Volume 11738

Proceedings of SPIE 0277-786X, V. 11738

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Anomaly Detection and Imaging with X-Rays (ADIX) VI*, edited by Amit Ashok, Joel A. Greenberg, Michael E. Gehm, Proc. of SPIE 11738, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SESSION 1 SCATTER AND PHASE CONTRAST

- 11738 03 Hard x-ray gratings-based phase contrast imaging with a spectroscopic detector [11738-2]
- 11738 06 Concealed drug detection via fan beam coded-aperture x-ray diffraction imaging [11738-5]
- 11738 07 Design and analysis of a hybrid x-ray transmission and diffraction system [11738-6]

SESSION 2 ALGORITHMS

- 11738 0G Using basis material decomposition to correct for the non-linear response of photon-counting detectors in energy-resolved computed tomography [11738-15]

SESSION 3 NOVEL SYSTEMS

- 11738 0K HTPX: fast, automatic, low-cost x-ray bag screening for mass-casualty threats [11738-18]
- 11738 0L Parametric testing of explosives detection systems using synthetic data augmentation [11738-19]
- 11738 0M DICOS: part of the solution for an interoperable, open airport architecture [11738-20]
