Proceedings of the
Iron & Steel Technology Conference
Volume I

AISTech 2020

Ronald E. Ashburn, Publisher
Amanda L. Blyth, Publications Manager
Jennifer M. Emling, Technical Editor
Emily C. Williams, Technical Editor
Christopher P. Brown, Lead Graphic Designer
Krista J. McGhee, Graphic Designer

A Publication of the Association for Iron & Steel Technology
# TABLE OF CONTENTS

**AISTech® 2020**

## VOLUME I

### BRIMACOMBE MEMORIAL LECTURE

**BRIMACOMBE MEMORIAL LECTURE**

Recent Developments in Thermomechanical Processing of Steels ......................................................... 1

*Clod Aranas, Samuel Filgueiras Rodrigues, Chiradeep Ghosh, Fulvio Siciliano, John Jonas*

### SAFETY & HEALTH

#### SAFETY & HEALTH I

Smart Safety Guard Improving Safety Through Real-Time People Localization ........................................... 10

*Nicolas Schlesser, Fabrice Hansen, Yves Reuter*

Virtual Reality Simulator for Portable Fire Extinguisher Training ............................................................. 19

*Justin Heffron, Chenhao Zhang, John Moreland, Kyle Toth, Angela Hiller, Jeffry Mitchell, Robbie Britton, Stephen Borzych, Chenn Zhou*

#### SAFETY & HEALTH II

Development of Steel Manufacturing Plant–Specific Safety Plan ................................................................. 26

*Katrina Fenimore, Mason Hawk, Justin Knowles, Emma Rawls, Sathyanarayanan Rajendran, Jennifer Serne*

### SAFETY & HEALTH/MATERIAL HANDLING/CRANES/TRANSPORTATION & LOGISTICS

#### SAFETY & HEALTH/MATERIAL HANDLING/CRANES/TRANSPORTATION & LOGISTICS

Crane Safety — We've Done the Thinking So You Don't Have To ............................................................... 34

*Kevin Hoffmeyer, Craig Wagner, Jennifer Pasek*

### ENVIRONMENTAL/ENERGY & UTILITIES

#### ENVIRONMENTAL/ENERGY & UTILITIES

Total Waste Heat Recovery Device for Offgas From Electric Arc Furnace................................................. 38

*Maolin Dong, Tao Zhou*
ENVIRONMENTAL

ADVANCES IN WATER AND AIR POLLUTION CONTROL

Sustainable Recycling of Steel Manufacturing Wastewater Treatment Solid Wastes Via In-Process Dynamic Separation .......................................................... 44
   Naiyang Ma

Heating Value and Waste Gas Flow-Controlled Exhaust Gas Post-Combustion for a 150-Ton RH-TOP Degasser at Big River Steel .......................................................... 53
   Helmut Biehl, Volker Wiegmann, Jochen Schlüter, Michele Vachon, Jonathan Youngblood

New EAF Dust Treatment Process for Co-Production of Metallic Zinc and Calcium-Ferrite .................. 61
   Shunsuke Koide, Hitoshi Mizuno, Kazuyoshi Yamaguchi, Fumio Tanno, Tetsuya Nagasaka

AIR POLLUTION CONTROL — STEELMAKING & DOWNSTREAM APPLICATIONS

Applications That Reduce the Pressure Drop of Air Pollution Control Systems: From Canopy Hood to Stack .................................................................................. 71
   Marco Peter Cudicio, Alberto Feruglio

Current Best Practice for Rolling Mill Fume Exhaust System Design ................................................. 79
   William Frank, Joseph Butchko

The Clean Air Act and Its Requirements for Environmental Air Sampling (“Stack Testing”) for the Iron and Steel Industry ................................................................. 91
   Joseph Tutak

AIR POLLUTION CONTROL — UPSTREAM APPLICATIONS

BOF Gas Cleaning System Upgrades for Increased Efficiency and Off-Gas Quality .......................... 101
   Matthias Meyn, Peter Klut, Ruud Herold, Edo Engel

Gas Cleaning and Waste Heat Recovery Solutions for Integrated Steel Plants and Mini-Mills — State-of-the-Art Technologies and Latest References ............................................. 112
   Alexander Fleischanderl, Thomas Steinpazer, Paul Trunner

The Characteristics of Sulfur in Blast Furnace Gas and Desulfurization Technology ......................... 122
   Jian Xie, Jingchuan Wu

CAE Simulation and Study on Revamping Dust Catcher for Blast Furnace ........................................ 131
   Tian Hui, Zhongping Zou, Yu Zhong, Xu Can, Yu Donglong

COKE MAKING

COKE PLANT MAINTENANCE & OPERATIONS

Managing the Impact, Assessment and Application of Solutions for Combustible Dust Mitigation and Control in Modern Manufacturing Environments .......................................... 144
   Simon Shipp

Successful Operation of Sulfur Recovery Unit at New Byproduct Plant at Tata Steel ......................... 159
   Deepak Kumar, Rajesh Kumar, Abhijit Roy
COKE QUALITY & CHARACTERIZATION

Coal Rheology — The Effect of Rank and Sample Preparation on Test Results ........................................ 167
  Ted Todoschuk, Louis Giroux

Effects of Interaction of CO₂, H₂O and K on Coke Thermal Strength ........................................ 173
  Hongwei Li, Li Xin, Liu Ran, Hongyang Li, Shuhui Zhang, Lyu Qing

IRONMAKING

BLAST FURNACE CAMPAIGN EXTENSION I

Development of Strategy for Sustaining, Enhancement and Cost Reduction at Severstal's Primary End ................................................................................................................................. 178

30+ Year Campaign of IJmuiden Blast Furnace No. 6 ........................................................................ 187
  Frank Kerkhoven, J. Stuurwold, G. Tijhuis, B. Nugteren, Reinoud Van Laar

JinXi Blast Furnace No. 9 Refractory Wear Evaluation Based on AU-E and Physical Measurements .... 198
  Afshin Sadri, Li Jian Wei, Sun Ya Ping, Mitchell Henstock, Wai Lai Ying, Jesson Ma

Campaign Life Extension of Blast Furnace Offgas System .................................................................. 205
  Sergio Nascimento Leal, Jorge Luiz De Oliveira, Maher Al-Dojaji, Hamid Ghorbani, Ricardo Jose Maia, Camilla Lopes, Yang Zhou, Mark Allan, Sunil Kumar, Chad Van Der Woude

Blast Furnace Campaign Extension by Recovering Cooling Capability of the Furnace Body and Increasing Cost Competitiveness by Low-Grade Coke Operation at Pohang No. 1 Blast Furnace .......... 216
  Cheolgi Min, Taejun Kim

BLAST FURNACE CAMPAIGN EXTENSION II

Ironmaking in Russia ............................................................................................................................ 221
  Yakov Gordon, Dmitriy Tikhonov, Alexey Tretyak

