

42nd Annual Meeting of the Cognitive Science Society (CogSci 2020)

Developing a Mind: Learning in Humans,
Animals, and Machines

Online
29 July - 1 August 2020

Volume 1 of 5

ISBN: 978-1-7138-1897-7

Table of Contents

Workshop

<i>Mental effort: One construct, many faces?</i>	1
Sebastian Musslick, Maria Wirzberger, Ivan Grahek, Laura Bustamante, Amitai Shenhav, and Jonathan Cohen	

Workshop

<i>Cognition, Collectives, and Human Culture</i>	3
Charley Wu, Natalia Vélez, Mark Ho, and Robert Goldstone	

Workshop

<i>The Origins of Common Sense in Humans and Machines</i>	5
Kevin Smith, Eliza Kosoy, Alison Gopnik, Deepak Pathak, Alan Fern, Josh Tenenbaum, and Tomer D. Ullman	

Workshop

<i>How stories shape us, and how we shape stories</i>	7
Angela Nyhout, Vaunam Venkadasalam, Keith Oatley, and Raymond Mar	

Workshop

<i>From Efficient Coding to Information Gain: Information-Theoretic Principles in Models of Human Decision Making</i>	9
Mikaela Akrenius, Laurence Maloney, and Jonathan D. Nelson,	

Workshop

<i>Workshop on Scaling Cognitive Science</i>	11
Jordan Suchow, Tom Griffiths, and Joshua K. Hartshorne	

Workshop

<i>Making Science Accessible: A Co-design of Non-visual Representations for Visually Impaired Students</i>	13
Pui Yee Nikkie To, Christopher M. Schiafone, Marta Wnuczko, Peter Coppin, Runa Patel, and Robert Ingino	

Workshop

<i>Practical Advice on How to Run Human Behavioral Studies</i>	15
Frank E. Ritter, Jonathan H. Morgan, and Jong Kim	

Workshop

<i>Building neural processing accounts of higher cognition in Dynamic Field Theory</i>	17
Gregor Schöner and Aaron Buss	

Symposium

- Getting Our Bearings: Advances in Understanding Spatial Reorientation* 19
Nora Newcombe, Alexandre Duval, Sang Ah Lee, Anna Shusterman, and Noam Miller

Symposium

- Toward a Unified Theory of Proportion* 21
Michelle Hurst, Stephanie Denison, Yunji Park, Percival Matthews, and Jessica Cantlon

Choices and Decisions

- Limits on Predictability of Risky Choice Behavior* 23
Anjali Sifar and Nisheeth Srivastava
- What determines the learned predictiveness effect? Separating cue-outcome correlation from choice relevance* 29
Jessica Lee, Justine Greenaway, and Evan Livesey
- Exploration Decisions Precede and Improve Explicit Uncertainty Judgments in Preschoolers* 36
Elizabeth Lapidow, Isabella Killeen, and Caren Walker
- Prospect Theory and Optimal Risky Choices with Goals* 43
Jana Jarecki and Jörg Rieskamp
- Toward Unifying Cognitive Architecture and Neural Task Set Theories* 50
Bryan Stearns and John Laird

Neuroscience and Psychophysics

- Adaptations of Executive Function and Prefrontal Cortex Connectivity Following Exergame Play in 4- to 5-year old Children* 57
Cassandra Eng, Melissa Pocsai, Frank Fishburn, Dominic Calkosz, Erik Thiessen, and Anna Fisher
- Dissociable systems for recognizing places and navigating through them: neuropsychological and developmental evidence* 64
Frederik Kamps, Samaher Radwan, Stephanie Wahab, Jordan Pincus, and Daniel Dilks
- Motor interference changes meaning* 65
Omar Escámez, Daniel Casasanto, Gabriella Vigliocco, and Julio Santiago
- The "cognitive speed-bump": How world champion Tetris players trade milliseconds for seconds* 66
John Lindstedt and Wayne Gray
- Engaging with figurative language: insights from neuroimaging* 72
Francesca Citron

Human Learning

- Explanation Supports Hypothesis Generation in Learning* 74
Erik Brockbank and Caren Walker
- Analogical Transfer and Recognition Memory in Relational Classification Learning* 81
Sean Snoddy and Kenneth Kurtz

<i>Learning to build physical structures better over time</i>	88
William McCarthy, David Kirsh, and Judith Fan	
<i>Effects of “chained” study on spontaneous relational discovery</i>	95
Doug Markant	
<i>How a-priori biases affect sequence learning in a serial reaction time task</i>	102
Amir Tal and Eli Vakil	
Semantics	
<i>Systematicity in a Recurrent Neural Network by Factorizing Syntax and Semantics</i>	109
Jacob Russin, Jason Jo, Randall O’Reilly, and Yoshua Bengio	
<i>Distinguishing Fact from Opinion: Effects of Linguistic Packaging</i>	116
Elsi Kaiser and Catherine Wang	
<i>Symmetric alternatives and semantic uncertainty modulate scalar inference</i>	123
Brandon Waldon and Judith Degen	
<i>Simple mechanisms, rich structure: Statistical co-occurrence regularities in language shape the development of semantic knowledge</i>	130
Layla Unger, Olivera Savic, and Vladimir Sloutsky	
<i>Becoming Organized: How Simple Learning Mechanisms may Shape the Development of Rich Semantic Knowledge</i>	137
Olivera Savic, Layla Unger, and Vladimir Sloutsky	
Modeling Language	
<i>A Model of Temporal Connective Acquisition</i>	144
Mark Gorenstein, Zhang Cedegao, and Steven Piantadosi	
<i>Towards a Complete Model of Reading: Simulating Lexical Decision, Word Naming, and Sentence Reading with Über-Reader</i>	151
Aaron Veldre, Lili Yu, Sally Andrews, and Erik Reichle	
<i>Interactions of length and overlap in the TRACE model of spoken word recognition</i>	158
James Magnuson and Elizabeth Simmons	
<i>A Computational Analysis of the Constraints on Parallel Word Identification</i>	164
Erik Reichle and Elizabeth Schotter	
<i>Corrective Processes in Modeling Reference Resolution</i>	171
Constantine Nakos, Irina Rabkina, Samuel Hill, and Ken Forbus	
Memory	
<i>Forming Concepts of Mozart and Homer Using Short-Term and Long-Term Memory: A Computational Model Based on Chunking</i>	178
Dmitry Bennett, Fernand Gobet, and Peter Lane	
<i>Using Emails to Quantify the Impact of Prior Exposure on Word Recognition Memory</i>	185
Hyungwook Yim, Courtney O’Brien, Benjamin Stone, Adam Osth, and Simon Dennis	

