Table of Contents

Plenary Speakers - Abstracts	
Smart and Adaptive 4D Materials – Hierarchical Manufacturing	1
Hani Naguib, University of Toronto, Toronto, ON, Canada	
Integrated Design of Magnetorheological Fluid and Energy Absorbers for Optimal System Performance	2
Norman Wereley, University of Maryland, College Park, MD, USA	
Design of Multifunctional Composites and their Advanced Additive Manufacturing	3
Daniel Therriault, Polytechnique Montréal, Montréal, QC, Canada	
Acoustic Black Hole Structures and their Applications in Vibration Damping and Noise Reduction	4
Jinhao QIU, Nanjing University of Aeronautics and Astronautics, Nanjing, China	
Noise and Vibration Control	
Stiffness Modulation as a Method for Vibration Reduction	5
Alexander Nowak, L. Flavio Campanile, and Alexander Hasse, Chemnitz University of Technology, Chemnitz, Germany	
On the Calculation and Control of Structural Intensities to Reduce Sound Transmission through Thin Walled Structures	7
Michael Rose and Alexander Kokott, German Aerospace Center (DLR), Brunswick, Germany	
Vibration Control of MRE Isolator-embedded Smart Building using Genetic Algorithm	9
Yang Yu, Yancheng Li, Jianchun Li, Thuc N. Nguyen, and Shaoqi Li, University of Technology Sydney, Sydney, Australia Emre Erkmen, Concordia University, Montreal, QC, Canada	
Response Modification Factors for Friction Dampers as per the 2015 National Building Code of Canada	11
Ali Naghshineh and Ashutosh Bagchi, Concordia University, Montreal, QC, Canada Fariborz M Tehrani, California State University, Fresno, CA, USA Oscar Romero Galindo, Quake Tek Inc., Montreal, QC, Canada	
Aero-engine Vibration Transfer Path Analysis	13
Seyed-Ehsan Mir-Haidari and Kamran Behdinan, University of Toronto, Toronto, ON, Canada	
Optimal Magnetorheological Damper for Two-Wheeled Vehicle	15
Manjeet Keshav, Eashan Dhawade, and Sujatha Chandramohan, Indian Institute of Technology Madras, Chennai, India	
Intelligent Resonance Identification and Vibration Suppression for Industrial Robots	17
Michael Newman, Ehsan Jalayeri, and Matt Khoshdarregi, University of Manitoba, Winnipeg, MB, Canada	

Dynamic Analysis and Design Optimization of a Light-Weight Magnetorheological Elastomer-based Adaptive Vibration Absorber	19
Mostafa Asadi Khanouki, Ramin Sedaghati, and Masoud Hemmatian, Concordia University, Montreal, QC, Canada	
The Effectiveness of Distributed Tuned Mass Damper Integrated with Adaptive MR Damper in Building	21
A.Bagchi and A. Torkaman Rashid, Concordia University, Montreal, QC, Canada	

Smart Structural Systems

Effect of Parametric Uncertainties on Vibration Mitigation of a Rod with Interconnected Piezoelectric Patches	23
Marcelo A. Trindade, University of São Paulo, Sao Paulo, Brazil Boris Lossouarn and Jean-François Deü, Conservatoire national des arts et métiers (Cnam), Paris, France	
Nonlinear Frequency Analysis of Hair Cell Bundle Structure with Negative Stiffness Characteristic	25
Gi-Woo Kim and Mai Van Ngoc, Inha University, Incheon, South Korea	
Shock Reduction on a Thin Plate using Elastic Wave Dispersion Patch	27
Dae-Hyun Hwang and Jae-Hung Han, KAIST, Daejeon, South Korea	
Digital Twin Model Proposal for an Automotive Chassis	29
Jorge de Jesús Lozoya-Santos, Andrés Campos Ferreira, Adriana Vargas Martínez, Ruben Morales-Menendez, Ricardo A. Ramirez-Mendoza, Tecnológico de Monterrey, Monterrey, Mexico Juan Carlos Tudón-Martinez, Universidad de Monterrey, Monterrey, Mexico	
Multi-mode Piezoelectric Shunt Damping of Plate-like Structures	33
Johan Frederik Toftekær and Jan Høgsberg, Technical University of Denmark, Kgs. Lyngby, Denmark	
Investigating the Performance of Multiple Tuned Mass Dampers on Long Span Cable Stayed Bridge under Multiple Support Excitation	35
Zahrasadat Momeni and Ashutosh Bagchi, Concordia University, Montreal, QC, Canada	
Seismic Performance of Concrete Moment Resisting Frames in Western Canada	37
Ali Naghshineh and Ashutosh Bagchi, Concordia University, Montreal, QC, Canada	