BLAST FURNACE DIGITALIZATION I

Blast Furnace Data Validation Using Deep Learning as an Enabler for Autonomous Blast Furnace .......... 231
  Cédric Schockaert, Fabrice Hansen, Franck Giroldini, Alexander Schmitz

Applications and Practices of Integrated Intelligent Management and Control Platform for Ironmaking Area ....................................................................................................................... 243
  Gang Wang, Tao Deng, Jinsong Wang, Hao Xie, Xiaodong Sun, Xianming Li

BLAST FURNACE DIGITALIZATION II

Machine Learning to Improve Blast Furnace Productivity at Jindal Steel & Power .............................. 252
  Ritesh Mishra, Anil Gandhi, Richa Jaiswal, Sambit Mishra, Aniruddha Fadnis
Computerized Blast Furnace Training System................................................................................................. 261
Sergei V. Filatov, Sergei A. Zaiganov, Vladislav S. Listopadov, Larisa Yu. Gileva, Sergei V. Myasoyedov, Andrey Yu. Sorokin, Yakov Gordon, Andrei A. Pishihin,

Technological Parameters and Blast Furnace Practice to Achieve Long Blast Furnace Campaign .................. 269
Vladislav S. Listopadov, Nikolai Izumskiy, Rory McNally, Sergei Shalimov, Yakov Gordon,
Gennadiy Matvienko, Oleksii Chaika

BLAST FURNACE INJECTION TECHNOLOGIES

Pulverized Coal Conversion in Blast Furnaces — Analysis of Involved Scales .................................................. 277
Markus Bösenhofer, Eva-Maria Wartha, Christian Jordan, Franz Hauzenberger, Christoph Feilmayr, Hugo Stocker, Johannes Rieger, Bernhard König, Michael Harasek

Investigation of High-Rate and Preheated Natural Gas Injection in the Blast Furnace ...................................... 286
Samuel Nielson, Tyamo Okosun, John D’Alessio, Shamik Ray, Mitchell Klaas, Chenn Zhou

Study on the Slagging System of Blast Furnace With Gas Injection ................................................................. 298
Li Hong-Yang, Lyu Qing, Li Fu-Min, Li Hong-Wei, Lan Chen-Chen, Li Xin

BLAST FURNACE OPTIMIZATION

Optimization of Parameters of Blast Furnace Smelting Under Conditions of Plant Operation With
Limited Supply of Coke, Natural Gas or Iron-Bearing Materials ....................................................................... 302
Michael Alter

Optimization of Blast Furnace Operation by Using One-Third-Scale Experimental Burden
Distribution Simulator and Mathematical Modeling ......................................................................................... 310
Kosho Matsuda, Hiroshi Mio, Hiroshi Sakai, Kaoru Nakano, Seiji Nomura

Study on the Formation Mechanism of Gas Gap in Blast Furnace Hearth ....................................................... 318
Zhongping Zou, Jun Xu, Min Chen

HEATING & COOLING

The Effects of Heat Loss of Blast Furnace on Its Coke Rate ................................................................................ 329
D. (Frank) Huang, Marcelo Andrade, Phillip Pergi, Christopher Caplick, Wayne Everitt, Larry Storm

Usage of Blast Furnace Heat Balances to Control Heat Loss ............................................................................. 340
Nikolai Spirin, O. Onorin, A. Polinov, A. Pavlov, Yakov Gordon

The Formation and Distribution of Ti(C,N) to Prevent Blast Furnace Refractory Wear .................................. 346
Thomas Britt, P. Chris Pistorius

Investigation on Blast Furnace Copper Stave Operation Conditions ................................................................. 353
Feng Wang, Jun Xu, Xianbo Hu, Zhongping Zou, Yunjian Zhao, Zhongyong Xiang

IMPROVEMENT OPPORTUNITIES

Modern Blast Furnace Top Gas Cleaning: Wet Separation Improvements at U. S. Steel – Great Lakes Works B2 Blast Furnace .................................................................................................................. 361
Jean-Luc Kuffer, James Quick, Christian Davidi
### Sustainable Steelmaking
— A Strategic Evaluation of the Future Potential of Hydrogen in the Steel Industry

*Micahel Skorianz, Edo Engel, J. Schenk*

---

### RAW MATERIALS

#### Addition of Scrap and DRI/HBI to the Blast Furnace — Technology to Overcome Top Temperature Limits and Reduce Greenhouse Gas Emissions

*Ian Cameron, Don Tu, Mitren Sukhram, Janice Bolen, Jennifer Woloshyn*

### SINTER FOR IRONMAKING

#### Decreased Sinter Process Variation at BlueScope Steel Using Real-Time Feed Composition

*Nick Di Giorgio, David Pinson, Garry Noble*

#### Optimizing Sinter Chemistry to Counter Alumina Effect

*Chandra Shekhar Verma*

#### Study on the Effect of Compound Additives on Sinter Quality

*Li Xin, Hongwei Li, Liu Ran, Hongyang Li, Xiaofie Liu, Liu Song*

### DIRECT REDUCED IRON

#### Effects of Methane Injection on Carbon Formation in MIDREX Hot Briquetted Iron (HBI)

*Michelle Godoy, Christopher Harris, Wolfgang Sterrer, Victor Romo, Emmanuel De Moor*

#### Investigation of Carbon Deposition During Natural Gas and Oxygen Injection for the Direct Reduction Ironmaking Process

*Tyamo Okosun, Yu Wang, Qurram Syed, Elaine Chen, Rui Liu, Cesar Velazquez, Joel Carmona, Chenn Zhou,*

#### Effects of Reduction and Carburization on Strength of Direct Reduced Iron

*Geonu Kim, P. Chris Pistorius*

#### Flexibility in Charge Materials and Low-Emission Production With CONPRO

*Arnd Frankenberger, Thomas Henkel, Peter Starke, Ralf Nörthemann*

### PELLETS FOR IRONMAKING

#### Reduction Behavior of DRI Pellets

*Chandra Shekhar Verma*

### SUSTAINABLE DRI

#### Recent Sustainability Developments in the Iron and Steel Industry

*Alicia Giglio, Janice Bolen*
Searching New Horizons: The Hydrogen Revolution in Steelmaking ................................................................. 484
Paolo Argenta, Francesco Memoli

CFD Study of an Energiron Reactor Fed With Different Concentrations of Hydrogen ........................................... 492
Dario Pauluzzi, Ashton Hertrich Giraldo, Alberto Zugliano, Daniela Dalle Nogare, Alessandro Martinis

ELECTRIC STEELMAKING/DIGITALIZATION APPLICATIONS

Real Intelligence – A Novel Approach to EAF Optimization ......................................................................................... 502
Mark Trapp, Jeremy Jones

Numerical Investigation of DC Electric Arc Behavior Under the Consideration of Electrode Movement ..................... 510
Yuchao Chen, Yu Wang, Armin Silaen, Chenn Zhou

