning 85
Mengwei Xu (University of Bristol, Bristol, UK), Kevin McAreavey (University of Bristol, Bristol, UK), Kim Bauters (University of Bristol, Bristol, UK), and Weiru Liu (University of Bristol, Bristol, UK)

Multi-agent Path Planning with Heterogeneous Cooperation 93
Keisuke Otaki (Toyota Central R&D Labs., Inc.), Satoshi Koide (Toyota Central R&D Labs., Inc.), Keiichiro Hayakawa (Toyota Central R&D Labs., Inc.), Ayano Okoso (Toyota Central R&D Labs., Inc.), and Tomoki Nishi (Toyota Central R&D Labs., Inc.)

Collision-Free Path Finding for Dynamic Gaming and Real Time Robot Navigation 101
Roopam Bamal (University of Tromsø – The Arctic University of Norway , UiT)

Routing Sales Territory by Solving a Multi-objective TSP Variant with Evolutionary Algorithms 109
Sávio Menezes Sampaio (Institute of Informatics, Federal University of Goias), Altino Dantas (Institute of Informatics, Federal University of Goias), and Celso G. Camilo-Junior (Institute of Informatics, Federal University of Goias)

A Comparison of Contextual Bandit Approaches to Human-in-the-Loop Robot Task Completion with Infrequent Feedback 117
Matthew McNeill (Fordham University, United States) and Damian Lyons (Fordham University, United States)

Random Walk-Based Top-k Tag Generation in Bipartite Networks of Entity-Term Type 125
Mingxi Zhang (University of Shanghai for Science and Technology, China), Guanying Su (University of Shanghai for Science and Technology, China), and Wei Wang (Fudan University, China)

REASONING

Cases without Borders: Automating Knowledge Acquisition Approach using Deep Autoencoders and Siamese Networks in Case-Based Reasoning 133
Kareem Amin (DFKI / TU Kaiserslautern)

Fence GAN: Towards Better Anomaly Detection 141
*Phuc Cuong Ngo (Hwa Chong Institution (College Section), Singapore), Amadeus Aristo Winarto (Hwa Chong Institution (College Section), Singapore), Connie Khor Li Kou (Agency for Science, Technology and Research (A*STAR), National University of Singapore, Singapore), Sojeong Park (Agency for Science, Technology and Research (A*STAR) Singapore Chosun University, South Korea), Farhan Akram (Agency for Science, Technology and Research (A*STAR), Singapore), and Hwee Kuan Lee (Agency for Science, Technology and Research (A*STAR), National University of Singapore, Singapore Eye Research Institute (SERI), Image and Pervasive Access Laboratory (IPAL), Singapore)*

An End-to-End Abnormal Fastener Detection Method Based on Data Synthesis 149
Bangyi Dong (Beijing Key Lab of Transportation Data Analysis and Mining, Beijing Jiaotong University, Beijing), Qingyong Li (Beijing Key Lab of Transportation Data Analysis and Mining, Beijing Jiaotong University, Beijing), Jianzhu Wang (Beijing Key Lab of Transportation Data Analysis and Mining, Beijing Jiaotong University, Beijing), Wei Huang (Beijing Key Lab of Transportation Data Analysis and Mining, Beijing Jiaotong University, Beijing), Peng Dai (Infrastructure Inspection Research Institute, China Academy of Railway Sciences LTD, Beijing), and Shengchun Wang (Infrastructure Inspection Research Institute, China Academy of Railway Sciences LTD, Beijing)

Reasoning About Future Cyber-Attacks Through Socio-Technical Hacking Information 157
Ericsson Marin (Arizona State University), Mohammed Almukaynizi (Arizona State University), and Paulo Shakarian (Arizona State University)

Automated Mechanism Design: Compact and Decomposition Linear Programming Models 165
Brigitte Jaumard (Concordia University), Kia Babashahi Ashtiani (Concordia University), and Nicolas Huin (Huawei)

DEEP LEARNING - 1

Deep Reinforcement Learning with Model-Based Acceleration for Hyperparameter Optimization 170
SenPeng Chen (University of Electronic Science and Technology of China), Jia Wu (chensp@std.uestc.edu.cn), and XiuYun Chen (University of Electronic Science and Technology of China)

Internet of Things Security Analytics and Solutions with Deep Learning 178
Luke Holbrook (University of Texas at San Antonio) and Miltiadis Alamaniotis (University of Texas at San Antonio)

Deep Reinforcement Learning for Time Optimal Velocity Control using Prior Knowledge 186
Gabriel Hartmann (Ariel university, Israel), Zvi Shiller (Ariel university, Israel), and Amos Azaria (Ariel university, Israel)

Shallow Deep Learning: Embedding Verbatim K-Means in Deep Neural Networks 194
Len Du (Australian National University)

Coordination in Adversarial Multi-Agent with Deep Reinforcement Learning Under Partial Observability..... 198
Elhadji Amadou Oury Diallo (Waseda University, Japan) and Toshiharu Sugawara (Waseda University, Japan)

Parallel Gym Gazebo: a Scalable Parallel Robot Deep Reinforcement Learning Platform 206
Zhen Liang (National University of Defense Technology, China), Zhongxuan Cai (National University of Defense Technology, China), Minglong Li (National University of Defense Technology, China), and Wenjing Yang (National University of Defense Technology, China)

MACHINE LEARNING - 1

Adversarial Capsule Learning for Network Embedding 214
Di Jin (Tianjin University, China), Zhigang Li (Tianjin University, China), Liang Yang (Hebei University of Technology, China), Dongxiao He (Tianjin University, China), Pengfei Jiao (Tianjin University, China), and Lu Zhai (Tianjin University, China)

Semi-Supervised Ovulation Detection Based on Multiple Properties 222
Amos Azaria (Ariel University) and Seagal Azaria (Mayanei Hayeshua Medical Center)

Distant-Supervised Relation Extraction with Hierarchical Attention Based on Knowledge Graph 229
Hong Yao (China University of Geosciences, Wuhan, China), Lijun Dong (China University of Geosciences, Wuhan, China), Shiqi Zhen (China University of Geosciences, Wuhan, China), Xiaojun Kang (China University of Geosciences, Wuhan, China), Xinchuan Li (China University of Geosciences, Wuhan, China), and Qingzhong Liang (hina University of Geosciences, Wuhan, China)

Approximating Learning Curves for Imbalanced Big Data with Limited Labels 237
Aaron N. Richter (Florida Atlantic University) and Taghi M. Khoshgoftaar (Florida Atlantic University)

An Adjusted Nearest Neighbor Algorithm Maximizing the F-Measure from Imbalanced Data 243
Rémi Viola (Université Saint-Etienne, DGFiP, France), Rémi Emonet (Université Saint-Etienne, France), Amaury Habrard (Université Saint-Etienne, France), Guillaume Metzler (Université Saint-Etienne, France), Sébastien Riou (DGFiP, France), and Marc Sebban (Université Saint-Etienne, France)

The Concept of Criticality in Reinforcement Learning 251
Yitzhak Spielberg (Ariel University) and Amos Azaria (Ariel University)

NLP / NLU - 1

Math Expression Image Retrieval via Attention-Based Framework 259
Caili Wu (East China Normal University), Zhao Zhou (Videt Tech Ltd.), Hao Ye (Videt Tech Ltd.), Jing Yang (East China Normal University), and Liang He (East China Normal University)

Sentence-Level Semantic Features Guided Adversarial Network for Zhuang Language Part-of-Speech Tagging 265
Zhixin Li (Guangxi Normal University), Yaru Sun (Guangxi Normal University), Suqin Tang (Guangxi Normal University), Canlong Zhang (Guangxi Normal University), and Huifang Ma (Northwest Normal University)

Text-Independent Speaker ID Employing 2D-CNN for Automatic Video Lecture Categorization in a MOOC Setting 273
Ali Shariq Imran (Norwegian University of Science and Technology, Norway), Zenun Kastrati (Linnaeus University, Sweden), Torbjørn Karl Svendsen (Norwegian University of Science and Technology, Norway), and Arianit Kurti (Linnaeus University, Sweden)

Document Clustering and Topic Modeling: A Unified Bayesian Probabilistic Perspective 278
Gianni Costa (ICAR-CNR, Italy) and Riccardo Ortale (ICAR-CNR, Italy)

Improving Irregular Text Recognition by Integrating Gabor Convolutional Network 286
Zhaohong Guo (Chongqing Institute of Green and Intelligent Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Hui Xu (Chongqing Institute of Green and Intelligent Technology, Chinese Academy of Sciences, China), Feng Lu (Chongqing Institute of Green and Intelligent Technology, Chinese Academy of Sciences, China), Qiufeng Wang (Xian Jiaotong-Liverpool University, China), Xiangdong Zhou (Chongqing Institute of Green and Intelligent Technology, Chinese Academy of Sciences, China), and Yu Shi (Chongqing Institute of Green and Intelligent Technology, Chinese Academy of Sciences, China)

Aspect-Based Sentiment Analysis with Adjustments to Irrelevant Sentimental-Related Features 294
Huiwen Jiang (Sun Yat-sen University, China), Weigang Wu (Sun Yat-sen University, China), and Jiangtao Ren (Sun Yat-sen University, China)

NLP / NLU - 2

Deep Captioning Hashing Network for Complex Scene Image Retrieval 300
Song Liu (Shenzhen Graduate School, Peking University), Jiawei Zhan (Shenzhen Graduate School, Peking University), Zhengding Luo (Shenzhen Graduate School, Peking University), Gege Qi (Shenzhen Graduate School, Peking University), Zhiqiang Bai (Shenzhen Graduate School, Peking University), and Yuesheng Zhu (Shenzhen Graduate School, Peking University)

Text-Enhanced Knowledge Representation Learning Based on Gated Convolutional Networks 308
Chunfeng Liu (College of Intelligence and Computing, TianJin University, Tianjin Key Laboratory of Advanced Networking (TANK Lab), Tianjin Key Laboratory of Cognitive Computing and Application,), Yan Zhang (College of Intelligence and Computing, TianJin University,Tianjin Key Laboratory of Advanced Networking (TANK Lab), Tianjin Key Laboratory of Cognitive Computing and Application), Mei Yu (College of Intelligence and Computing, TianJin University,Tianjin Key Laboratory of Advanced Networking (TANK Lab), Tianjin Key Laboratory of Cognitive Computing and Application), Xuewei Li (College of Intelligence and Computing, TianJin University,Tianjin Key Laboratory of Advanced Networking (TANK Lab), Tianjin Key Laboratory of Cognitive Computing and Application), Mankun Zhao (College of Intelligence and Computing, TianJin University,Tianjin Key Laboratory of Advanced Networking (TANK Lab), Tianjin Key Laboratory of), Tianyi Xu (College of Intelligence and Computing, TianJin University,Tianjin Key Laboratory of Advanced Networking (TANK Lab), Tianjin Key Laboratory of Cognitive Computing and Application), Jian Yu (College of Intelligence and Computing, TianJin University,Tianjin Key Laboratory of Advanced Networking (TANK Lab), Tianjin Key Laboratory of Cognitive Computing and Application), and Ruiguo Yu (College of Intelligence and Computing, TianJin University,Tianjin Key Laboratory of Advanced Networking (TANK Lab), Tianjin Key Laboratory of Cognitive Computing and Application)