Shape Memory Materials

Tailoring the Flexural Response of Sandwich Structures with Faces Made from Shape Memory Alloy composite actuators	39
Luke Mizzi, Andrea Spaggiari, and Eugenio Dragoni, University of Modena and Reggio Emilia, Reggio Emilia, Italy	
3D Printing to Automate Shape Memory Alloy Placement in Composite Structures	41
Sampada Bodkhe and Paolo Ermanni, ETH Zurich, Zurich, Switzerland Lorenzo Vigo, EPFL, Lausanne, Switzerland	

Constitutive Model of the Correlation Between the Applied Stress, Strain and Electrical Resistance of SMA Actuator	43
Xin Xiang Jiang, Brian Lynch, Alex Ellery, and Fred Nitzsche, Carleton University, Ottawa, ON, Canada	
Shape Memory Polymer Composites and 4D Printing Technologies: From the Aerospace to Flexible Electronics	45
Jinsong Leng and Yanju Liu, Harbin Institute of Technology, Harbin, China	
Impact of Thermally Sensitive Self-adaptive Structures on the Performance of a Cooling Device	47
M. Vilarrubí, J. Rosell, and J. Barrau, University of Lleida, Lleida, Spain L. G. Fréchet, Université de Sherbrooke, Sherbrooke, QC, Canada	
Training for Adaptive Three-dimensional SMA Bumps with Two-way Shape Memory Effect	49
Chen Zhang, Hongli Ji, Lin Hao, and Jinhao Qiu, Nanjing University of Aeronautics and Astronautics, Nanjing, China	
Damping Characteristics of SCSMA Vibration Isolator	53
Kasumi Hayashi, Shimpei Sato, Moe Kawamura, Nobuhisa Katsumata, and Ken Higuchi, Muroran Institute of Technology, Muroran, Japan	

Integration of Sensors and Actuators

Runnability Improvement of the Moon Rover with Leg-circle Transformable Wheel	55
Ayako Torisaka, Kohei Eguchi, Satoshi Miura, Victor Parque, and Tomoyuki Miyashita, Tokyo Metropolitan University, Tokyo, Japan	
Incorporating Sensing Capability in an Electrorheological Haptic Module	57
Alex Mazursky and Jeong-Hoi Koo, Miami University, Oxford, OH, USA Tae-Heon Yang, Korea National University of Transportation, Chungbuk, Republic of Korea Sam-Yong Woo, Korea Research Institute of Standards and Science, Daejeon, Republic of Korea	
Development of PZT Fiber Sensor Array to Locate Acoustic Source	59
Bao Ha and Gang Wang, University of Alabama in Huntsville, Huntsville, AL, USA	
Smart Elastomers for the Sensing of Force and Vibration: A Proof of Concept	61
Jorge de Jesús Lozoya-Santos, Adriana Vargas Martínez, Ruben Morales-Menendez, Ricardo A. Ramirez-Mendoza, and Armando Roman-Flores, Tecnológico de Monterrey, Monterrey, Mexico Juan Carlos Tudón-Martinez, Universidad de Monterrey, Monterrey, Mexico	
An Optical RGB Sensor for Monitoring the Degradation of Magnetorheological Fluids in High-torque Clutch Actuators	63
Benoit Gillet, Mathieu Lamy, Alexandre Landry-Blais, Raphaël Pilon, and Jean-Sébastien Plante, Université de Sherbrooke, Sherbrooke, QC, Canada	
Hilbert-huang Transform on Piezoelectric-Piston Synthetic Jet	65
Zhang Li, Li Hongsheng, Lu Hong, and Long Li, Nanjing Institute of Technology, Nanjing, China	

Development of a Multi-axis Active Seat Mount System for Helicopter Aircrew Whole-body Vibration Reduction 67

Jason Chang, Amin Fereidooni, Viresh Wickramasinghe, and Yong Chen, National Research Council of Canada, Ottawa, ON, Canada

Experimental Characterization of Pull-in Parameters for an Electrostatically Actuated Cantilever 69

