SPIE

Volume 11437

Proceedings of SPIE 0277-786X, V. 11437

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *2019 International Conference on Optical Instruments and Technology: Advanced Laser Technology and Applications*, edited by Zhiyi Wei, Chunqing Gao, Pu Wang, Franz X. Kärtner, Stefan A. Weber, Proceedings of SPIE Vol. 11437 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

ADVANCED LASER TECHNOLOGY AND APPLICATIONS

11437 02	High-power all-fiber polarization maintaining picosecond pulsed laser amplifier [11437-2]
11437 03	High power single-frequency laser output from a diffusion-bonded monolithic nonplanar Ho:YAG ring oscillator [11437-7]
11437 04	Liquid crystal optical phased array based on isomeric structure [11437-9]
11437 05	Near diffraction limit output of a coiled 20/400 μm Yb-doped fiber laser [11437-11]
11437 06	NOLM-based mode-locked Yb-doped fiber laser with wide-spectrum [11437-13]
11437 07	Research on velocity calibration of an eye-safe all-solid-state coherent Doppler wind lidar [11437-15]
11437 08	High-energy, single-frequency, Q-switched Er:YAG laser for coherent wind measurement lidar [11437-16]
11437 09	Thermal effects analysis of end-pumped Er:YAG rod and slab by using finite element method [11437-17]
11437 0A	Review of dispersive interferometry ranging with optical frequency comb and the instrumentation prospect [11437-18]
11437 0B	An improved method for 3D reconstruction based on uniform point drift registration estimation [11437-19]
11437 0C	Demonstration of forming complex patterns on a Ti-film using a nanosecond pulsed laser [11437-22]
11437 0D	Dynamics of the spatial mode competition process in a dual-cavity solid-state vortex laser [11437-23]
11437 0E	Evaluation of thermally-induced lens of a pentagonal-side-pumped solid-state laser rod [11437-25]

11437 OF	Design of laser screen velocity measurement optical system based on circular arc cylinder reflection [11437-26]
11437 OG	Theoretical and experimental demonstration of transparent glass laser processing with a tripartite-interaction procedure [11437-34]
11437 OH	Wavelength tunable single-frequency Cr:ZnSe laser [11437-35]
11437 OI	Research on spatial hole burning effect of linear cavity fiber laser [11437-37]
11437 OJ	Preparation of Yb³⁺-doped silica fiber preform at low temperature [11437-41]
11437 OK	Investigation of dispersion-managed, all-polarization-maintaining-fiber Yb-doped laser mode-locked by nonlinear polarization evolution [11437-43]
11437 OL	Mode-locked fiber laser with a nonlinear amplifying loop mirror at different repetition rate varying from 100 kHz to 21 MHz [11437-48]
11437 OM	Design of fiber PM2.5 and PM10 concentration detectors based on MIE scattering [11437-49]
11437 ON	Dark soliton trains generation from self-mode-locking fiber laser with an ultra-long ring cavity [11437-52]
11437 OO	Triggering and guiding of lightning by ultrafast lasers (Invited Paper) [11437-53]
11437 OP	Improving the model of a passively Q-switched microchip laser based on experimental data [11437-59]
11437 OQ	High-power chirped pulse amplification based on Yb-doped rod-type PCF and nonlinear amplifying loop mirror oscillator [11437-60]
11437 OR	Frequency-sweeping single-frequency polarization-maintaining Er-doped fiber laser for FMCW lidar [11437-61]
11437 OS	Watt-level passively Q-switched mode-locked Tm,Ho:LLF laser at 1882 nm [11437-62]
11437 OT	Tunable single frequency fiber laser based on injection-locked for coherent detection of lidar [11437-68]
11437 OU	Femtosecond pulse laser beam shaping and power control for free-space optical material properties measurements [11437-69]
11437 OV	Spectral transmittance measurement nonlinearity of a (280-540) nm spectrophotometer based on a tunable femtosecond pulse laser [11437-70]
11437 OW	Design of a fiber coupled diode laser based on a novel beam shaping component which is provided with beam collimating and re-orienting [11437-74]