An Efficient Approach for Semantic Relatedness Evaluation Based on Semantic Neighborhood 316
Alcides Lopes (UFRGS), Renata Alvarenga (UFRGS), Joel Carbonera (UFRGS), and Mara Abel (UFRGS)

Semi-Supervised Cross-Modal Hashing Based on Label Prediction and Distance Preserving 324
Xu Zhang (Chongqing University of Posts and Telecommunications,China), Xin Tian (Chongqing University of Posts and Telecommunications,China), Bing Yang (China Academy of Electronics and Information Technology,China), Zuyu Zhang (Chongqing University of Posts and Telecommunications,China), and Yan Li (Inha University,South Korea)

Self-Learned Feature Reconstruction and Offset-Dilated Feature Fusion for Real-Time Semantic Segmentation 331
Gege Qi (Shenzhen Graduate School of Peking University), Lin Pan (Shenzhen Graduate School of Peking University), Song Liu (Shenzhen Graduate School of Peking University), Zhengding Luo (Shenzhen Graduate School of Peking University), and Yuesheng Zhu (Shenzhen Graduate School of Peking University)

Scaling up Prediction of Psychosis by Natural Language Processing 339
Dong Si (University of Washington Bothell, USA), Sunny Chieh Cheng (University of Washington Tacoma, USA), Ruiwen Xing (University of Washington Bothell, USA), Chang Liu (University of Washington Bothell, USA), and Hoi Yan Wu (University of Washington Bothell, USA)

NEURAL NETS - 1

Mini Lesions Detection on Diabetic Retinopathy Images via Large Scale CNN Features 348
Qilei Chen (The University of Massachusetts Lowell), Xinzi Sun (The University of Massachusetts Lowell), Ning Zhang (The University of Massachusetts Lowell), Yu Cao (The University of Massachusetts Lowell), and Benyuan Liu (The University of Massachusetts Lowell)

A Multi-channel Neural Network for Imbalanced Emotion Recognition 353
Ran Li (Chinese Academy of Sciences, China;University of Chinese Academy of Sciences, China), Qingyi Si (Chinese Academy of Sciences, China;University of Chinese Academy of Sciences, China), Peng Fu (Chinese Academy of Sciences, China), Zheng Lin (Chinese Academy of Sciences, China), Weiping Wang (Chinese Academy of Sciences, China), and Gang Shi (Chinese Academy of Sciences, China;University of Chinese Academy of Sciences, China)

Automatic 2D-to-3D Video Conversion using 3D Densely Connected Convolutional Networks 361
Bei Chen (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, Nanjing), Jiabin Yuan (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, Nanjing), and Xiuping Bao (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, Nanjing)

Predicting User Reported Symptoms Using a Gated Neural Network 368
Lahari Poddar (National University of Singapore), Wynne Hsu (National University of Singapore), and Mong Li Lee (National University of Singapore)

A Unified Approximation Framework for Compressing and Accelerating Deep Neural Networks 376
Yuzhe Ma (The Chinese University of Hong Kong), Ran Chen (The Chinese University of Hong Kong), Wei Li (The Chinese University of Hong Kong), Fanhua Shang (Xidian University), Wenjian Yu (Tsinghua University), Minsik Cho (IBM T. J. Watson), and Bei Yu (The Chinese University of Hong Kong)

SEARCH - RECOGNITION

A Probabilistic Forward Search Value Iteration Algorithm for POMDP 384
Feng Liu (Nanjing University), Cheng Lei (Nanjing University), Hanyi Liu (Nanjing University), and Chongjun Wang (Nanjing University)

A Divide and Conquer Algorithm for Dominance Testing in Acyclic CP-Nets 392
Sultan Ahmed (University of Regina, Canada) and Malek Mouhoub (University of Regina, Canada)

Generating Reduced Tests for FSMs using a Search-Based Testing Approach 400
Mariana Soller Ramada (Universidade Federal de Goiás, Brazil), Telma Woerle de Lima (Universidade Federal de Goiás, Brazil), Anderson da Silva Soares (Universidade Federal de Goiás, Brazil), and Adenilso Simao (Universidade de São Paulo, Brazil)

AERNs: Attention-Based Entity Region Networks for Multi-Grained Named Entity Recognition 408
Jianghai Dai (Beijing Institute of Technology, China), Chong Feng (Beijing Institute of Technology, China), Xuefeng Bai (Beijing Institute of Technology, China), Jinming Dai (Communication University of China, China), and Huanhuan Zhang (China Academy of Electronics & IT of CETC, China)

Monte Carlo Tree Search with Variable Simulation Periods for Continuously Running Tasks 416
Seydou Ba (The National Institute of Advanced Industrial Science and Technology (AIST), Japan), Takuya Hiraoka (NEC Security Research Laboratories, Japan), Takashi Onishi (NEC Security Research Laboratories, Japan), Toru Nakata (The National Institute of Advanced Industrial Science and Technology (AIST), Japan), and Yoshimasa Tsuruoka (The University of Tokyo, Japan)

KNORA-IU: Improving the Dynamic Selection Prediction in Imbalanced Credit Scoring Problems 424
Leopoldo Melo Jr (Universidade Federal do Ceará), Franco Maria Nardini (ISTI-CNR), Chiara Renso (ISTI-CNR), and José Antonio Macedo (Universidade Federal do Ceará)

METHODS - TOOLS-1

Agnostic Local Explanation for Time Series Classification 432
Maël Guillemé (Univ Rennes, Insa, Inria, CNRS, IRISA, France), Véronique Masson (Univ Rennes, Insa, Inria, CNRS, IRISA, France), Laurence Rozé (Univ Rennes, Insa, Inria, CNRS, IRISA, France), and Alexandre Termier (Univ Rennes, Insa, Inria, CNRS, IRISA, France)

Using Gradient Based Multikernel Gaussian Process and Meta-Acquisition Function to Accelerate SMBO 440
Daning Cheng (University of Chinese Academy of Sciences , China Institute of Computing Technology, China), Hanping Zhang (University at Buffalo, USA Wisdom Uranium technology Co.Ltd, China), Fen Xia (Wisdom Uranium technology Co.Ltd, China), Shigang Li (ETH Switzerland), and Yunquan Zhang (Institute of Computing Technology, China)

Ant Colony Optimization Parameters Control Based on Evolutionary Strength 448
Chen Chang (Army Engineer University), Jianjun Cao (The Sixty-third Research Institute, National University of Defense Technology), Nianfeng Weng (The Sixty-third Research Institute, National University of Defense Technology), and Guojun Lv (Army Engineer University)

Budget-Constrained Demand-Weighted Network Design for Resilient Infrastructure 456
Amrita Gupta (Georgia Institute of Technology, USA) and Bistra Dilkina (University of Southern California, USA)

On the Convergence Speed of AMSGRAD and Beyond 464
Tao Tan (Faculty of Computer and Information Science, Southwest University Chongqing, China 400715), Shiqun Yin (Faculty of Computer and Information Science, Southwest University Chongqing, China 400715), Kunling Liu (Faculty of Computer and Information Science, Southwest University Chongqing, China 400715), and Man Wan (Faculty of Computer and Information Science, Southwest University Chongqing, China 400715)

TPOT-SH: A Faster Optimization Algorithm to Solve the AutoML Problem on Large Datasets 471
Laurent Parmentier (OVH, France), Olivier Nicol (OVH, France), Laetitia Jourdan (University of Lille, France), and Marie-Eleonore Kessaci (University of Lille, France)

CLASSIFICATION - 1

METAPHOR - A Multiagent Architecture using IoT and Classification Algorithms for Referral Postoperative Patients 479
Afonso Lima (Universidade Estadual do Ceara, Brazil), Tiberio Loureiro (Universidade Estadual do Ceara, Brazil), Marcial Fernandez (Universidade Estadual do Ceara, Brazil), Jerry Vasconcelos (Instituto Federal do Ceara, Brazil), and Fernando Trinta (Universidade Federal do Ceara, Brazil)

AudioMask: Robust Sound Event Detection Using Mask R-CNN and Frame-Level Classifier 485
Alireza Nasiri (University of South Carolina, USA), Yuxin Cui (University of South Carolina, USA), Zhonghao Liu (University of South Carolina, USA), Jing Jin (University of South Carolina, USA), Yong Zhao (University of South Carolina, USA), and Jianjun Hu (University of South Carolina, USA)

Regularized Non-Negative Spectral Embedding for Clustering 493
Yifei Wang (Computer Science and Engineering, Beihang University), Rui Liu (Computer Science and Engineering, Beihang University), Yong Chen (Computer Science and Engineering, Beihang University), Hui Zhang (Computer Science and Engineering, Beihang University), and Zhiwen Ye (Computer Science and Engineering, Beihang University)

An Efficient Truth Discovery Mechanism for Crowdsensing Tasks With Temporal and Spatial Correlations..... 501
Runzhi Wang (Soochow University, China), Yu-E Sun (Soochow University, China), He Huang (University of Florida, United States), Le Lu (Soochow University, China), Yang Du (University of Science and Technology of China, China), and Danlei Huang (Soochow University, China)

A Subspace Hierarchical Clustering Algorithm for Categorical Data 509
Joel Luís Carbonera (UFRGS) and Mara Abel (UFRGS)

Multi-label Emotion Classification in Music Videos Using Ensembles of Audio and Video Features 517
Bruno Kostiuk (PPGIa, Pontificia Universidade Católica do Paraná (PUCPR) - Curitiba, Paraná - Brazil), Yandre M. G. Costa (Department of Informatics, State University of Maringá (UEM) - Maringá, Paraná - Brazil), Alceu S. Britto Jr. (PPGIa, Pontificia Universidade Católica do Paraná (PUCPR) - Curitiba, Paraná - Brazil), Xiao Hu (Division of Information and Technology Studies, University of Hong Kong, Pok Fu Lam, Hong Kong), and Carlos N. Silla Jr. (PPGIa, Pontificia Universidade Católica do Paraná (PUCPR) - Curitiba, Paraná - Brazil)

IMAGING - 1

Recovering Extremely Degraded Faces by Joint Super-Resolution and Facial Composite 524
Xiu Li (Tsinghua University), Guichun Duan (Tsinghua University), Zhouxia Wang (SenseTime Research), Jimmy Ren (SenseTime Research), Yongbing Zhang (Tsinghua University), Jiawei Zhang (SenseTime Research), and Kaixiang Song (Tsinghua University)

