19th International Conference on
MULTIPHASE PRODUCTION TECHNOLOGY
Cannes, France, 5th – 7th June, 2019

CONTENTS

FOREWORD	1
OBITUARY	3
DATA ANALYTICS	
Slugging monitoring and classification with machine learning <i>P Shoeibi Omrani, I Dobrovolschi, K Loh, SPC Belfroid, Heat Transfer and Fluid Dynamics department, TNO, The Netherlands</i>	7
Optimization of a subsea design using an evolutionary algorithm <i>M Healey, S Duff, & J James, Pace Flow Assurance Ltd, London, UK</i>	23
A real-time well integrity monitoring workflow based on artificial intelligence and dynamic flow modeling <i>A Bilogan, Wintershall Holding GmbH, V Elichev, Wintershall Holding GmbH, H Binn-Tahir, Binn-Tahir Consulting, R Khabibullin, Russian Oil and Gas University, K Litvinenko, Russian Oil and Gas University</i>	35
EMERGING APPLICATIONS	
An innovative technique for transient liquid management of hilly gas pipelines <i>D Roullier, Wood PLC, H. Karami, The University of Oklahoma, Oklahoma, USA; T Makogon, Wood PLC, Texas, USA</i>	49
Risk-based flow assurance: a probabilistic approach to optimising flowline insulation requirement <i>S A D Jacquemin, Y K Lum, Genesis Oil and Gas Consultants, Australia (Flow Assurance); J C Y Wong, J E P Morgan, Woodside Energy Ltd, Australia (Flow Assurance)</i>	63
Integration of custom flow assurance models into Hydraulic Simulators <i>T P Lagus, ExxonMobil Upstream Research Company, USA</i>	77
Fluctuating forces in a large ID pipe due to multiphase flow <i>O Macchion, L Stachyra, A Jensen, TechnipFMC, Lysaker, Norway; S Belfroid, TNO, Delft, Netherlands</i>	91

Novel coupled Cahn-Hilliard Navier-Stokes solver for the evaluation of oil and gas multiphase flow 105

S Gómez-Álvarez, A Rivero-Jiménez, Repsol Technology Lab, Mostoles, Madrid, Spain; G Rubio, J Manzanero, C Redondo, ETSIAE-UPM – School of Aeronautics, Universidad Politécnica de Madrid (UPM), Madrid, Spain

Production recovery and economic performance of subsea processing technologies for longer and deeper gas field developments 119

T Wood, L Thomas, INTECSEA, UK

X-ray 2D and 3-Phase computed tomography (CT) measurements of multiphase flows: digital reconstruction of multiphase flow maps suitable for high pressure applications 137

S Black, M Laing, TUV SUD NEL (National Engineering Laboratory), East Kilbride, UK

EXPERIMENTAL

Effect of droplet entrainment in liquid loading prediction 155

C Vieira, M Stanko, Norwegian University of Science and Technology, Norway

Experimental studies for the dimensional analysis and scaling in two-phase gas-liquid stratified pipe flow 167

R Farokhpoor, L Liu, M Langsholt, K Hald, J Amundsen, IFE, Institute for Energy Technology, Norway; C Lawrence, Schlumberger Software Technology, Oslo Technology Centre, Norway

An experimental investigation of three phase flow instabilities in a flowline-riser medium scale setup 183

T K Kjeldby, M Nordsveen, Equinor ASA, Norway

HYDRATE MANAGEMENT

Predicting gas hydrate formation during three-phase gas-(water-in-oil) flow 201

C L Bassani, F A A Barbuto, R E M Morales, Multiphase Flow Research Center (NUEM), Brazil; A Cameirão, J-M Herri, Mines Saint-Etienne, France; A K Sum, Hydrates Energy Innovation Laboratory, USA

Predicting hydrate film growth on the wall from water droplet deposition in gas-dominant flowlines 217

T B Charlton, B W E Norris, M L Johns, E F May, Z M Aman, School of Mechanical and Chemical Engineering, The University of Western Australia; L E Zerpa, C A Koh, Center for Hydrate Research, Colorado School of Mines, USA

1D numerical simulations of hydrate formation and transport in oil-dominated systems with a population balance framework 231

M A Pasqualette, J N E Carneiro, ISDB FlowTech; G G Ribeiro, A B Soprana, V Girardi, ESSS; G S Bassani, Repsol Sinopec Brasil; D Merino-Garcia, Repsol

Multiphase flow simulator use for production & hydrate management – Improvements and benchmark against experimental data with real fluids 247

C Tzotzi, E A Abubeker, Angela De Leebeeck, TechnipFMC, France; M Gainville, D Roche, IFPEN, France