Q-SYM² and Q-ASC: ABS Scrap Yard Management, Assisted Scrap Classification and Digital Integration Into the Steel Process ........................................................................................................... 519
Luca Argiolas, Lorenzo Bacchetti

AI Application to Melting Temperature Prediction in an Electric Arc Furnace ............................................................. 526
Marcelo Saparrat, Fernando Monti, José Ibarra

ELECTRIC STEELMAKING

EAF BURNER TECHNOLOGY

Operational Results and Experience of HTT Oxymo Burners/Oxygen Injectors With Moving Flame and Oxygen Jets Installed in the Electric Arc Furnace at Stahl und Walzwerk Marienhütte .......................... 533
Jaroslav Brhel, Thomas Griessacher

Mastering Fully Automated Steelmaking .................................................................................................................. 540
Richard Stadlmayr, Christoph Stangl, Peter Pinter

EAF EFFICIENCY

How U.S. Steelmaking Became a Green Industry and What Lies Ahead ................................................................. 550
Francesco Memoli

Problems With and Solutions to Skull Formation in EBT Furnace for Tool and Stainless Steel Production .................. 583
Eung-Sou Lee, Ho-Kyoung Kim, Eun-Woo Jung, Lidong Teng, Kwang-Seok Kim, Joakim Andersson, Hongliang Yang

EAF SLAG

Safe Slag and Liquid Steel Handling ......................................................................................................................... 593
Eneko Sedano, Ricardo Baños, Ugo Zanelli

The Role of Transient Slags in Steelmaking .............................................................................................................. 602
Eugene Pretorius
ELECTRODES

Optimization of Electrode Consumption in the EAF for Different Operating Conditions ........................................... 625
Bipin Richharia, T. Nagarajan, Juan Ramon Fernandez, Manendra Sharma

OXYGEN STEELMAKING

BOF VESSELS AND EQUIPMENT

Revamp of BOF Converters at AK Steel – Middletown Works Using Vaicon Link 2.0 Converter
Vessel Suspension System ................................................................................................................................................. 636
Steve Torok, Gerald Wimme, Georg Unterrainer, Denis Vaillancourt

Spray-Cooled BOF Hoods at U. S. Steel – Gary Works: 27 Years .................................................................................. 645
Louis Valentas, Troy Ward

Installation of Vaicon Slag Stopper at U. S. Steel – Great Lakes Works ................................................................. 654
Ernesto Serrano, Gerald Wimme, David Runner, Yun Li, Denis Vaillancourt, Michael Maringer

State-of-the-Art Converter Technology: Proven Features for Longest BOF Lifetime ........................................... 665
Günther Staudinger, Michael Skorianz, Joachim Lehner

Dynamic Control of Top Blowing Gas Jet Velocity by Applying Actuation Gas .................................................. 676
Nobuhiko Oda, Yumi Murakami, Shingo Sato, Goro Okuyama, Takeshi Murai, Naoki Kikuchi

CHEMISTRY & PROCESS MODELING

Application of Decision Tree-Based Twin Support Vector Machines to Classify Dephosphorization
in BOF Steelmaking ......................................................................................................................................................... 684
Jovan Phull, Juan Egas, Sandip Barui, Sankha Mukherjee, Kinnor Chattopadhyay

New Approach to Classify Phosphorus Partition in BOF Steelmaking Using PCA-Based Twin
Support Vector Machines ............................................................................................................................................. 696
Sankha Mukherjee, Sandip Barui, Kinnor Chattopadhyay

Understanding the Dynamics of Slag Evolution and Its Influence on Hot Metal Refining in a BOF
Process ............................................................................................................................................................................. 704
Bapin Rout, Elisabeth Beunder, Aart Overbosch, Willem Van Der Knoop, Jianjun Sun, Frank N. H. Schrama

SPECIALTY ALLOY & FOUNDRY

SPECIALTY ALLOY & FOUNDRY

100% In-Process Compositional Testing Using X-Ray Fluorescence ........................................................................ 715
Alex Thurston

Vibration Reduction by Electronic Torque Brakes on Converters (AOD) ................................................................. 721
Daniel Beckers, Andrea Asaro, Reiner Külchen
Results of Tool Steel H13, Remelted With SMS Mevac GmbH’s New-Generation Electroslag Remelting With Rotating Electrode Unit ................................................................. 727
Jochen Schlüter, Cihangir Demirci, Martin Schwenk, Professor Bernd Friedrich

LADLE & SECONDARY REFINING/METALLURGY – STEELMAKING & CASTING

INCLUSION SHAPE CONTROL

Value Creation of Dolime Compared to MgO Alternatives for EAF Application ................................. 739
Michael Nispel, Eric Perrin, John Beatty

Inclusion Shape Control Through Ca Treatment ............................................................. 752
Keyan Miao, Muhammad Nabeel, Neslihan Dogan, Stanley Sun

Modification Mechanism of Cerium on the Inclusions in EH36 Shipbuilding Steel .......................... 760
Ruming Geng, Jing Li, Chengbin Shi, Jianguo Zhi, Bin Lu

LADLE & SECONDARY REFINING

ALLOYS & CONSUMABLES IN LADLE METALLURGY

New Corrosion Test Method for Improved Performance Ladle Purge Plug ................................. 769
Quentin Robinson, Philipp Hunger

VOLUME 2

Efficient Purification of Ferrosilicon Alloy by Using Oxidative Slag Agent ........................................ 782
Lifeng Zhang, Yaqiong Li, Yanhui Zhang

Computational Studies and Optimization of Inclusion Removal in a Steel Ladle ................................ 788
Xipeng Guo, Joel Godinez, Nicholas Walla, Armin Silaen, Helmut Oltmann, Vivek Thapliyal, Abhishek Bhansali, Eugene Pretorius, Chenn Zhou

Understanding the Mechanisms of Bubble Formation in Bottom-Blowing Processes Using Physical and Mathematical Modeling in a Thin Rectangular Channel ........................................................................ 803
Amiy Srivastava, Rubin Wang, Donghui Li, Kinnor Chattopadhyay

LADLE & SECONDARY METALLURGY EQUIPMENT

Vacuum Converter Provides Superb Stainless Steel and Ferroalloy Refining Power for Highly
Demanding Applications ........................................................................................................... 815
Uwe Thiedemann, Miroslaw Paluszak, Tim Kleier

CONTINUOUS CASTING/METALLURGY – STEELMAKING & CASTING

PERITECTIC STEELS

Peritectic Behavior Detection in the Fe-C-Mn-Al-Si Steel System Using Fiber Optic Temperature Mapping ........................................................................................................... 822
Muhammad Roman, Damilola Balogun, Rex E. Gerald II, Laura Bartlett, Jie Huang, Ronald O’Malley
Assessment of the Peritectic Behavior in the Continuous Casting Mold .................................................. 834
Franz Ramstorfer, Leonardo Martins Demuner, Oliver Lang, Christian Ortner, Martin Schuster

