IABSE Congress 2020

Resilient Technologies for Sustainable Infrastructure

Congress Postponed due to COVID-19

Christchurch, New Zealand
3 - 5 February 2021

Volume 1 of 2

Editor:

Anthony Abu

ISBN: 978-1-7138-2601-9

Table of Contents

Keynote lecture abstracts

NZ Seismic Resilience: experience from the Canterbury earthquakes 1
Lianne Dalziel, Stefano Pampanin

Structural fire for vertical and horizontal infrastructure 3
Luke Bisby, Venkatesh Kodur

Sustainability and resilience in the design of bridges and buildings 4
Mark Sarkisian, Akio Kasuga

Finding forms and materials in structural design 5
Peter Burnton, Knut Stockhusen

Digital engineering: the new frontier of civil engineering 6
Philippe Block, Carlo Ratti

The history, the failure and the renaissance of the Morandi Bridge 7
Tullia Iori, Gian Michele Calvi, Angelo Vitozzi

The Future Challenge: Extending the life of existing infrastructure 9
Limin Sun, Dan Frangopol

Special Sessions

New Zealand (NZ) Applications 1 11
Will Pank, Tim Brook

New Zealand (NZ) Applications 2 12
Barry White, Jeremy Waldin

Young Engineers 13
Sakthy Selvakumaran, Weng Yuen Kam, Manya Deyanova

Bridge Engineering

Alternative design for the replacement Cambridge Pipe Bridge 14
Steven Prozniak, Safia Moniz, Jayden Mellsop

Darlington Upgrade Project – Bridge design for manufacture and assembly 21
Arwin Salih, John Kenyon, John Steele, Ranjan Weeraratne

Bataan-Cavite Interlink Bridge, Philippines – a new 32 km sea crossing 29
Sammy Yip, Steve Kite, Paresh Vishnoi, Vikas Venkatesha

Connecting Auckland through innovative engineering solutions: the Northern Corridor Improvements Project 37
Sabina Piras, Paul Corbett, Tomasz Mirocha

Eddy current based evaluation of axial force of high-strength bolts 45
Ayako Akutsu, Sanjeema Bajracharya, Eiichi Sasaki, Tetsuhiro Shimozato, Masayuki Tai

Shear connection between two precast concrete bridge segments built with thin-walled elements 54
Tobias Huber, Stephan Fasching, Johann Kollegger

Assessment of corrosion-induced bond deterioration in reinforced concrete: towards a splitting crack-based approach 62
Michele Win Tai Mak, Janet M. Lees

A review of research progress on shear lag effect of bridges 70
Shukun Duan, Jinyang Gao, Yiwei Gu, Jiansheng Fan, Yufei Liu

Experimental study of the steel-concrete connection in the hybrid continuous rigid frame bridge 79
Debao Chen, Qingtian Su, Zhiping Lin, Jiang Lin, Yuqiang Cai

Rehabilitation the União Bridge by stay-cable system 88
Pedro Afonso de Oliveira Almeida, Pádua Andrade

Ice-shedding and aerodynamic investigations of bridge cables with steel wire meshes 94
Lubomir Matejicka, Christos T. Georgakis, Holger H. Koss, Philipp Egger

Construction of the Lewis and Clark cable-stayed bridge over the Ohio River 103
Marcos Loizias

Cable stayed bridge over the crati river in Cosenza 111
Pierangelo Pistoletti, Marcello Vaccarezza, Simone Varni, Paolo Roggero, Marco Sciarra

Railway lines of R.F.I. and Ferrotramviaria crossing in Bari - "Adriatico" cable stayed bridge 119
Pierangelo Pistoletti, Paolo Maestrelli, Simone Varni, Marco Sciarra, Andrea Danelon

Seismic retrofit of a truss bridge in Seto-Ohashi bridges 125
Takao Kaneda, Masahiro Nishitani, Kazuo Endo, Hiroki Murakami

