Volume 11260

Proceedings of SPIE 0277-786X, V. 11260

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fiber Lasers XVII: Technology and Systems*, edited by Liang Dong, Michalis N. Zervas, Proceedings of SPIE Vol. 11260 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix	<i>Authors</i>
xiii	<i>Conference Committee</i>

KW-CLASS FIBER LASERS AND AMPLIFIERS I

11260 03	High-efficient kW-level single-mode ytterbium fiber lasers in all-fiber format with diffraction-limited beam at wavelengths in 1000-1030 nm spectral range (Invited Paper) [11260-2]
11260 05	High power narrow-linewidth Raman amplifier and its limitation [11260-4]
11260 06	Wavelength flexible, kW-level narrow linewidth fibre laser based on 7GHz PRBS phase modulation [11260-5]

COHERENT COMBINATION OF FIBER LASERS

11260 0B	10.4 kW coherently-combined ultrafast fiber laser (Invited Paper) [11260-10]
11260 0D	Investigation of the thermo-optical behavior of multicore fibers used in coherently combined fiber laser systems [11260-12]
11260 0E	Simplification strategies for segmented-mirror splitters in multicore fiber CBC systems [11260-13]

THULIUM DOPED FIBER LASERS AND AMPLIFIERS I

11260 0H	Efficient cladding pump Tm:Ho co-doped fiber laser for operation in the 2.1 microns region [11260-16]
11260 0I	Watt-class optical parametric amplification driven by a thulium doped fiber laser in the molecular fingerprint region [11260-17]
11260 0K	108 W average power ultrashort pulses with GW-level peak power from a Tm-doped fiber CPA system [11260-19]

ULTRAFAST FIBER LASERS AND AMPLIFIERS II

11260 0L	Coherent beam combining of 60 femtosecond fiber amplifiers (Invited Paper) [11260-20]
----------	--

ULTRAFAST FIBER LASERS AND AMPLIFIERS III

- | | |
|----------|---|
| 11260 OP | Amplification of ultrafast pulses in an extended Mamyshev regenerator [11260-24] |
| 11260 OR | Compact all-fiber supercontinuum source with high stability [11260-26] |
| 11260 OT | 1020-1064 nm wavelength-tunable all polarization maintaining mode-locked fiber laser with a programmable optical filter [11260-28] |

THULIUM DOPED FIBER LASERS AND AMPLIFIERS II

- | | |
|----------|---|
| 11260 OU | Soft x-ray high order harmonic generation driven by high repetition rate ultrafast thulium-doped fiber lasers (Invited Paper, Best Student Paper Award) [11260-29] |
| 11260 OV | 1720-nm narrow-linewidth all-fiber ring laser based on thulium-doped fiber [11260-30] |
| 11260 OW | Single-frequency hybrid Brillouin-thulium fiber laser with kilohertz linewidth [11260-31] |
| 11260 OY | Novel miniature 2 μm watt-level PM single clad Tm-doped fiber amplifier [11260-33] |
| 11260 OZ | Toward high peak power ultrashort pulses using normal dispersion thulium fiber in all-fiber amplifier and compressor [11260-35] |

NOVEL DESIGN AND MATERIALS I

- | | |
|----------|--|
| 11260 10 | All-fiber bandwidth tunable filter for high power fiber lasers [11260-36] |
| 11260 11 | Talbot fiber: a poorman's approach to coherent combining [11260-37] |
| 11260 13 | Low-noise, single-frequency 200 W fiber amplifier [11260-39] |
| 11260 14 | Beating of two FDML lasers in real time [11260-40] |

MODE INSTABILITY/STIMULATED THERMAL RAYLEIGH SCATTERING

- | | |
|----------|---|
| 11260 16 | Mode instability in coiled fiber amplifiers [11260-42] |
| 11260 17 | Novel high-speed camera analysis of transverse mode instabilities in rod fiber amplifiers [11260-43] |
| 11260 18 | The sensitivity of the mode instability threshold to different types of intensity noise [11260-44] |

