World Environmental and Water Resources Congress 2021

Planning a Resilient Future along America's Freshwaters

Selected Papers from the World Environmental and Water Resources Congress 2021

Online
7 – 11 June 2021

Volume 1 of 2

Editors:

Lily A. Baldwin
Veera Gnaneswar Gude

ISBN: 978-1-7138-3124-2

Printed from e-media with permission by:

Curran Associates, Inc.

Contents

Desalination and Water Reuse Symposium

Effect of Hybridization of Nanofiltration and Reverse Osmosis Membrane on Inorganic Fouling Potential of Groundwater 1
Jahangeer Jahangeer, Manoj Chandra Garg, and Pinki Sharma

Desalination and Water Purification Analysis Using Modified Double-Slope Passive Solar Still 14
Suresh K. Patel, Sanjay Tewari, G. L. Devnani, Deepak Singh, and Dhananjay Singh

A Perspective from India on Treated Wastewater Reuse: Few Case Studies 31
Bhaskar Tatwawadi

Groundwater Symposium

Stream Depletion due to Cyclical Pumping 42
R. M. Neupauer and C. Turnadge

A Regional-Scale Non-Stationarity Based Framework in Unsaturated Zone Flow Modeling 52
Mohammad Karamouz, Hadi Meidani, and Davood Mahmoodzadeh

Hydraulics and Waterways

Investigating Modeling Strategies to Couple Inland Hydrology and Coastal Hydraulics to Better Understand Compound Flood Risk 64
Joseph L. Gutenson, Ahmad A. Tavakoly, T. Chris Massey, Gaurav Savant, Amanda S. Tritinger, Margaret B. Owensby, Mark D. Wahl, and Mohammad S. Islam

Simulation of Wave-Induced Along-Shore Current with Wave-Current Interaction 76
Yong G. Lai

Two-Dimensional Hydraulic Modeling for Bank Stabilization in the White River 86
Nabil Ghalayini

Retrospective Analysis of U.S. Hydraulic Bridge Collapse Sites to Assess HYRISK Performance 92
Fahmidah U. Ashraf and Madeleine M. Flint

Static Scour Features for Steady and Unsteady Jet Flows 106
Michele Palermo, Jessica Di Nardi, Fabián A. Bombardelli, and Stefano Pagliara

© ASCE

Use of Composite Material for Sector Gates and Vertical Lift Gates.....116
David Weston, George Chartouni, Larry Dalton, David Force, Jonathan Trovillion, Kiril Zumbulev, David Lovett, Dan Hawk, Gary Hipkins, Ian Vega, Jason Chapple, David Shiver, Corey Press, Malton Prifti, Alan Kennedy, Brooke Divan, Jeff Fallin, Rebecca Wilson, Rob Germann, and Rick McMillen

Flood Simulation and Assessment due to Dam Breaching of the Cherry Creek Reservoir, Colorado.....122
Emily Lai, Bryne Knowles, Scott Hogan, and Yong Lai

Influences of Boulder Placement on Stream Habitat Quality Metrics 134
Amir Golpira, Ryan Pierce, and Abul B. M. Baki

Investigation of Riverine Loading Impacts on the Lower Green Bay Hydrodynamic Regimes 145
Fuad Bin Nasir, Bahram Khazaei, and Hector R. Bravo

Assessing Flow Rate through a Lake Siphon System via Computational Flow Modeling 153
Md. Nowfel Mahmud Bhuyian, Nadim Reza, and David Blackwood

Coupled 1D and 2D HEC-RAS Floodplain Modeling of Pecos River in New Mexico 165
Ajay Kalra, Neekita Joshi, Sudip Baral, Sajjan Nhuchhen Pradhan, Mildred Mambepa, Swarupa Paudel, Chunjie Xia, and Ritu Gupta

Assessment of Floodplain Inundation Mapping of Davenport City in Iowa Using Civil Geo-HECRAS.....179
Ajay Kalra, Neekita Joshi, Indira Pokhrel, Sajjan Nhuchhen Pradhan, Pratima Adhikari, Chunjie Xia, and Ritu Gupta

