

PROCEEDINGS OF SPIE

*2019 International Conference on Optical
Instruments and Technology*

Optical Communication and Optical Signal Processing

Jian Chen
Yi Dong
Fabien Bretenaker
Editors

26–28 October 2019
Beijing, China

Sponsored by
CIS—China Instrument and Control Society (China)

Cosponsored and Published by
SPIE

Volume 11435

Proceedings of SPIE 0277-786X, V. 11435

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *2019 International Conference on Optical Instruments and Technology: Optical Communication and Optical Signal Processing*, edited by Jian Chen, Yi Dong, Fabien Bretenaker, Proceedings of SPIE Vol. 11435 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

OPTICAL COMMUNICATION AND OPTICAL SIGNAL PROCESSING

11435 02	Invalid spectrum rate based scheduling for advance reservation services in elastic optical networks [11435-2]
11435 03	Spectrum defragmentation based on path-switching mechanism for 1+1 protection in elastic optical networks [11435-3]
11435 04	Leaf-looping based multicast protection algorithm for elastic optical network [11435-4]
11435 05	Spectrum defragmentation in flexible grid optical networks (Invited Paper) [11435-6]
11435 06	Research on ultrathin silicon-based electro-optic modulators [11435-7]
11435 07	A nonlinear tuning compensation method based on homomorphic deconvolution for OFDR systems (Invited Paper) [11435-8]
11435 08	Nonlinearity estimation method based on error vector correlation function in coherent optical fiber transmission systems [11435-9]
11435 09	Polarization state persistence characteristics in wet haze within PM2.5 for forward transmission [11435-10]
11435 0A	Design of annular blazed grating for rotating beam [11435-13]
11435 0B	A method for complex spectrum analysis of modulated optical signal [11435-15]
11435 0C	EHD-printing technology: a novel approach to THz broadband absorber fabrication (Invited Paper) [11435-19]
11435 0D	An improved k-means method based indoor visible light localization scheme [11435-21]

- 11435 OE **NOMA-based visible light non-pre-equalization communication system** [11435-22]
- 11435 OF **Photonic devices based on antisymmetric Bragg gratings (Invited Paper)** [11435-23]
- 11435 OG **Photonics-based inverse synthetic aperture radar for near-field RCS calculation** [11435-26]
- 11435 OH **6G: network visions and requirements for next generation optical networks (Invited Paper)** [11435-27]
- 11435 OI **Combined routing and core-spectrum assignment scheme based on spectrum status for spatial division multiplexing elastic optical networks** [11435-28]
- 11435 OJ **When virtual network functions are deployed in network resource virtualized elastic optical networks (Invited Paper)** [11435-30]
- 11435 OK **Fountain clocks comparisons in Beijing area** [11435-35]
- 11435 OL **Time and frequency transfer and synchronization through the optical fiber** [11435-36]