SOON: Specifically Optimized One-Stage Network for Object Detection in Remote Sensing Imagery 531
Zhuo Wang (XiDian University,China), Haonan Qin (XiDian University,China), Yunsong Li (XiDian University,China), Jie Lei (XiDian University,China), and Weiying Xie (XiDian University,China)

Partial Attribute-Driven Video Person Re-Identification 539
Wanru Song (Nanjing University of Posts and Telecommunications), Jieying Zheng (Nanjing University of Posts and Telecommunications), Yahong Wu (Nanjing University of Posts and Telecommunications), Changhong Chen (Nanjing University of Posts and Telecommunications), and Feng Liu (Nanjing University of Posts and Telecommunications)

CPDM: An Efficient Crowdsensing-Based Pothole Detection and Measurement System Design 547
Xiaofeng Zhao (School of Rail Transportation, Soochow University, China), Xiaocan Wu (School of Computer Science and Technology, Soochow University, China), Yu-E Sun (School of Rail Transportation, Soochow University, China; Department of Computer and Information of Science and Engineering, University of Florida, US), He Huang (School of Computer Science and Technology, Soochow University, China; Department of Computer and Information of Science and Engineering, University of Florida, US), Yang Du (The Suzhou Institute for Advanced Study, University of Science and Technology of China, China), and Zhen Cao (School of Computer Science and Technology, Soochow University, China)

FMNet: Feature Mining Networks for Brain Tumor Segmentation 555
Fengming Lin (Shandong University, China), Ju Liu (Shandong Univerisity, China), Qiang Wu (Shandong University, China), Xiangmao Kong (Shandong University, China), Waliullah Khan (Shandong University, China), Wei Shi (Shandong University, China), and Enshuai Pang (Shandong University, China)

APPLICATIONS - 1

No-PASt-BO: Normalized Portfolio Allocation Strategy for Bayesian Optimization 561
Thiago de P. Vasconcelos (Federal University of Ceará, Brazil), Daniel A. R. M. A. de Souza (Federal University of Ceará, Brazil), César L. C. Mattos (Federal University of Ceará, Brazil), and João P. P. Gomes (Federal University of Ceará, Brazil)

Texture CNN for Thermoelectric Metal Pipe Image Classification 569
Daniel Vriesman (Technische Hochschule Ingolstadt), Alceu Britto Junior (Pontifical Catholic University of Paraná), Alessandro Zimmer (Technische Hochschule Ingolstadt), and Alessandro Lameiras Koerich (École de Technologie Supérieure)

A Multi-index Examination Cheating Detection Method Based on Neural Network 575
Zhizhuang Li (Peking University), Zhengzhou Zhu (Peking University), and Teng Yang (Peking University)

GLmser: A GAN-Lmser Network for Image-to-Image Translation 582
Haote Yang (Shanghai Jiao Tong University, China) and Shikui Tu (Shanghai Jiao Tong University, China)

Stealthy Malware Detection using RNN-Based Automated Localized Feature Extraction and Classifier 590
Sanket Shukla (George Mason University), Gaurav Kolhe (George Mason University), Sai Manoj P D (George Mason University), and Setareh Rafatirad (George Mason University)

IMAGING - 2

ECPNet: An Efficient Attention-Based Convolution Network with Pseudo-3D Block for Human Action Recognition 598
Xiuping Bao (Nanjing University of Aeronautics and Astronautics), Jiabin Yuan (Nanjing University of Aeronautics and Astronautics), and Bei Chen (Nanjing University of Aeronautics and Astronautics)

Triplet Deep Hashing with Joint Supervised Loss for Fast Image Retrieval 606
Mingyong Li (1College of Computer Science and Technology, Donghua University, Shanghai, China; 2 College of Computer and Information Science, Chongqing Normal University, Chongqing, China), Hongya Wang (College of Computer Science and Technology, Donghua University, Shanghai, China), Liangliang Wang (College of Computer Science and Technology, Donghua University, Shanghai, China), Kaixiang Yang (College of Computer Science and Technology, Donghua University, Shanghai, China), and Yingyuan Xiao (School of CSE, Tianjin University of Technology, China)

Automatic Identification of Alzheimer's Disease and Epilepsy Based on MRI 614
Xijue Zhang (University of Electronic Science and Technology of China, China), Wanling Li (West China Hospital, Sichuan University, China), Wangshu Shen (University of Electronic Science and Technology of China, China), Lin Zhang (West China Hospital, Sichuan University, China), Xiaorong Pu (University of Electronic Science and Technology of China, China), and Lei Chen (West China Hospital, Sichuan University, China)

Salient Textural Anomaly Proposals and Classification for Metal Surface Anomalies 621
Vidhya Natarajan (Rolls-Royce@NTU Corporate Lab), Shangbo Mao (Rolls-Royce@NTU Corporate Lab), and Liang-Tien Chia (School of Computer Science and Engineering, Nanyang Technological University)

Texture Recognition on Metal Surface using Order-Less Scale Invariant GLAC 629
Shangbo Mao (Rolls-Royce@NTU Corporate Lab), Vidhya Natarajan (Rolls-Royce@NTU Corporate Lab), Liang-Tien Chia (School of Computer Science and Engineering, Nanyang Technological University, Singapore), and Guang-Bin Huang (School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore)

AFP-Net: Realtime Anchor-Free Polyp Detection in Colonoscopy 636
Dechun Wang (University of Massachusetts Lowell), Ning Zhang (University of Massachusetts Lowell), Xinzi Sun (University of Massachusetts Lowell), Pengfei Zhang (University of Massachusetts Lowell), Chenxi Zhang (University of Massachusetts Lowell), Yu Cao (University of Massachusetts Lowell), and Benyuan Liu (University of Massachusetts Lowell)

RECOMMENDATION - 1

MALP: A More Effective Meta-Paths Based Link Prediction Method in Partially Aligned Heterogeneous Social Networks 644
Kai Zhu (Department of Computer Science and Technology, Nanjing University, Nanjing, China), Meng Cao (Department of Computer Science and Technology, Nanjing University, Nanjing, China), and Heng-yang Lu (School of Internet of Things Engineering, Jiangnan University, Wuxi, China)

SARC: Split-and-Recombine Networks for Knowledge-Based Recommendation 652
Weifeng Zhang (Zhejiang University, China), Yi Cao (Zhejiang University, China), and Congfu Xu (Zhejiang University, China)

Element-Aware Legal Judgment Prediction for Criminal Cases with Confusing Charges 660
Shang Li (Harbin Institute of Technology), Boyang Liu (Harbin Institute of Technology), Lin Ye (Harbin Institute of Technology), Hongli Zhang (Harbin Institute of Technology), and Binxing Fang (Harbin Institute of Technology)

A Location-Aware Strategy for Agents Negotiating Load-Balancing 668
Quentin Baert (Université de Lille, France), Anne Cécile Caron (Université de Lille, France), Maxime Morge (Université de Lille), Jean-Christophe Routier (Université de Lille, France), and Kostas Stathis (Royal Holloway University of London, UK)

A Dynamic Knowledge Generation System for Cognitive Agents 676
Antonio Lieto (Dipartimento di Informatica, Università di Torino), Gian Luca Pozzato (Dipartimento di Informatica, Università di Torino), and Federico Perrone (Dipartimento di Informatica, Università di Torino)

METHODS-TOOLS - 2

Online Kernel Selection via Grouped Adversarial Bandit Model 682
Junfan Li (College of Intelligence and Computing, Tianjin University) and Shizhong Liao (College of Intelligence and Computing, Tianjin University)

Optimizing Value of Information Over an Infinite Time Horizon 690
Sarthak Ghosh (Stony Brook University, USA) and C. R. Ramakrishnan (Stony Brook University, USA)

Automating Personnel Rostering by Learning Constraints Using Tensors 697
Mohit Kumar (KU Leuven), Stefano Teso (KU Leuven), Patrick De Causmaecker (KU Leuven), and Luc De Raedt (KU Leuven)

Towards a Hybrid Approach for Evolving Bayesian Networks Using Genetic Algorithms 705
Sonu Jose (University of Nevada, Reno), Siming Liu (Missouri State University), Sushil Louis (University of Nevada, Reno), and Sergiu Dascalu (University of Nevada, Reno)

An Eigenvector-Enhanced Parallel Adaptive Differential Evolution for Electric Motor Design 713
Mokhtar Essaid (University of Haute Alsace, France), Mathieu Brévilliers (University of Haute Alsace, France), Julien Lepagnot (University of Haute Alsace, France), Lhassane Idoumghar (University of Haute Alsace, France), and Daniel Fodorean (Technical University of Cluj Napoca, Romania)

An Effective Dynamic Programming Algorithm for Optimal Coalition Structure Generation 721
Narayan Changder (National Institute of Technology, Durgapur, India), Samir Aknine (LIRIS laboratory, Claude Bernard University Lyon 1, France), and Animesh Dutta (National Institute of Technology, Durgapur, India)

NEURAL NETS - 2

Multi-granularity Position-Aware Convolutional Memory Network for Aspect-Based Sentiment Analysis 728
Yuanyuan Pan (Nanjing University), Jun Gan (Nanjing University), Xiangying Ran (Nanjing University), and Chongjun Wang (Nanjing University)

Residual Neural Network Based Classification of Macular Edema in OCT 736
Yueyao Huang (Sichuan University,China) and Junjie Hu (Sichuan University,China)

Multi-graph Convolution Network with Jump Connection for Event Detection 744
Xiangbin Meng (School of Computer Science, Beijing University of Posts and Telecommunications), Pengfei Wang (School of Computer Science, Beijing University of Posts and Telecommunications), Haoran Yan (Key Laboratory of Network Data Science and Technology, Institute of Computing Technology,Chinese Academy of Sciences), Liutong Xu (School of Computer Science, Beijing University ofPosts and Telecommunications), Jiafeng Guo (Key Laboratory of Network Data Science and Technology,Institute of Computing Technology, Chinese Academy of Sciences), and Yixing Fan (Key Laboratory of Network Data Science and Technology, Institute of Computing Technology, Chinese Academy of Sciences)

Constrained State-Preserved Extreme Learning Machine 752
Garrett Goodman (Wright State University), Cogan Shimizu (Kansas State University), and Iosif Papadakis Ktistakis (ASML)

Reconciling Feature-Reuse and Overfitting in DenseNet with Specialized Dropout 760
Kun Wan (University of California, Santa Barbara), Shu Yang (University of California, Santa Barbara), Boyuan Feng (University of California, Santa Barbara), Yufei Ding (University of California, Santa Barbara), and Lingwei Xie (Xiamen University)

A One-step Pruning-recovery Framework for Acceleration of Convolutional Neural Networks 768
Dong Wang (Beihang University), Xiao Bai (Beihang University), Lei Zhou (Beihang University), and Jun Zhou (Griffith University)