Dam Breach Flood Inundation Modeling for Aripir Dam, Sindh, Pakistan.....193
Zarif Khero, Babar Naeem, and Ibrahim Samoo

Changing Middle Rio Grande Channel Conditions: Isleta to Rio Puerco 208
Drew C. Baird, Chun-Yao Yang, Kristin Laforge, Pierre Y. Julien, and Sydney Doidge

Hydro-Climate/Climate Change Symposium

Simulation of Water Balance Using CORDEX over a Large River Indian Basin.....222
Brij Kishor Pandey and Deepak Khare

Non-Stationary Regional Frequency Analysis for Sites with Trends in Maharashtra, India 231
Chingka Kalai, Arpita Mondal, Adam Griffin, and Elizabeth Stewart

© ASCE

Implication of Different Pipe-Sizing Strategies for the Resilience of Stormwater Networks 244
Sina Hesarkazzazi, Mohsen Hajibabaei, Kegong Diao, and Robert Sitzenfrei

On Modeling of Extreme Rainfall Processes over a Wide Range of Time Scales 253
Van-Thanh-Van Nguyen and Truong-Huy Nguyen

Irrigation and Drainage

Model-Based Upscaling of the IoT-Based Smart Rain Barrel—An Integrated Analysis of the Urban Water Cycle 262
Martin Oberascher, Carolina Kinzel, Wolfgang Rauch, and Robert Sitzenfrei

Analysis of Multi-Spectral Images Acquired by UAVs to Monitor Water Stress of Citrus Orchards in Sicily, Italy 270
David J. Peres and Antonino Cancelliere

A Numerical Model to Quantify Plant Water Intake 279
M. Fayzul K. Pasha, Alex Lundeen, Deepro F. Pasha, Dilruba Yeasmin, Nathan Nishikawa, and Guillermo Valenzuela

Performance of Non-Contact Flow Meters in Irrigation Canals and Surface Drains 286
Kyle Feist, Jack Evans, Zach Markow, and Stuart Styles

Testing of Pipeline Flow Measurement Devices under Various Operating Conditions 295
Sierra Layous, Stuart Styles, and Jack Evans

Stormwater Symposium

Assessment of SMP Performance under Future Climate Change 302
Morgan Flynn and Robert J. Ryan

Study the Performance of Various Stormwater Control Measures in a Single Full-Scale Low Impact Development (LID) Testbed under Changing Environments Using SWMM 314
Abtin Shahrokh Hamedani, Hanieh Soleimanifar, Michelle Barkley, Maya Abounasr, Cesar do Lago, Heather Shipley, and Marcio Giacomoni

Microplastics in Urban Stormwater: Sampling and Separation Method 324
Margaret A. Helms, Lydia Andraso, and Varun K. Kasaraneni

Unlocking Twitter and High-Resolution Radar Rainfall to Better Understand Urban Flooding Patterns and Extents 336
Tom Batroney

© ASCE

Urban Water Resources Research Council

Urban Pluvial Flood Risk Assessment: Challenges and Opportunities for Improvement Using a Community-Based Approach 350
Koorosh Azizi and Claudio I. Meier

Water Quality Modeling and Restoration

Impact of a Regulator Dam on the River Water Quality—Tigris River Case Study.....362
Massara Abbas, Iacopo Carnacina, and Rafid Alkhaddar

Experimental and Numerical Study of Salt Transport under Unstable Conditions 371
Kamal Mamoua, Ashok Pandit, and Howell H. Heck

Assessing Spatiotemporal Change in Land Cover and Total Dissolved Solids Concentration Using Remote Sensing Data.....384
Tahir Ali Shaikh, Sajjad Ahmad, and Haroon Stephen

Spatial Assessment of Overland Flow, Pollutant Concentration, and First Flush Using a 2D Non-Point Source Pollution and Hydrological Model for Urban Catchments 397
Marcus Nóbrega Gomes Jr., Marcio H. Giacomoni, Athanassios T. Papagiannakis, Eduardo Mario Mendiondo, and Fernando Dornelles

Potentiality of Using Environmental Value Engineering for Re-Evaluating the Quality and Performance of Infrastructure Elements through Building Mini Information System: A Real Project Study 414
Abeer El Shahawy and Gamal Abouelenean

Water, Wastewater, and Stormwater

Impact of Bioreactor Geometry on K_La Coefficient.....425
Rebecca G. Etter, Emilie R. Vanness, and Richard O. Mines Jr.

