Contents

PREFACE	XIX
<i>A. Bertron and H. Jonkers</i>	
VOLUME I	XXI
Session 1: Microorganisms-cementitious materials interactions in different contexts - Biodeterioration	1
Keynote paper: Microbial induced acid corrosion from a field perspective - advances in process understanding and construction material development	3
<i>C. Grengg, F. Mittermayr N. Ukrainczyk, E. Koenders, G. Koraimann, S. Kienesberger and M. Dietzel</i>	
Mineralogical characterization of the alteration layer of chemically and biologically altered cementitious materials	11
<i>T. Pons, C. Fourdrin, A. Grandclerc, M. Gueguen-Minerbe, M. Tarrida, M. Peyre Lavigne, E. van Hullebusch, T. Chaussadent and Y. Pechaud^l</i>	
Accelerated testing of materials under the influence of biogenic sulphuric acid corrosion (BSA)	23
<i>H. Wack, T. Gehrke, W. Sand, F. Pape, D. Hintemann, F. Brill and S. Deckert</i>	
Accelerated biodeterioration of various cementitious materials through an accelerated laboratory chamber..	33
<i>J. Herisson, D. Guinot and F. Saucier</i>	
Investigation of test methods to qualify cementitious materials subjected to biological attack in sewer conditions	45
<i>A. Aboulela, M. Peyre-Lavigne and A. Bertron</i>	
Influence of biodeterioration on the mechanical properties of cement mortar	57
<i>J. F. Márquez-Peñaranda, M. Sánchez-Silva, J. Husslerl and E. Bastidas-Arteaga</i>	
1D transport reaction model coupling microbial succession of sulfur oxidizing microorganisms and Mortar reactivity for OPC-, BFSC- and CAC-based materials	69
<i>M. Peyre Lavigne, Y. Pechaud, A. Buvignier, C. Patapy, E. Paul and A. Bertron</i>	
Extending the life factor method for predicting sewer corrosion to non-Portland-based cementitious materials – an experimental study.....	83
<i>M. W. Kiliswa, M. G. Alexander and A. M. Goyns</i>	
Combining corrosion and structural performance of concrete sewers: implications for pipe design and remaining life	97
<i>A.M.N. Goyns and M.G. Alexander</i>	
Microbial activity and corrosion of calcium aluminate concrete in sewers.....	109
<i>M. Valix, H. Bustamante and J. Sunarho</i>	
Accelerated biodeterioration test of cementitious materials in sewer networks	119
<i>A. Grandclerc, M. Guéguen-Minerbe and T. Chaussadent</i>	
Field investigation of cementitious materials durability in sewer environment	127
<i>T. Pons, M. Gueguen, A. Grandclerc, I. Nour, C. Fourdrin, Y. Pechaud, M. Peyre Lavigne, C. Patapy, E. Paul, A. Bertron and T. Chaussadent</i>	
Granules-based bioconcrete: a sustainable strategy towards sewer corrosion.....	137
<i>J. Wei, P. Bond, Z. Yuan and G. Jiang</i>	
Biodeterioration of mortars in sewers: relation with microbial diversity of biofilms.....	143
<i>C. Lors, J. Aube, R. Guyoneaud, F. Vandenbulcke and D. Damidot</i>	
Comparative study on acid resistance tests for cementitious materials applied in sewer systems	153
<i>A.M. Sielaff and D.A. Stephan</i>	
Interaction of wastewater microorganisms with geopolymers and cementitious materials.....	163
<i>B. Drugă, K. Weise, N. Ukrainczyk, M. Muthu, S. Lackner and E. Koenders</i>	
Bioreceptivity of geopolymers in wastewater: preliminary comparison with conventional mortars	173
<i>M.P. Herrling, N. Ukrainczyk, S. Lackner J. Nägler and E. Koenders</i>	
Corrosion of lined concrete	183
<i>M.Valix, A.W. Cheung, R. C. Sendanayaka and M.K. Nazemi</i>	

