18th International Symposium on
AERODYNAMICS, VENTILATION & FIRE IN TUNNELS

Athens, Greece, 25th – 27th September, 2019

CONTENTS

FOREWORD	1
GUIDELINES	
NFPA 502 2020 Edition: A Summary of the Revisions from the Technical Committee <i>I Bowman, Mott MacDonald, Canada</i>	5
Revisions to EN 14067 part 5 on tunnel aerodynamics: Introduction to substantive modifications <i>P Deeg, DB Systemtechnik, Aerodynamics and Air Conditioning, Germany</i>	16
Non-emergency ventilation in enclosed road, rail and mass transit facilities <i>I Maevski, Jacobs, USA; R Z Smith, Innerquest LLC, USA; A Louie, WSP, USA; B Lampkin, Greenheck, USA; M Colino, WSP, USA; D G Newman, Mott Macdonald, USA</i>	27
Canal tunnels: safety and regulations – focus on ventilation system <i>L Agnese, Setec TPI, France</i>	36
Study of Spatial Constraints on the Critical Ventilation Velocity <i>E Hataysal, O Tunc, M Tabarra, Arup, UK</i>	47
HYPERLOOP	
Hyperloop: simulation and assessment of high-speed vehicle transport in evacuated tubes <i>G Kauzinyte, M Vezza, University of Glasgow, UK; S Alizadeh, D Eckford, Mott MacDonald, UK</i>	61
ROAD TUNNELS - OPERATION AND MANAGEMENT	
Project Borée: controlling road-tunnel ventilation by means of a network of microsensors, in order to reduce the exposure of the local population to pollutants - Background, methodology and initial results <i>J F Burkhart, M Yaghzar, B Vidal, JP Grand, CETU (Centre d'Etudes des Tunnels), France; D Robin, S Castel, R Boissat, AtmoSud, France</i>	79
Influence of a reverse operation of Jet Fans on traffic (safety) and its countermeasures <i>Y Abe, Metropolitan Expressway Company Limited, Japan; H Yanagi Echoplan Company Limited, Japan</i>	94
Allocation and operation of jet-fans for a safe evacuation at a fire in a tunnel with longitudinal ventilation system <i>K Takahashi, FITUT Laboratory Co. Ltd., Japan; A Mizuno, Kogakuin University, Japan</i>	108

Assessment of Tunnel Ventilation Operation in Eurasia Road Tunnel 123
E Hataysal, M Tabarra, Arup, UK; B Gun, M Gucuyener, ATAŞ, Turkey

Study on measures to suppress the temperature rise in road tunnels 137
M Matsuzuki, H Saito, Metropolitan Expressway Company Limited, Japan; A Mizuno, Kogakuin University, Japan

Using Audible Information to Prevent Entry into a Tunnel 152
K Yamamoto, Central Nippon Expressway Company Limited, Japan; H Yazawa & M Yokota, Central Nippon Highway Engineering, Tokyo Company Limited, Japan

HIGH SPEED TUNNELS

Simple and accurate analysis of MPWs: Near-field and far-field 163
A E Vardy, University of Dundee, UK & Dundee Tunnel Research, UK

Influence of train underbody gap on the formation of entry compression wave in a high-speed railway tunnel 178
R S Iyer, T H Kim, H D Kim, Andong National University, Korea Republic; D H Kim, Hypertube Express (HTX), Korea Railroad Research Institute, Korea Republic

Effect of the cross-sectional expansion of a tunnel hood on the reduction of micro-pressure waves 194
H Okubo, T Fukuda, T Miyachi, S Saito, Railway Technical Research Institute, Japan

Micro-pressure waves from tunnel portals in cuttings 206
H Wang, Southwest Jiaotong University, China; A E Vardy, University of Dundee and Dundee Tunnel Research, UK; H Bi, Southwest Jiaotong University, China

PROJECT CASE STUDY

North-South Railway junction of Brussels – Design of the emergency ventilation system including Saccardo nozzles in a complex tunnel network 223
F Waymel, M Lorenz, Egis Tunnels, France; E Béraud, L Rathat, Eiffage Énergie Systèmes, France

Tunnel ventilation concepts comparison as driven by archaeological investigations 240
P Molteni, M Mossi, GESTE Engineering SA, Switzerland; G Leoutsakos, Attiko Metro SA, Greece

Innovative approaches for detailed 3D fire simulations in large metro stations – Example of a large scale metro rehabilitation project in Germany 259
J Muetterlein, R Gertl, M Schoell, ILF Consulting Engineers Austria GmbH, Austria