MODEL ENHANCEMENTS

- Simplified mechanistic model for the separation of dispersed oil-water horizontal pipe flows 265
N Evripidou, V Voulgaropoulos, P Angeli, ThAMeS Multiphase Research Group, Department of Chemical Engineering, University College London, UK
- Assessment entrainment rate correlations for annular flow based on disturbance wave crests 277
J G C de Siqueira, A O Nieckele, Petrobras, PUC-Rio, Dept. Mech. Eng., Pontifical Catholic University of Rio de Janeiro, Brazil; J N E Carneiro, ISDB FlowTech, Brazil
- Modeling high-liquid viscosity two-phase flow pattern transitions in upward vertical pipe flow 291
E Al-Safran, M Ghasemi, F Al-Ruhaimani, Petroleum Engineering Department, Kuwait University, Kuwait

PIGGING AND SPHERING

- Simulation of slug propagation for by-pass pigging in two-phase stratified pipe flow 317
M H W Hendrix, Shell Projects & Technology, The Netherlands, Delft University of Technology, The Netherlands; B Sanderse, Centrum Wiskunde & Informatica (CWI), The Netherlands; W-P Breugem, Delft University of Technology, The Netherlands; R A W M Henkes, Shell Projects & Technology, The Netherlands, Delft University of Technology, The Netherlands
- Operational sphering for liquid management: matching field data with OLGA 331
J Lovick, A Jamieson, Genesis, One St Paul's Churchyard, London, UK
- Crude oil rheological properties and flow regime for Gannet oil export pipeline 345
S Henderson, Process Engineering, Shell UK; M van Dijk, A Cheong, Process Engineering, Shell Global Solutions International B.V

SLUG FLOW

- Flow structures of gas-liquid slug flow in annuli using X-ray tomography 359
R Ibarra, O Skjæraasen, J Nossen, Department of Fluid Flow, Institute for Energy Technology (IFE), Norway
- Severe slugging mitigation in an S-shape pipeline-riser system with injectable venturi for stabilised and increased production 375
J Inok, L Lao, Department of Energy and Power, Cranfield University, UK; Y Cao, College of Chemical and Biological Engineering, Zhejiang University, China; J F Whidborne, Dynamics Simulation and Control Group, Cranfield University, UK
- Characterization of pseudo-slug flow in a slightly upward large diameter pipe under elevated pressures 389
A A Soedarmo, TUFFP, The University of Tulsa, Tulsa OK, USA, Schlumberger Norway Technology Center, Asker, Norway; H T Rodrigues, TUFFP, The University of Tulsa, Tulsa OK, USA, Petrobras R&D Center (CENPES), Rio de Janeiro, Brazil; E Pereyra, C Sarica, TUFFP, The University of Tulsa, Tulsa OK, USA

TANZANIA - THE STORY CONTINUES

Tanzania Gas development-flow assurance challenges <i>H Holm, Equinor ASA, Norway</i>	409
Large scale experiments on high-rate three-phase low liquid loading flows <i>J Kjølås, T E Unander, H Schumann, M Wolden, SINTEF, Norway; H Holm, Equinor, Norway</i>	425
Modelling of the wall film in high-rate low liquid loading flows <i>J Kjølås, SINTEF, Norway; H Holm, Equinor, Norway</i>	441
Rheology study: Comparison of a real condensate-MEG system and a model fluid system <i>H Schumann, J Kjølås and M Wolden, SINTEF, Norway; C Lawrence, Schlumberger Software Technology, Norway; H Holm, Equinor, Norway</i>	461
A new model for annular stratified flow <i>D Biberg, C Lawrence, A Brigadeau, A Andersson, Schlumberger Norway Technology Center; H Holm, Equinor, Norway</i>	477

WAX AND SAND MANAGEMENT

Impact of fluid flow and thermodynamic wax models on multiphase wax deposition simulation <i>X Zhang, N Pedrosa, A Speranza, A Queimada, R Szczepanski; KBC Advanced Technologies Ltd (A Yokogawa Company), London, UK</i>	497
Experiments and modelling of critical transport velocity of threshold (very low) particle concentration in single-phase and multiphase flows <i>S K Sajeev, B S McLaurry, S A Shirazi, Tulsa University Sand Management Projects (TUSMP), The University of Tulsa, USA</i>	513
Selection, implementation and validation of a sand transport model within a commercial multiphase dynamic simulator for effective sand management <i>A Musi, D Larrey, J Monsma, M-A Paran, M-K. Decrin, TOTAL E&P, UK</i>	533