Andrea Sorrentino, Giovanni Bianchi, Davide Castagnetti, and Enrico Radi, University of Modena and Reggio Emilia, Reggio Emilia, Italy

Design, Prototyping and Validation of a New PVDF Acoustic Sensor 71

Andrea Sorrentino, Yuri Ricci, Davide Castagnetti, and Luca Larcher, University of Modena and Reggio Emilia, Reggio Emilia, Italy

Design and Experimental Validation of a Haptic Glove and Robotic Arm Powered by Magnetorheological Actuators for Dexterous Object Manipulation in VR 75

Benjamin Bedard, Louis-Philippe Lebel, Bruno-Pier Busque, Marc Denninger, Guifré Julio, Alexandre Girard, and Jean-Sébastien Plante, Université de Sherbrooke, Sherbrooke, QC, Canada

Experimental Assessment of a Linear Actuator Driven by Magnetorheological Clutches for Automotive Active Suspensions 77

William East, Jérôme Turcotte, and Jean-Sébastien Plante, Université de Sherbrooke, Sherbrooke, QC, Canada

Embedded SiC Fiber Sensor based Low-velocity Impact Monitoring of Composite Structures 79

Hyunseok Kwon, Yurim Park, and Chun-Gon Kim, KAIST, Daejeon, Republic of Korea

Microcantilever Sensor for Biochemical Reaction Detection 85

Shervin Foroughi, Jeetender Amritsar, Durai Chelvan, Shanmugamsundaram Packirisamy, and Muthukumaran Packirisamy, Concordia University, Montreal, QC, Canada

Morphing Structures

Control of a Full-scale Portion of a Regional Aircraft Morphable Wing 87

Duc-Hien Nguyen and Ruxandra Mihaela Botez, École de Technologie Supérieure, Montréal, QC, Canada
Teodor Lucian Grigorie, École de Technologie Supérieure, Montréal, QC, Canada and Military Technical Academy "Ferdinand I", Bucharest, Romania
Mahmoud Mamou and Yousef Mébarki, National Research Council of Canada, Ottawa, ON, Canada

Investigation on a Morphing Winglet Driven by Differential Retractable Grid 89

Wei Li, Shanghai University of Engineering Science, Shanghai, China
Ke Xiong, Nanjing University of Aeronautics and Astronautics, Nanjing, China

Analysis of Cylindrical Tensegrities for Use in a Morphing Boom	91
Kaila Roffman and George A. Lesieutre, The Pennsylvania State University, University Park, PA, USA	
Conceptual Design for the Actuation and Skin Integration of a Morphing Leading Edge	93
Amin Fereidooni, Jan Marchwica, Natalie Leung, Jaye Mangione, and Viresh Wickramasinghe, National Research Council of Canada, Ottawa, ON, Canada	
A Morphing Winglet Concept with a Variable Stiffness Skin	95
Jian Sun, Harbin Institute of Technology, Harbin, China and University of Bristol, Bristol, UK Linze Du, Yanju Liu, and Jinsong Leng, Harbin Institute of Technology, Harbin, China Fabrizio Scarpa, University of Bristol, Bristol, UK	
Surrogate Model of the Aerodynamic, Structural and Mass Properties of a Shape Adaptive Airfoil for the blade of the Bo105 Helicopter	97
Stephane Fournier and Benjamin K. S. Woods, University of Bristol, Bristol, UK	
A Finite Element Analysis of a Gull Wing through Varied Morphed Configurations	99
Christina Harvey and Daniel J. Inman, University of Michigan, Ann Arbor, MI, USA	

Bioinspiration and Bioengineering

Analysis, Simulation and Comparison of an Exoskeleton for Rehabilitation of Lower Limbs using Different Materials for its Manufacture	101
C. Hernández-Santos and Juan C. Tudón-Martínez, Universidad de Monterrey, Monterrey, Mexico Fermín C. Aragón, Adriana Vargas-Martínez, Jorge de J. Lozoya-Santos, and Ricardo Ramírez-Mendoza, Tecnológico de Monterrey, Monterrey, Mexico	
Biodegradable Starch-based Materials for Wound Dressing, Monitoring, and Healing	103
M. Mohsen Delavari and I. Stiharu, Concordia University, Montreal, QC, Canada A. Perez-Cruz, Autonomous University of Queretaro, Santiago de Querétaro, Mexico	
Design of Bypass Rotary Vane Magneto Rheological Damper for Prosthetic Knee Application	105
Radhe Shyam Saini Tak and Hemantha Kumar, National Institute of Technology Karnataka, Mangalore, India Sujatha Chandramohan and Sujatha Srinivasan, Indian Institute of Technology Madras, Chennai, India	
Kinematic Analysis and Position Control of a Flexible Tendon-driven Catheter for Minimally Invasive Cardiac Surgery	107
Mohammad Jolaei, Amir Hooshier, and Javad Dargahi, Concordia University, Montreal, QC, Canada	