METHODS -TOOLS- 3

Modeling Uncertainty and Inaccuracy on Data from Crowdsourcing Platforms: MONITOR 776
Constance Thierry (University of Rennes, France), Jean-Christophe Dubois (University of Rennes, France), Yolande Le Gall (University of Rennes, France), and Arnaud Martin (University of Rennes, France)

Dynamic Multi-population Artificial Bee Colony Algorithm 784
Xinyu Zhou (Jiangxi Normal University), Yiwen Ling (Jiangxi Normal University), Maosheng Zhong (Jiangxi Normal University), and Mingwen Wang (Jiangxi Normal University)

Robust Point Set Registration with Mixture Re-Weighting Based on Relative Geometric Structures 792
Yucheng Shu (Chongqing University of Posts and Telecommunications), Zhenlong Liao (Chongqing University of Posts and Telecommunications), and Dan Luo (Lehigh University)

Manifold Regularized Stochastic Block Model 800
Tiantian He (Nanyang Technological University, Singapore), Lu Bai (Nanyang Technological University, Singapore), and Yew-Soon Ong (Nanyang Technological University, Singapore)

Improving the Accuracy of Principal Component Analysis by the Maximum Entropy Method 808
Guihong Wan (The University of Texas at Dallas, USA), Crystal Maung (7-Eleven Inc, USA), and Haim Schweitzer (The University of Texas at Dallas, USA)

NEURAL NETS - 3

RegCNN: A Deep Multi-output Regression Method for Wastewater Treatment 816
Luoyi Zhang (Nanjing University, China), Xiaowen Ma (Nanjing University, China), Peng Shi (Nanjing University, China), Sheng Bi (Nanjing University, China), and Chongjun Wang (Nanjing University, China)

Crowd Counting via Enhanced Feature Channel Convolutional Neural Network 824
Yinlong Bian (University of Electronic Science and Technology of China, China), Jie Shen (University of Electronic Science and Technology of China, China), Xin Xiong (University of Electronic Science and Technology of China, China), Ying Li (University of Electronic Science and Technology of China, China), Wei He (University of Electronic Science and Technology of China, China), and Peng Li (University of Electronic Science and Technology of China, China)

Unsupervised Pedestrian Trajectory Prediction with Graph Neural Networks 832
Mingkun Wang (College of Computer, National University of Defense Technology), Dianxi Shi (National Innovation Institute of Defense Technology;Tianjin Artificial Intelligence Innovation Center), Naiyang Guan (National Innovation Institute of Defense Technology; Tianjin Artificial Intelligence Innovation Center), Tao Zhang (Department of Computer Science, The University of Illinois at Chicago), Liujing Wang (College of Computer, National University of Defense Technology), and Ruoxiang Li (College of Computer, National University of Defense Technology)

High-Speed Rail Operating Environment Recognition Based on Neural Network and Adversarial Training 840
Xiaoxue Hou (Tongji University), Jie An (Tongji University), Miaomiao Zhang (Tongji University), Bowen Du (University of Warwick), and Jing Liu (East China Normal University)

Integrating an Attention Mechanism and Deep Neural Network for Detection of DGA Domain Names 848
Fangli Ren (Institute of Information Engineering, Chinese Academy of Sciences), Zhengwei Jiang (Institute of Information Engineering, Chinese Academy of Sciences), and Jian Liu (Institute of Information Engineering, Chinese Academy of Sciences)

Solving the Defect in Application of Compact Abating Probability to Convolutional Neural Network Based Open Set Recognition 856
Xiangyuan Sun (National University of Defense Technology, China), Xiaoyong Li (National University of Defense Technology, China), Kaijun Ren (National University of Defense Technology, China), and Junqiang Song (National University of Defense Technology, China)

DEEP LEARNING - 2

Experience Selection in Multi-agent Deep Reinforcement Learning 864
Yishen Wang (Soochow University, China) and Zongzhang Zhang (Nanjing University, China)

Applying Deep Learning and Wearable Devices for Educational Data Analytics 871
Z.X. Zhou (The University of Hong Kong), V. Tam (The University of Hong Kong), K.S. Lui (The University of Hong Kong), E.Y. Lam (The University of Hong Kong), Allan Yuen (The University of Hong Kong), Xiao Hu (The University of Hong Kong), and Nancy Law (The University of Hong Kong)

Graph Colouring Meets Deep Learning: Effective Graph Neural Network Models for Combinatorial Problems 879
Henrique Lemos (Federal University of Rio Grande do Sul), Marcelo Prates (Federal University of Rio Grande do Sul), Pedro Avelar (Federal University of Rio Grande do Sul), and Luis Lamb (Federal University of Rio Grande do Sul)

Object Detection Boosting using Object Attributes in Detect and Describe Framework 886
Muhammad Jahanzeb Khan (SHANGHAI JIAO TONG UNIVERSITY), Adeel Zafar (SHANGHAI JIAO TONG UNIVERSITY), Valeriia Tumanian (SHANGHAI JIAO TONG UNIVERSITY), Ding Yue (SHANGHAI JIAO TONG UNIVERSITY), and Guoqiang Li (SHANGHAI JIAO TONG UNIVERSITY)

Driver Identification Based on Vehicle Telematics Data using LSTM-Recurrent Neural Network 894
Abenezer Girma (North Carolina A&T State University), Xuyang Yan (North Carolina A&T State University), and Abdollah Homaifar (North Carolina A&T State University)

Deep Unsupervised Progressive Learning for Distant Domain Adaptation 903
Suncheng Xiang (Shanghai Jiao Tong University, China), Yuzhuo Fu (Shanghai Jiao Tong University, China), and Ting Liu (Shanghai Jiao Tong University, China)

MACHINE LEARNING - 2

MABWiser: A Parallelizable Contextual Multi-Armed Bandit Library for Python 909
Emily Strong (Fidelity Investments), Bernard Kleynhans (Fidelity Investments), and Serdar Kadiolu (Fidelity Investments)

Harnessing GAN with Metric Learning for One-Shot Generation on a Fine-Grained Category 915
Yusuke Ohtsubo (Kyushu University), Tetsu Matsukawa (Kyushu University), and Einoshin Suzuki (Kyushu University)

Metric Learning from Imbalanced Data 923
Léo Gautheron (Jean Monnet University), Amaury Habrard (Jean Monnet University), Emilie Morvant (Jean Monnet University), and Marc Sebban (Jean Monnet University)

Transfer Learning with Ensemble Feature Extraction and Low-Rank Matrix Factorization for Severity Stage Classification of Diabetic Retinopathy 931
Isuru Wijesinghe (University of Moratuwa, Sri Lanka), Chathurika Gamage (University of Moratuwa, Sri Lanka), and Charith Chitraranjan (University of Moratuwa, Sri Lanka)

Accelerating Nash Q-Learning with Graphical Game Representation and Equilibrium Solving 939
Yunkai Zhuang (State Key Laboratory for Novel Software Technology, Collaborative Innovation Center of Novel Software Technology and Industrialization, Nanjing University, Nanjing, China), Xingguo Chen (National Engineering Laboratory for Agri-product Quality Traceability, Beijing Technology and Business University, Beijing, China), Yang Gao (State Key Laboratory for Novel Software Technology, Collaborative Innovation Center of Novel Software Technology and Industrialization, Nanjing University, Nanjing, China), and Yujing Hu (Fuxi AI Lab in Netease, Hangzhou, China)

Embedding Learning with Heterogeneous Event Sequence for Insider Threat Detection 947
Jiarong Wang (Chinese Academy of Sciences, University of Chinese Academy of Sciences), Lijun Cai (Chinese Academy of Sciences), Aimin Yu (Chinese Academy of Sciences), and Dan Meng (Chinese Academy of Sciences)

DEEP LEARNING - 3

Motion Coordination of Multiple Robots Based on Deep Reinforcement Learning 955
Xiuzhao Hao (Beijing Jiaotong University, China), Zhihao Wu (Beijing Jiaotong University, China), Haiguang Zhou (Systems Engineering Research Institude, China), Xiangpeng Bai (Beijing Jiaotong University, China), Youfang Lin (Beijing Jiaotong University, China), and Sheng Han (Beijing Jiaotong University, China)

Experience Sharing Between Cooperative Reinforcement Learning Agents 963
Lucas Oliveira Souza (Numenta, USA), Gabriel de Oliveira Ramos (Universidade do Vale do Rio dos Sinos, Brazil), and Celia Ghedini Ralha (University of Brasilia, Brazil)

Deep Learning Poison Data Attack Detection 971
Henry Chacon (The University of Texas at San Antonio, UTSA), Samuel Silva (The University of Texas at San Antonio, UTSA), and Paul Rad (The University of Texas at San Antonio, UTSA)

Estimating Vehicle Speed on Highway Roads from Smartphone Sensors Using Deep Learning Models 979
Norhan Elsayed Amer Abdelgawad (Egypt-Japan University of Science and Technology,Egypt), Ahmed El Mahdy (Egypt-Japan University of Science and Technology, Egypt), Walid Gomaa (Egypt-Japan University of Science and Technology, Egypt), and Amin Shoukry (Egypt-Japan University of Science and Technology, Egypt)

MACHINE LEARNING - 3

Learning Sparse Support Vector Machine with Relaxation and Rounding 987
Xiangyu Tian (College of Intelligence and Computing, Tianjin University) and Shizhong Liao (College of Intelligence and Computing, Tianjin University)

Information-Theoretic Ensemble Learning for DDoS Detection with Adaptive Boosting 995
Monowar H. Bhuyan (NAIST, Japan and Umeå University, Sweden), Maode Ma (Nanyang Technological University, Singapore), Youki Kadobayashi (NAIST, Japan), and Erik Elmroth (Umeå University, Sweden)

Transfer Learning on Decision Tree with Class Imbalance 1003
Ludovic Minvielle (CMLA, ENS Paris-Saclay, Cachan, France), Mounir Atiq (CMLA, ENS Paris-Saclay, Cachan, France), Sergio Peignier (INSA Lyon, Lyon, France), and Mathilde Mougeot (ENSIIE, Évry, France)

EsiNet: Enhanced Network Representation via Further Learning the Semantic Information of Edges 1011
Anqing Zheng (School of Computer Science, Beijing Institute of Technology), Chong Feng (School of Computer Science, Beijing Institute of Technology), Fang Yang (School of Computer Science, Beijing Institute of Technology), and Huanhuan Zhang (China Academy of Electronics & IT of CETC)

Learning Linear Programs from Data 1019
Elias Arnold Schede (KU Leuven), Samuel Kolb (KU Leuven), and Stefano Teso (KU Leuven)

A Novel Learning Classification Scheme for Brain EEG Patterns 1027
Spyridon Manganas (Wright State University, United States of America) and Nikolaos Bourbakis (Wright State University, United States of America)