Ventilation of the Seattle SR99 Highway Tunnel: The Owner's Perspective 277
I Bowman, Mott MacDonald, Canada; S Everett, Washington State Department of Transportation, USA

Metro tunnel ventilation concepts evolution following operational advances and evolving rolling stock characteristics 292
G Leoutsakos, Attiko Metro SA, Greece

TESTING AND COMMISSIONING

- Tunnel Ventilation System Testing and Commissioning – How Far? How Fast? How Much? 319
I Sweetland, Yyss Ltd, UK; M Gilbey WSP Ltd, UK
- Validation of numerical simulation of a longitudinal ventilated road tunnel by Particle–Image Velocimetry (PIV) in a reduced scale model tunnel 334
L L Lehmann, TLT-Turbo GmbH, Germany; W Jessen, W Schröder, RWTH Aachen University, Germany
- Cold flow validation of point extraction vehicular tunnel ventilation system 350
S Cassady, S Parayil, E Jones, T Tran, D Parker, J Casey, HNTB Corporation, USA
- Lessons learned from extensive tunnel velocity verification testing 363
M I Bilge, O Çelebi, M Bilge, Mecon, Turkey; E Musluoglu, Qatar Rail, Qatar

EQUIPMENT

- MoJet Tunnel Ventilation – Full-Scale Testing and CFD Analysis 379
F Tarada, K Else, A Domoney, Mosen Ltd, UK; P Hendrick, A Tarhach, Université Libre de Bruxelles, Belgium; A Mugisha, A Kabuya, Bruxelles Mobilité, Service Public Régional de Bruxelles, Belgium
- Impact of installation of Sound Attenuators on tunnel ventilation fan performance 390
S Upadhya, J Fletcher, R Arnold, M Miah, Jacobs Ltd., UK
- Case study of staged start-up implication on locked rotor torque demand for reversible vane axial tunnel ventilation fans operating in a parallel configuration 405
D Kandra, D Kim, R Potter, D Lin; V-G Chan, Arup, USA
- Full-scale measurements of thrust and power of inverter-driven jet-fans 419
I Nakahori, T Sakaguchi, S Abe, Sohatsu Systems Laboratory Inc., Japan; A Vardy, University of Dundee, UK & Dundee Tunnel Research, UK

RISK ASSESSMENT – FIRE RISKS

- Modelling of tunnel ventilation's influence on fire risk – a detailed comparison of model assumptions and their potential influence 435
S Frey, N Riklin, R Brandt, HBI Haerter AG, Switzerland; O Heger, B Kohl, ILF Consulting Engineers Austria GmbH, Austria
- User's safety in tunnels - additional risks of new energy carriers vehicles 450
C Willmann, B Truchot, CETU – safety department & INERIS – Accident risk direction, France

CFD/1D MODELLING

- Modelling of PSD station interfaces in 1-D simulations 467
D Fernandes, C Graham, S O'Gorman, WSP, Australia

On the opportunities and limitations of simplified CFD models for tunnels with complex geometries 482
T Pleninger, Lechner & Partner ZT GmbH, Austria

ROAD TUNNELS - DESIGN CONSIDERATIONS

Boosting pressure generated by jet-fans when operated against the longitudinal airflow in road tunnels 499
N Kato, S Ito, A Mizuno, Kogakuin University, Japan; T Chihara, S Hashimoto, FITUT Laboratory Co. Ltd., Japan

Road tunnel safety levels and minimum operating requirements 512
G Clark, C Perez, Y Gomez, Atkins Ltd, UK

Revisiting natural ventilation requirements for short transit and road tunnels 528
E Persson, J Del Solar, M Bilson, K McQuade-Jones, WSP, USA

Ventilation and cooling during construction: major issues to solve while considering the specific constraints of each project (comparison of 3 examples) 543
C Museux-Castel, R Debacque, Setec Tpi, France

RAIL TUNNELS - DESIGN CONSIDERATIONS

How Many Trains Should Be Allowed in a Vent Zone? 561
A Louie, S Li, S Marsico, B R Seo, N Nishimura, WSP, USA

Ventilation zone management for transit system ramping track crossovers 576
E Jones, S Cassidy, T Tran, S Parayil, HNTB Corporation, USA

Tunnel and ventilation design considerations for multiple-head diesel locomotives 591
C Jasper, D A Paradiso, D Edwards, Aurecon Group, Australia

Overall analysis of pressure relief shafts optimisation for a metro system: Case Study - Paris Line 14 South Extension 606
I Baha, M Pihouee, S Vassoudevane, SYSTRA Group, France; F Nicolas, S Pichon, X Peron, RATP Group, France

