The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.
Contents

TARGET, ANOMALY, AND CHANGE DETECTION I

11727 08  Improved covariance equalization for change detection in hyperspectral images [11727-1]
11727 09  Reducing false alarms in hyperspectral images using a covariance matrix based on preliminary false detections [11727-2]
11727 0A  Lognormal background modeling for gaseous plume detection [11727-3]
11727 0B  Veritas: an admissible detector for targets of unknown strength [11727-4]

INSTRUMENTATION AND CHARACTERIZATION I

11727 0D  Characterizing the dynamic range of a hyperspectral camera [11727-6]
11727 0F  Low-cost, user friendly multispectral imaging system for the recovery of damaged, faded or palimpsested historical documents [11727-8]
11727 0G  Test of SIMAGAZ: a LWIR cryogenic multispectral infrared camera for methane gas leak detection and quantification [11727-9]

INSTRUMENTATION AND CHARACTERIZATION II

11727 0H  Status of the moderate-resolution imaging spectroradiometer level 1B algorithm [11727-10]
11727 0I  Terra MODIS sees solar eclipses: analysis of reflective solar band response at multiple radiance levels [11727-11]
11727 0J  S-NPP VIIRS solar diffuser degradation at the view direction of rotating telescope assembly [11727-12]

SYSTEM MODELING

11727 0K  Modeling the radiative response of a high facet count rainforest for synthetic sensor imagery [11727-13]
11727 0M  Deepfaking it: experiments in generative, adversarial multispectral remote sensing [11727-15]
### APPLICATIONS OF SPECTRAL SENSING I

- 11727 0P  Identification of minerals from hyperspectral imaging based on a fuzzy logic approach [11727-18]
- 11727 0Q  Automatic clustering of inks in cultural heritage artifacts via optimal selection of graph modularity [11727-19]
- 11727 0R  Algorithms for identification of trace explosives by active infrared backscatter hyperspectral imaging [11727-20]

### SPECTRAL MEASUREMENTS AND MODELING

- 11727 0V  Application of machine learning to estimate fireball characteristics and their uncertainty from infrared spectral data [11727-24]
- 11727 0W  Solar panel coverglass degradation due to the simulated GEO environment exposure [11727-25]
- 11727 0X  Scatter coordinate mapping and out-of-plane BRDF measurements for specular materials using an augmented CASI measurement system [11727-48]

### TARGET, ANOMALY, AND CHANGE DETECTION II

- 11727 0Y  Using pre-segmentation with the adaptive cosine estimator and matched filter algorithms for hyperspectral target detection [11727-26]
- 11727 0Z  Subpixel target implantation to assess pansharpening performance on hyperspectral datasets [11727-27]
- 11727 10  Supervised unconstrained and constrained least squares unmixing in hyperspectral imagery [11727-28]
- 11727 11  Hyperspectral data cube segmentation analysis in sub-pixel target detection [11727-29]
- 11727 12  Paint detection in shortwave and midwave hyperspectral using one dimensional CNN and guided grad-CAM band selection [11727-30]

### APPLICATIONS OF SPECTRAL SENSING II

- 11727 14  Measurement of aflatoxin in maize/corn meal and other agricultural products [11727-32]
- 11727 15  Multi-resolution hyperspectral collection for analysis of panchromatic sharpening algorithms [11727-33]
A simple web-based tool for multi-spectral surface visualization [11727-34]

Detection, identification, and quantification of SF$_6$ point-source emissions using Telops hyper-cam LW airborne platform [11727-49]

POSTER SESSION

Spectrum-feature extraction from diffuse reflectance using multiplicative-factor decomposition [11727-35]

Case-study analysis of dielectric response for cesium lead halide perovskites [11727-36]

Development of VIS/NIR hyperspectral imaging system for industrial sorting applications [11727-38]

Spectral characterization of spacecraft materials used in hypervelocity impact testing [11727-43]

Improving mosquito population models over the Greater Toronto Area using MSI and SAR data [11727-45]

Linear models for SWIR surface spectra from the ECOSTRESS library [11727-46]
