Table of Contents

<i>Preface</i>	<i>iii</i>
 Chapter 2 I01A-01 Modeling 1	
Finite Element Model Based Determination of Local Membrane Conductivity of Polymer Electrolyte Fuel Cells <i>A. Schuller, J. Eller</i>	3
 Chapter 3 I01A-02 Modeling 2	
Hybrid Methodology for Efficient on the Fly (Re)Parametrization of Proton Exchange Membrane Fuel Cells Electrochemical Model for Diagnostics and Control Applications <i>A. Kravos, A. Kregar, T. Katrašnik</i>	13
 Chapter 4 I01A-11 Imaging	
Investigation of Liquid Water Distribution under Temperature Gradient in PEFC Using in-situ X-ray Visualization <i>T. Komiyama, T. Sasabe, H. Naito, K. Kawamura, T. Suzuki, S. Hirai</i>	27
 Chapter 5 I01A-12 Catalyst Layer 1	
Modeling Impedance Caused by Ohmic Losses in High Surface Area Carbons in Polymer Electrolyte Fuel Cells <i>R. M. Darling, S. F. Burlatsky</i>	39

Measurement and Analysis of Gas Transport Properties in Catalyst Layers of Polymer Electrolyte Fuel Cells with Different Ionomer to Carbon Ratio <i>F. Tsutsui, T. Suzuki, S. Tsushima</i>	49
Fabrication and Evaluation of Catalyst Layers in Polymer Electrolyte Fuel Cells: A Comparison of Decal and Inkjet Printing Techniques <i>Y. Shimizu, R. Murata, R. Kokogawa, T. Suzuki, S. Tsushima</i>	55
Effect of Reaction Products on the PEFC Catalyst Ink Property and Catalyst Layer Quality <i>S. Uemura, K. Sakai, T. Sasabe, H. Matsumoto, H. Sugimori, K. Shinohara, S. Hirai</i>	61
Optimizing the Composition of the PEMFC Catalyst Layer <i>J. Lamb, P. Andrei</i>	67

Chapter 6
I01A-22 Catalyst Layer 2

Distribution of Relaxation Time Analysis of Cathode Micro-Patterned PEFC <i>M. Tomizawa, K. Nagato, K. Nagai, M. Nakao</i>	81
-------------------------------------------------------------------------------------------------------------------------------	----

Chapter 7
I01A-21 GDL & MPL

X-ray Imaging of Water Distribution in Cathode Electrode of PEFC and Control of Liquid Water Transport by Electrode Perforation <i>K. Nishida, R. Funaoka, T. Furukawa, Y. Kono</i>	89
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----

Chapter 8
I01A-31 Degradation

Understanding Degradation Phenomena in HT-PEM Fuel Cells Using Micro-Computed Tomography <i>H. Schmies, D. Schonvogel, J. Büsselmann, P. Wagner, A. Dyck</i>	99
-----------------------------------------------------------------------------------------------------------------------------------------------------------------	----

Failure Analysis and Defects Characterization of Polymer Electrolyte Membrane Fuel Cells after Relative Humidity Cycling	109
<i>A. P. Soleymani, J. Chen, M. Ricketts, J. Waldecker, J. Jankovic</i>	

Chapter 9
I01A-32 Cell Level Methodics

Water Balance Measurements for a Single Proton Exchange Membrane Fuel Cell Using a Hot Wire Anemometer	125
<i>S. Al Shakhshir, T. Berning</i>	
Influence of Proton Activity Gaps between Electrodes on Open-Circuit Potential of H ₂ /H ₂ and H ₂ /Air Cells	135
<i>T. Yoshida, T. Hojo, T. Jozuka, T. Matsuda, N. Danilovic, A. Z. Weber, T. Suzuki</i>	
Nature-Inspired Flow-Fields and Water Management for PEM Fuel Cells	145
<i>P. Trogadas, J. I. S. Cho, V. S. Bethapudi, P. Shearing, D. Brett, M. O. Coppens</i>	
Development of an Oxygen Mass Transport Coefficient Measurement and Separation Method for Proton Exchange Membrane Fuel Cells	153
<i>L. Buehre, M. Suermann, R. Hanke-Rauschenbach, B. Bensmann, K. Bethune, J. St-Pierre</i>	
Determination Method of Dimensionless Moduli for Estimation of PEFC Performance	163
<i>M. Kageyama, K. Yamaguchi, D. Heggo, Y. Ma, H. Ogawa, M. Kawase</i>	
Acoustic Emission Analysis of Polymer Electrolyte Membrane Fuel Cells	177
<i>V. S. Bethapudi, G. Hinds, P. R. Shearing, D. Brett, M. O. Coppens</i>	