Bio-corrosion behavior of zeolite and silica fume composites in sulphate environment	193
<i>M. Smolakova, A. Estokova and A. Luptakova</i>	
Optical pH imaging of concrete exposed to chemically corrosive environments.....	203
<i>B. Mueller, C. Grengg, F. Mittermayr, T. Mayr, S. Borisov and M. Dietzel</i>	
Biodeterioration of reinforced sprayed concrete in subsea tunnels	209
<i>S. Karačić, P. Hagelia, T.H.A. Haverkamp, F. Persson and B.M. Wilén</i>	
Influence of marine environment biodegradation on concrete durability.....	223
<i>A. Fabien, N. Sebaibi and M. Boutouil</i>	
Biodeterioration mechanisms and kinetics of SCM and aluminate based cements and AAM in the liquid phase of an anaerobic digestion system.....	231
<i>M. Giroudon, M. Peyre Lavigne, C. Patapy and A. Bertron</i>	
Evaluation of microbial proliferation on cementitious materials exposed to biogas systems	243
<i>C. Voegel, N. Durban, A. Bertron, Y. Landon and B. Erable</i>	
Cathodic polarization properties of steel bars in concrete mixed with aerobic microorganism of bacillus subtilis	259
<i>K. Kawaai, I. Ujike, S. Fujioka, T. Nishida and A. Saito</i>	
Heterotrophic denitrification by mixed populations in nuclear waste repository context, effect of alkaline pH and high nitrate concentration	267
<i>P. Albina, N. Durban, A. Bertron, A. Albrecht, J.C. Robinet and B. Erable</i>	
Microbial nitrate reduction in a highly alkaline environment containing solid cement paste	279
<i>N. Durban, P. Albina, A. Bertron, A. Albrecht, J.C Robinet and B Erable</i>	
VOLUME II.....	287
Session 2: Microbial stains on building materials and protection of materials; building materials with improved bio-receptivity	289
Concrete with improved bio-receptivity.....	291
<i>V. Morin, F. De Larrard, I. Dubois-Brugger, M. Horgnies, S. Duchand, S. Vacher, F. Martarèche, A. Musnier and M. Lapinski</i>	
Bioreceptivity of cementitious material in sea water: development of a laboratory protocol to characterize colonization	301
<i>M.-A. Ferrero, M. Boutouil, H. Cuadrado and P. Claquin</i>	
Eco-design of marine structures in the Bay of Ajaccio, Corsica	309
<i>M. Salgues, J.C. Souche, G. Le Saout, A. Agostini and S. Pioch</i>	
Impact of a thin coating layer of calcium aluminate and sulfoaluminate cements on algal biofouling.....	319
<i>A. Govin, P. Grosseau, C. Lors and D. Damidot</i>	
Session 3: Proliferation of microorganisms (bacteria, fungi) on building materials in indoor conditions and health issues	323
Characterization and identification of environmental fungal and bacterial flora on the surface of in situ earthen materials	325
<i>A. Simons, A. Bertron, C. Roux, J.-E. Aubert and C. Roques</i>	
Characterization and identification of environmental fungal and bacterial flora on the surface of in situ earthen materials	335
<i>B. Aleksic, S. Bailly, M. Draghi, E. Robine and J.D. Bailly</i>	
Impacts of alkalinity and environmental ageing on fungal growth in hemp concretes	347
<i>G. Delannoy, M. Guéguen-Minerbe, I. Nour, S. Marceau, P. Glé, E. Gourlay, D. Diafi, S. Amziane and F. Farcas</i>	
Antibacterial properties of a photocatalytic paint-like coating for the protection of building materials against microbial proliferation.....	355
<i>T. Verdier, A. Bertron and C. Roques</i>	
Improving the methodology of laboratory tests to explore sensitivity of building materials to fungal growth: case of bio-based earth materials.....	367