- 11260 19 **Manipulating the heat load distribution by laser gain competition in TMI-limited fiber amplifiers**
[11260-45]
- 11260 1A **Mitigation of transverse mode instability with travelling waves in high-power fiber amplifiers**
[11260-46]

NOVEL DESIGN AND MATERIALS II

- 11260 1C **Single-frequency chirally-coupled-core all-fiber amplifier with 100W in a linearly-polarized TEM₀₀-mode** [11260-48]
- 11260 1D **All-fiber mode-locked laser at 0.98 μm** [11260-49]
- 11260 1G **Design and analysis on optically pumped gas THz fiber laser based on hollow-core anti-resonant fiber** [11260-52]

NOVEL DESIGN AND MATERIALS III

- 11260 1K **Yellow emission from dysprosium-doped ZBLAN fiber laser** [11260-56]
- 11260 1L **Coherent light source with 106 nm broadband spectrum generated directly from Yb-doped fiber oscillator** [11260-57]

MID INFRARED FIBER LASERS AND AMPLIFIERS

- 11260 1M **Sub-150 fs all-fiber polarization maintaining tunable laser in the mid-infrared** [11260-58]
- 11260 1N **All-fiber 600nm amplified spontaneous emission (ASE) source covering the spectral range of 2.75 μm to 3.35 μm** [11260-59]
- 11260 1P **Diode pumped dysprosium fiber laser** [11260-61]
- 11260 1R **New excitation wavelengths for dysprosium-doped mid-infrared fiber lasers** [11260-63]

EYE-SAFE FIBER LASERS AND AMPLIFIERS

- 11260 1S **Hundred-watt CW and Joule level pulsed output from Raman fiber laser in 1.7 μm band**
[11260-64]

HIGH PEAK POWER/HIGH ENERGY FIBER AMPLIFIERS

- 11260 1W **High power UV pulsed laser with LMA tapered fiber** [11260-68]
- 11260 1Y **Green picosecond narrow-linewidth tapered fiber laser system** [11260-70]
- 11260 1Z **High peak power pulsed fiber laser with high efficiency based on an ytterbium doped powder sinter fiber** [11260-71]
- 11260 20 **Generation of picosecond pulses with 150 W of average and 0.92 MW of peak power from an Yb-doped tapered fiber MOPA** [11260-72]

KW-CLASS FIBER LASERS AND AMPLIFIERS II

- 11260 21 **16kW single mode CW laser with dynamic beam for material processing** [11260-73]
- 11260 22 **8-kW single-stage all-fiber Yb-doped fiber laser with a BPP of 0.50 mm-mrad** [11260-74]
- 11260 23 **Passively cooled pump signal combiners at 2.1kW for fiber laser and amplifier systems** [11260-75]
- 11260 24 **Yb/Ce co-doped aluminosilicate PM fibers by VAD process for high power amplification of narrow linewidth source** [11260-76]
- 11260 25 **Fiber Bragg gratings in active multimode XLMA fibers for high-power kW-class fiber lasers** [11260-77]
- 11260 26 **Analysis of fabrication techniques and material systems for kW fibers limited by TMI** [11260-78]

POSTER SESSION

- 11260 27 **Eigenvalue management using dispersion oscillating fibers** [11260-79]
- 11260 28 **Comprehensive study on the parameters affecting the line-width and stability of SOA-based SLM random fiber laser** [11260-80]
- 11260 2A **Sub 500 kHz single soliton generation in a ring cavity Er-fiber laser** [11260-82]
- 11260 2C **Research on picosecond pulsed all-fiber Yb-doped laser with 1.2-GHz repetition rate** [11260-84]

- 11260 2E **Linear Er-doped fiber Mamyshev regenerator with high pulse energy generation** [11260-86]
- 11260 2F **Compact high-power GHz intra-burst repetition rate all-in-fiber CPA system with LMA fiber power amplifier** [11260-87]