Chapter 10
I01A – Poster Session

Multiscale Simulation of Proton Transport in the Catalyst Layer with Consideration of Ionomer Thickness Distribution	187
<i>T. Matsuda, K. Kobayashi, T. Mabuchi, G. Inoue, T. Tokumasu</i>	
Microscopy Studies of the Catalyst Inks for PEM Fuel Cells	197
<i>S. Pedram, N. Macauley, S. Zhong, H. Xu, J. Jankovic</i>	

Simulation of Reaction and Mass Transport in PEFC Cathode Catalyst Layer Fabricated by Inkjet Printing Method <i>Y. Wei, K. Park, G. Inoue, N. Kimura, Y. Tsuge</i>	213
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Chapter 11

I01A - Polymer Electrolyte Fuel Cells & Electrolyzers 20 (PEFC&E) 20 - Diagnostics/Characterization Methods, MEA Design/Modeling

<i>(Invited)</i> Factors Influencing the Performance of Vanadium Flow Batteries: Electrodes and Electrolytes <i>D. N. Buckley, A. Bourke, D. Oboroceanu, N. Quill, C. Lenihan, M. Al-Hajji Safi, M. A. Miller, R. F. Savinell, J. S. Wainright, R. P. Lynch</i>	223
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Chapter 12

I01B – Heavy Duty Vehicles and Balance of Plant

Automotive Cold Start of a PEMFC System by Using a Methanol Solution as Antifreeze <i>G. Montaner Rios, J. Schirmer, F. Becker, S. Bleeck, C. Gentner, J. Kallo</i>	243
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Chapter 13

I01B – Stack

A Computational Fluid Dynamics Analysis of Heat Transfer in an Air-Cooled Proton Exchange Membrane Fuel Cell with Transient Boundary Conditions <i>A. Lind, C. Yin, T. Berning</i>	255
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Chapter 14

I01B – Transportation Contamination and Reformed Fuel

NO/NO ₂ Contamination of HT-PEM Fuel Cells – A Degradation Study with Evaluation of Regeneration Strategies <i>D. Schonvogel, J. Büsselmann, P. Wagner, A. Dyck</i>	267
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Chapter 15
I01B – Bipolar Plates and Mass Transport

Applications of Artificial Intelligence for Analysis of Two-Phase Flow in PEM Fuel Cell Flow Fields	279
<i>A. D. Santamaria, M. Mortazavi, V. Chauhan, J. Benner, O. Philbrick, R. Clemente, H. Jia, C. Ling</i>	
High Efficiency Operation Conditions in Polymer Electrolyte Fuel Cell System with Hydrogen Circulation	291
<i>Y. Ma, K. Yamaguchi, M. Kageyama, M. Kawase</i>	
Combined Two-phase Co-flow and Counter-flow in a Gas Channel/Porous Transport Layer Assembly	305
<i>S. B. Beale, M. Andersson, N. Weber, H. Marschall, W. Lehnert</i>	
Development of an Open-Source Solver for Polymer Electrolyte Fuel Cells	317
<i>S. Zhang, S. B. Beale, Y. Shi, H. Janßen, U. Reimer, W. Lehnert</i>	

Chapter 16
I01B – MEA Development

Investigation of Multilayered Catalyst Layers for Polymer Electrolyte Fuel Cells by Electrospray Deposition	333
<i>H. Arai, M. Irita, N. Katayama</i>	

Chapter 17
I01B – Poster Session

Comparison of Planar and Tubular Flow Field Plates for Proton Exchange Membrane Fuel Cells (PEMFCs) through Simulation	343
<i>A. Y. Tang, J. Jankovic, L. Crisci, S. Pedram</i>	
Optimization of Mass Transport within Direct Formic Acid Fuel Cell Catalyst Layer via Pore Formers	355
<i>S. Lam, M. M. Bixby, C. A. Rice</i>	

Chapter 18
I01C – Ion-Exchange Membrane Development

- Pore-Filled PEMs from Poly(Phenylene Sulfonic Acid)s and Electrospun Poly(Phenylene Sulfone) Fiber Mats 367
M. Hossain, Z. Shang, R. Wycisk, P. N. Pintauro