Seismic performance of a bridge pier reinforced with titanium alloy bars 133
Mahesh Acharya, Mustafa Mashal, Jared Cantrell

Reverse engineering of existing reinforced concrete slab bridges 140
T.L. Harrewijn, R.P.H. Vergoossen, E.O.L. Lantsoght

Experimental study on PSC beams with various conditions of corrosion 148
Chi-Ho Jeon, Duy Cuong Nguyen, Chang-Su Shim

The Rakaia Gorge bridge deck replacement and seismic strengthening 156
Peter Routledge, Andrew Bradfield

An overview of urban-bridge construction in Bangkok metropolitan area, Thailand 164
Kitisak Kanjanun, Yan Bin, Sakda Katawaethwarag

Full-scaled experiment on flexural behavior of pre-tensioned prestressed bulb T-beam 172
Bowen Feng, Yongjian Liu

Structural tests on 43- and 45-year-old pre-stressed concrete bridge for reinforcement effect of PSC-I girders reinforced by external strand tendons 180
Kim Hyun-Joong, Park Young Suk, Kim Chul Young, Kwon Seung Hee, Seong, Yeong Hun

Reassessment of the load capacity of an aged bridge under new design methods 188
Li Dong, Dongli Sun, Yizhuo Zhang

Feasibility study for the Samal Island to Davao City Connector Project 197
James Pitchforth, Steve Kite

An earthquake resistant pier system for Accelerated Bridge Construction 205
Jared Cantrell, Mustafa Mashal, Arya Ebrahimpour

Reliability based performance assessment of a roadway bridge under seismic actions 212
Carlos Mendoza, José Matos, Neryvaldo Galvão, Álvaro Viviescas

Enhancing the application potential of dissipative controlled rocking connections through detailing and design 220
Brandon McHaffie, Peter Routledge, Alessandro Palermo

Extending span ranges and accelerating construction of spread slab beam bridges 229
Dongqi Jiang

Numerical analyses of joint with steel endplates, headed stud anchors and concrete cross-beam in continuous steel-concrete composite girder bridges 237
Bruno Briseghella, Junping He, Junqing Xue, Zordan Tobia

Strengthening strategies of highway viaducts in Germany 245
Balthasar Novák, Vazul Boros, Jochen Reinhard

Highway traffic loading - AS5100 and NZTA Bridge Manual compared to international codes 261
Steve Rhodes, Philip Icke, Paul Lyons

Design of segmental box girder bridges with match cast dry joints in Melbourne, Australia 269
Adam McManus, Daniel Tofful, Rafal Wozniak

Mary Elmes Bridge. An urban pedestrian bridge, from concept to opening 276
Marcos Sanchez Sanchez, Robert Ryan, Simon Roberts

Design of the Shintomei-Nakatsukawa Bridge - An extradosed bridge considering effect of large displacement due to a fault 285
Takeshi Yamaguchi, Hiroki Aoi, Dai Wakabayashi

On the potential for using bridge natural frequencies to detect scour: an experimental study 293
Kasun Kariyawasam, Campbell Middleton, James Talbot, Paul Fidler, Stuart Haigh, Jenny Roberts, Gopal Madabhushi

Experimental study on partial-combination method in continuous composite girder 302
Hang Su, Qingtian Su, Wensheng Yu, Yunjin Wang, Minghui Zeng

Preventing the wind-induced vibration of arches during construction 311
Zachary J. Taylor, Andrew W. Smith, Aaron G. Gradeen, J. Shayne Love, Guy L. Larose

Analysis of Performance Evaluation Index for bridge group networking monitoring and collaborative supervision 319
Liye Zhang, Yong He, Shoushan Cheng, Guoliang Wang, Hongwei Ren, Lijuan Dong, Bingjian Wang, Ke Chen, Hanyong Liu

Proposed evaluation methods for vibration serviceability of long span cable bridges 327
E.-S. Hwang, M.T. Hwang, D.Y. Kim, K.J. Park