PROCESS METALLURGY OF STEELMAKING & CASTING

Effects of Alloy Elements in Advanced High-Strength Steels on the Efficiency of Nitrogen Removal in a Tank Degasser ................................................................. 841
Dai Tang, P. Chris Pistorius

Modeling of the Dynamic-Bulging-Induced Surface Level Fluctuations in Continuous Casting .............. 851
Zhengtao Xu, Zhelin Chen, Lu Chen, Bryan Petrus, Madison Milligan, Daniel Stephens, Joseph Bentsman, Brian G. Thomas,

Application of Soft Reduction to Improve Internal Quality of Fine-Punched Steel .................................. 867
Zhiping Chen, Chenhui Wu, Nailiang Cheng, Cheng Ji, Miaoyong Zhu

REOXIDATION/INCLUSIONS/QUALITY

Basic Actions to Prevent Continuous Casting Defects of Billets ......................................................... 875
José Britti Bacalhau, José Roberto Bolota, Danilo Di Napoli Gazela, Marcos Stuart Nogueira

Reduction in Rejection Due to Longitudinal Corner Cracks ....................................................................... 888
E Zachariah Chacko, Pankaj Kumar Pandey, Krishna Murari Choubey, Swapnil N Dhakate, Ashutosh Kumar

CONTINUOUS CASTING

CASTING TECHNOLOGIES

Danieli Endless Casting and Rolling: Energy-Saving Technology for the Rebar Market ............................. 897
Andrea De Luca, Federico Tortul, M. Cimolino, S. Ronco

High-Throughput Casting Technology — Challenges and Solutions .......................................................... 908
Jürgen Müller, Christian Fröhling, Frank Seuffert

On the Mold Width Adjustment Factor in Continuous Slab Casting ....................................................... 915
Franz Ramstorfer, Carla De Oliveira Sousa Melo, Andre Albuquerque Bittencourt De Oliveira, Douglas Crelier Teixeira, Leticia Melo Piccin, Leonardo Martins Demuner

MOLD BEHAVIOR

Mold Level Control: Performance Module for Quality Improvement ....................................................... 923
Lothar Schaps, Ronald Wilmes

A Potential Application for Utilizing Adaptive Mesh Refinement in a Continuous Caster Simulation ............ 930
Matthew Moore, John Resa, Xiang Zhou, Haibo Ma, Armin Silaen, Chenn Zhou
NEW INSTALLATIONS & MODERNIZATIONS

Fourth Industrial Revolution for Torch Cutting Equipment ................................................................. 942
Andreas Kellner, Reinhard Pollhammer, Erich Berghammer, Heimo Huemer

Production of an Ultralarge-Section-Sized Slab With POSCO Mega Caster Developed by POSCO's
Own Engineering ........................................................................................................................................ 950

X Pact® Process Guidance: Process Optimization, Condition Monitoring, Quality Evaluation,
Metallurgical Parameter Administration and Operator Guidance Integrated in One System ...................... 960
Ronald Wilmes, Lothar Schaps, Georg Nowak, Uwe Plociennik

PROCESS IMPROVEMENTS

Improvement of Centerline Segregation at U. S. Steel – Gary Works' No. 2 C Line Continuous
Caster .......................................................................................................................................................... 968
Ernesto Serrano, S. McCann, William Schlichting, M. Keel, C. Paynes, M. Liedtke, Thinh Natarajan, B. Flanagan, C. Tomazin, M. Knights, Marcellino Fornasier

How JSW Dolvi Evolved Since 1998 to Become One of the Most Productive CSP® Plants in the
World ......................................................................................................................................................... 977
Georg Padberg, Atluri Ratnaprasad, Vurity Saibabu, Ralf Bauer, Michael Pander, Luc Neumann

PRODUCT CASTABILITY

An Effective Solution for Open Casting Improvements at Mid American Steel and Wire: Facts and
Figures of PROIL Application ................................................................................................................... 984
Ron Kuehne, Andrea Giacobbe, Marcos Tomàs Casado, Bill Haynes, Marco Aloni

Reducing Corner Cracks With a New Strategy for Secondary Cooling .................................................. 991
Paul Pennerstorfer, Andreas Mittermair, Se-Ho Lim, Won-Jae Cho

Reduction in Rejection Due to Rhomboidity in 150 mm2 Billet................................................................. 997
Pankaj Kumar Pandey, E Zachariah Chacko, Krishna Murari Choubey, Opk Singh, Ashutosh Kumar

Computational Fluid Dynamics Studies of Slag Entrapment in Continuous Casting Process ................. 1004
Kuanren Qian, Zuowei Wen, Mengchen Wu, Satbir Singh, Asish Sinha

HOT SHEET ROLLING

Danieli Universal Endless — Outstanding First Results of Production Flexibility .................................... 1017
Alessandro Pigani, Mathias Knigge

Power Cooling — Advanced Strip Cooling Technology for Hot Strip Mills for Maximum
Metallurgical Flexibility, High Cooling Rates and for Saving of Alloying Elements .................................. 1024
Lukas Pichler, Konrad Krimpelstaetter, Rüdiger Düll, Klaus Weinzierl
Productivity and Performances Enhancing in OMK for X70 Arctic Via Thin-Slab Rolling Fed by EAF

Romano Sellan, Marcellino Fornasier, Bojan Vucinic, Oliver Rott, Kisllica Vyacheslav, Muntin Alexander

1034

Nucor Gallatin Pre-Assembled Tunnel Furnace: Meeting the Demand of Quality Construction With Saving in Installation Time

Alessandro Venanzini, Fabrizio Pere, Narayan Raut

1049

Full Hydraulic Solution – The Advanced Fourth-Generation Pair Cross Mill

Longze He, Akira Sako, Jiro Hasai, Takao Owada

1057

PRODUCT QUALITY & IMPROVEMENT — GEOMETRY/STABILITY

Measuring Flatness of Rolled Strips Under Tension in Hot Rolling Mills

Frank Gorgels, Olaf Jepsen, Patrick Siemann

1063

Decoupled Flatness and Contour Control in the Last Stands of a Hot Strip Mill During Rolling

Klaus Loehe, Niklas Petrasch

1072

Toward Man-Less Factory: Improved Roughing Mill Operation by Camber-Free Rolling Reduces Strip Steering Challenge in the Finishing Mill of SSAB Borlänge, Sweden

Mats Thuergren, Wolfgang Spies, Siegfried Latzel, Klaus Pronold, Eberhard Becker

1084

On-Line Monitoring System to Detect Anomaly of Rolls in Rolling Mills

Yuki Okano, Hiroyuki Imanari, Kazuyuki Maruyama, Yukihiro Yamasaki

1090

Cutting-Edge Technology for HSM – Strip Steering Control

Olaf Jepsen, Christian Mengel, Michael Breuer

1100

PRODUCT QUALITY & IMPROVEMENT — PROPERTIES/SURFACE

Peculiarities of Post-Rolling Cooling of the Hot-Rolled Coil of Advanced High-Strength Steel