Chapter 19
I01C – Membrane Durability

- (Invited)* Liquid Chromatography/Mass Spectrometry Analysis of Effluent Water from Perfluoroalkylsulfonic Acid (PFSA) Membrane Degradation Studies at Accelerated Durability Test Conditions 377
M. Yandrasits, A. Komlev, K. Kalstabakken, M. Lindell, M. Kurkowski
- Modeling Synergistic Fuel Cell Membrane Degradation with Mitigating Effects of Cerium 395
V. M. Ehlinger, A. Kusoglu, A. Z. Weber
- Probing Membrane Degradation with Varying Catalyst Layer Thickness and Carbon Support 407
A. Spears, T. Rockward, R. Mukundan, F. H. Garzon

Chapter 20
I01C – Ionomer and Membrane Characterization and Modeling

- Measurement of Proton Conductivity and Water Diffusivity of Nafion Membrane at Subzero Temperatures 427
K. Tajiri, U. Shrivastava, S. Verma

Chapter 21
I01C – Poster Session

- Molecular Analysis of Cerium Ion Transport Properties in Polymer Electrolyte Membrane 439
K. Ishikawa, T. Tokumasu, T. Mabuchi

Nanostructure of a Catalyst Ink Investigated by Contrast-Variation Small-Angle Neutron Scattering <i>W. Yoshimune, M. Harada</i>	447
-------------------------------------------------------------------------------------------------------------------------------------	-----

Chapter 22
I01D-02 Non-PGM Cathode Catalysts 2

Effect of Semiconducting Properties of Oxide-Based Compounds on Oxygen Reduction Activity in Acidic Media <i>A. Ishihara, J. Hirata, T. Nagai, Y. Kuroda, K. Matsuzawa, A. Imanishi, S. Mitsushima, Y. Takasu, K. I. Ota</i>	457
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Chapter 23
I01D-11 Pt and Pt-Alloy Cathode Catalysts

Manufacturing Process of Electrode Films <i>C. J. Banas, B. Aponte, U. Pasaogullari</i>	467
Development of in situ A-SAXS and XAS Measurements of Pt Catalyst under Controlled Electrochemical Condition Using Channel Flow Electrode Cell <i>T. Watanabe, T. Kawamoto, K. Suda, C. Pondchanok, Y. Hiraoka, I. Hirosawa, J. Inukai</i>	477
Synthesis and Characterization of Low Platinum-Cobalt Alloy Cathode Catalysts by Rapid Annealing and Quenching Method for Fuel Cell Applications <i>R. Furukawa, M. M. Rahman, Y. Kaneta, B. Delgertsetseg, K. Ui, T. Takeguchi</i>	487

Chapter 24
I01D-12 Pt-Alloy Cathode Catalysts and Catalyst Layers

Effects of Solvent Composition on Viscosity and Dispersion Structure of PEFC Catalyst Ink <i>K. Iida, T. Sasabe, K. Sakai, S. Uemura, K. Shinohara, S. Hirai</i>	497
---------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Chapter 25
I01D-22 Performance & Durability of Cathode Catalyst Layers

Impact of Carbon Support Structure on the Durability of PtCo Electrocatalysts 505
*T. E. O'Brien, S. A. Herrera, D. A. Langlois, N. N. Kariuki, H. Yu, D. J. Myers,
D. A. Cullen, R. L. Borup, R. Mukundan*

Nanostructuring Pt Electrocatalysts Supported on Nanocrystalline SnO₂ for Polymer
Electrolyte Fuel Cells 517
T. Yoshizumi, Z. Noda, J. Matsuda, M. Nishihara, A. Hayashi, K. Sasaki

Pt-TiO₂ Nanocomposite PEFC Electrocatalysts for High Potential Cycle Durability 523
T. Tonosako, Z. Noda, J. Matsuda, M. Nishihara, A. Hayashi, K. Sasaki

Chapter 26

I01D-31 Pt-Based Anodes and Cathode Catalyst Layers

Influence of Ammonia Contamination on HT-PEM Fuel Cell Platinum Catalyst 537
A. Dushina, D. Schonvogel, Y. Fischer, J. Büsselmann, A. Dyck, P. Wagner