<i>Proceduralization and Working Memory in Association Learning</i>	191
Philip Newlin and Jarrod Moss	
<i>Understanding Memory for WHERE using Smartphone Data</i>	198
Elizabeth Laliberte, Benjamin Stone, Hyungwook Yim, and Simon Dennis	
<i>Prefrontal-striatal circuitry supports adaptive memory prioritization across development</i>	199
Kate Nussenbaum and Catherine Hartley	
Gender and Individuals	
<i>Paradoxical Gender Gaps in Mathematics Achievement: Pressure as a key</i>	206
Emily Lyons, Almaz Mesghina, and Lindsey Richland	
<i>Gender convergence in the expressions of love: A computational analysis of lyrics</i>	213
Lana El Sanyoura and Yang Xu	
<i>Embodiment and gender interact in alignment to TTS voices</i>	220
Michelle Cohn, Patrik Jonell, Taylor Kim, Jonas Beskow, and Georgia Zellou	
<i>Preschoolers use minimal statistical information about social groups to infer the preferences and group membership of individuals</i>	227
Natalia Vélez and Hyowon Gweon	
Symposium	
<i>Health beliefs and decision making</i>	234
Micah Goldwater, Amy Perfors, Zachary Horne, Cristine Legare, and Ellen Markman	
Symposium	
<i>Unravelling Past Cognition: Approaches Across Disciplines</i>	236
Larissa Mendoza Straffon, Andrea Bender, Claudio Tennie, Dietrich Stout, Simon Greenhill, and Francesco D'Errico	
Language and Groups	
<i>Influence of partner behaviour on overspecification</i>	238
Jia Loy and Kenny Smith	
<i>Generalizing meanings from partners to populations: Hierarchical inference supports convention formation on networks</i>	245
Robert Hawkins, Noah Goodman, Adele Goldberg, and Tom Griffiths	
<i>Probabilistic weighting of perspectives in dyadic communication</i>	252
Rachel Ryskin, Suzanne Stevenson, and Daphna Heller	
<i>Production expectations modulate contrastive inference</i>	259
Elisa Kreiss and Judith Degen	
<i>Does informational independence always matter? Children believe small group discussion is more accurate than ten times as many independent informants</i>	266
Emory Richardson and Frank Keil	

Judgement and Decision Making

- Do you want to know a secret? The role of valence and delay in early information preference* 273
Jake Embrey, Shi Xian Liew, Danielle Navarro, and Ben Newell
- Knowledge Representations in Health Judgments* 280
Natasha Gandhi, Wanling Zou, Caroline Meyer, Sudeep Bhatia, and Lukasz Walasek
- Learning what is relevant for rewards via value-based serial hypothesis testing* 287
Mingyu Song, Yael Niv, and Mingbo Cai
- Dual Processes in Relational Judgment: A Computational Framework* 293
Sudeep Bhatia, Russell Richie, and Wenjia Joyce Zhao
- Joint action planning: co-actors minimize the aggregate individual costs of actions* 295
Georgina Török, Oana Stanciu, Natalie Sebanz, and Gergely Csibra

Facets of Cognition

- The Differential Relationship of Extracurricular Activities and Screen Time with Adolescents' Fluid and Crystallized Cognition* 302
Jennifer Weber
- Quantifying Curiosity: A Formal Approach to Dissociating Causes of Curiosity* 309
Emily Liquin, Frederick Callaway, and Tania Lombrozo
- Explaining the Existential: Functional Roles of Scientific and Religious Explanation* 316
Telli Davoodi and Tania Lombrozo
- The latent factor structure of developmental change in early childhood* 323
Ben Stenhaus and Michael Frank
- Examining Sustained Attention in Child-Parent Interaction: A Comparative Study of Typically Developing Children and Children with Autism Spectrum Disorder* 329
Julia Yurkovic, Grace Lisandrelli, Rebecca C. Schaffer, Kelli Dominick, Ernest Pedapati, Craig A. Erickson, Daniel P Kennedy, and Chen Yu