A. Laborel-Préneron, K. Ouédraogo, A. Simons, M. Labat, A. Bertron, C. Magniont, C. Roques, C. Roux and J.E. Aubert

Session 4: Bacteria-based engineering protective systems for cementitious materials	377
Keynote paper: Biotechnology offers more durable and sustainable cementitious composites	379
<i>Y.Ç. Erşan</i>	
Application and performance of bacteria-based self-healing concrete	387
<i>K. Paine, T. Sharma, M. Alazhar, A. Heath and R. Cooper</i>	
A bacteria-based agent for realizing cost-effective self-healing concrete in low temperature marine environments	395
<i>D. Palin, M.A.A. Geleijnse, B.A. Abbas, V.A. C. Wiktor and H.M. Jonkers</i>	
Screening of pH-responsive hydrogels for encapsulation of bacteria for concrete crack self-sealing.....	405
<i>J. Wang, A. Mignon, G. Trenson, S. Van Vlierberghe, N. Boon and N. De Belie</i>	
Ultrasonic monitoring of bacterial healing of concrete	415
<i>N. Pal Kaur, J. Kumar Shah, S. Majhi, A. Ramachandran and Ab. Mukherjee</i>	
Self-healing efficiency of cement-based materials containing extruded cementitious hollow tubes filled with bacterial healing agent.....	425
<i>G. Anglani, P. Antonaci, J.M. Tulliani, K. Van Tittelboom, J. Wang and N. De Belie</i>	
Microbial calcite induced precipitation ground strengthening with minimum cement content.....	433
<i>A.E. Richardson¹, R. Valentine, M. Abrahams and D Nicholson</i>	
Carbon source selection for microbial conversion to minerals in cementitious materials	445
<i>R.M. Mors and H.M. Jonkers</i>	
Evaluations of effects of nutrients, calcium precursors, and bacteria on mechanical properties of mortar specimens	455
<i>C.C. Chen, M.B. Cucolotto, M. Balac, S. Wang, C.H. Chiu and W.T.Evert Ting</i>	
Using lightweight aggregates as a carrier for bacterial spores in self-healing concrete	465
<i>C.H. Chiu, C.C. Chen and W.T. Evert Ting</i>	
Granules with activated compact denitrifying core (ACDC) for self-healing concrete with corrosion protection functionality	475
<i>Y.Ç. Erşan, N. Boon and N. De Belie</i>	
Effect of bacteria on mechanical properties of engineered cementitious composites	485
<i>Y. Ding, D. Li, Z. Zhang and S. Qian</i>	
Screening of sporulation media for concrete healing bacteria.....	491
<i>W. T. Evert Ting, C.H. Chiu and C.C. Chen</i>	
Applicability of bio-based self-healing concrete in central European conditions: a preliminary study	501
<i>H. Schreiberová, P. Bělý and P. Ryparová</i>	
Healing depth and functionality regain of non-axenic granulated culture based self-healing concrete.....	511
<i>Y.Ç. Erşan, D. Palin, H. Jonkers, N. Boon and N. De Belie</i>	
Mechanisms of cementation of Australian road bases using MICP	521
<i>H. Porter, N. Dhami and A. Mukherjee</i>	
Impact of chemical admixtures on bio-based self-healing mortar.....	533
<i>A. Amiri, M. Azima and Z. Başaran Bundur</i>	
A review on utilization of pozzolanic materials in microbial concrete	543
<i>X. Zhu, N. De Belie¹ and V. Achal</i>	
Use of microorganisms to improve rheology of cement-based materials.....	551
<i>M. Azima, A. Sepetçi, Ş. Gürel and Z. Basaran Bundur</i>	
Poster session.....	559
Influence of physico-chemical properties of cement binders on their biodeterioration in sewer network conditions	561
<i>A. Buvignier, M. Peyre Lavigne, C. Patapy, E. Paul and A. Bertron</i>	
Performance of alternative cementitious binders to biological attack in sewer networks.	563
<i>A. Aboulela, M. Peyre-Lavigne, C. Patapy, S. Meulneyzer, F. Moro and A. Bertron</i>	
The specific role of microbial biofilms in the deterioration of concrete tanks for anaerobic digestion plants	565
<i>C. Perez, C. Lors and B. Erable</i>	

Study of bacterial anoxic corrosion in cementitious environment.....	567
<i>S. Grousset, C. Wittebroodt, A. Dauzères and L. Urios</i>	
Microbial hydrogenotrophic denitrification in nuclear waste repository context - effect of solid cement paste presence.....	569
<i>P. Albina, N. Durban, A. Bertron, A. Albrecht, J.C. Robinet and B. Erable</i>	
Evaluation of the biological sulphate reduction coupled with propionate oxydation in cementitious environment.....	571
<i>N. Durban, P. Albina, A. Bertron, A. Albrecht J.C. Robinet and B. Erable</i>	
Comparison of biocides, allelopathic substances and UV-C as treatments for biofilm proliferation on heritage monuments	575
<i>S. Pfendler, F. Borderie, L. Alaoui-Sehmer, F. Boustia, L. Aleya and B. Alaoui-Sossé</i>	
Up-scaling and industrial validation of enhanced bioreceptivity mortars for living façades development	577
<i>I. Segura, S. Manso, G. Faneca, A. Pitari (4), P. Borralleras and A. Aguado</i>	
Infrared thermography for identification hydro and thermo isolating defects of buildings in relation to molds	579
<i>P. Buchta and I. Kukletová</i>	
Monoglycerides to protect bio-based insulation materials from microbial growth	581
<i>T. Verdier, A. Bertron, C. Magniont, M. Montibus and P. Evon</i>	
Biomimetic multi-scale damage immunity for concrete: the contribution of bacteria-based self-healing	583
<i>K. Paine, A. Heath, R. Cooper and S. Gebhard</i>	
Development and evaluation of a microorganism-based admixture (MBA) in materials cementitious	585
<i>Y. Rodríguez Rodríguez⁽¹⁾, José Fernando Martirena Hernández⁽²⁾, Alina Hereira Díaz⁽³⁾ Yelenys Alvarado-Capó, Y. Díaz-Cárdenas and R. González López</i>	
Selection and characterization of new bacterial isolates for carbonate precipitation in self-healing concrete	587
<i>B.J. Reeksting, K. Paine and Susanne Gebhard</i>	
Cell-free bio-cementation for soils	589
<i>D. Terzis and L. Lyesse</i>	
Acrylic-based hydrogel encapsulated spores of <i>Sporosarcina pasteurii</i> for self-healing cementitious materials	591
<i>O. Lj. Šovljanski, A.M. Vidaković, S.B. Vučetić, I.S. Ristić, B.B. Miljević, J.G. Ranogajec, S.L. Markov</i>