CLASSIFICATION - 2

Visual Sequence Place Recognition with Improved Dynamic Time Warping 1034
Feng Lu (Chongqing Institute of Green and Intelligent Technology, University of Chinese Academy of Sciences; CAS Chongqing, China), Baifan Chen (School of Automation, Central South University, Changsha, China), Zhaohong Guo (Chongqing Institute of Green and Intelligent Technology, University of Chinese Academy of Sciences; CAS Chongqing, China), and Xiangdong Zhou (Chongqing Institute of Green and Intelligent Technology, Chinese Academy of Sciences (CAS), Chongqing, China)

Heterogeneous Transfer Clustering for Partial Co-occurrence Data 1042
Xiangyang Ye (Tianjin University), Liu Yang (Tianjin University), Qinghua Hu (Tianjin University), Chenyang Shen (UT Southwestern Medical Center), Liping Jing (Beijing Jiaotong University), and Zhibin Du (China Automotive Technology and Research Center Co. Ltd)

A CNN-RNN Hybrid Model with 2D Wavelet Transform Layer for Image Classification 1050
Zihao Dong (College of Computer science,Nankai University), Ruixun Zhang (MIT Laboratory for Financial Engineering), and Xiuli Shao (College of Computer science,Nankai University)

Fine-Grained Image Classification Combined with Label Description 1057
Xiruo Shi (Beijing University of Posts and Telecommunications, National Engineering Laboratory of Big Data Application on Improving Government Governance Capabilities), Liutong Xu (Beijing University of Posts and Telecommunications), and Pengfei Wang (Beijing University of Posts and Telecommunications)

Data-Driven Gene Regulatory Network Inference Based on Classification Algorithms 1065
Sergio Peignier (Université Lyon 1, INSA Lyon, INRA BF2I, UMR0203, F-69621), Pauline Schmitt (Université Lyon 1, INSA Lyon, INRA BF2I, UMR0203, F-69621), and Federica Calevro (Université Lyon 1, INSA Lyon, INRA BF2I, UMR0203, F-69621)

Targeted Sentiment Classification with Knowledge Powered Attention Network 1073
Ximo Bian (Beijing Institute of Technology, China), Chong Feng (Beijing Institute of Technology, China), Arshad Ahmad (University of Swabi, Anbar), Jinming Dai (Communication University of China, China), and Guifen Zhao (Beijing Institute of Science and Technology Information, China)

CLASSIFICATION - 3

Cancer Classification Using Microarray Data By DPCAForest 1081
Xiaoheng Deng (Central South University) and Yuebin Xu (Central South University)

Towards Explainable Multi-Label Classification 1088
Karim Tabia (CRIL CNRS UMR 8188 - Artois University)

EPMS: A Framework for Large-Scale Patient Matching 1096
Himanshu Singhal (SSN College of Engineering, India), Harish Ravi (SSN College of Engineering, India), Sathiya Narayan Chakravarthy (SSN College of Engineering, India), Prabavathy Balasundaram (SSN College of Engineering, India), and Chitra Babu (SSN College of Engineering, India)

Bayesian Network Learning for Classification via Transfer Method 1102
April Hua Liu (Shanghai University of Finance and Economics, China), Zihao Cheng (Shanghai University of Finance and Economics, China), and Justin Jiang (Shanghai University of Finance and Economics, China)

Fusing Vector Space Models for Domain-Specific Applications 1110
Laura Rettig (University of Fribourg, Switzerland), Julien Audiffren (ENS Paris-Saclay, France), and Philippe Cudré-Mauroux (University of Fribourg, Switzerland)

Solving Traveling Salesman Problem with Image-Based Classification 1118
Shoma Miki (Graduate School of Science and Engineering, Kansai University) and Hiroyuki Ebara (Graduate School of Science and Engineering, Kansai University)

CLASSIFICATION - 4

Monaural Music Source Separation using a ResNet Latent Separator Network 1124
Gino Brunner (ETH Zurich, Switzerland), Nawel Naas (ETH Zurich, Switzerland), Sveinn Palsson (ETH Zurich, Switzerland), Oliver Richter (ETH Zurich, Switzerland), and Roger Wattenhofer (ETH Zurich, Switzerland)

A Decision-Based Dynamic Ensemble Selection Method for Concept Drift 1132
Régis Antônio S. Albuquerque (Federal University of Amazonas, Brazil), Albert F. Josuá Costa (Federal Institute of Amazonas, Brazil), Eulanda Miranda dos Santos (Federal University of Amazonas, Brazil), Robert Sabourin (École de Technologie Supérieure, Canada), and Rafael Giusti (Federal University of Amazonas, Brazil)

Towards a High-Level Multi-label Classification from Complex Networks 1140
Vinicius H. Resende (Federal University of Uberlândia, Brazil) and Murillo G. Carneiro (Federal University of Uberlândia, Brazil)

Effects of Integrated Instance-Random-Sampling and Feature Reduction on Classifiers Performance and Training Speed 1148
Reham Alamro (The George Washington University) and Abdou Youssef (The George Washington University)

Gorthaur: A Portfolio Approach for Dynamic Selection of Multi-Armed Bandit Algorithms for Recommendation 1156
Nicolas Gutowski (University of Angers (LERIA) / ESEO-TECH (ERIS)), Tassadit Amghar (University of Angers (LERIA)), Olivier Camp (ESEO-TECH (ERIS)), and Fabien Chhel (ESEO-TECH (ERIS))

NLP / NLU - 3

Sentiment-Aware Short Text Classification Based on Convolutional Neural Network and Attention 1164
Zeyu Chen (Hohai University), Yan Tang (Hohai University), Zuowei Zhang (Hohai University), Chengyang Zhang (Hohai University,), and Luwei Wang (Hohai University)

Implementing Ranking-Based Semantics in ConArg 1172
Stefano Bistarelli (University of Perugia, Italy), Francesco Faloci (University of Perugia, Italy), and Carlo Taticchi (Gran Sasso Science Institute, Italy)

Graph-Based Attention Networks for Aspect Level Sentiment Analysis 1180
Junjie Chen (College of Computer Science, Inner Mongolia University), Hongxu Hou (College of Computer Science, Inner Mongolia University), Yatu Ji (College of Computer Science, Inner Mongolia University), Jing Gao (College of Computer Science and Information Engineering, Inner Mongolia Agricultural University), and Tiangang Bai (College of Computer Science, Inner Mongolia University)

FPSeq: Simplifying and Accelerating Task-Oriented Dialogue Systems via Fully Parallel Sequence-to-Sequence Framework 1187
Meina Song (Beijing University of Posts and Telecommunications), Zhongfu Chen (Beijing University of Posts and Telecommunications), Peiqing Niu (Beijing University of Posts and Telecommunications), and Haihong E (Beijing University of Posts and Telecommunications)

GLSE: Global-Local Selective Encoding for Response Generation in Neural Conversation Model 1195
Hongli Wang (Sun Yat-sen University, China) and Jiangtao Ren (Sun Yat-sen University, China)

Detecting Sentences that May be Harmful to Children with Special Needs 1201
Merav Allouch (Ariel University, Ariel, Israel), Amos Azaria (Ariel University, Ariel, Israel), and Rina Azoulay (Jerusalem College of Technology, Jerusalem, Israel)

IMAGING - 3

An Efficient Semantic Segmentation Method using Pyramid ShuffleNet V2 with Vortex Pooling 1206
Jiansheng Dong (Wuhan University of Technology), Jingling Yuan (Wuhan University of Technology), Lin Li (Wuhan University of Technology), Xian Zhong (Wuhan University of Technology), and Weiru Liu (University of Bristol)

Few-Shot Learning for Monocular Depth Estimation Based on Local Object Relationship 1213
Shuai Li (Beihang University), Jiaying Shi (Beihang University), Wenfeng Song (Beihang University), Aimin Hao (Beihang University), and Hong Qin (State University of New York at Stony Brook)

Learning Spatial-Corrected Regularized Correlation Filters for Visual Tracking 1221
Zhaobing Yang (Shanghai Jiao Tong University), Jing Wu (Shanghai Jiao Tong University), and Chengnian Long (Shanghai Jiao Tong University)

A Robust Single-Sensor Face and Iris Biometric Identification System Based on Multimodal Feature Extraction Network 1229
Zhengding Luo (Shenzhen Graduate School of Peking University, China), Qinghua Gu (Shenzhen Graduate School of Peking University, China), Gege Qi (Shenzhen Graduate School of Peking University, China), Song Liu (Shenzhen Graduate School of Peking University, China), Yuesheng Zhu (Shenzhen Graduate School of Peking University, China), and Zhiqiang Bai (Shenzhen Graduate School of Peking University, China)

Deep Multi-label Hashing for Image Retrieval 1237
Xian Zhong (Wuhan University of Technology, China), Jiachen Li (Wuhan University of Technology, China), Wenxin Huang (Wuhan University, China), and Liang Xie (Wuhan University of Technology, China)

An Efficient Spatial-Temporal Polyp Detection Framework for Colonoscopy Video 1244
Pengfei Zhang (University of Massachusetts, Lowell), Xinzi Sun (University of Massachusetts, Lowell), Dechun Wang (University of Massachusetts, Lowell), Xizhe Wang (University of Massachusetts, Lowell), Yu Cao (University of Massachusetts, Lowell), and Benyuan Liu (University of Massachusetts, Lowell)

RECOMMENDATION - 2

Collective Mobile Sequential Recommendation: A Recommender System for Multiple Taxicabs 1252
Tongwen Wu (Sun Yat-set University), Zizhen Zhang (Sun Yat-sen University), Yanzhi Li (City University of Hong Kong), and Jiahai Wang (Sun Yat-sen University)

New Approaches to the Identification of Dependencies between Requirements 1257
Ralph Samer (Graz University of Technology, Austria), Martin Stettinger (Graz University of Technology, Austria), Müslüm Atas (Graz University of Technology, Austria), Alexander Felfernig (Graz University of Technology, Austria), Guenther Ruhe (University of Calgary, Canada), and Gouri Deshpande (University of Calgary, Canada)

A Novel Method to Enhance Recommendation Systems via Leveraging Multiple Types of Implicit Feedbacks..... 1263
Zhenxu Yao (East China Normal University, China) and Zhiyun Chen (East China Normal University, China)

TMRM: Two-Stage Multi-Task Recommendation Model Boosted Feature Selection 1269
Fan Zhu (Beijing University of Posts and Telecommunications, China), Juan Yang (Beijing University of Posts and Telecommunications, China), and Pengfei Wang (Beijing University of Posts and Telecommunications)

Cost-Effective Prediction in Medicine and Marketing: Only the Difference Between Bayesian Model Averaging and the Single Best-Fit Model 1274
Paul Darwen (James Cook University Brisbane)