Language Development

- Structured ecologies for social and linguistic development* 336
Joanna Rączaszek-Leonardi and Katharina Rohlfing
- Not what you expect: The relationship between violation of expectation and negation* 338
Victor Gomes, Yubin Huh, and John Trueswell
- Can Automated Gesture Recognition Support the Study of Child Language Development?* 343
Soumitra Samanta, Colin Bannard, Julian M. Pine, and Language05 Team
- The (Un)Surprising Kindergarten Path* 350
Zoe Ovans, Yi Ting Huang, and Naomi Feldman
- The complementary roles of knowledge and strategy in insight problem-solving* 357
Thomas Ormerod and James N. MacGregor

Neural Networks

<i>Context variability promotes generalization in reading aloud: Insight from a neural network simulation</i>	363
Ian Miller, Nicolas Dumay, Mark Pitt, Brian Lam, and Blair Armstrong	
<i>Neural Language Models Capture Some, But Not All Agreement Attraction Effects</i>	370
Suhaz Arehalli and Tal Linzen	
<i>Probing Neural Language Models for Human Tacit Assumptions</i>	377
Nathaniel Weir, Adam Poliak, and Benjamin Van Durme	

Events, Actions, and Sequencing

<i>How to Help Best: Infants' Changing Understanding of Multistep Actions Informs their Evaluations of Helping</i>	384
Brandon Woo and Elizabeth Spelke	
<i>Ten-month-olds infer relative costs of different goal-directed actions</i>	391
Barbara Pomiechowska and Gergely Csibra	
<i>A rational model of sequential self-assessment</i>	397
Rachel Jansen, Anna Rafferty, and Tom Griffiths	
<i>Illusory causal connections and their effect on subjective probability</i>	404
Sami Yousif and Frank Keil	
<i>Intentionality Effects on Event Boundaries</i>	411
Ariel Mathis and Anna Papafragou	

Emotions and Beliefs

<i>The Emotion-Induced Belief-Amplification Effect</i>	417
Madalina Vlasceanu, Jacob Goebel, and Alin Coman	
<i>How do Emotions Change during Learning with an Intelligent Tutoring System? Metacognitive Monitoring and Performance with MetaTutor</i>	423
Elizabeth Cloude, Franz Wortha, Daryn Dever, and Roger Azevedo	
<i>Emotional Words – The Relationship of Self- and Other-Annotation of Affect in Written Text</i>	430
Nadine Braun, Martijn Goudbeek, and Emiel Krahmer	
<i>Inconsistencies Among Beliefs as a Basis for Learning via Thought Experiments</i>	437
Igor Bascandziev	
<i>Crowdsourcing to Analyze Belief Systems Underlying Social Issues</i>	443
John Priniski and Keith Holyoak	

Symposium

<i>New Measures for the Fundamentals of Human Performance</i>	450
Wayne Gray, Ray Perez, Roussel Rahman, Chris Sims, Elizabeth Torres, and Travis Wiltshire	

Symposium

- Learning via Insight* 452
Jasmin Kizilirmak, Margaret Webb, Linden Ball, Maxi Becker, and Thomas Colin

Complex Dynamics

- Concealable Stigmatized Identity Disclosure as a Possible Perturbation to Complex Social Systems* . 454
Hannah Douglas, Sarah Toohey, Michael J Richardson, and Rachel W. Kallen
- Quantifying Emergent, Dynamic Tonal Coordination in Collaborative Musical Improvisation* 461
Matthew Setzler and Robert Goldstone
- Mental state inference from indirect evidence through Bayesian event reconstruction* 467
Michael Lopez-Brau, Joseph Kwon, and Julian Jara-Ettinger
- Formalizing Interdisciplinary Collaboration in the CogSci Community* 474
Lauren Oey, Isabella Destefano, Erik Brockbank, and Ed Vul
- Loss Functions Modulate the Optimal Bias-Variance Trade-off* 481
Adam Bear and Fiery Cushman

Learning and Development

- Awe yields learning: A virtual reality study* 488
Hedwig van Limpt - Broers, Max M. Louwerse, and Marie Postma
- Hearing water temperature: Characterizing the development of nuanced perception of auditory events* 494
Tanushree Agrawal, Michelle Lee, Amanda Calcetas, Danielle Clarke, Naomi Lin, and Adena Schachner
- Specificity of Infant Statistical Learning* 500
Sara Parvanezadeh Esfahani and Jessica Hay
- Children hear more about what is atypical than what is typical* 501
Claire Bergey, Benjamin Morris, and Dan Yurovsky
- For 19-Month-Olds, What Happens On the Screen Stays On the Screen* 508
Barbu Revencu and Gergely Csibra

Numerosity

- Dynamics vs. Development in Numerosity Estimation: A Computational Model Accurately Predicts a Developmental Reversal* 514
Dan Kim and John Opfer
- Children use one-to-one correspondence to establish equality after learning to count* 515
Rose Schneider and David Barner
- How Reliable is the Give-a-Number task?* 522
Elisabeth Marchand and David Barner
- Starting small: Exploring the origins of successor function knowledge* 529
Rose Schneider, Ashlie Pankonin, Adena Schachner, and David Barner