Experiences from the wind-tunnel testing of the Hardanger Bridge section model 335
Bartosz Siedziako, Ole Øiseth

Calculation and construction study for the Novel Twin-Deck Cable-Stayed Bridge with shared pylon 343
Xiangmin Yu, Dewei Chen

Using heterogeneous measurement data to update the corrosion degree in bridge girders 350
Eline Vereecken, Wouter Botte, Robby Caspeele, Geert Lombaert

Steelframe reinforced plug joint towards seamless bridge deck 358
Yousong Peng, Sichang Liu, Yi Wang, Jie Li, Jian Ren, Hong You, Qihua Zhao, Xingxiang Wu, Wanfu Yu

Calculation of influence line using regular traffic for improving bridge weigh-in-motion under variable vehicle speed 366
Kouichi Takeya, Junji Yoshida, Junki Mori

Finding the optimum layout for cable-stayed bridge in conceptual design 374
Sami Soppela, Esko Järvenpää

Analytical study on repair method for steel I-girder bridges with corrosion damage considering its structural system behavior 382
Ryoga Oura, Takashi Yamaguchi, Kentaro Arimura

Attachment of a crash-tested traffic barrier to a new bridge deck design in aluminium 390
Charles-Darwin Annan, Martin Cormier, Mario Fafard

Evaluation of vehicular contact force on bridge joints by vibration responses and object detection 396
Di Su, Yuichiro Tanaka, Tomonori Nagayama

Bridge asset management at Auckland Transport 404
Gang Yu, Matiul Khan

Wind self-excited force models suited for floating bridges 412
Mitja Papinutti, Ole Øiseth, Ketil Aas-Jakobsen

The E39 Bjørnafjorden crossing, development and selection of bridge concept 420
Svein Erik Jakobsen, Per Norum Larsen, Sverre Wiborg, Anette Fjeld, Jon Solemsli, Øyvind Nedrebø, Stian Moe Johannesen, Vigleik L. Hansen

Review of detail categories of lattice girder node joints of EC 3 428
Helen Bartsch, Markus Feldmann

Rose Fitzgerald Kennedy bridge over the River Barrow. Design and Construction of a long span extrados bridge 436
Marcos Sanchez Sanchez, Miguel Angel Astiz Suarez, John Iliff

Elastic-, inelastic and plastic buckling of curved shear webs in closed box girders with vertical stiffeners 445
Gilles Van Staen, Philippe Van Bogaert, Amelie Outtier, Hans De Backer

Analysis of economic efficiency for cable-stayed-suspension bridges based on structural applicability 453
Younki Son, Wanghyun Nam, Dongho Yoo, Sangwon Song

Facing construction challenges in constructing two bridges to provide access to Singapore's new waste facilities 456
Mike Tapley, Jacco Poland

Challenges of implementing bridge model updating in industry practice 464
Cong Ye, Campbell Middleton, Sin-Chi Kuok, Liam Butler

On the seismic vulnerability evaluation of RC bridges exposed to corrosion 471
Marco Zucca, Pietro Crespi, Giuseppe Pasqualato

Properly designed expansion joint to ensure successful seismically isolated structures 479
Bambang Boediono, Tri Suryadi, Lie-Hendri Hariwijaya, Tony Sihite

Seismic performance of Greater Jakarta LRT with added lead rubber bearing using non-linear time history analysis 487
Iswandi Imran, Marie Hamidah, Husain A. Shiddiq, Tri Suryadi, Hasan Al-Harris, Syamsul Hidayat

Experimental study on seismic performance of suspended ceiling components 497
Yong Wang, Huanjun Jiang, Chen Wu, Zihui Xu, Zhiyuan Qin

Comparative study on seismic design and check of piers by Chinese and European Codes 505
Bruno Briseghella, Junzhen Chen, Junqing Xue, Davide Lavorato, Camillo Nuti

Hutt River pipeline bridge spanning across the Wellington fault 513
Francisco Barrantes, Andrew McMenamin, Roger Tang