Structural Health Monitoring

Fault Diagnosis of Adaptive Structures using Mahalanobis-taguchi System	109
Hiroshi Okubo, Toui Ushiku, and Marika Satoh, Kanagawa Institute of Technology, Atsugi, Japan	
Time-reversal Imaging Method based on Laser Ultrasonic Guide Waves with Temporal Filter Method	111
Chenguang Xu, Ying Luo, and Baiqiang Xu, Jiangsu University, Zhenjiang, China	
Predictive Analytics of Structural Lateral Distribution Performance for an in-service Simply Supported Girder Bridge	113
Qiwen Jin, Hefei University of Technology, Hefei, China Zheng Liu, University of British Columbia, Kelowna, BC, Canada	

Estimation of the Capacity of a Bridge Deck and the Bridge Superstructure System Based on Ground Penetrating Radar Imaging	117
Dipesh Donda, Farzad Ghodoosi, and Ashutosh Bagchi, Concordia University, Montreal, QC, Canada	
Automated Visual Assessment of Structural Conditions by FE Model Updating using Building Information Modeling (BIM)	119
S. Bahmanoo, M. Valinejadshoubi, F. A. Sakib, A. Sabamehr, A. Bagchi, and A. Bhowmick, Concordia University, Montreal, QC, Canada	
SHM Point Arrangement for in-service Continuous Bridge with Consideration of Structural Robustness	121
Qiwen Jin, Hefei University of Technology, Hefei, China Zheng Liu, University of British Columbia, Kelowna, BC, Canada	
Experimental Broadband Signal Reconstruction for Plate-like Structures	123
Nicolas Venturini, Clarkson University, Potsdam, NY, USA and University of Bologna, Bologna, Italy Marcias Martinez, Clarkson University, Potsdam, NY, USA and Delft University of Technology, Delft, Netherlands Enrico Troiani and Francesco Falcetelli, University of Bologna, Bologna, Italy Maria Barroso-Romero, Delft University of Technology, Delft, Netherlands	
Vibration-based Damage Detection in a Cable-stayed Bridge	125
Zahrasadat Momeni and Ashutosh Bagchi, Concordia University, Montreal, QC, Canada	
System Identification of Concordia University EV Building by Operational Modal Analysis	127
Saikat Bagchi, Ardalan Sabamehr, Timir Baran Roy, and Ashutosh Bagchi, Concordia University, Montreal, QC, Canada	

Electro/Magneto Sensitive Materials

Shear Behaviour of Magnetorheological Elastomers: Viscoelastic and Magnetorheological Properties	129
Andrea Spaggiari and Alberto Bellelli, University of Modena and Reggio Emilia, Reggio Emilia, Italy	
Behaviours of Lithium-based Magnetorheological Grease under Triangular Quasi-static Test	131
Huixing Wang, Guang Zhang, and Jiong Wang, Nanjing University of Science and Technology, Nanjing, China Yancheng Li, Nanjing Tech University, Nanjing, China and University of Technology Sydney, Sydney, Australia Jianchun Li, University of Technology Sydney, Sydney, Australia	
On the Role of Shape Factor on the properties of Magnetorheological Elastomers in Compression Mode	133
Hossein Vatandoost, Masoud Hemmatian, Ramin Sedaghati, and Subhash Rakheja, Concordia University, Montreal, QC, Canada	
Enhancement of MR-effect in Magnetorheological Elastomers through Bi-layer Composition: Theory and Validation	135
Ali Alkhalaf, Amir Hooshair, and Javad Dargahi, Concordia University, Montreal, QC, Canada	