Eugene Nikiitenko

1108

Key Challenges for Efficient Descaling

John Hinton, Joseph Lee

1115

Scale Formation on 430 Stainless Steel in a Simulated Slab Combustion Reheat Furnace Atmosphere

Richard Osei, Simon Lekakh, Ronald O'Malley

1126

Hot Rolling Coil Technology Development for Pipes Intended for Extraction and Transportation of Petroleum Products

Aleksei Ogoltcov, Artem Mitrofanov

1138

COLD SHEET ROLLING

DEVELOPMENTS IN COLD ROLLING

Toward Man-Less Factory: Higher Level of Automation at New Multi-Purpose Reversing Cold Rolling Mill at Bilstein, Germany

Wolfgang Spies, Markus Gümpe, Wolfgang Franken, Falk Töpfer

1151
New Cold Mill Complex in Turkey — Technologies and Achieved Performances
Ruediger Holz, Cristian Bini

Welding of High-Strength Steel Grades With X-Pro® Laser Welder in Continuous Strip Processing Lines
Jens Szonn, Christian Dornscheidt, Jens Artel, Caesar Sasse

Latest Advances and Trends in the Operation and Maintenance of Automotive Paint Shops
Luis Edgardo Llanes

Journey Toward Improvement: 6-High Rolling Mill — A Major Upgrade Project
Jitendra Mathur, R C Singh, Mukesh Kumar, Anoop Trivedi, Kanishka Chakraverti, Yutaka Matsuda

IMPROVED ROLLING & SECONDARY PRACTICES

Cold Rolling Mill Technologies for Electrical Steel
Akihiro Yamamoto

Reduction in Down-Gradation of Cold-Rolled Extra-Deep Drawing Steels at Tata Steel
Ashwin Pandit, Soumilya Nayak, Dharmendra Kumar, Shashi Bhusan, R. K. Chaudhary, Abhijit Paul

QUALITY & YIELD IMPROVEMENT THROUGH TECHNOLOGY & MAINTENANCE

Lightweight Work Roll Flattening Model for Severe Rolling Conditions
Brian Braho, Paul Schaeffer

Microdynamic Interactions Within the Roll Clusters of 20-High Sendzimir Mills
Mark Zipf

Product Yield Improvement in Non-Continuous Rolling Mills
Ruediger Holz, Luciano Vignolo

Tension Reel Redesigned — Efficient Exit Concept for Tandem Cold Mills
Markus Gümpel, Falk Töpfer, Christoph Schwarz, Mark Zipf

GALVANIZING

ADVANCED TECHNOLOGIES

Impact of Lip Adjustment on Wiping Efficiency
Michel Dubois, Frank Goodwin

Corrosion Behavior of Different Alloys in Zn and Al Alloy Galvanizing Baths
Tobias Simon, Frank Wischnowski

New NOF and Post Zinc Pot Cooler for Automobile Sheet Galvanizing Line Revamp
Baisong Yang, Guoqiang Zhang, Junyou Liu

Galvanneal Furnace Analysis and Control Methods
Wang Lu
PROCESS & CONTROL ADVANCES

Continuous Galvanizing Process for Long Steel Products ................................................................. 1284
   Mike Stroia, Daniel Liu

Automatic Pilot for Strip Processing Lines .................................................................................. 1289
   Etienne Menigault, Philippe Rocabois, Maxime Monnoyer, Arnaud Ollagnier, Aldo Fiorini,
   Stefano Pantarotto, Alessandro Ferraiuolo

Non-Linear Bending Control for Temper Mills .............................................................................. 1299
   Brian Braho, Paul Schaeffer

Intelligent Quality Monitoring System as an Effective Tool for Quality Control in Continuous
Galvanizing Line at Tata Steel ........................................................................................................ 1310
   Sibasis Sahoo, Ashwin Pandit, Soumilya Nayak, Suvro Chakraborty, Rajesh Pais,
   Satyanarayana Lalam, Sai Kumar Gudimetla

PLATE ROLLING

PLATE ROLLING

Evaluation of Mechanical Behavior Shifting of API 5L X70 Skelp Through Accelerated Cooling
and Spiral Forming Processes ....................................................................................................... 1316
   Qiulin Yu, Jacob Lewis, Matt Montgomery, Pr Mahida, Ashish Singh

High-Performance Plate Production at the New Steckel Mill at Shandong Iron & Steel in Rizhao,
China ............................................................................................................................................... 1327
   Wolfgang Spies, Alexander Reske, Peter Rainer, Huibao Liu, Stephan Mosbleck, Weihua Sun

Improvement of Steel Plate Temperature Control Accuracy in Accelerated Cooling ...................... 1344
   Takahiro Ohara, Keiichi Yamashita, Kensuke Uenishi, Taketsugu Osaka

An Investigation on the In-Line Direct Quenching Parameters on the Microstructure and Hardness
Uniformity of an Abrasion-Resistant Steel Plate .............................................................................. 1353
   Hamed Hoseiny, Andrew Harvey

Inspection of Rolled Heavy Plate by 3D Inspection ......................................................................... 1361
   Dominik Recker, Greg Gutmann

LONG PRODUCTS

ADVANCEMENTS IN ROLLING PROPERTIES

Steel Dynamics Inc.'s New Billet Welder and Spooler Line .................................................................. 1369
   Massimo Paro, Mirko Dorigo

PMI 4.0 — How LIBS Technology Can Streamline Frequent Steel Grade Changes in Rolling Mills
and Finishing Lines ......................................................................................................................... 1375
   Karsten Hofmann, Alexander Schlemminger

Overcoming Challenges by Measuring Bouncing, Unguided Cylindrical Moving Products ................ 1380
   Gonzalez
FINISHING TECHNOLOGIES
MAIR Research — From Black Bar to Bright Bar Processing Lines .................................................. 1392
Andrea Zanoni

METALLURGICAL TRANSFORMATION
Reduction of Metallurgical Property Transition for In-Line Heat Treatment of Long Products ............. 1395
Shane Marlin, John Donnelly, Timothy Hurley
Contactless Mold Thermal Mapping: A New Tool for Metallurgists, Quality Control and Productivity Improvement ........................................................................................................... 1405
Giovanni Schiavon, Isabella Mazza, Stefano Spagnul, Stefano Miani

PIPE & TUBE

PIPE & TUBE
Development of Heavy-Gauge X80 Spiral Line Pipe With Low-Temperature Toughness.................... 1413
Michael Gaudet, Zeinab Naderi, Kendal Dunnett, Muhammad Arafin, Laurie Collins, Muhammad Rashid

Fully Automated Rating of Slab Segregation Images for Pipeline Steel on a Continuous Scale .......... 1426
Ahmad Van Der Breggen, Kendal Dunnett, Laurie Collins

