SPIE

Volume 11493

Proceedings of SPIE 0277-786X, V. 11493

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advances in Computational Methods for X-Ray Optics V*, edited by Oleg Chubar, Kawal Sawhney, Proceedings of SPIE Vol. 11493 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

NEW/UPGRADED LIGHT SOURCES AND BEAMLINES

- 11493 03 **Advanced simulation tools in the OASYS suite and their applications to the APS-U optical design (Invited Paper) [11493-1]**
- 11493 05 **Flexible optical layouts based on cylindrical mirrors with sagittal curvature for high-stability beamlines (Invited Paper) [11493-3]**
- 11493 07 **Wave optics simulations for new soft x-ray beamlines at NSLS-II [11493-5]**

COMPUTER CODES AND METHODS I

- 11493 09 **A software package named MOI is developed for calculating the mutual optical intensity propagation through beamline (Invited Paper) [11493-7]**
- 11493 0A **McXtrace anno 2020 - complex sample geometries and GPU acceleration [11493-8]**
- 11493 0B **WISER wavefront propagation simulation code: advances and applications [11493-9]**

COMPUTER CODES AND METHODS II

- 11493 0C **Reduced model representation of x-ray transport suitable for beamline control (Invited Paper) [11493-10]**
- 11493 0D **Perturbation perspective of partial coherence discussion on imperfect x-ray optical elements (Invited Paper) [11493-11]**
- 11493 0E **Reconstruction of offsets of an electron gun using deep learning and an optimization algorithm [11493-12]**
- 11493 0G **CPU and memory efficient coherent mode decomposition for the partially coherent x-ray simulations [11493-14]**
- 11493 0H **Parallel performance of "Synchrotron Radiation Workshop" code: partially coherent calculations for storage rings and time-dependent calculations for XFELs [11493-15]**

REFRACTIVE OPTICS I

- 11493 0J **Recent developments in X-ray lens modelling with SRW [11493-17]**

11493 OK **Beam-shaping elements based on x-ray refractive optics: theory, modeling, and experiment**
[11493-18]

REFRACTIVE OPTICS II

11493 OL **Peculiarities in the interference pattern obtained by x-ray bilens interferometer** [11493-19]

11493 OM **Analysis of hard x-ray focusing by 2D diamond CRL** [11493-20]

MIRRORS AND GRATINGS

11493 ON **Analytical expressions of the surface shape of 'diaboloid' mirrors** [11493-21]

11493 OR **Theoretical analysis and development of high efficiency tender x-ray multilayer coated gratings** [11493-25]

CRYSTAL OPTICS I

11493 OU **Simulation of wavefront propagation in diffraction of XFEL beams by single crystals** [11493-28]

CRYSTAL OPTICS II

11493 OV **Bragg-case x-ray dynamical diffraction propagator in SRW: application to thin crystal phase retarders (Invited Paper)** [11493-29]

11493 OW **X-ray forward diffraction wave-front propagation in Si and C single crystals: simulations and experiments** [11493-30]

SIMULATION OF EXPERIMENTS

11493 OY **Characterization of undulator radiation from a compact laser plasma acceleration source (Invited Paper)** [11493-32]

11493 OZ **VINYL: The Virtual Neutron and x-ray Laboratory and its applications (Invited Paper)** [11493-33]

11493 10 **Simulations of coherent scattering experiments at storage ring synchrotron radiation sources in the hard x-ray range** [11493-34]

11493 11 **Introduction of the Sirepo-Bluesky interface and its application to the optimization problems**
[11493-35]