Hyperion BioEnergy Facility: Three and Half Years' Performance Data and Operations and Maintenance Challenges in City of Los Angeles, California 431
K. Majid Sadeghi, Octavio Murillo, Sheri Symons, Shahrouzeh Saneie, Hi Sang Kim, Michael Daycock, Christopher Kucherer, and Timeyin Dafeta

Using CFD Modelling as an Evaluation Tool in the Design of Jet Mixers 448
Vilas Sarsani and Amit Bathija

Management of Erosion and Sediment Carryover at a Large Construction Site.....461
Cagri Turan, Matt Carney, Mustafa Samad, and Kit Ng

© ASCE

Life-Cycle Assessment of Trenchless Cured-in-Place Pipe (CIPP) Renewal Method in Large Diameter Stormwater Drainage Conduits.....472
Ramtin Serajiantehrani, Mohammad Najafi, Vinayak Kaushal, and Mohammadreza Malek Mohammadi

Nutrient Removal in Small Wastewater Treatment Facilities: Design and Operation.....486
Raj Chavan and Kamrun Ahmadi

CFD Simulation of Air–Water Interactions in Rapidly Filling Horizontal Pipe with Entrapped Air 495
Biao Huang, Mengge Fan, Jiachun Liu, and David Z. Zhu

Numerical Study of Storm Geyser Mechanism in the Multi-Inlet System at Laboratory and Prototype Scale.....508
Jiachun Liu, Biao Huang, and David Z. Zhu

Fully Enclosed Wastewater Treatment Plants Require Special Design Considerations.....522
David J. Rigby

Watershed

Unit Hydrograph Peak Rate Factor Estimation for Houston Watersheds 535
Jonathan David D. Lasco, Francisco Olivera, and Hatim O. Sharif

Analysis and Modeling of Frozen Ground and Soil Temperature in North Dakota 545
Xavier Conzet, Isabella LaFavor, Mohamud Abdimuhsin, Ali Rashid Niaghi, and Mohsen Tahmasebi Nasab

Improvement of Lake and Reservoir Parameterization in the NOAA National Water Model.....552
Bahram Khazaei, Laura K. Read, Matthew Casali, Kevin M. Sampson, and David Yates

Parameter Sensitivity Analysis of the HSPF Model on a Pervious Landcover Dominated Watershed.....561
Preyanka Dey, Shuvashish Roy, Jejal Reddy Bathi, Anurag Mishra, Francesca Leasi, and A. K. M. Azad Hossain

Cyber-Physical Security of Urban Water Infrastructure

Performing Risk and Resilience Assessments of Urban Water Infrastructure and Developing Emergency Response Plans: Overview of the Process and Lessons Learned 575
Sanjay Tewari, Scott Thomas, Joseph McCroy, Pacia Diaz, and Stephen Baruch

© ASCE

Emerging and Innovative Technologies

Internet-Enabled Remotely Controlled Architecture to Release Water from Storage Units 586
Vivek Verma, Linlong Bian, Dogukan Ozecik, Surya Srikar Sirigineedi, and Arturo Leon

Carbon Footprint of Water Use in Industrial Expansion 593
Mohammad Karamouz and Mohammadreza Zare

Operational Reliability Assessment of a Remotely Controlled Siphon System for Draining Shallow Storage Ponds 607
Linlong Bian, Vivek Verma, Aditia Rojiali, Dogukan Ozecik, and Arturo S. Leon

A Tale of Process Intensification: Optimization to Achieve More Capacity and Lower Nutrient Limits 621
Raj Chavan and Charan Tanneru

Emerging Contaminants

Interpretation of the Risk Associated with Emerging Contaminants in the Aquatic Systems for BRICS Nations 628
Vaishali Choudhary and Ligy Philip