ROLLS

ROLLS
Development of Electrical Discharge Coating for Extended Textured Roll Campaigns........................ 1440
Chris Childs, Gareth Evans, Tom Lowbridge

Understanding the Interaction Between Residual Stresses in Backup Rolls and Modern Mill Loading Conditions .................................................................................................................. 1445
Konstantin Redkin, Christopher Hrizo, Howard Zeigler

Design and Application of an Optimum Roughing Mill Backup Roll Contour in a Hot Strip Mill ........ 1454
Mustafa Saygili, Ozkan Ozkan

METALLURGY – STEELMAKING & CASTING

IMPACT OF INCLUSION ON MECHANICAL PROPERTIES
New Experimental Apparatus to Investigate Hot Tearing Behavior in Steel ........................................ 1460
Yanru Lu, Laura Bartlett, Ronald O'Malley, Simon Lekakh, Mario Buchely

The Influence of Ti, Nb and V on the Hot Ductility of As-Cast Microalloyed Steels ............................ 1470
Madhuri Varadarajan, Laura Bartlett, Ronald O'Malley, Simon Lekakh

Effect of Ti Microalloying on Inclusions and Mechanical Properties of Q195 Carbon Structural Steel ........................................................................................................................................ 1479
Jujin Wang, Lifeng Zhang, Ying Ren
Resolution of Off-Centered Sulfide Segregation in High-Carbon Automotive Steel During Continuous Casting With Vertical Bending Slab Casters .................................................. 1484
Pabitra Palai, R. V. Sangwai, V. V. Mahashabde

INCLUSION EVOLUTION & CHARACTERIZATION I

Study on Inclusion Evolution Through Si/Mn Deoxidation in Medium-Carbon Steels ....................................... 1491
Katharina Kirchheimer, Ronald Schnitzer, Gerald Klösch, Josef Fasching, Christian Bernhard, Susanne K. Michelic

An Integrated Approach to Steel Cleanliness Evaluation of Aluminum-Killed Steel Produced Using CSP Technology ............................................................................................................. 1503
Cody Dyar, Dmitry Tsvetkov, Pat Luekenhoff, Anthony Bader, Pete Loomis

Analysis of Inclusion Clusters Using Machine Learning Tools .................................................................................. 1513
Mohammad Abdulsalam, M. Jacobs, Bryan Webler

Evaluation of the Iron Content in Non-Metallic Inclusions in Steel for (Sub)-Microscopic Steel Cleanliness Description ................................................................................................................ 1526
Alexander Mayerhofer, Peter Presoly, Christian Bernhard, Susanne K. Michelic

Influence of Mold Powder Slag Composition on the Formation of Oxide Particles in Steel .................................. 1535
Junya Ito, Yuki masa Iwamoto, Jim Gilmore, Masanori Okada

INCLUSION EVOLUTION & CHARACTERIZATION II

Evolution of Non-Metallic Inclusions in Highly Alloyed Steels .................................................................................. 1545
Drew Huck, Bryan Webler

VOLUME 3

Effect of Basicity of Refining Slag on the Inclusions in BN4 Stainless Steel ................................................................. 1557
Ji Zhang, Ying Ren, Qiang Ren, Lifeng Zhang

METALLURGY – PROCESSING, PRODUCTS & APPLICATIONS

METALLURGY & PROCESSING OF MICRO ALLOYED STEELS

Influence of Production Factors on the Mechanical Properties of Ti-Bearing Steels ...................................................... 1562
Dmitry Tsvetkov, Kyle Vanover, Keegan Wright, Brandon Ensor, Cody Dyar

Process and Physical Metallurgical Developments for High-Performance Niobium-Containing Pressure Vessel Plate Steels ............................................................................................................... 1569
Steven Jansto

Generation of High-Corrosion-Resistance Surface-Optimized Diffusion Alloy (SODA) Steel Sheet for Forming Operations ................................................................................................................. 1582
Zachary M. Detweiler, Jack R. Kindred, Adam G. Thomas, Daniel B. Bullard

Structural Steels Microstructural Homogeneity Effect on Fatigue Performance in Air and Hydrogen Environments ............................................................................................................................... 1589
Douglas Stalheim, Andrew Slifka, Enrico Lucon, Pello Uranga, Dong-Hoon Kang
MICROSTRUCTURAL ENGINEERING & PROCESSING OF STEELS I
Hydrogen-Based Annealing Technologies for High-Alloyed Steel Strips Open Various Market Segments ................................................................. 1599
  Sascha Eppensteiner
Microstructure Measurement for the Production of High-Strength Steels ................................................................. 1608
  Grant Shoebridge, Joseph Lee, John Hinton, Anthony Peyton

MICROSTRUCTURAL ENGINEERING & PROCESSING OF STEELS II
A Modified Johnson-Cook Model Incorporating the Effect of Grain Size on Flow Stress ......................... 1614
  Shouvik Ganguly, Mario Buchely, K. Chandrashekhara, Simon Lekakh, Ronald O'Malley
Role of Cooling Rate on the Substructure of Eutectic M7C3 Carbides in Hypereutectoid Fe-Cr-C Alloy 8Cr13MoV ................................................................. 1622
  Jie Zhang, Jing Li, Wei Yan, Chengbin Shi, Yindong Yang
Development of Nanobainitic Steels With Accelerated Kinetics and Tensile Strength of 1.7-2.0 GPa ................................................................. 1628
  Minal Shah, Swapan K Das, Sandip Ghosh Chowdhury
On-Line Prediction of Product Quality With IoT Technologies ................................................................. 1644
  Corrado Licata, Tom Kenneth Mikael Nordell, Sergio Nova
A Metallurgy-Based Real-Time Quality Certification System ................................................................. 1657
  Maxime Monnoyer, Raphael Biland, Etienne Menigault, Denys Seguret

ENERGY & UTILITIES
PROCESS HEATING, HEAT TRANSFER & COMBUSTION
Process Heating Assessments Using DOE’s Manufacturing Energy Assessment Software for Utility Reduction (MEASUR) Tool Suite ................................................................. 1665
  Sachin Nimbalkar, Kristina Armstrong, Kiran Thirumaran, Wei Guo, Gina Accawi, Thomas Wenning, Arvind Thekdi
Development of High-Efficiency Recuperator by New Heat Transfer–Promoting Device at the Continuous Annealing Line ................................................................. 1680
  Ryo Kamura, Koji Iwata, Kunitoshi Oyama
Application of Oxygen-Enriched Combustion in an Industrial Reheating Furnace Using CFD ......................... 1687
  Bethany Worl, Francisco Martinez, Armin Silaen, Kurt Johnson, Larry Fabina, Kelly Tian, Joe Maiolo, Chenn Zhou