<i>Does the number sense represent number?</i>	530
Sam Clarke and Jacob Beck	
Language and Meaning	
<i>Informational goals, sentence structure, and comparison class inference</i>	537
Michael Tessler, Polina Tsvilodub, Jesse Snedeker, and Roger Levy	
<i>Do Taxonomic and Associative Relations Affect Word Production in the Same Way?</i>	544
Delaney McDonagh, Anna Fisher, and Nazbanou Nozari	
<i>Metaphors: Where the neighborhood in which one resides interacts with (interpretive) diversity</i>	551
J. Nick Reid, Hamad Al-Azary, and Albert N. Katz	
<i>Reconstructing Maps from Text</i>	557
Johnathan Avery, Robert Goldstone, and Michael N. Jones	
<i>Does Language Model Surprisal Measure Code Comprehension?</i>	564
Casey Casalnuovo, Premkumar Devanbu, and Emily Morgan	
Speech and Phonetics	
<i>Evaluating computational models of infant phonetic learning across languages</i>	571
Yevgen Matusevych, Thomas Schatz, Herman Kamper, Naomi Feldman, and Sharon Goldwater	
<i>Input matters in the modeling of early phonetic learning</i>	578
Ruolan Li, Thomas Schatz, Yevgen Matusevych, Sharon Goldwater, and Naomi Feldman	
<i>Learning from the acoustic signal: Error-driven learning of low-level acoustics discriminates vowel and consonant pairs</i>	585
Jessie Nixon and Fabian Tomaschek	
<i>The Perceptimatic English Benchmark for Speech Perception Models</i>	592
Juliette Millet and Ewan Dunbar	
<i>A Model of Prenatal Acquisition of Vowels</i>	599
Katerina Chladkova, Natalia Nudga, and Paul Boersma	
Spatial Cognition	
<i>The semantics of spatial demonstratives</i>	605
Mikkel Wallentin and Roberta Rocca	
<i>A Cross-Cultural Principle Of Temporal Spatialization</i>	611
Carmen Callizo, Slavica Tutnjević, Maja Pandza, Marc Ouellet, Alexander Kranjec, Sladjana Ilić, Yan Gu, Tilbe Göksun, Sobh Chahboun, Daniel Casasanto, and Julio Santiago	
<i>Data Foraging: Spatiotemporal Data Collection Decisions in Disciplinary Field Science</i>	612
Cristina Wilson, Feifei Qian, Doug Jerolmack, Thomas Shipley, Sonia Roberts, Jonathan Ham, and Daniel Koditschek	
<i>Multi-directional mappings in the minds of the Tsimane': Size, time, and number on three spatial axes</i>	613
Benjamin Pitt, Daniel Casasanto, Stephen Ferrigno, Edward Gibson, and Steven Piantadosi	

<i>Grounding Spatial Language in Perception by Combining Concepts in a Neural Dynamic Architecture</i>	620
Daniel Sabinasz, Mathis Richter, Jonas Lins, and Gregor Schöner	
Categorization	
<i>Identifying the neural dynamics of category decisions with computational model-based fMRI</i>	627
Juliana Adema, Emily Heffernan, and Michael Mack	
<i>End-to-end Deep Prototype and Exemplar Models for Predicting Human Behavior</i>	634
Pulkit Singh, Joshua Peterson, Ruairidh Battleday, and Tom Griffiths	
<i>Contrasting Exemplar and Prototype Models in a Natural-Science Category Domain</i>	641
Robert Nosofsky, Brian Meagher, and Parhesh Kumar	
<i>The evolution of category systems within and between learners</i>	648
Vanessa Ferdinand and Amy Perfors	
<i>The Effects of Feature Verbalizability on Category Learning</i>	655
Bailey Brashears and John Paul Minda	
Symposium	
<i>Cognitive models of time: Across the lifespan, the world, and the mind</i>	661
Katharine Tillman, Benjamin Pitt, Andrea Bender, Ariel Starr, and Thanujeni Pathman	
Symposium	
<i>Computational approaches to analyzing and generating comics</i>	663
Aditya Upadhyayula, Chris Martens, Rogelio Cardona-Rivera, Andrew Hendrickson, and Neil Cohn	
Reading and Processing	
<i>Online Article Comprehension in Monolingual Spanish-Speaking Preschoolers with Specific Language Impairment: A Language-Mediated Visual Attention Study</i>	665
Andrea Helo, Carmen Julia Coloma, Zulema De Barbieri, and Ernesto Guerra	
<i>Event-related potentials reveal differences between foveal and parafoveal integration of visual and contextual information during sentence processing</i>	672
Sara Milligan, Alex Sciuto, Martín Antúnez, and Elizabeth Schotter	
<i>Synchrony and asynchrony of the two eyes in binocular fixations in the reading of English and Chinese; the implications for ocular prevalence</i>	673
Ruomeng Zhu, Mateo Obregón, Hamutal Kreiner, and Richard Shillcock	
<i>Task effects on the lexical boost effect in structural priming</i>	680
Roger van Gompel, Laura Wakeford, and Leila Kantola	
<i>Is Segmental Interference Position-dependent?</i>	681
William Harrison, Christopher Hepner, and Nazbanou Nozari	
Language and Uncertainty	
<i>When Generic Language does not Promote Psychological Essentialism</i>	688
Nadya Vasilyeva, Alison Gopnik, and Tania Lombrozo	