RECOMMENDATION - 3

Adversarial Attack Against DoS Intrusion Detection: An Improved Boundary-Based Method 1280
Xiao Peng (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences), Weiqing Huang (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences), and Zhixin Shi (Institute of Information Engineering, Chinese Academy of Sciences)

Knowledge Graph Embedding by Bias Vectors 1288
Minjie Ding (Shanghai Institute for Advanced Communication and Data Science), Weiqin Tong (Shanghai Institute for Advanced Communication and Data Science), Xuehai Ding (Shanghai Institute for Advanced Communication and Data Science), Xiaoli Zhi (Shanghai Institute for Advanced Communication and Data Science), Xiao Wang (Shanghai Institute for Advanced Communication and Data Science), and Guoqing Zhang (Bio-Med Big Data Center, University of Chinese Academy of Sciences)

Reverse Auction Based Incentive Order Matching Mechanism for Real-Time Ride-Sharing 1295
Bing Shi (Wuhan University of Technology, China), Liquan Zhu (Wuhan University of Technology, China), and Yikai Luo (Wuhan University of Technology, China)

The Application of Network Based Embedding in Local Topic Detection from Social Media 1303
Junsha Chen (SKLOIS, Institute of Information Engineering, CAS), Neng Gao (SKLOIS, Institute of Information Engineering, CAS), Cong Xue (Institute of Information Engineering, CAS), Yifei Zhang (SKLOIS, Institute of Information Engineering, CAS), Chenyang Tu (SKLOIS, Institute of Information Engineering, CAS), and Min Li (SKLOIS, Institute of Information Engineering, CAS)

Graph Attention Networks for Neural Social Recommendation 1312
Nan Mu (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China; School of Cyber Security, University of Chinese Academy of Sciences, Beijing, China), Daren Zha (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China; School of Cyber Security, University of Chinese Academy of Sciences, Beijing, China), Yuanye He (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China; School of Cyber Security, University of Chinese Academy of Sciences, Beijing, China), and Zhihao Tang (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China; School of Cyber Security, University of Chinese Academy of Sciences, Beijing, China)

Threshold Based Optimization of Performance Metrics with Severely Imbalanced Big Security Data 1320
Chad L. Calvert (Florida Atlantic Unversity) and Taghi M. Khoshgoftaar (Florida Atlantic University)

MISCELLANEOUS

Using Classical Planning in Adversarial Problems 1327
Pavel Rytí (Czech Technical University in Prague), Lukáš Chrpa (Charles University), and Branislav Bošanský (Czech Technical University in Prague)

Federated Learning of Unsegmented Chinese Text Recognition Model 1333
Xinghua Zhu (Ping An Technology (Shenzhen) Co., Ltd.), Jianzong Wang (Ping An Technology (Shenzhen) Co., Ltd.), Zhenhou Hong (Ping An Technology (Shenzhen) Co., Ltd.), Tian Xia (Ping An Technology (Shenzhen) Co., Ltd.), and Jing Xiao (Ping An Technology (Shenzhen) Co., Ltd.)

Evaluating Different Metric Configurations of an Evolutionary Wrapper for Attack Detection 1338
Javier Maldonado (Universidad Tecnica Federico Santa Maria) and Maria-Cristina Riff (Universidad Tecnica Federico Santa Maria)

Anomaly Detection, Consider Your Dataset First An Illustration on Fraud Detection 1343
Ayman Alazizi (University Univ Lyon, UJM-Saint-Etienne ,France), Amaury Habrard (University Univ Lyon, UJM-Saint-Etienne ,France), François Jacquenet (University Univ Lyon, UJM-Saint-Etienne ,France), Liyun He-Guelton (Worldline, France), Frédéric Oblé (worldline, France), and Wissam Siblini (worldline, Frqnce)

A Comparative Analysis of Classifiers in the Recognition of Packed Executables 1348
Cecília R. O. Assis (Federal University of Minas Gerais, Brazil), Rodrigo S. Miani (Federal University of Uberlândia, Brazil), Murillo G. Carneiro (Federal University of Uberlândia, Brazil), and Kil J. B. Park (Federal University of Uberlândia, Brazil)

Cases and Clusters in Reuse Policies for Decision-Making in Card Games 1353
Gustavo B. Paulus (Federal University of Santa Maria, Brazil), Joaquim V. Carvalho Assuncao (Federal University of Santa Maria, Brazil), and Luis A. L. Silva (Federal University of Santa Maria, Brazil)

Improving Bandit-Based Recommendations with Spatial Context Reasoning: An Online Evaluation 1358
Nicolas Gutowski (University of Angers (LERIA) / ESEO-TECH (ERIS)), Olivier Camp (ESEO-TECH (ERIS)), Fabien Chhel (ESEO-TECH (ERIS)), Tassadit Amghar (University of Angers (LERIA)), and Patrick Albers (ESEO-TECH (ERIS))

NEURAL NETS - 4

Exploring Numerical Calculations with CalcNet 1366
Ashish Rana (Thapar Institute of Engineering and Technology India), Avleen Malhi (Aalto University Finland), and Kary Främling (Umeå University Sweden)

An IBP-CNN Based Fast Block Partition for Intra Prediction .....
Jia Su (Capital Normal University), Wenpeng Ren (Capital Normal University), Chang Sun (Capital Normal University), and Zhiping Shi (Capital Normal University)

5M-Building: A Large-Scale High-Resolution Building Dataset with CNN Based Detection Analysis 1377
Zeshan Lu (University of Jinan, China), Tao Xu (University of Jinan, China), Kun Liu (University of Jinan, China), Zhen Liu (University of Jinan, China), Feipeng Zhou (Beihang University, China), and Qingjie Liu (Beihang University, China)

A New Effective Neural Variational Model with Mixture-of-Gaussians Prior for Text Clustering 1382
Miao Li (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, Beijing, China), Hongyin Tang (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, Beijing, China), Beihong Jin (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, Beijing, China), and Chengqing Zong (National Laboratory of Pattern Recognition, Institute of Automation, Chinese Academy of Sciences, Beijing, China)

Learning Effective Neural Nets for Outcome Prediction from Partially Labelled Log Data 1388
Francesco Folino (ICAR-CNR), Gianluigi Folino (ICAR-CNR), Massimo Guarascio (ICAR-CNR), and Luigi Pontieri (ICAR-CNR)

DASNet: Dynamic Activation Sparsity for Neural Network Efficiency Improvement 1393
Qing Yang (Duke University), Jiachen Mao (Duke University), Zuoguan Wang (Black Sesame Technologies), and Hai Li (Duke University)

METHODS - TOOLS-4

Feature-Selected and -Preserved Sampling for High-Dimensional Stream Data Summary 1398
ling Lin (State Key Laboratory for Novel Software Technology, Nanjing University, Nanjing), Qian Yu (State Key Laboratory for Novel Software Technology, Nanjing University, Nanjing), Wen Ji (State Key Laboratory for Novel Software Technology, Nanjing University, Nanjing), and Yang Gao (State Key Laboratory for Novel Software Technology, Nanjing University, Nanjing)

Hyperparameter Tuning using Quantum Genetic Algorithms 1404
Athanasios Lentzas (Aristotle University of Thessaloniki, Greece), Christoforos Nalmpantis (Aristotle University of Thessaloniki, Greece), and Dimitris Vrakas (Aristotle University of Thessaloniki, Greece)

Fair Kernel Regression via Fair Feature Embedding in Kernel Space 1409
Austin Okray (University of Wyoming), Hui Hu (University of Wyoming), and Chao Lan (University of Wyoming)

Bayesian Anytime m-top Exploration 1414
Pieter Libin (Vrije Universiteit Brussel, Belgium), Timothy Verstraeten (Vrije Universiteit Brussel, Belgium), Diederik M. Roijers (Vrije Universiteit Brussel, Belgium), Wenjia Wang (Vrije Universiteit Brussel, Belgium), Kristof Theys (Katholieke Universiteit Leuven, Belgium), and Ann Nowe (Vrije Universiteit Brussel, Belgium)

Optimal Multiple Stopping Rule for Warm-Starting Sequential Selection 1421
Mathilde Fekom (ENS Paris-Saclay), Nicolas Vayatis (ENS Paris Saclay), and Argyris Kalogeratos (ENS Paris Saclay)

Attribute Reduction for Partially Labeled Data Based on Hypergraph Models 1426
Xiaojun Xie (Nanjing University of Aeronautics and Astronautics), Xiaolin Qin (Nanjing University of Aeronautics and Astronautics), Guangmei Huang (Guangxi Normal University), and Wei Zhao (McMaster University)

METHODS - TOOLS-5

An Expansion Convolution Method Based on Local Region Parameter Sharing 1432
Qimao Yang (East China Normal University, China) and Jun Guo (East China Normal University, China)

Hybrid-TE: Hybrid Translation-Based Temporal Knowledge Graph Embedding 1438
Zhihao Wang (East China Normal University, China) and Xin Li (East China Normal University, China)

Proximal Policy Optimization with Mixed Distributed Training 1444
Zhenyu Zhang (Shanghai University), Xiangfeng Luo (Shanghai University), Tong Liu (Shanghai University), Shaorong Xie (Shanghai University), Jianshu Wang (Shanghai University), Wei Wang (Shanghai University), Yang Li (Shanghai University), and Yan Peng (Shanghai University)

Learning Fuzzy SPARQL User Preferences 1449
Olfa Slama (Umanis Rsearch & Innovation, France) and Anis Yazidi (Oslo Metropolitan University, Norway)

MACHINE LEARNING - 4

Feature Space Regularization for Person Re-identification with One Sample 1455
TIan Xu (Fudan University, Shanghai, China), Jiangli Li (Fudan University, Shanghai, China), Hao Wu (Fudan University, Shanghai, China), Huafeng Yang (Fudan University, Shanghai, China), Xiaoming Gu (Fudan University, Shanghai, China), and Yanqiu Chen (Fudan University, Shanghai, China)

Towards Automated Machine Learning: Evaluation and Comparison of AutoML Approaches and Tools 1463
Anh Truong (Capital One, USA), Austin Walters (Capital One, USA), Jeremy Goodsitt (Capital One, USA), Keegan Hines (Capital One, USA), C. Bayan Bruss (Capital One, USA), and Reza Farivar (University of Illinois at Urbana-Champaign, USA)

Multi-task Learning for Relation Extraction 1472
Kai Zhou (Shanghai University, China), Xiangfeng Luo (Shanghai University, China), Hao Wang (Shanghai University, China), and Richard Xu (University of Technology Sydney, Australia)

Admissible Generalizations of Examples as Rules 1480
Philippe Besnard (CNRS/IRIT), Thomas Guyet (Agrocampus-Ouest/IRISA), and Véronique Masson (Univ Rennes, Inria, CNRS, IRISA)

