Tenth International Symposium on Land Subsidence – living with subsidence

PIAHS 382/1 | 2020

P. A. Fokker and G. Erkens	Preface: Subsidence and society	1
	Measuring and monitoring land subsidence	
F. Acuña-Lara et al.	Infiltration of surface water through subsidence failure assessment applying electric prospecting, case Aguascalientes Valley, Mexico	5
G. Agudelo et al.	GPS geodetic infrastructure for subsidence and fault monitoring in Houston, Texas, USA	11
C.-K. Ahn and S.-W. Lee	Ground subsidence due to the backfill pressure in tunnel boring machine	19
B. Alberts et al.	An InSAR based planning tool for maintaining the Dutch height system	25
C. A. Bischoff et al.	Nationwide deformation monitoring with SqueeSAR® using Sentinel-1 data	31
G. Bitelli et al.	Updating the subsidence map of Emilia-Romagna region (Italy) by integration of SAR interferometry and GNSS time series: the 2011–2016 period	39
J. T. Brandt et al.	Detection and measurement of land subsidence and uplift using interferometric synthetic apertureradar, San Diego, California, USA, 2016–2018	45
T. J. Burbey	Parameter estimation of a multiple aquifer-aquitard system from a single extensometer record: Las Vegas, Nevada, USA	51
M. de Koning et al.	Determination of amount of land subsidence based on INSAR and LiDAR monitoring for a dike strengthening project	57
J. A. de Waal and M. W. Schouten	Regulating Subsidence and its uncertainty in the Dutch Wadden Sea	63
M. Ferentinou	Sinkhole collapse propagation studies through instrumented small-scale physical models	71
M. Ferentinou et al.	Detection of sinkhole occurrence, experiences from South Africa	77

Tenth International Symposium on Land Subsidence – living with subsidence

PIAHS 382/1 | 2020

M. Ferronato et al.	On the radioactive marker technique for in-situ compaction measurements: a critical review	83
S. Gandolfi et al.	GNSS measurements for ground deformations detection around offshore natural gas fields in the Northern Adriatic Region	89
K. Gu et al.	Land subsidence monitoring using distributed fiber optic sensing with Brillouin scattering in coastal and deltaic regions	95
M. Hernandez-Marin et al.	Ongoing research on the pumping-induced land deformation in the Aguascalientes Valley: an analysis of the recent data of vertical deformation, groundwater level variations and local seismicity	99
W.-C. Hung et al.	IoT technology and big data processing for monitoring and analysing land subsidence in Central Taiwan	103
K. Karlsrud et al.	Preliminary results of land subsidence monitoring in the Ca Mau Province	111
G. Ketelaar et al.	Integrated monitoring of subsidence due to hydrocarbon production: consolidating the foundation	117
F. Li et al.	Subsidence monitoring with TerraSAR-X data in Beijing Central Business District and subway tunnelings, China	125
J. Lin et al.	Spatial–temporal characterization of land subsidence induced by large area distribution of recent dredger fill	131
S.-P. Liu et al.	Application of distributed fiber optic sensing technique in land subsidence monitoring in coastal areas: a case study in Tianjin, China	137
Y. Muramoto et al.	PDCA method for management of land subsidence	143
K. Nooren et al.	Late Holocene differential subsidence and relative sea level rise in the Tabasco Delta, Mexico	149
T. Oliver-Cabrera et al.	InSAR Detection of Localized Subsidence Induced by Sinkhole Activity in Suburban West-Central Florida	155
R. Reudink et al.	Absolute vertical motion of the Amsterdam Ordnance Datum (NAP)	161
X. Rodriguez-Lloveras et al.	Two decades of GPS/GNSS and DInSAR monitoring of Cardona salt mines (NE of Spain) – natural and mining-induced mechanisms and processes	167
D. E. Solano-Rojas et al.	A multiscale approach for detection and mapping differential subsidence using multi-platform InSAR products	173
T. Strozzi et al.	Land subsidence and associated ground fracturing: study cases in central Mexico with ALOS-2 PALSAR-2 ScanSAR Interferometry	179
K. Teshebaeva et al.	Permafrost seasonal surface changes revealed from Sentinel-1 InSAR time-series, Yamal peninsula	183