Site controlling in infrastructure projects by digital methods 521
Tino Walther, Marianne Pieper, Hans-Joachim Bargstädt

Resilience evaluation and recovery time estimation in multi-storey building models 529
Takeshi Asakawa, Shota Saito, Nanami Oda

Recovering the Waiho – Emergency response and recovery of the Waiho River Bailey Bridge 537
Jeremy Waldin, Ben Baty

Kaimai Tunnel track slab assessment 545
Peter Burnton, Citra Wicaksana

Mechanics analysis of long span railroad cable-stayed bridge under effect of vertical loads 554
Jun-Qing Lei, Xian-Qing Zhang, Shu-Lun Guo, Zu-Wei Huang, Wu-Qin Wang

Experimental study on transverse stress of different forms of concrete bridge deck 559
Xieli Zhang, Chong Wu, Qingtian Su, Xiaomao Feng, Xiaoyong Zhou

Modal shape identification for short and medium span bridges using wavelet based vehicular sensing approach 567
Xudong Jian, Limin Sun, Ye Xia

The replacement of Uusi-Pitkälä underpass bridge 576
Sami Noponen

Navigation clearance evaluation and marine simulations for the planning of new bridge spans 581
Steve Kite, James Pitchforth, Sammy Yip, Paz Artejo, Gerardo Ramon Galang

Rehabilitation and modification of structures

Strengthening of reinforced concrete beams: RC versus UHPFRC layers 589
Andreas Lampropoulos, Ourania Tsioulou, Spyridon Paschalis, Stephanos Dritsos

One-sided repair of corroded steel girder end with high-strength bolted doubler plate and evaluation of its resiliency after the repair 597
Hitoshi Moriyama, Lang Yu, Takashi Yamaguchi

Redesign of a dissipative bracing-based retrofit intervention for an earthquake damaged school building 605
Gloria Terenzi, Iacopo Costoli, Stefano Sorace

Resilience improvement of historical timber floors subjected to cyclic loading 614
Shota Urushadze, Miloš Drdácký

Mechanical behavior of monitoring sleeved members with rigid connections at both core tube sides 622
Wudang Ying, Changgen Deng, Chenhui Zhang

Strategic bridge repair and its repair effect based on the damage tendency of the expressway viaducts 630
Yuji Sakai, Shigeru Matsumoto, Takashi Kuroda

The structural rehabilitation of the Costa e Silva bridge in Brasília, DF, Brazil 638
Pedro A. de O. Almeida, Maruska L. S. Holanda, Ronaldo O. Almeida

Swan Street Bridge Upgrade – Widening a 70-year old bridge 647
Alistair Watson, Scott Paton, Andrew Cowell

Rehabilitation of bearings of a major earthquake damaged railway bridge 655
Ronald Wessel, Geoff Brown, Morgan Harris, Rudolph Kotze

BridgeDoctor, life cycle costs of bridges under control 663
Bert Hesselink, Wim Freriks, Mark van der Burg, John van Dijk

Laboratory tests on strengthening steel and concrete elements with high-strength concrete 671
Marina Traykova, Lazar Georgiev, Emad Abdulahad, Stoyan Ivanov

Load bearing performance of precast PC slab using rationalized joints 679
Yoshimatsu Hidekazu, Takahashi Ryosuke, Tokushige Hidenobu

Aerodynamic behavior of wind turbines with polygonal cross-sectional tower 687
Yong Chul Kim, Yukio Tamura

Proposal of technical specifications for the "arch-tied strengthening method" applied on medium span bridges 695
Alvaro Rojas, Matías A. Valenzuela, Hernán Pinto

Rehabilitation and strengthening procedures used for RC structures in Bulgaria 703
Marina Traykova

Performance-based fire engineering

Experimental fire performance of unloaded stay-cables for bridge infrastructure 710
Benjamin Nicoletta, John Gales, Panagiotis Kotsovinos