Chapter 27

I01D – Poster Session

Factors Affecting ORR Activity of Nb-Added TiO_x Catalyst Using Carbon Support
for PEFC 555
*Y. Adachi, T. Nagai, Y. Kuroda, Y. Ohgi, K. Matsuzawa, S. Mitsushima, K. I. Ota,
A. Ishihara*

P-Doped SnO₂ Powder as a Support for PEFC Cathode 565
*Y. Inoue, K. Matsuzawa, Y. Ma, Y. Ohgi, T. Nagai, Y. Kuroda, S. Yamamoto,
A. Ishihara*

Porous Metal Support for Gas Diffusion Electrode of PEFCs 573
T. Ikehara, Z. Noda, J. Matsuda, M. Nishihara, A. Hayashi, K. Sasaki

Chapter 28

I01E – Electrolyte Properties and Impacts on AEMFC Performance

(Invited) Electrochemical Energy Storage and Conversion Devices Incorporating C2-
Protected Polybenzimidazoliums and Polyimidazoliums 585
Q. Wei, B. Chen, S. Cassegrain, S. Holdcroft

- Electrochemical Synthesis of Polyaniline on Onion-like Carbon Nanoparticles Using the RoDSE Technique 595
B. L. Vargas Pérez, F. N. Sánchez Fonseca, K. M. Gonzalez-Aponte, L. Cunci

Chapter 29

I01E – Catalysts for Alkaline Oxygen Reduction

- Highly Active Fe-N/C Oxygen Electrocatalysts Based on Silicon Carbide Derived Carbon 607
P. Teppor, R. Jäger, J. Hints, O. Volobujeva, P. Valk, M. Koppel, E. Lust
- Template Synthesis of Ag@Fe-N-Doped Carbon Electrocatalyst for Oxygen Reduction Reaction in Alkaline Media 617
C. Gong, Z. Wang, X. Chen, Y. Chen, L. Yu, L. Dong

Chapter 30

I01E – Poster Session

- Investigation on Methanol Tolerance of Pt/C Cathode Catalyst with Heteroatom-Doped Carbon Layer for Direct Methanol Fuel Cell 625
J. G. Choi, K. Ham, J. Lee
- Paraffin Removal in the Synthesis of Novel Janus Carbon Nano-Onions 631
A. Del Valle-Perez, L. Rivera-Rivera, O. E. Gonzalez-Sanchez, L. Cunci

Chapter 31

I01F-01 Alkaline Electrolysis 1

- Large-Scale Coupling Numerical Simulation of Two-Phase Flow and Electrochemical Phenomena in Alkaline Water Electrolysis 641
N. Murakami, T. Kiuchi, M. Kodama, S. Hirai

Chapter 32

I01F-22 PEM Electrolysis 3

Considering Two-Phase Flow in Three-Dimensional Computational Fluid Dynamics Simulations of Proton Exchange Membrane Water Electrolysis Devices <i>J. S. Lopata, Z. Kang, J. L. Young, G. Bender, J. W. Weidner, H. S. Cho, S. Shimpalee</i>	653
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Chapter 33
I01F-31 PEM Electrolysis 4

Saline Water Electrolysis Membranes Prepared via the Simultaneous Irradiation of Electron-Beam <i>I. K. Park, W. J. Cha, C. H. Lee</i>	665
-------------------------------------------------------------------------------------------------------------------------------------------	-----

Chapter 34
I01F-32 Electrolysis: Electrocatalysis and Systems

Grid Scale Energy Storage: Modeling of Electrolyzer-Fuel Cell Combination and Comparison with Flow Batteries <i>S. Motupally, U. Pasaogullari</i>	675
------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Chapter 35
I01F – Poster Session

Durability Analysis on PEM Water Electrolyzers against the Voltage Fluctuation of Wind Power <i>Y. Honsho, M. Nagayama, K. Sasaki, A. Hayashi</i>	687
Electrocatalytic Hydrogen Evolution Reaction with Multilayer Graphene-Covered Ni Particles Synthesized by Microwave-Assisted Catalytic Methane Decomposition <i>F. Kadera, N. Yoshida, M. Inoue, M. Umeda, A. Miyakoshi</i>	699
Perfluorinated Anion Exchange Membranes for Alkaline Water Electrolysis <i>Q. M. Nguyen, S. Y. Jung, J. P. Hwang, J. Ahn, J. H. Lim, W. Jang, C. H. Lee</i>	703
Author Index	713