<i>Measuring prosodic predictability in children's home language environments</i>	695
Kyle MacDonald, Marisa Casillas, Okko Räsänen, and Anne Warlaumont	
<i>Forward-looking Effects in Subject Pronoun Interpretation: What Comes Next Matters</i>	702
Jina Song and Elsi Kaiser	
<i>Learner dynamics in a model of wug inflection: integrating frequency and phonology</i>	709
Stella Frank, Kenny Smith, and Christine Cuskley	
<i>Learning under uncertainty changes during adolescence</i>	716
Liyu Xia, Sarah Master, Maria Eckstein, Linda Wilbrecht, and Anne Collins	
Linguistics	
<i>Linguistic Overhypotheses in Category Learning: Explaining the Label Advantage Effect</i>	723
Anna Ivanova and Matthias Hofer	
<i>Prototype theory and emotion semantic change</i>	730
Aotao Xu, Jennifer Stellar, and Yang Xu	
<i>Universal linguistic inductive biases via meta-learning</i>	737
Richard McCoy, Erin Grant, Paul Smolensky, Tom Griffiths, and Tal Linzen	
<i>Birds and Words: Exploring environmental influences on folk categorization</i>	744
Joshua Abbott and Charles Kemp	
Comparative and Cultural Cognition	
<i>Reverse engineering the origins of visual intelligence</i>	750
Justin Wood, Donsuk Lee, Brian Wood, and Samantha Wood	
<i>Rational After All: Changes in Probability Matching Behaviour Across Time in Humans and Monkeys</i>	752
Carmen Saldana, Nicolas Claidiere, Joel Fagot, and Kenny Smith	
<i>Repetition Suppression in Low- and High-Order Regions of the Primate Visual Cortex</i>	759
Nathaniel Williams and Carl Olson	
<i>"Think" and "believe" across cultures: A shared folk distinction between two cognitive attitudes in the US, Ghana, Thailand, China, and Vanuatu</i>	766
Neil Van Leeuwen, Kara Weisman, and Tanya Luhrmann	
<i>Comparing Adaptive and Random Spacing Schedules during Learning to Mastery Criteria</i>	773
Everett Mettler, Christine Massey, Timothy Burke, and Philip J Kellman	
Concepts and Systems	
<i>Prevalence-Induced Concept Change in Older Adults</i>	780
Sean Devine, Cassandra Neumann, David Levari, Robert Wilson, and Ben Eppinger	
<i>Nameability affects subjective and objective measures of visual similarity</i>	787
Martin Zettersten, Ellise Suffill, and Gary Lupyan	
<i>Separability and the Effect of Valence. An Empirical Study of Thick Concepts</i>	794
Pascale Willemsen and Kevin Reuter	

<i>Simple kinship systems are more learnable</i>	801
Kenny Smith, Stella Frank, Sara Rolando, Simon Kirby, and Jia Loy	
<i>The Paradox of Time in Dynamic Causal Systems</i>	808
Zach Davis, Neil Bramley, and Bob Rehder	
Biases	
<i>Bootstrap Hell: Perceptual Racial Biases in a Predictive Processing Framework</i>	815
Zachariah A. Neemeh	
<i>Overconfident in Hindsight: Memory, Hindsight Bias and Overconfidence</i>	822
Matthew Welsh	
<i>The contingency illusion bias as a potential driver of science denial</i>	829
Justin Sulik, Robert Ross, and Ryan McKay	
<i>Population-level amplification of perceptual bias</i>	836
Mathew Hardy, Bill Thompson, Peter Krafft, and Tom Griffiths	
<i>Object Bias Disrupts Rule-Based Generalization in Adults Across Domains</i>	837
Evan Orticio and Stella Christie	
Social Inference	
<i>Detecting social information in a dense database of infants' natural visual experience</i>	844
Bria Long, George Kachergis, Ketan Agrawal, and Michael Frank	
<i>Children use inverse planning to detect social transmission in design of artifacts</i>	845
Madison Pesowski, Alyssa Quy, Michelle Lee, and Adena Schachner	
<i>Children use agents' response time to distinguish between memory and novel inference</i>	852
Emory Richardson and Frank Keil	
<i>Social Offloading: Just Working Together is Enough to Remove Semantic Interference</i>	859
Miles Tufft and Daniel Richardson	
<i>Stubborn extremism as a potential pathway to group polarization</i>	866
Matthew Turner and Paul Smaldino	
Symposium	
<i>Where is Cognitive Science Now?</i>	873
Carson Miller Rigoli, Ashok Goel, Andrea Bender, Robert Goldstone, and Rafael Nunez	
Agend-based Models	
<i>Simulating Early Word Learning in Situated Connectionist Agents</i>	875
Felix Hill, Stephen Clark, Phil Blunsom, and Karl Moritz Hermann	
<i>Social Foraging in Groups of Search Agents with Human Intervention</i>	882
Daniel Schloesser, Derek Hollenbeck, and Christopher Kello	
<i>Too many cooks: Coordinating multi-agent collaboration through inverse planning</i>	889
Sarah Wu, Rose E Wang, James Evans, Josh Tenenbaum, David Parkes, and Max Kleiman-Weiner	