Tenth International Symposium on Land Subsidence – living with subsidence

PIAHS 382/1 | 2020

S. van Asselen et al.	Monitoring shallow subsidence in cultivated peatlands	189
A. A. M. Venmans et al.	Reliability of InSAR satellite monitoring of buildings near inner city quay walls	195
G.-J. Vis et al.	Depressions caused by localized subsidence in the Netherlands, Belgium and Germany: a link with coal mining?	201
S. Wdowinski et al.	Land subsidence contribution to coastal flooding hazard in southeast Florida	207
R. Xiao et al.	General Survey of Large-scale Land Subsidence by GACOS-Corrected InSAR Stacking: Case Study in North China Plain	213
Y. Xu et al.	Study on the influence of supertall building load on adjacent tunnel subsidence	219
C.-H. Yang and A. Mütterthies	Introduction of Integrated Mining Impact Monitoring – i ² Mon Development Project	225
M. Yokochi et al.	Subsidence of rice paddy and upland crop fields in Shinotsu Peatland, Hokkaido, Japan	231
L. Zhang et al.	InSAR monitoring surface deformation induced by underground mining using Sentinel-1 images	237
R. Zhao et al.	Rapid Land Subsidence in Tianjin, China Derived from Continuous GPS Observations (2010–2019)	241
D. Zhou et al.	Land subsidence monitoring based on PS-InSAR Persistent Scatterers identification with spectral analysis method	249
Understanding land subsidence		
A. V. Anikeev et al.	Determination of land subsidence value under permanent drainage conditions at the site of highway tunnel in Moscow	255
M. Antonellini et al.	Hydrologic control on natural land subsidence in the shallow coastal aquifer of the Ravenna coast, Italy	263
R. F. Bekendam	A reanalysis of the collapse of the Heidegroeve: subsidence over an abandoned room and pillar mine due to previously unknown mine workings underneath	269
R. Boni et al.	Ground motion areas detection (GMA-D): an innovative approach to identify ground deformation areas using the SAR-based displacement time series	277
L. Bruno et al.	Factors controlling natural subsidence in the Po Plain	285
L. Guo et al.	Analysis of land subsidence changes on the Beijing Plain from 2004 to 2015	291
R. Hejmanowski et al.	Identification of the ground movements caused by mining-induced seismicity with the satellite interferometry	297
K. Kawano et al.	Effect of brine injection into shallow formation on land subsidence in the Southern Kanto gas field, in Japan	303

Tenth International Symposium on Land Subsidence – living with subsidence

PIAHS 382/1 | 2020

K. Lei et al.	Leaking recharge mechanism in the multi-layer aquifer system of a typical land subsidence area in Beijing	309
Y. Liu et al.	The Secondary Consolidation (Creep) due to Geohistorical Overburden Pressure in the Houston-Galveston Region, Texas	315
C. Loupasakis	An overview of the land subsidence phenomena occurring in Greece, triggered by the overexploitation of the aquifers for irrigation and mining purposes	321
P. S. J. Minderhoud et al.	Towards unraveling total subsidence of a mega-delta – the potential of new PS InSAR data for the Mekong delta ater	327
J. H. Nienhuis et al.	Altered surface hydrology as a potential mechanism for subsidence in coastal Louisiana	333
K. Shi and Y. Luo	Dynamic variation characteristics of layered monitored land subsidence near a fast railway line	339
P. Teatini et al.	Characterizing marshland compressibility by an in-situ loading test: design and set-up of an experiment in the Venice Lagoon	345
R. Tomás et al.	Wavelet analysis of land subsidence time-series: Madrid Tertiary aquifer case study	353
D.-H. Tran and S.-J. Wang	Land subsidence due to groundwater extraction and tectonic activity in Pingtung Plain, Taiwan	361
M. H. Truong and D. T. Nguyen	Characteristics of consolidation settlements and sedimentary environments of the late Pleistocene–Holocene deposits in the Mekong Delta and Ho Chi Minh City, Vietnam	367
C.-L. Yeh et al.	Influence of pore water pressure change on consolidation behavior of saturated poroelastic medium	375
Q. Yu et al.	Assessment of subsidence and consolidation of dredger fill area based on SBAS-InSAR and laboratory tests	381
Y. Zhang et al.	Experimental study on mechanism for pumping-induced land subsidence	387
J. Zhou et al.	Spatial variation of three-dimensional deformation: a case study in the north-eastern Beijing plain, China	391
Modelling of land subsidence		
A. W. Ahmed et al.	Modeling of land subsidence caused by groundwater withdrawal in Konya Closed Basin, Turkey	397
M. Aichi	Land subsidence modelling for decision making on groundwater abstraction under emergency situation	403
R. Boni et al.	Understanding the dynamic behaviour for the Madrid aquifer (Spain): insights from the integration of A-DInSAR and 3-D groundwater flow and geomechanical models	409
H. Bootsma et al.	Atlantis, a tool for producing national predictive land subsidence maps of the Netherlands	415
G. Buscarnera et al.	Multi-scale simulation of rock compaction through breakage models with microstructure evolution	421

Tenth International Symposium on Land Subsidence – living with subsidence