TECHNOLOGIES & PRINCIPLES FOR ENERGY EFFICIENCY
Advancements in High-Emissivity Coatings ................................................................................................. 1696
  Justin Jackovic, Joseph Jacobs
Machine Learning for Planning Natural Gas Consumption ......................................................................... 1703
  Rosiane Faleiro, Vagner Brasil, Lis Soares, Lucas Meira, Julio Cesar Ferreira
Numerical Simulation of the Electromagnetic Field Inside the Molten Channel of Power Frequency Cored Induction Furnace for Melting Copper ............................................................. 1707
  Xinyu Cai, Wei Chen, Yaqiong Li, Anjun Xu, Lifeng Zhang

USING WASTE GASES TO REDUCE CARBON FOOTPRINT

Configuring and Tuning "U" and "W" Radiant Tubes for Optimum Performance .................................................. 1714
  Dennis Quinn
Simulation Model for Optimizing Byproduct Energy Scheduling and Utilization in the Steel Industry............................................................. 1718
  Dabin Wang, Hu Kun

ELECTRICAL APPLICATIONS/DIGITALIZATION APPLICATIONS

Implementation of MANIFEST Augmented Reality System at Tata Steel Europe.................................................. 1734
  Eric Almquist

The Widest ESP Line for U. S. Steel — Full Digitalization Possibilities With TPO .................................................. 1745
  Andreas Jungbauer, Klaus Jax, Roman Winkler, M. Ringhofer, Michael Weinzierer, Klaus Frauenhuber, Adnan Cosic, B. Voglmaier, A. Haschke, A. Maierhofer

Holistic Process Condition Analyzer as a Platform for an Intelligent Rolling Mill .................................................. 1756
  Wolfgang Spies, Odette Schaumann, Gregor Schneider

The Metals Enterprise Service Bus ........................................................................................................... 1764
  Sebastian Martens, Luc Van Nerom

ELECTRICAL APPLICATIONS

SDI Heartland Temper Mill Stand Motor and Drive Replacement ................................................................. 1772
  Thomas Richards, Gary Sinders, Neil Carpenter

Grounding Brush Platinum Shaft Plating for Improved Bearing Performance ................................................. 1780
  Noboru Morita, Ronald Tessendorf, Sumiyasu Kodama, Hiroaki Kobara

ELECTRICAL APPLICATIONS II

Digital Substation and Process Bus for Steel Mills – Overview and Quantitative Assessment...................... 1787
  Poojith Lingam, Tim Burtram, Hiranya Pathak, Ramesh Khajjayam

IEC Technical Specification for AC Adjustable-Speed Rolling Mill Motors ................................................. 1798
  Ronald Tessendorf, Sumiyasu Kodama, Noboru Morita
DIGITALIZATION APPLICATIONS

DIGITALIZATION OF ROLLING MILLS

Profile and Defect Detection Experiences on Section Mills ......................................................... 1806
   Marco Appio, Luca Vitale, Angelo Lugnan

AI Application to Front-End Bending Prediction ......................................................................... 1821
   Marcelo Saparrat, Fernando Monti, José Ibarra

Industry 4.0 Boosts the Steel Industry Into a New Era of Digitalization and Smart Technology ........... 1829
   Hong Dai, Xiangjun Zuo

DIGITIZED PROCESS ANALYSIS

The Preservation of OpenVMS Control Systems Through Emulation ............................................. 1842
   Philip Levin

Numerical Model Development for Air-Mist Spray in Steel Secondary Cooling Process Using the VOF-to-DPM Multi-Phase Transition Model ................................................................. 1851
   Edwin Mosquera Salazar, Haibo Ma, Rui Liu, Armin Silaen, Chen Zhou

The Next-Generation Surface Quality Management System ......................................................... 1858
   Michael Hoenen, Greg Gutmann

MACHINE LEARNING

Novel Methodology of Modeling Iron Ore Induration Furnaces ..................................................... 1864
   Claire Velikonja, Jayant Borana, Oghenebrorhie Emuophedaro, Umesh Shah, Manuel Huerta, Janice Bolen, Jennifer Woloshyn, Yakov Gordon, Tom Plikas

Machine Learning–Based Predictive Quality ............................................................................... 1872
   Jérémy Coppe, Elena Samaylova, Emeli Dral

Integrated Overall Quality Management ....................................................................................... 1878
   Joachim Gnauk, Vladimir Berenzon, Jörg Hackmann, Kai Huang, Xiao Qiang Liu

Accelerating Product Chemistry Refinement Using Machine Learning ........................................... 1886
   Alp Kucukelbir, Bryan Williams, Taylor Giddens, Jena Kreuzer

A Mini-Tutorial for Managers and Practitioners: Machine Learning for Process Improvement in Iron and Steel Manufacturing .................................................................................... 1896
   Anil Gandhi, Richa Jaiswal, Aniruddha Fadnis, Ritesh Mishra, Sambit Mishra

METALS QUALITY WITH BIG DATA

Machine Learning–Based On-Line Model for Slag Conditioning in Ladle Furnaces at Ternium Mexico ................................................................................................................................. 1908
   Alejandro Zambrano, Julio Lara, Nelson Sánchez, José Lara

Software as a Service in the Metals Industry — Challenges, Requirements and Opportunities ............. 1919
   Reinhold Leitner, Daniel Fuchshuber, Christoph Stangl
Application of Machine Learning for Defective Coils Prediction .......................................................... 1927  
Gina Verbanac, Luca Cestari, Gabriele Costante, Paolo Valigi, Riccardo Forti, Giacomo Disarò

Artificial Intelligence Services in Steel Production — On Premises and in the Cloud ................................ 1936  
Sonja Strasser, Gerald Hohenbichler, Manuel Sattler, Petra Krahkinkler, Johann Reidetschlaeger

MODELING

Modeling and Design of Quenching and Tempering Process for Alloy Steel Pipes .................................. 1945  
Zhichao (Charlie) Li, Justin Sims, B. Lynn Ferguson

PROCESS OPTIMIZATION

Steel Continuous Annealing Line Simulation ......................................................................................... 1955  
Kelvin Erickson, Carlos Forjan, Daniel Rosner, Price Weakley, Chris Eichholz, Makeda Beyene

Pressure-Drop and Flowrate Model of Slidegate Metal Delivery Systems (PFSG) ............................... 1964  
Hamed Olia, Hyunjin Yang, Seongmook Cho, Mingyi Liang, Matthew Zappulla, Brian G. Thomas

PRODUCT INSPECTIONS WITH BIG DATA

Yale Zhang, Mitren Sukhram, Ian Cameron, Janice Bolen, Alvaro Rozo

Synthetic Images of Longitudinal Cracks in Steel Slabs Via Wasserstein Generative Adversarial Nets Used Toward Unsupervised Classification ............................................................... 1985  
Diego Andrade, Miguel A. Simiand, Aldo Javier Barreiro

Use of Machine Learning to Improve Condition Monitoring and Vibration Analysis .......................... 1999  
Borui Li, Andrew Lauden, Jonathan Davis, Klaus Stohl

Improved Prediction of Steel Hardness Through Neural Network Regression .................................... 2013  
Colin Elkin, Rajat Bathla, Tom Poplawski, Soumitra Agashe, Vijay Devabhaktuni