<i>Learning in Social Environments with Curious Neural Agents</i>	896
Megumi Sano, Julian De Freitas, Nick Haber, and Daniel L. K. Yamins	
<i>How do disparities reproduce themselves? "Ground truth" inference from utility-maximizing agent's sampling behavior</i>	903
Yuan Meng and Fei Xu	
Social Learning	
<i>A Bayesian Model of Social Influence under Risk and Uncertainty</i>	909
Simon Ciranka and Wouter van den Bos	
<i>How much to copy from others? The role of partial copying in social learning</i>	916
Chelsea Campbell, Eduardo Izquierdo, and Robert Goldstone	
<i>Hatred is in the Eye of the Annotator: Hate Speech Classifiers Learn Human-Like Social Stereotypes</i>	923
Aida Mostafazadeh Davani, Mohammad Atari, Brendan Kennedy, Shreya Havaldar, and Morteza Dehghani	
<i>Relative deprivation and social identity in laboratory based riots: A model</i>	924
James Allen, Guillaume Dezecache, and Daniel Richardson	
<i>Givenness Hierarchy Theoretic Cognitive Status Filtering</i>	925
Poulomi Pal, Akshay Swaminathan, Lixiao Zhu, Andrea Golden-Lasher, and Tom Williams	
Forms of Learning	
<i>Relation learning in a neurocomputational architecture supports cross-domain transfer</i>	932
Leonidas A. A. Doumas, Guillermo Puebla, Andrea Martin, and John Hummel	
<i>Unconscious learning of automatic inhibition is reflected in frontal theta and sensorimotor oscillations</i>	938
Silvia Isabella, J. Allan Cheyne, and Douglas Cheyne	
<i>Metacognition and Motivation: The Role of Time-Awareness in Preparation for Future Learning</i>	945
Mark Abdelshiheed and Min Chi	
<i>Can I get your (robot) attention? Human sensitivity to subtle hints of human-likeness in a humanoid robot's behavior</i>	952
Davide Ghiglino, Davide De Tommaso, Cescio Willemse, Serena Marchesi, and Agnieszka Wykowska	
<i>Exploratory play, rational action, and efficient search</i>	959
Junyi Chu and Laura Schulz	
Reasoning	
<i>Morality justifies motivated reasoning</i>	960
Corey Cusimano and Tania Lombrozo	
<i>Improving Cognitive Models for Syllogistic Reasoning</i>	967
Jonas Bischofberger and Marco Ragni	
<i>Incremental Hypothesis Revision in Causal Reasoning Across Development</i>	974
Rebekah Gelpi, Ben Prystawski, Christopher Lucas, and Daphna Buchsbaum	

<i>A New Approach to Testimonial Conditionals</i>	981
Stephan Hartmann and Ulrike Hahn	
<i>'...that P is relevant for Q': Indicative conditionals and learning from testimony</i>	987
Karolina Krzyzanowska, Peter Collins, and Ulrike Hahn	
Pragmatics	
<i>Learning to refer informatively by amortizing pragmatic reasoning</i>	994
Julia White, Jesse Mu, and Noah Goodman	
<i>Are you thinking what I'm thinking? Perspective-taking in a language game</i>	1001
Johanne Nedergaard and Kenny Smith	
<i>Visual Grouping and Pragmatic Constraints in the Generation of Quantified Descriptions</i>	1008
Gordon Briggs, Hillary Harner, and Sangeet Khemlani	
<i>Recursive Adversarial Reasoning in the Rock, Paper, Scissors Game</i>	1015
Erik Brockbank and Ed Vul	
<i>Parents scaffold the formation of conversational pacts with their children</i>	1022
Ashley Leung, Robert Hawkins, and Dan Yurovsky	
Word Learning	
<i>A Computational Model of Early Word Learning from the Infant's Point of View</i>	1029
Satoshi Tsutsui, Arjun Chandrasekaran, Md. Alimoor Reza, David Crandall, and Chen Yu	
<i>Decoding Eye Movements in Cross-Situational Word Learning via Tensor Component Analysis</i> ...	1036
Andrei Amatuni and Chen Yu	
<i>Child-directed speech: the impact of variations in speaking rate on word learning</i>	1043
Jinyu Shi, Yan Gu, Beata Grzyb, and Gabriella Vigliocco	
<i>Active Word Learning through Self-supervision</i>	1050
Lieke Gelderloos, Alireza Mahmoudi Kamelabad, and Afra Alishahi	
<i>Predicting Age of Acquisition in Early Word Learning Using Recurrent Neural Networks</i>	1057
Eva Portelance, Judith Degen, and Michael Frank	
Attention and Faces	
<i>Modeling temporal attention in dynamic scenes: Hypothesis-driven resource allocation using adaptive computation explains both objective tracking performance and subjective effort judgments</i>	1064
Eivinas Butkus, Mario Belledonne, Brian Scholl, and Ilker Yildirim	
<i>Foraging in the Virtual Himalayas: Intrinsic and Extrinsic Factors in Search</i>	1065
Ketika Garg and Christopher Kello	
<i>The role of eye movement consistency in learning to recognise faces: Computational and experimental examinations</i>	1072
Janet Hsiao, Jeehye An, and Antoni Chan	

<i>Face Selectivity in Social (But Not Perceptual) Areas of the Infant Brain</i>	1079
Heather Kosakowski, Michael Cohen, Nancy Kanwisher, and Rebecca Saxe	
<i>Leveraging Computer Vision Face Representation to Understand Human Face Representation</i>	1080
Chaitanya Ryali, Xiaotian Wang, and Angela Yu	

