

PROCEEDINGS OF SPIE

Advanced Optical Techniques for Quantum Information, Sensing, and Metrology

Philip R. Hemmer
Alan L. Migdall
Zameer Ul Hasan
Editors

4–5 February 2020
San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 11295

Proceedings of SPIE 0277-786X, V. 11295

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Optical Techniques for Quantum Information, Sensing, and Metrology*, edited by Philip R. Hemmer, Alan L. Migdall, Zameer Ul Hasan, Proceedings of SPIE Vol. 11295 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

PHOTONIC QUANTUM COMPUTING

11295 03	Cyclic quantum walks: photonic realization and decoherence analysis [11295-2]
----------	--

QUANTUM COMMUNICATION AND ENTANGLEMENT II

11295 0C	Volume Bragg gratings for wavelength division multiplexing of entanglement-based quantum key distribution in free space [11295-11]
11295 0D	Towards high-performance quantum key distribution with implementation security (Invited Paper) [11295-12]

QUANTUM MEMORY

11295 0F	High-retrieval efficiency quantum memory for the quantum internet [11295-14]
11295 0G	Quantum-memory-based spin-wave processor for light [11295-15]

QUANTUM SOURCES

11295 0L	Optimised tapered amplifier systems for quantum technologies [11295-19]
----------	--

QUANTUM METROLOGY

11295 0Q	A comprehensive experimental system for measuring molecular two-photon absorption using an ultrafast entangled photon pair excitation source [11295-23]
11295 0R	Near infrared single-photon imaging based on compressive sensing with a sinusoidally gated InGaAs/InP single-photon avalanche diode [11295-24]
11295 0T	An information-theoretical treatment of nonlocal PMD compensation [11295-26]

POSTER SESSION

11295 0W **Measuring of the petroleum product leaks by distributed systems** [11295-28]