FFFS – TESTING

Heat Release Rates of Heavy Goods Vehicle Trailer in Tunnels with Fixed Water-based Fire Fighting Systems 621
M K Cheong, G Louis, L W Lim, M Thong, Land Transport Authority of Singapore, Singapore; A Palle, VID Fire-Kill Aps; Singapore; A D Lemaire, T Rakovec, E Ferad, Efectis Nederland BV, Netherlands

The Effect of Nozzle Design on the Fire Heat Release Rates in Tunnel Deluge Systems 633
F Tarada, Mosen Ltd, UK; M K Cheong, G Louis, L W Lim, M Thong, Land Transport Authority of Singapore, Singapore; A D Lemaire, Efectis Nederland BV, Netherlands

Validation of 3D Fire Simulator FDS for evaluation of ventilation control and water spray activation at road tunnel fires with risk analysis model 645
A Ichikawa, K Takahata, East Nippon Expressway Company Ltd., Japan; K Toeda, Nexco-East Engineering Company Ltd., Japan; N Kawabata, Komatsu University, Japan; T Sakaguchi, T Matsumoto, Sohatsu Systems Laboratory Inc., Japan; B Kohl, O Senekowitsch, ILF Consulting Engineers Inc., Austria

EVACUATION

Determination of Cross-Passage Spacing from Fractional Effective Dose Analysis 661
S A Marsico, S Li, A Louie, WSP, USA

Safe Passage – Evacuation Provisions for Road Tunnel Users 676
N de los Rios, N Harvey, K X Li, Mott MacDonald Holdings Inc., USA; R Hall, Mott MacDonald Holdings Inc., UK

Global Assessment regarding the time of Tenability - Considerations for a Metro System: Application to the Riyadh Metro 689
A Rudolf, A Jonard, S Vassoudevane, R Singh, Systra, Infrastructure A Alluhaidan, RDA, France

SMOKE MANAGEMENT

Experimental analysis of smoke control using transverse ventilation in a tunnel 705
F Chaabat, P Salizzoni, M Creyssels, M Marro, J Wingrave, H Correia, CNRS University Lyon, France; A Mos, CETU (Centre of Expertise on Tunnels), France

Combined fan systems for Metro Station Smoke Management Operations 723
C S Koulani, C J Graham, S O'Gorman, WSP, Australia

Unidirectional ventilation for steep metro rail tunnels 738
C Biotto, Aurecon, Australia; J Alston, Ove Arup & Partners, USA; P Johnson, Arup, Australia; O Dinsdale-Young, Mott MacDonald, New Zealand

Researching on Methods of Early Detection and Smoke Control in Road Tunnel Fire 753
N Suzuki, Central Nippon Expressway Company Limited. Kanazawa University; N Kawabata, Komatsu University; M Yokota, Central Nippon Highway Engineering Tokyo Company Limited, Japan

An investigation of the effects of inter-carriage doors on smoke management in metro systems 764
O Dinsdale-Young, Mott MacDonald, New Zealand; S Gan, P Gehrke, C Holmes, Mott MacDonald, Australia; E Krokos, Mott MacDonald, UK

PROJECT CASE STUDY – REFURBISHMENT

Electromechanical innovative approach for Landy tunnel refurbishment – from conception to commissioning 781
L Fournier, Egis, France

Development of an injection nozzle retrofit to disrupt the Coanda effect 796
C Fleming, J Van, SNC-Lavalin, Canada; N Rhodes, Consulting Engineer, USA

AERODYNAMICS

Analysis and design considerations for non-mechanical ventilation schemes 809
for transit system infrastructure
S Cassidy, H Raharja, T Tran, J Casey, HNTB Corporation, USA

Assessment of aerodynamic loading on cable support assemblies in a long 824
rail tunnel
S Alizadeh, J Francois, M Macchi, R Khodadadi, D Eckford, Mott MacDonald, UK

THERMODYNAMICS/AIR QUALITY

Tunnel environmental conditions in the Gotthard base tunnel – prediction 839
and reality
A Busslinger, M Flueckiger, B Béguin, C Raemy, P Reinke, HBI Haerter, Switzerland

Cable tunnel analysis using a seasonal methodology 854
J A Thompson, WSP, UK

Assessing indoor air quality inside underground metro stations. 865
A Case study of Delhi Metro
A K Garg, R K Jain, Delhi Metro Rail Corporation Limited, India; A K Tripathi, National High Speed Rail Corporation Limited, India

AUTHOR INDEX