Poster Session 1

<i>Tracing the Emergence of Gendered Language in Childhood</i>	1087
Ben Prystawski, Erin Grant, Aida Nematzadeh, Spike W. S. Lee, Suzanne Stevenson, and Yang Xu	
<i>Self-Other Similarity Modulates the Socially-Triggered Context-Based Prediction Error Effect on Memory</i>	1094
Madalina Vlasceanu, Michael J Morais, Zidong Zhao, Aaron Bornstein, Diana Tamir, Kenneth Norman, and Alin Coman	
<i>A Meta-Analytic Review of Verbal Overshadowing Effect on Insight Problem Solving Using Bayes Factors</i>	1095
Sachiko Kiyokawa and Zoltan Dienes	
<i>Covert attention shift by Sequence-space synesthesia (SSS): a cognitive grammar approach</i>	1096
Mohsen Dolatabadi and Mehrdad Dowlatabadi	
<i>When and how do toddlers in rural Western Kenya understand the referential nature of pictures?</i>	1097
Rebecca Zhu, Helen Pitchik, Lia Fernald, and Alison Gopnik	
<i>Improving Multi-Agent Cooperation using Theory of Mind</i>	1098
Terence Lim, Sidney Tio, and Desmond Ong	
<i>Restricted Access to Working Memory Does Not Prevent Cumulative Improvement in a Cultural Evolution Task.</i>	1099
Juliet Dunstone, Mark Atkinson, and Christine Caldwell	
<i>Is She a Good Teacher? Children Learn to use Meaningful Gesture as a Marker of a Good Informant</i>	1100
Elizabeth Wakefield, Eliza L. Congdon, Miriam A. Novack, and Lauren Howard	
<i>Beyond Pattern Completion with Short-Term Plasticity</i>	1107
Kevin Shabahang, Hyungwook Yim, and Simon Dennis	
<i>Does Children's Visual Attention to Objects Influence their Verb Learning?</i>	1114
Jane Childers, Bibiana Cutilletta, Katherine Capps, Sneha Lalani, and Priscilla Tovar-Perez	
<i>Model gender influences emotion categorization</i>	1115
Rista Plate, Kristina Woodard, and Seth D Pollak	
<i>A Large-Scale Analysis of Attentional Deployment across One Hundred Sessions of Adaptive Multitask Training</i>	1116
Omar Clafin	
<i>Children's age-related transition from associative learning processes to reasoning-based social learning strategies</i>	1122
Kirsten Blakey, Eva Rafetseder, Mark Atkinson, Elizabeth Renner, and Christine Caldwell	

<i>I don't know if you did it, but I know why: A 'motive' preference at multiple stages of the legal-investigative process</i>	1123
Alice Liefgreen, Sami Yousif, Frank Keil, and David Lagnado

<i>Representational complexity and pragmatics cause the monotonicity effect</i>	3398
Fabian Schlotterbeck, Sonia Ramotowska, Leendert van Maanen, and Jakub Szymanik	
<i>Probability Without Counting and Dividing: A Fresh Computational Perspective</i>	3405
Thomas Shultz and Ardavan S. Nobandegani	
<i>Simulating Feature- and Relation-Based Categorisation with a Symbolic-Connectionist Model</i>	3412
Ekaterina Y. Shurkova and Leonidas A. A. Doulas	
<i>On causal claims, contingencies, and inference: How causal terminology affects what we think about the strength of causal links</i>	3419
Simon Stephan and Michael R. Waldmann	
<i>Causal scope and causal strength: The number of potential effects of a cause influences causal strength estimates</i>	3426
Simon Stephan and Michael R. Waldmann	
<i>A methodology for distinguishing copying and reconstruction in cultural transmission episodes</i> ...	3433
James Strachan, Arianna Curioni, Merryn Constable, Günther Knoblich, and Mathieu Charbonneau	
<i>Word Aversion and Consumer Behavior</i>	3440
Paul Thibodeau and Katherine Christel	
<i>Better learning of partially diagnostic features leads to less unidimensional categorization in supervised category learning</i>	3444
Sujith Thomas and Narayanan Srinivasan	
<i>Children's spontaneous inferences about time and causality in narrative</i>	3451
Katharine Tillman, Nestor Tulagan, and Jess Sullivan	
<i>Can we match the variance across different visual feature?</i>	3458
Midori Tokita	
<i>Keep Calm and Learn the Language: Do Multilinguals Have Lower Intolerance of Uncertainty than Monolinguals?</i>	3464
Julija Vaitonytė, Özge Öztürk, and Lisa-Maria Müller	
<i>Influence of Topic Knowledge on Curiosity</i>	3471
Shirlene Wade and Celeste Kidd	
<i>Risk Taking and Impulsivity in Boredom: an EEG investigation</i>	3478
Ofir Yakobi and James Danckert	
<i>Does top-down information about speaker age guise influence perceptual compensation for coarticulatory /u/-fronting?</i>	3483
Georgia Zellou, Michelle Cohn, and Aleese Block	

<i>Top-down effects of apparent humanness on vocal alignment toward human and device interlocutors</i>	3490
Georgia Zellou and Michelle Cohn	

Papers accepted as Posters, appearing in proceedings only (abstract-only publication)

<i>How does over-specification affect referent identification?</i>	3497
Kumiko Fukumura and Maria Nella Carminati	
<i>Cross-linguistic investigation of the representations underlying pronoun choice</i>	3498
Kumiko Fukumura, Coralie Hervé, Sandra Villata, Francesca Foppolo, and F.-Xavier Alario	