Comparison of steel strength retention models for fire exposed concrete slabs 717
Thomas Thienpont, Ruben Van Coile, Robby Caspeele, Wouter De Corte

The York-Arup cable experiments: Implications for the fire design of cable-supported bridges 725
Benjamin Nicoletta, John Gales, Panagiotis Kotsovinos

Analytical study on evaluation of residual strength for steel-concrete composite girder bridge after fire 729
Yusuke Takahashi, Yusuke Imagawa, Osamu Ohyama

Degradation of concrete elements under thermal and mechanical loads and its repair 737
D. Harinadha Reddy, Ananth Ramaswamy

Application of Group Analytic Technique in the design decision-making process for a steel building in fire 745
Obinna Akaa, Anthony Abu, Michael Spearpoint

Performance under multi-hazards

Construction on Antarctica: Dismantling an existing wharf structure 753
Koen van Doremaele

Application of risk management system (GRDR) on Chilean tunnels La Pólvora and Subway Line 3 Santiago 761
Matias A. Valenzuela, Christopher Garrido, Ruben Castro, Alvaro Peña-Fritz, Paola Moraga, Flavio Alvarez

Study on climate change impacts of sea level rise on the Saemangeum Sea Dike using the EEMD method 769
Baeg Lee, Hyun-han Kwon

Forensic engineering

Recent failures of external prestressing grouted tendons: the paramount role of the HDPE duct 775
Bruno Godart, Laurent Gaillet, Laetitia Van Schoors, Laurent Labourie, Didier Germain, Bastien Vaurigaud

Development of CROSS in Australasia 783
Mike Fordyce, Colin Caprani

Innovative forms, technologies and materials

First operational ground floor building using load bearing 3D printed elements 792
Olivier Cremens, Benoit Meulewaeter, Luai Al Kurdi, Sami Bishara

Conceptual and parametric design of steel bridges 800
Liam Edwards, Kevin Ip

Innovation & Fast Track Construction 808
BC Roy, Tanmoy Guha, R Ekambaram

Two important bridges protected from earthquake by extremely big sliding pendulum isolators 816
Agostino Marioni, Roberto Dalpedri, Marco Banfi, Carla Cai

The bearings for the Bangkok Monorail: innovative concepts and fatigue resistance 824
Agostino Marioni, Roberto Dalpedri, Marco Banfi, Ivan Marenda

Full-scale experimental testing of Structural Concrete Insulated Panels (SCIPs) 833
Mustafa Mashal, Karma Gurung, Mahesh Acharya

Wind turbine structures – recent developments regarding fatigue design 841
Marion Rauch, Markus Knobloch

A visual integration information platform for maintenance management of concrete structures based on information technology 849
Y.F. Zhang, H. Yokota, P.Y. Miao

Case Study: the use of concrete prefabricated prefinished volumetric construction for two blocks of 40-Storey residential flats (the Clement Canopy), Singapore 858
Wong Seng, Heng Kim Huat, Maey Leow Geok Mui, Tan Teng Hooi, Chew Keat Chuan, Tan Chong Lin

Numerical analyses on flexural performance of UHPC link slab-abutment backwall system in jointless bridges 866
Bruno Briseghella, Zhen-guo Yang, Jun-qing Xue, Jian-hui Lin, Fu-yun Huang

Development of an innovative one part green concrete 874
Ourania Tsioulou, Andreas Lampropoulos, Kyriacos Neocleous, Nicholas Kyriakides, Thomaida Polydorou

Numerical simulation of cracking in concrete using damage mechanics 881
Todor Zhelyazov, Radan Ivanov

Meso-scale study of notched and un-notched plain concrete beam under three-point bending 890
Biswajit Pal, Ananth Ramaswamy

Toughened 2K-epoxy adhesives: structural strengthening of steel structures 898
Tobias Meier, Fabien Choffat, Antonino Montalbano

Digital technology and fabrication

A BIM-integrated graph database for the construction execution phase 903
Sebastian Seiß, Hans-Joachim Bargstädt