TUNING THE STEELMAKING PROCESS

Classifier Tuning of Automated Surface Inspection System ............................................................. 2020  
Liwei Zhang, Alisha Sawant, Bradley Masters, Brian Feagan, Kyle Harmon

A Forecasting Model-Based Discovery of Causal Links of Key Influencing Performance Quality Indicators for Sinter Production Improvement .......................................................... 2028  
Matej Vukovic, Vaishali Dhanoa, Markus Jäger, Conny Walchshofer, Josef Küng, Petra Krahkinkler, Belgin Mutlu, Stefan Thalmann,

The Integrated Production Management System — The Platform for Innovation .................................. 2039  
Heiko Wolf
## PROJECT & CONSTRUCTION MANAGEMENT

### PROJECT & CONSTRUCTION MANAGEMENT I

Comprehensive Tool to Bring Total Cost of Ownership in Design During Project Conceptualization Stage at Engineering and Projects at Tata Steel ................................................................. 2044  
*Niraj Ranjan Kumar, Rajat Kumar, Ch Ramesh Babu, A D Kothari, D N Jha, Rajesh Ranjan Jha*

Choosing an Electrical Supplier ........................................................................................................ 2053  
*Thomas Richards, Gary Gepitulan*

Application of Finite Element Analysis to Blast Furnace Crude Gas Piping Design ......................... 2067  
*Daji Zou, Ze Yang, Zhongping Zou, Le Qi*

### PROJECT & CONSTRUCTION MANAGEMENT II

*Neil Tannyan, Matthew Marcus, George Granger, Nicole Sitler*

Importance of Simulation and Modern Logistics in Project Management ......................................... 2082  
*Juha Suksi, Jagannathan Rajagopalan, Samu Kattanaho*

Use of Discrete-Event Simulation for Production Expansion Planning at NLMK Indiana .................. 2094  
*Emily Valley, Russell Sindrey, Randal Beardsley, Steve Ryan*

## MAINTENANCE & RELIABILITY

### BEARING RELIABILITY

Ball Spalling in Rolling Element Bearings: Decrease in Rolling Contact Fatigue Life Due to Inferior Microstructure and Manufacturing Processes .............................................................. 2105  
*Elizabeth Brazitis, Mark Wolka, Graham Keep*

The Next Generation of Proactive Maintenance ............................................................................ 2118  
*Dave Cutnaw*

### BEST PRACTICES

Review of Centrifugal Fan Design Decisions Over the Past 25 Years of Operation .......................... 2125  
*Sean Graham, Steve Back, Michael Schlemmer, Dan Banyay*

Shooter 4.0 – A Prototype for Intelligent and Autonomous Gunning Maintenance ......................... 2135  
*Nikolaus Mutsam, Gregor Lammer, Ronald Lanzenberger, Douglas Beish*

Thermal Assessment of Salamander Cooling During a 10-Day Blast Furnace Shutdown .................. 2146  
*Chad Van Der Woude, Kyle Chomyn, Mitren Sukhram, Ian Cameron, Ralph Albanese, Brian Rogers, Michael J. McCoy*

On-Line Robotics: Microdredging to Clean While Tanks Remain Functional ............................... 2158  
*Steven Rydarowski, Randi Morgan, Joe Leist*
RELIABILITY & VALIDITY

Imaging the Remaining Refractory Lining in Active Blast Furnaces................................................................. 2169
  Mitchell Henstock, Afshin Sadri, Rachel Santini

Danieli Condition Monitoring System — A New Package for Predictive Maintenance...................................... 2177
  Massimo Badini

RELIABILITY MAINTENANCE 4.0

Use of InSight Data Management Software to Improve Reliability at NLMK Indiana ........................................ 2182
  James Gleason, Ehren Plew, Terry Black

Maintenance for Ironmaking Technologies Becomes Smart: The Power of Digitizing, Sharing and Linking Valuable, Empirical Knowledge ........................................................................................................ 2187
  Stephan Weyer, Fabrice Hansen, Yves Reuter, Alexander Schmitz

RELIABILITY MAINTENANCE PROCESS

The Use of Unifuse™ Technology for EAF Duct Life Extension............................................................................ 2196
  Pedro Amador, Chris Hawk

Maintenance and Operations Improvement Process .................................................................................................. 2208
  Lyle Bufogle

LUBRICATION & HYDRAULICS

LUBRICATION & HYDRAULICS

Improving Roll Neck Bearing Grease Lubrication................................................................................................. 2214
  Michael Allega

Bearing Grease Selection — Going Beyond the Data Sheets ................................................................................. 2218
  Kuldeep Mistry, Michael Allega

REFRACTORY SYSTEMS

REFRACTORY SYSTEMS

In-Plant Observations and Thermomechanical Modeling of Different Vessel Types Applying an Insulation Layer......................................................................................................................... 2226
  Lionel Rebouillat, Shengli Jin

Development of Long-Life Slag Pot by Optimizing Stiffness Structurally for Temperature Distribution................................................................. 2233
  Kosuke Kozai, Makoto Naito, Yoshichika Sato, Kunitoshi Oyama

Interactions Between Dry Vibratable Tundish Linings and Steel Melts............................................................. 2241
  Tyler Richards, Ronald O'Malley, Jeffrey Smith, Todd Sander

Ladle Bottom Design for Optimized Steel Flow and Metallic Yield ..................................................................... 2251
  Haysler Lima, Vladnilson P. S. Ramos, Douglas Galesi, Wallace C. S. Gonçalves
History and Latest Technology of Castables for Steel Ladles of Japanese Integrated Steel Mills .......... 2261
Masafumi Nishimura, Koji Asakawa

MATERIAL HANDLING/TRANSPORTATION & LOGISTICS

MATERIAL HANDLING/TRANSPORTATION & LOGISTICS

Steeled for Safety: Visual Aid Technologies to Increase Safety With Material Handling ......................... 2276
Christopher Machut

Automatic Slab Yard: Concepts Applied to a Greenfield Yard ........................................................... 2280
Lorenzo Bacchetti

Application of CISDI-ECIA Material Storage Technology in Bulk Materials Handling Plant of Baosteel Shanghai ........................................................................................................... 2287
Ting Lei, Zhanwen Liu

Research on Intelligent Logistics Practice of Steel Enterprises Based on Mass Logistics .................... 2295
Hui Liu, Xinku Fan, Yun Yang

CRANES

CRANES

Crane Remote Driving: Applications in Meltshop Area ........................................................................ 2310
Lorenzo Bacchetti, Luca Argiolas

DIGITALIZATION APPLICATIONS

METALS QUALITY WITH BIG DATA

Smart Ladle: AI-Based Tool for Optimizing Caster Temperature ............................................................. 2318
Nicholas Walla, Zhankun Luo, Bin Chen, Yury Krotov, Chenn Zhou