Member Abstracts, appearing in proceedings only

<i>Cognitive consequences of structured education in a connectionist model of analogical reasoning</i> .	3499
David Barrett, Felix Hill, Adam Santoro, and Jay McClelland	
<i>Grid-Navigation Tasks involve Skill Learning</i>	3500
Krishn Bera, Anuj Shukla, and Raju Bapi	
<i>Value-of-Information based Arbitration between Model-based and Model-free Control</i>	3501
Krishn Bera, Yash Mandilwar, Anuj Shukla, and Raju Bapi	
<i>A Self-Learned Arbitration Between Model-Based and Model-Free Navigation Strategies in Autonomous Driving</i>	3502
Shaojun Cai and Yingjia Wan	
<i>What is the Influence of Scale Format? A Study on the Likert and Visual Analogue Scale</i>	3503
Salomé Cojean, Nicolas Martin, and Martin Ragot	
<i>Enhancing generalization through an optimized sequential curriculum: Learning (to read) through machine teaching</i>	3504
Matthew Cooper Borkenhagen, Ayon Sen, Mark Seidenberg, Jerry Zhu, and Christopher Cox	
<i>Children's generalization of food properties: the role of transformation, property valence, and neophobia</i>	3505
Foinant Damien, Lafraire Jérémie, and Jean-Pierre Thibaut	
<i>Ontogenesis of social interaction: Review of studies relevant to the fetal social behavior.</i>	3506
Igor Val. Danilov and Sandra Mihailova	
<i>To Move or not to Move: An ERP Study on the Processing of Literal and Fictive Motion Constructions</i>	3507
Yu Deng	
<i>The impact of context and content similarity on risky choices: Insights from a memory-component model for decisions from experience</i>	3508
Hanna Fechner and Jörg Rieskamp	
<i>Jointly learning motion verbs and frame semantics from natural language and grounded scenes</i> ..	3509
Jon Gauthier, Jiayuan Mao, Tianmin Shu, Roger Levy, and Josh Tenenbaum	

<i>The rational side of decision “bias” based on verbal probabilities</i>	3510
Yuanqi Gu, Hidehito Honda, Toshihiko Matsuka, and Kazuhiro Ueda	
<i>Learning Communication Policies for Knowledge Transfer between Agents</i>	3511
Masoumeh Heidari Kapourchali and Bonny Bannerjee	
<i>Conditional Reasoning and Relevance</i>	3512
Steffen Hölldobler	
<i>Musical Pitch Affects Brightness Judgment of a Concurrent Visual Object</i>	3513
You Jeong Hong, Ahyeon Choi, Chae-Eun Lee, and Kyogu Lee	
<i>Distributional Information in Speech to Children: Nouns Come First</i>	3514
Philip Huebner and Jon Willits	
<i>Order matters: Developmentally plausible acquisition of lexical categories</i>	3515
Philip Huebner and Jon Willits	
<i>How does simulating aspects of primate infant visual development inform training of CNNs?</i>	3516
Shantanu Jaiswal, Dongkyu Choi, and Fernando Basura	
<i>Understanding Computational Thinking Assessment through Text Mining</i>	3517
Mi Song Kim and Negar Shabihi	
<i>Co-speech gestures reflect non-linguistic thinking: evidence from mental abacus</i>	3518
Yağmur Deniz Kısa, Neon Brooks, and Susan Goldin-Meadow	
<i>Can misconceptions be forgotten? Evaluating the efficacy of a directed-forgetting paradigm in revising science misconceptions</i>	3519
Melina Knabe, Emma Lazaroff, and Haley Vlach	
<i>To repeat or not to repeat: Competitor repetition and variability in children’s memory for words</i> ..	3520
Melina Knabe and Haley Vlach	
<i>Intentionally forgotten food pictures are perceived less delicious.</i>	3521
Masanori Kobayashi	
<i>Are analogies enough? Assessing long-term retention of and cognitive supports for science concepts learned using structural alignment</i>	3522
Emma Lazaroff and Haley Vlach	
<i>Effect of Active Pre-Learning Activities on Humans and Machines</i>	3523
Jaeseo Lim, Hwiyeol Jo, Byoung-Tak Zhang, and Jooyong Park	
<i>A Generalization Test of Conjunction Errors in Physical Reasoning</i>	3524
Ethan Ludwin-Peery, Neil Bramley, Ernest Davis, and Todd Gureckis	
<i>Is the structure of the belief in conspiracy theory equivalent across cultures?</i>	3525
Yoshimasa Majima and Hiroko Nakamura	
<i>Spatial structure in the cultural ecosystem of number</i>	3526
Tyler Marghetis, Kate Samson, Robert Goldstone, and David Landy	

<i>The Acceptability of AI at Work: Predicting the Intention to Use relying on UTAUT</i>	3527
Nicolas Martin, Salomé Cojean, and Martin Ragot	
<i>Procedures and principles of number: Evidence from the Tsimane’</i>	3528
Benjamin Pitt, Rose Schneider, Stephen Ferrigno, Edward Gibson, David Barner, and Steven Piantadosi	
<i>Effect of wordings on public perception toward Artificial Intelligence</i>	3529
Martin Ragot, Nicolas Martin, and Chloé Michaud–Redon	
<i>To Dye or Not to Dye : The Effect of Hair Color on First Impressions</i>	3530
Amanda Song, Devendra Pratap Yadav, Weifeng Hu, Garrison Cottrell, and Ed Vul	
<i>Effect of a colour-based descriptor and stimuli presentation mode in unsupervised categorization</i> .	3531
Sujith Thomas, Aditya Kapoor, and Narayanan Srinivasan	
<i>Large-Scale Survey of Students’ Skills in Reading Math Definitions</i>	3532
Naoya Todo, Noriko H. Arai, and Shingo Sugawara	
<i>Should we always log-transform looking time data in infancy research?</i>	3533
Angeline Sin Mei Tsui, Michael Frank, and Patricia É. Brosseau-Liard	
<i>Disguising self-esteem caused changes in academic achievements differently for boys and girls in Japanese junior high school.</i>	3534
Akitoshi Uchida and Kazuo Mori	
<i>Assessing children’s perceptual sensitivity to social information</i>	3535
Emanuela Yeung and Ulrich Mueller	
<i>Online Ratings: A Case Study of Information Integration</i>	3536
Jingqi Yu, David Landy, and Robert Goldstone