Algorithmic Currency Trading Based on Reinforcement Learning Combining Action Shaping and Advantage Function Shaping 1486
Hongyong Sun (University of Electronic Science and Technology of Chin), Nan Sang (University of Electronic Science and Technology of China), Jia Wu (University of Electronic Science and Technology of China), and Chen Wang (niversity of Electronic Science and Technology of China)

MACHINE LEARNING - 5

Sparse High-Level Attention Networks for Person Re-Identification 1491
Sheng Xie (Guangxi Normal University), Canlong Zhang (Guangxi Normal University), Zhixin Li (Guangxi Normal University), and Zhiwen Wang (Guangxi University of Science and Technology)

Optimizing the Parameters for Post-Processing Consumer Photos via Machine Learning 1496
Linlin Bie (Shenzhen University), Xu Wang (Shenzhen University), and Jari Korhonen (Shenzhen University)

High-Value Prioritized Experience Replay for Off-Policy Reinforcement Learning 1502
Xi Cao (Beijing Jiaotong University, China), Huaiyu Wan (Beijing Jiaotong University, China), Youfang Lin (Beijing Jiaotong University, China), and Sheng Han (Beijing Jiaotong University, China)

An Adaptive Cross-Layer Sampling-Based Node Embedding for Multiplex Networks 1507
Nianwen Ning (Beijing University of Posts and Telecommunications), Chenguang Song (Beijing University of Posts and Telecommunications), Pengpeng Zhou (Beijing University of Posts and Telecommunications), Yunlei Zhang (Beijing University of Posts and Telecommunications), and Bin Wu (Beijing University of Posts and Telecommunications)

Some Improvements of Deep Knowledge Tracing 1512
Ange Tato (Université du Québec à Montréal, Centre de Recherche en Intelligence IA) and Roger Nkambou (Université du Québec à Montréal, Centre de Recherche en IA)

DEEP LEARNING - 4

Optimizing Training using Information Theory-Based Curriculum Learning Factory 1517
Henok Ghebrechristos (University of Colorado, Denver) and Gita Alaghband (University of Colorado, Denver)

Design and Research of Composite Web Page Classification Network Based on Deep Learning 1523
Qiuhan Zhao (Beijing University of Posts and Telecommunications), Wenchuan Yang (Beijing University of Posts and Telecommunications), and Rui Hua (Beijing University of Posts and Telecommunications)

Learning to Drive via Apprenticeship Learning and Deep Reinforcement Learning 1528
Wenhui Huang (Politecnico Di Milano, Italy), Francesco Braghin (Politecnico Di Milano, Italy), and Zhuo Wang (Xidian University, China)

Swarm Filter - A Simple Deep Learning Component Inspired by Swarm Concept 1533
Ha-Thanh Nguyen (Japan Advanced Institute of Science and Technology) and Le-Minh Nguyen (Japan Advanced Institute of Science and Technology)

Variational Policy Chaining for Lifelong Reinforcement Learning 1538
Christopher Doyle (Trinity College Dublin, Ireland), Maxime Guériau (Trinity College Dublin, Ireland), and Ivana Dusparic (Trinity College Dublin, Ireland)

Enhancing Profit by Predicting Stock Prices using Deep Neural Networks 1543
Soheila Abrishami (Florida State University, USA), Michael Turek (Florida State University, USA), Ahana Roy Choudhury (Florida State University, USA), and Piyush Kumar (Florida State University, USA)

NLP / NLU - 4

Impact of Argument Type and Concerns in Argumentation with a Chatbot 1549
Lisa Andreevna Chalaguine (Computer Science Department, University College London), Anthony Hunter (Computer Science Department, University College London), Henry Potts (Institute of Health Informatics, University College London), and Fiona Hamilton (eHealth Unit, University College London)

Text Style Transfer Using Partly-Shared Decoder 1555
Gil Halevi (Briarcliff) and Kahini Wadhawan (IBM Research)

Incorporating Domain Knowledge in Learning Word Embedding 1560
Arpita Roy (University of Maryland, Baltimore County), Youngja Park (IBM T.J. Watson Research Center), and Shimei Pan (University of Maryland, Baltimore County)

NLP / NLU - 5

Enhancing Relation Extraction Using Syntactic Indicators and Sentential Contexts 1566
Qiongxing Tao (Shanghai University), Xiangfeng Luo (Shanghai Institute for Advanced Communication and Data Science; Shanghai University), Hao Wang (Shanghai Institute for Advanced Communication and Data Science; Shanghai University), and Richard Xu (University of Technology Sydney)

Dynamically Scoring Rhymes with Phonetic Features and Sequence Alignment 1573
Benjamin Bay (Lawrence Livermore National Laboratory), Paul Bodily (Idaho State University), and Dan Ventura (Brigham Young University)

Deep Contextualized Pairwise Semantic Similarity for Arabic Language Questions 1578
Hesham Al-Bataineh (Mawdoo3 Ltd, Jordan), Wael Farhan (Mawdoo3 Ltd, Jordan), Ahmad Mustafa (Mawdoo3 Ltd, Jordan), Haitham Seelawi (Mawdoo3 Ltd, Jordan), and Hussein T. Al-Natsheh (Mawdoo3 Ltd, Jordan)

Age-Suitability Prediction for Literature Using a Recurrent Neural Network Model 1584
Eric Brewer (Brigham Young University) and Yiu-Kai Ng (Brigham Young University)

BERT for Stock Market Sentiment Analysis 1589
Matheus Gomes Sousa (UFMS), Kenzo Sakiyama (UFMS), Lucas de Souza Rodrigues (UFMS), Pedro Henrique Moraes (UFMS), Eraldo Rezende Fernandes (UFMS), and Edson Takashi Matsubara (UFMS)

Quantum-Inspired DMATT-BiGRU for Conversational Sentiment Analysis 1594
Peng Guo (Tianjin University, China), Junwei Zhang (Tianjin University, China), Yuexian Hou (Tianjin University, China), Xiujun Gong (Tianjin University, China), Panpan Wang (Tianjin University, China), and Yazhou Zhang (Tianjin University, China)

APPLICATIONS - 2

An Improved Hybrid Heuristic Algorithm for Pickup and Delivery Problem with Three-Dimensional Loading Constraints 1599
Jiangqing Wu (Xiamen University), Ling Zheng (Xiamen University), Can Huang (Xiamen University), Sifan Cai (Xiamen University), Shaorong Feng (Xiamen University), and Defu Zhang (Xiamen University)

Pre-training of Autoregressive Model for Aircraft Hard Landing Prediction Based on QAR Data 1605
Yucheng Lu (Beihang University) and Tongyu Zhu (Beihang University)

Self-Organizing Traffic Based on Dynamic Platoon Configuration 1610
Maxime Guériau (School of Computer Science and Statistics , Trinity College Dublin, Ireland)

Adaptive Phone Orientation Method for Continuous Authentication Based on Mobile Motion Sensors 1615
Shixuan Wang (Nanjing University Of Aeronautics And Astronautics, China), Jiabin Yuan (Nanjing University Of Aeronautics And Astronautics, China), and Jing Wen (Nanjing University Of Aeronautics And Astronautics, China)

Flooding-Driven Modifications of a Hierarchical and Irregular Navigation Grid Structure for Large Virtual Terrains used in Simulation Systems 1620
Evaristo Jose do Nascimento (Federal University of Santa Maria, Brazil), Eliakim Zacarias (Federal University of Santa Maria, Brazil), Daniel Matheus Doebber (Federal University of Santa Maria, Brazil), Edison Pignaton de Freitas (Federal University of Rio Grande do Sul, Brazil), and Luis Alvaro de Lima Silva (Federal University of Santa Maria, Brazil)

EmbML Tool: Supporting the use of Supervised Learning Algorithms in Low-Cost Embedded Systems 1625
Lucas Tsutsui da Silva (Universidade de São Paulo, Brazil), Vinicius M. A. Souza (Universidade de São Paulo, Brazil), and Gustavo E. A. P. A. Batista (University of New South Wales, Australia)

APPLICATIONS - 3

Query Answering from Traditional Dance Videos: Case Study of Zapin Dances 1630
Sihem Belabbes (University of Artois, France), Chi Wee Tan (Universiti Teknologi Malaysia, Malaysia), Tri-Thuc Vo (Can Tho University, Vietnam), Yacine Izza (University of Artois, France), Karim Tabia (University of Artois, France), Sylvain Lagrue (University of Technology of Compiegne, France), and Salem Benferhat (University of Artois, France)

Neural Network Approximation for Nonlinear Partial Differential Equations with Quasi-Newton Optimization and Piecewise Strategy 1635
Yu Jin (Shanghai University) and Ying Li (Shanghai University)

MOPNAR-II: An Improved Multi-Objective Evolutionary Algorithm for Mining Positive and Negative Association Rules 1640
Tao Zhang (Northeastern University, China), Lianbo Ma (Northeastern University, China), and Guangming Yang (Northeastern University, China)

Deep Active Imitation Learning in FIFA Free-Kicks Player Platforms Based on Raw Image and Object Detection State Representations 1646
Matheus Prado Prandini Faria (Federal University of Uberlândia, Brazil), Rita Maria Silva Julia (Federal University of Uberlândia, Brazil), and Lídia Bononi Paiva Tomaz (Federal Institute of Triângulo Mineiro, Brazil)

An Automatic Method for Identifying Huntington's Disease using Gait Dynamics 1651
Juliana Paula Felix (Universidade Federal de Goiás, Brazil), Flávio Henrique Teles Vieira (Universidade Federal de Goiás, Brazil), Gabriel da Silva Vieira (Instituto Federal Goiano, Brazil), Ricardo Augusto Pereira Franco (Universidade Federal de Goiás, Brazil), Ronaldo Martins da Costa (Universidade Federal de Goiás, Brazil), and Rogerio Lopes Salvini (Universidade Federal de Goiás, Brazil)

Rethink Gaussian Denoising Prior for Real-World Image Denoising 1656
Tianyang Wang (Austin Peay State University), Jun Huan (Baidu Research), Bo Li (University of Southern Mississippi), and Kaoning Hu (Texas A&M University-Commerce)

A Siamese-Detection Network for Real-Time Object Tracking 1661
Yang Deng (Center for Future Media and the School of Computer Science and Engineering University of Electronic Science and Technology of China, Chengdu, China), Ning Xie (Center for Future Media and the School of Computer Science and Engineering University of Electronic Science and Technology of China, Chengdu, China), and Yang Yang (Center for Future Media and the School of Computer Science and Engineering University of Electronic Science and Technology of China, Chengdu, China)

IMAGING - 4

Facial Expression Recognition: Residue Learning Using SVM 1667
Fangjun Wang (Shanghai Jiao Tong University) and Liping Shen (Shanghai Jiao Tong University)

