PROCEEDINGS OF SPIE

ODS 2020: Industrial Optical Devices and Systems

Ryuichi Katayama Yuzuru Takashima *Editors*

24 August – 4 September 2020 Online Only, United States

Sponsored and Published by SPIE

Volume 11500

Proceedings of SPIE 0277-786X, V. 11500

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in ODS 2020: Industrial Optical Devices and Systems, edited by Ryuichi Katayama, Yuzuru Takashima, Proceedings of SPIE Vol. 11500 (SPIE, Bellingham, WA, 2020) Sevendigit Article CID Number.

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510638068 ISBN: 9781510638075 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

HOLOGRAPHY AND ADVANCED CAMERAS

11500 08	Phase retrieval methods for adaptive optics correction with diffractive samples [11500-6]
11500 09	Light intensity distribution control element for high-brightness projectors using solid-state light sources [11500-7]
11500 0A	Multidimensional imaging using a lensless randomly coded aperture camera [11500-8]
11500 OB	A compact omnidirectional stereo camera for autonomous driving [11500-9]

DISPLAY TECHNOLOGIES FOR 3D AND AR

11500 0C	Laser scan control technology of scanning fiber device for small display system and its
	applications (Invited Paper) [11500-10]

- 11500 0D **Controlling transitional time of DMD mirror array by physical and electrical methods** [11500-11]
- 11500 0G **Design of a thin see-though optical viewer with a freeform surface** [11500-14]

ADVANCED MEASUREMENT AND SENSING

11500 OH	High-sensitive spectroscopy for remote sensing of concrete structures (Invited Paper) [11500-15]
11500 OJ	Increasing the sensitivity of laser triangulation systems using structured optical surfaces [11500-17]
11500 OK	Vision-based high speed wafer film thickness profile estimation with nonlinear regression [11500-18]
11500 0M	Distributed carbon dioxide sensor based on sol-gel silica-coated fiber and optical frequency domain reflectometry (OFDR) [11500-20]
11500 ON	Distributed fiber optic chemical sensor with a temperature compensation mechanism [11500-21]
	POSTER SESSION

11500 0Q An embedded vision system for autonomous vehicles [11500-24]