Creating parametric design workflows for rapid conceptual design and optioneering 912
Alecs Kak Tien Chong, John Chen, Mike Tapley, Kristof Crolla

An approach to reduce concrete rework using Building Information Models 920
Okuhle Vonco, Jan Wium

Durability

Long-term monitoring of a progressively deteriorating bridge to support safe operation 927
Darby Johannessen, Tim Heldt, Neal Lake, Hanson Ngo, Joshua Frew

Degradation modelling of railway infrastructure 935
Ewa Laskowska, Jørn Vatn

Large-scale fatigue tests on prestressed concrete beams 943
Dennis Birkner, Steffen Marx

Durability issues related to detailing links of steel crane runway beams to columns 952
Dimitar Dakov, Borislav Belev

Quality assurance and quality control to ensure durability 960
BC Roy, Tanmoy Guha, R Ekambaram

Verification of applicability of weathering steel based on long-term exposure tests in Vietnam 968
Shinichi Miura, Dang Dang Tung, Eiji Iwaski

Corrosion risk assessment for sheet piles in road environment – using ISO9223 dose response function and long term exposure samples 976
Graham Gedge, Bruna Frydman

Residual service life estimation of bridges 984
Mayank Bajaj, Biswajit Bhattacharjee

Sustainability

Resource consumption in construction as a global challenge 992
Matthias Lieboldt, Wiebke Seifert, Matthias Tietze

Corrosion investigation of longitudinal direction of corroded main cable on an actual suspension bridge 1000
Kazuhiro Miyachi, Koji Kinoshita, Rina Hasuike, Yoshitomo Yano, Yosuke Hatasa

Sustainable infrastructures: aeroelastic response of a pedestrian suspension bridge made of wood and hemp cables. 1008
Fabio Rizzo, Giuseppe Brando, Federica Tamburrano, Paolo Fusero

Experimental study on mechanical behavior of combined joint using adhesives and high strength bolts 1017
Takuya Kamino, Takashi Fujimoto, Takashi Yamaguchi, Yasumoto Aoki, Shinsuke Akamatsu, Hisakazu Horii

Push-out tests of shear connectors for new fully assembled steel-concrete composite beams 1024
Hetao Hou, Ning Wang, Zengyun Zang

The caulfield to Dandenong Level Crossing Removal Project – An innovative, sustainable, congestion busting success. 1032
Adam McManus, Daniel Tofful

A structural analysis: Designing our way into sustainability 1040
Lis Frisk

Sustainable practices for bridge structures 1048
Harminder Singh

Sustainability aspects of geotechnical engineering in New Zealand 1056
Alexei Murashev

Development of codes and standards

Consideration of climate change-induced corrosion by structural codes 1064
Maria Nogal, Emilio Bastidas-Arteaga, Helena Maria dos Santos Gervásio

Fatigue design using the structure stress concept for welded metal structures 1071
Niclas Rausch, Martin Mensinger

Performance-based methodology for seismic assessment of code-conforming RC buildings 1079
Krishna Murari, Harvinder Singh, Savleen Takkar

Load effects of overweight and oversize vehicle traffic on pavements and bridges 1087
Eui-Seung Hwang, Min-Tae Hwang, Do-Young Kim, Seong-Min Kim

Proposal to transform "AS(AS/NZS) 5100 Bridge Design Standard" to "AS/NZS 5100 Bridge and Transport Infrastructure Design Standard" 1095
Ross Pritchard

Risk analysis in the design of timber portal frames with semi-rigid knee joints 1104
Lilita Ozola, Janis Fabriciuss

Timber bodies strength of materials: Fundamental principles, test specimens proposal 1112
Miguel A. Tortoriello, Luis J. Lima, Ana C. Cobas, Renso A. Cichero

Nonlinear models for design of circular RC columns under ultimate and service states 1118
Helena Barros, Carla Ferreira, Joaquim Figueiras, Mário Pimentel