Extending the Aerial Image Analysis from the Detection of Tree Crowns 1673
Gabriel da Silva Vieira (Federal University of Goiás, Pixelab Laboratory. Goiânia - GO, Brazil), Bruno M. Rocha (Federal University of Goiás, Pixelab Laboratory. Goiânia - GO, Brazil), Fabrizzio Soares (Department of Computer Science, Southern Oregon University, Ashland - OR, USA), Júnio César Lima (Federal Institute Goiano, Computer Vision Laboratory. Urutaí - GO, Brazil), Helio Pedrini (Institute of Computing, University of Campinas, Campinas, SP, Brazil), Ronaldo Costa (Federal University of Goiás, Pixelab Laboratory. Goiânia - GO, Brazil), and Júlio Ferreira (Federal Institute Goiano)

X-ray Image Enhancement: A Technique Combination Approach 1678
Afonso U. Fonseca (Federal University of Goiás, Pixelab Laboratory), Fabrizzio Soares (Federal University of Goiás, Pixelab Laboratory; Southern Oregon University), Leandro L. Oliveira (Federal University of Goiás, Pixelab Laboratory), Mariana S. Ramada (Federal University of Goiás, Pixelab Laboratory), Rogerio Salvini (Federal University of Goiás, Pixelab Laboratory), Deborah S. A. Fernandes (Federal University of Goiás, Pixelab Laboratory), Cristiane B. R. Ferreira (Federal University of Goiás, Pixelab Laboratory), and Willian D. Ferreira (Federal University of Goiás, Pixelab Laboratory)

Accurate and Robust RGB-D Dense Mapping with Inertial Fusion and Deformation-Graph Optimization 1683
Yong Liu (Institute of Applied Technology, Hefei Institutes of Physical Science, Chinese Academy of Sciences,China), Liming Bao (Institute of Applied Technology, Hefei Institutes of Physical Science, Chinese Academy of Sciences,China;University of Science and Technology of China,China), Chaofan Zhang (Institute of Applied Technology, Hefei Institutes of Physical Science, Chinese Academy of Sciences,China), Wen Zhang (Institute of Applied Technology, Hefei Institutes of Physical Science, Chinese Academy of Sciences,China), and Yingwei Xia (Institute of Applied Technology, Hefei Institutes of Physical Science, Chinese Academy of Sciences,China)

APPLICATIONS - 4

3D Convolutional Two-Stream Network for Action Recognition in Videos 1689
Min Li (Beijing Jiaotong University, Institute of Information Engineering, Chinese Academy of Sciences, School of Cyber Security, University of Chinese Academy of Sciences , China), Yuezhu Qi (Institute of Information Engineering, Chinese Academy of Sciences, School of Cyber Security, University of Chinese Academy of Sciences , China), Jian Yang (Institute of Information Engineering, Chinese Academy of Sciences , Beijing Institute of Technology, China), Yanfang Zhang (Institute of Information Engineering, Chinese Academy of Sciences, School of Cyber Security, University of Chinese Academy of Sciences, China), Junxing Ren (Institute of Information Engineering, Chinese Academy of Sciences, School of Cyber Security, University of Chinese Academy of Sciences, China), and Hong Du (Beijing Jiaotong University, China)

TFPN: Twin Feature Pyramid Networks for Object Detection 1694
Yi Liang (School of Computer, National University of Defense Technology), Wang Changjian (School of Computer, National University of Defense Technology), Li Fangzhao (School of Computer, National University of Defense Technology), Peng Yuxing (School of Computer, National University of Defense Technology), Lv Qin (Department of Computer Science, University of Colorado Boulder), Yuan Yuan (School of Computer, National University of Defense Technology), and Huang Zhen (School of Computer, National University of Defense Technology)

Focus Generator with Score Classification on Fabric Defect Detection 1700
Yingjie Qin (Fudan University, China), Ming Chen (Fudan University, China), Lizhe Qi (Fudan University, China), and Yunquan Sun (Fudan University, China)

Poster Papers

Bayesian Deep Learning Based Exploration-Exploitation for Personalized Recommendations 1707
Xin Wang (Fidelity Investments) and Serdar Kadioglu (Fidelity Investments)

A Meta-Strategy Enhancement for Network Embedding 1712
Hengliang Wang (Peking University), Yuan Li (Peking University), Chenfei Zhao (Peking University), Yi Zhang (Peking University), and Kedian Mu (Peking University)

An Advanced Harmony Search Algorithm Based on Harmony Anchoring and Reverse Learning 1716
Lin Liu (Harbin Institute of Technology, China), Daming Shi (Harbin Institute of Technology, China), Dansong Cheng (Harbin Institute of Technology), and Maysam Orouskhani (Shenzhen University, China)

A Theoretical Analysis of Pooling Operation Using Information Theory 1721
Christoforos Nalmpantis (Aristotle University of Thessaloniki, Greece), Athanasios Lentzas (Aristotle University of Thessaloniki, Greece), and Dimitris Vrakas (Aristotle University of Thessaloniki, Greece)

Constrained GANs: Dealing with Constraints in Generation Tasks .....
Xia Xu (Xidian University, China) and Xiangning Li (Xidian University, China)

A Novel Proposed Pooling for Convolutional Neural Network 1731
Dou El Kefel Mansouri (University Ibn khaldoun, Tiaret, Algeria), Seif-Eddine Benkabou (University Lyon1, France), Bachir Kaddar (University Ibn khaldoun, Tiaret, Algeria), and Khalid Benabdeslem (University Lyon1, France)

Uplift Modeling for Cost Effective Coupon Marketing in C-to-C E-Commerce 1736
Akihiro Shimizu (Mercari, Inc., Japan Advanced Institute of Science and Technology), Riku Togashi (Mercari, Inc., Waseda University), Antony Lam (Mercari, Inc.), and Nam Van Huynh (Japan Advanced Institute of Science and Technology)

Random Vector Functional Link with Naive Bayes for Classification Problems of Mixed Data 1741
Gonzalo A. Ruz (Universidad Adolfo Ibáñez, Chile) and Pablo A. Henríquez (Universidad Adolfo Ibáñez)

Short-Spoken Language Intent Classification with Conditional Sequence Generative Adversarial Network..... 1745
Xinyu Zhou (Beijing University of Posts and Telecommunications, China) and Yang Peng (Beijing University of Posts and Telecommunications, China)

Deep Convolutional Neural Network Based Object Detector for X-Ray Baggage Security Imagery 1749
Jinyi Liu (University of Chinese Academy of Sciences,China), Xiaxu Leng (University of Chinese Academy of Sciences,China), and Ying Liu (University of Chinese Academy of Sciences, China)

Directional Search Algorithm and its Utilization of Simulated Annealing and Expand-Retract 1754
Beom Jin An (United States Military Academy) and Alexander S. Mentis (United States Military Academy)

Real-Coded Genetic Algorithm Realizing Fast Convergence by Reducing Its Population Size 1759
Kazuki Nishisaka (Kyoto Institute of Technology, Japan) and Hitoshi Iima (Kyoto Institute of Technology, Japan)

Multi-classfication Sentiment Analysis Based on the Fused Model 1763
Yingbin Xue (Tianjin University of Technology Key Laboratory of Computer Vision and System, Ministry of Education,Tianjin,300384, P.R China), Xiaoye Wang (Tianjin University of Technology Key Laboratory of Computer Vision and System, Ministry of Education,Tianjin,300384, P.R China), and Zan Gao (Tianjin University of Technology,Tianjin,300384, P.R China;Qilu University of Technology (Shandong Academy of Sciences), Shandong Computer Science Center,Jinan, 250014, P.R China)

Modeling Missing Data Based on Neural Fuzzy Inference for Implicit Recommendation 1768
Weina Zhang (South China University of Technology), Xingming Zhang (South China University of Technology), and Haoxiang Wang (South China University of Technology)

Classification of Infiltrated Injections During PET/CT Imaging Applying Deep Learning Technique 1773
Tasmia Rahman Tumpa (University of Tennessee, United States), Shelley N. Acuff (University of Tennessee, United States), and Dustin R. Osborne (University of Tennessee, United States)

SLAOE-NN:A Deep Network with Structure Learning for Aspect and Opining co-Extraction for NLP 1778
KunLing Liu (Southwest University, China), Shiqun Yin (Southwest University, China), and Tao Tan (Faculty of Computer and Information Science ,Southwest University)

Differential Evolution Using Linkage Identification 1783
Hitoshi Iima (Kyoto Institute of Technology, Japan) and Keijiro Yokoyama (Kyoto Institute of Technology, Japan)

Solving Six-Player Games via Online Situation Estimation 1787
Huale Li (Harbin Institute of Technology, Shenzhen,China), Xuan Wang (Harbin Institute of Technology, Shenzhen,China), Shuhan Qi (Harbin Institute of Technology, Shenzhen,China), Yang Liu (Harbin Institute of Technology, Shenzhen,China), Haojie Wang (Harbin Institute of Technology, Shenzhen,China), Fengwei Jia (Harbin Institute of Technology, Shenzhen,China), and Jiajia Zhang (Harbin Institute of Technology, Shenzhen,China)

Generative Adversarial Learning Based Commercial Building Electricity Time Series Prediction 1792
Yue Pang (Fudan University, China), Xiangdong Zhou (Fudan University, China), Donghui Xu (Fudan University, China), Zijing Tan (Fudan University, China), Mingxi Zhang (University of Shanghai for Science and Technology, China), Naiwang Guo (State Grid Shanghai Municipal Electric Power Company, China), and Yingjie Tian (State Grid Shanghai Municipal Electric Power Company, China)

Dynamic Multi-objective Evolutionary Algorithm with Fuzzy Weighted Borda Count Method 1797
Maysam Orouskhani (Shenzhen University), Daming Shi (Shenzhen University), and Lin Liu (Harbin University)

Improving Prediction Fairness via Model Ensemble 1802
Dheeraj Bhaskaruni (University of Wyoming), Hui Hu (University of Wyoming), and Chao Lan (University of Wyoming)

Sensory Substitution of Vision: A Systematic Mapping and a Deep Learning Object Detection Proposition 1807
Elze Pinheiro Lima Neto (Instituto de Informática Universidade Federal de Goiás), Ronaldo Martins da Costa (Instituto de Informática Universidade Federal de Goiás), Deborah Silva Alves Fernandes (Instituto de Informática Universidade Federal de Goiás), and Fabrízzio Alphonsus Alves de Melo Nunes Soares (Southern Oregon University)

Predicting Judicial Decisions: A Statistically Rigorous Approach and a New Ensemble Classifier 1812
Andrea Visentin (University College Cork), Alessia Nardotto (University College Cork), and Barry O'Sullivan (University College Cork)

Additional Paper

Opinion Spam Detection Based on Heterogeneous Information Network 1817
Yingcheng Sun (Case Western Reserve University), Kenneth Loparo (Case Western Reserve University)

Author Index
