REPRODUCED SOUND 2020 - CONTENTS

TUESDAY 17 NOVEMBER 2020

Investigation into the effects of the geometry in cone driven midrange horns and phase plugs 1
Lewis MacDonald, Jonathan Hargreaves, University of Salford

Infinite waveguide termination by hybrid finite element / series solution 13
Patrick C Macey, PACSYS

Advances in acoustic instrument measurements and system design 23
Ludovico Ausiello, Solent University

Temporal structure of the spectral levels within pre-recorded speech, music and cinema materials 35
Glenn Leembruggen, Acoustic Directions, Australia

On the viability of the Energy-Time Curve (ETC) in electro-acoustic measurement and analysis 57
James Love, David Gilfillan, Gilfillan Soundwork, Australia

Use of artificial intelligence in room acoustics prediction using a photograph 69
Daniel Milne, Lee Davison, Ludovico Ausiello, Solent University

An archaeoacoustics investigation of the Beulieu Abbey 81
Sebastian Duran, Martyn Chambers, Ioannis Kanellopoulos, Chris Barlow, Solent University

WEDNESDAY 18 NOVEMBER 2020

Analysis of neural network architectures for audio signal processing 93
Vlad S Paul and Philip A Nelson, ISVR, University of Southampton

Portable synthesizer on embedded system 105
João Davi de Campos, Federal University of Santa Maria, Brazil

Development and use of a low-cost acoustic flow resistance meter 117
Camille Hanrahan-Tan, Glenn Leembruggen, Acoustic Directions, Australia

Suitability of hi-fi loudspeakers measuring reverberation time in domestic rooms 129
Chris Adair, Adair Acoustic Design, Luis Gomez-Agustina, London South Bank University

Determining the source of coherence reduction using playback level of M-Noise. 137
Roger Schwenke, Merlijn Van Veen, Meyer Sound Laboratories, USA

THURSDAY 19 NOVEMBER 2020

WHAM: Webcam head-tracked ambisonics 145
Mark Dring, Bruce Wiggins, University of Derby

Rendering binaural signals for moving sources 155
Lucas M. Gomes, William D'Andrea Fonseca, Davi Carvalho; Paulo H. Mareze, Federal University of Santa Maria, Brazil

The acoustic design of the Qingdao Oriental Movie Metropolis Grand Theatre 167
Shenzhi Su, CSP Acoustics; Yuewei Cui, Sunac, China

A case study on the impact live event sound level regulations have on sound engineering practice 179
Adam Hill, Jon Burton, University of Derby.

An overview of UK and international guidance for the control of noise from outdoor events and why events deviate from the guidance 190
Peter Wheeler, Open University

An automated method for delay estimation and time alignment in reflective environments 198
A Holt, Ambrose Thompson, Martin Audio

The behaviour of ECS and SSEP amplification systems using different input signals and implications 210
Alberto Fueyo Gallego, Antony Stacey, AMS Acoustics