Earthquake engineering

Derailment probability of whole railway lines during an earthquake, considering the structure types of bridge, embankment and tunnel 1126
Kenji Narita, Munemasa Tokunaga, Keiichi Goto, Kimitoshi Sakai

Load bearing capacity of road lighting pole installed on bridges 1134
Masaaki Isa, Masatsugu Shinohara, Yasumoto Aoki

2-dimensional effective stress analysis for a damaged bridge located in the caldera of Mount Aso in 2016 Kumamoto earthquake 1142
Yukihide Kajita, Taiji Mazda, Kunihiko Uno, Takeshi Kitahara

Machine learning-based failure mode identification of RCSPSW 1150
Dongqi Jiang, Shanquan Liu, Tao Chen, Gang Bi

Real-time seismic damage prediction and comparison of various ground motion intensity measures based on machine learning 1158
Yongjia Xu, Xinzheng Lu, Yuan Tian, Yuli Huang

Effect of sliding pendulum isolator bearing on the structural performance of Becakayu Ahmad-Yani continuous span bridge 1167
Tri Suryadi, Tony Sihite, Wanda Heryudiasari

A study on the damage development process of steel rigid frame bridge piers with rocking columns 1175
Takahiro Fukushima, Hitoshi Yatsumoto, Kyoko Azumi, Koichi Sugioka

New Mexico City International Airport - Control Tower 1183
Tom Rice

Development of Indian standards in EQ resistant design of bridges – past, present and future prospects 1194
Alok Bhowmick, Harpreet Singh

Comparison between the previous and new earthquake design standards in Thailand 1205
Samard Buddee

Axial Compression Behaviour of Concrete-Filled Double-Layer Steel Tubular Column 1214
Li Wencong

Experimental analyses of innovative wood-shear walls under seismic loads 1222
Vera Wilden, Benno Hoffmeister

Analytical modelling of controlled rocking connections in post-tensioned timber frames under combined seismic and gravity loading 1230
Paul Horne, Anthony Abu, Alessandro Palermo, Peter Moss

Design of movable scaffolding systems for seismic events – A practical case 1239
Pedro Pacheco, André Resende, Alberto Torres, António Guerra, Hugo Coelho

Evaluation of unbonded Strip-STRP bearing based on current design guidelines 1247
M. B. Zisan, A. Igarashi

Multi-storey buildings

Seismic performance of circular columns from an existing RC building constructed in 1969 1257
Hideo Araki, Kazushi Sadasue, Eisuke Sakamoto

Structural behaviour of steel plate infilled outrigger wall system 1265
Alaa Elesawy, Mustafa Batikha

A study of ground reaction forces due to human movement 1273
Mehdi Setareh, Matthew Tiller

Design of multi-storey buildings for transportation 1281
Jim Martin, Danilo Marino, Tyrone Miller, James Bingham

Finite Element (FE) analysis of H-beam – composite POSCO (P)-box column joints with new inner diaphragms. 1289
Mahbub Khan, Brian Uy, Jin Won Kim

Estimation of the dynamic properties of floors using Heel Drop Tests 1297
Mehdi Setareh, Jiang Li

Structural design of an over-track building with mid-story isolation 1304
Daiki Nakamizo, Seiya Kimura, Yuichi Koitabashi

Earthquake induced floor accelerations on a high-rise building: scale model tests on a shaking table. 1312
Fabio Rizzo, Alessandro Pagliaroli, Giuseppe Maddaloni, Antonio Occhiuzzi, Andrea Prota

Simplified models to represent human effects on floor dynamic properties 1320
Mehdi Setareh

Study on mechanical properties of very low-strength concrete from an existing building 1328
Eisuke Sakamoto, Kazushi Sadasue, and Hideo Araki

Static analysis of high-rise concrete buildings with holistic 3D models 1336
Thomas Markus Laggner, Dirk Schlicke, Nguyen Viet Tue

Author index