Dynamic Characterization of Magnetorheological Elastomers based on hard Magnetic Particles under Harmonic Loading	137
Nader Mohseni, Masoud Hemmatian, and Ramin Sedaghati, Concordia University, Montreal, QC, Canada	
A Linear Model for Magnetoactive Elastomers	139
Alireza Beheshti, Ramin Sedaghati, and Subhash Rakheja, Concordia University, Montreal, QC, Canada	
On the Effects of Pre-strain on Dynamic Behavior of Magnetorheological Elastomers in Compression Mode	141
Hossein Vatandoost, Masoud Hemmatian, Ramin Sedaghati, and Subhash Rakheja, Concordia University, Montreal, QC, Canada	

Multifunctional Materials and Composites

The Influence of GFRP Web Reinforcement on the Structural Behaviour of Deep Beams	143
Fawzi Latosh and Ashutosh Bagshi, Concordia University, Montreal, QC, Canada	
Design and Analysis of the Mechanical Properties of 3D Printed Sinusoidal Structures with Auxetic Characteristics	145
Diego A. Quevedo-Moreno, Armando Román-Flores, Enrique Cuan-Urquizo, Marcos D. Moya-Bencomo, Adriana Vargas-Martínez, and Ricardo Ramírez-Mendoza, Tecnológico de Monterrey, Monterrey, Mexico	
Tuning the Hygro-mechanical Response of Paper-based Systems using Glycerol	149
Isaias Cueva-Perez, Roque Alfredo Osornio-Rios, Aurelio Dominguez-Gonzalez, and Angel Perez-Cruz, Universidad Autonoma de Queretaro, San Juan del Rio, Mexico	
The Effect of Adding CNT by Direct Compounding Versus Dilution of a Masterbatch on the Elastic and Electrical Properties of PP Copolymer Composites	151
Erika Palacios-Aguilar, Jaime Bonilla-Ríos, Adriana Vargas-Martínez, Jorge de J Lozoya-Santos, and Ricardo Ramírez-Mendoza, Tecnológico de Monterrey, Monterrey, Mexico	
José Antonio Sánchez-Fernández, Centro de Investigación en Química Aplicada, Saltillo, Mexico	
Polymer Gels: Investigation of the Swelling Induced Deformations with a Thermodynamically Consistent Chemo-mechanical Model	153
Marco Rossi and Thomas Wallmersperger, Technische Universität Dresden, Dresden, Germany	
Paola Nardinocchi, Sapienza Università di Roma, Rome, Italy	
Rapid Direct Deposition of Filled Polymer on Non-planar Surface	155
Jean-François Chauvette and Daniel Therriault, Polytechnique Montreal, QC, Canada	
Nicola Piccirelli, Safran Composites, Itteville, France	

Energy Harvesting

Design of a DC-DC Converter Applying Earthquake Algorithm for Inductance Selection	157
Efrain Mendez-Flores, Alexandro A. Ortiz-Espinoza, Israel Macias-Hidalgo, Miguel de J. Ramirez-Cadena, Adriana Vargas-Martinez, Jorge de J. Lozoya-Santos, Ricardo Ramirez-Mendoza, Arturo Molina-Gutierrez and Juan C. Tudón-Martínez, Tecnológico de Monterrey, Monterrey, Mexico	
Compressive-mode Piezoelectric Energy Harvesting	161
Zhengbao Yang, City University of Hong Kong, Hong Kong, China	
Importance of Cross-sectional Model in Piezoelectric Beam-type Energy Harvester Analysis	163
Shreya Banerjee, BMS Institute of Technology and Management, Bangalore, India P M G B Asdaque and Sitikantha Roy, Indian Institute of Technology Delhi, New Delhi, India	
Power Output Enhancement of Piezoelectric Energy Harvesters using Electrode Coverage Optimization	165
Peyman Hajheidari, Ion Stiharu, and Rama Bhat, Concordia University, Montreal, QC, Canada	
Investigation into Piezo-magneto-elastic Energy Scavenger with Exponentially Tailored Geometry	167
Mahdi Derayatifar, Ramin Sedaghati, Muthukumaran Packirisamy, and Rama Bhat, Concordia University, Montreal, QC, Canada	
A Frequency Adaptive Package Design for Micro Piezoelectric Energy Harvesters	169
Guan-Yu Ke, Cheng-Hsiang Hsu, Yu-Chun Kuo, Wei-Ting Shih, Chao-Ting Chen, Shun-Chiu Lin, and Wen-Jong Wu, National Taiwan University, Taipei, Taiwan