Spatial and Seasonal Variations of Disinfection Byproduct (DBP) Precursors in Relation with Total Organic Carbon (TOC) 644
Meena Ejjada, Daniel Gerrity, and Erica J. Marti

Energy Conservation and Management in the Water Industry

Energy Resilient Municipal Water and Wastewater Operations—A One Water System Review 655
S. Rao Chitikela

Environmental

A Novel Method for Environmental Risk Assessment: A Case Study of Coarse Particulate Matter and Infant Birth Weight 666
Nur H. Orak

Investigation of COVID-19 Lockdown Effects on Water Quality in Natural Bodies of Water in the Great Lakes Region 675
Sajad A. Hamidi, Baran Abbasi, and Helia Hamidi

Identifying Key Factors Affecting Harmful Algal Blooms in Western Lake Erie from the Perspective of Machine Learning 682
Jimmy Nguyen, Zesheng Chen, Veronika Meyer, and Dong Chen

© ASCE

Integrated Geomechanical and Fault Activation Modeling of the Wasia Reservoir: A Study Focused on Ground Uplift, Stability Analysis, and CO_2 Leakage.....694
Sikandar Khan, Y. A. Khulief, and A. A. Al-Shuhail

Salt Concentrations in Charleston City Parks.....708
Nandan H. Shetty and Aidan K. Puzzio

Growth Rates of Street Trees in Charleston, South Carolina.....714
Benjamin L. Kicklighter, Nandan Shetty, and Aidan K. Puzzio

Environmental and Water Resources Education and Outreach

Ethics, Ethics, and Ethics to All Professionals.....719
S. Rao Chitikela and William F. Ritter

Environmental Science and Engineering Research

Phycoremediation of Greywater Using *Chlorella vulgaris*.....734
S. Mohan and Manthapuri Vineeth

Eco-Hydrology and Hydraulics of Urban Watersheds—A Resilience Approach.....741
Kazi A. Tamaddun, Garrick E. Louis, Charles J. Vörösmarty, and Lawrence E. Band

Analysis of Suspended Material in Lake Mead Using Remote Sensing Indices.....754
Godson Ebenezer Adjovu, Sajjad Ahmad, and Haroon Stephen

Freshwater Systems and Ecology

Studying the Intra-Annual Variability in Surface Area and Volume of Salton Sea, California, Using Remote Sensing-Based Water Indices and GIS.....769
Usha Poudel, Sajjad Ahmad, and Haroon Stephen

History and Heritage: Wisconsin and Illinois History Symposium

The Jones Island Plant: ASCE's Only Wastewater Treatment National Historic Civil Engineering Landmark.....784
Cecil Lue-Hing, Kevin L. Shafer, and Jerry R. Rogers

History of the Lake Michigan Diversion.....796
W. H. Espey and Jeff Fuller

The Design and Construction of Canal du Midi, an ASCE IHCEL, in Southern France.....806
Georges Comair, Jerry Rogers, and William P. Bulloch

© ASCE

The First City Ditch: Colorado's Earliest Attempt at Hydraulic Engineering.....817
Cole Bedford

International Environmental and Water Resource Issues

A Holistic Approach for Designing Environmental Flows in the Lower Mekong Basin 829
Venkataramana Sridhar, Syed Azhar Ali, and Mitthan Lal Kansal

Hydrological Vulnerability Assessment of the Mekong River Impacted by Natural and Anthropogenic Changes.....840
Venkataramana Sridhar, Hyunwoo Kang, and Syed Azhar Ali

Equity in Designing a Summer International Research Experience: Recruitment and Partnerships for a Graduate Field School in El Salvador.....847
John S. Gierke, Luke J. Bowman, Emily Clark, Kari B. Henquinet, and Angie Carter

Sustainability

Life Cycle Assessment for Water Distribution System Decontamination Procedures: Fire Hydrants and Flushing Pond.....854
Darud E. Sheefa, Brian D. Barkdoll, and Robert M. Handler

How to Perform Life Cycle Assessment for Water Distribution Networks with Partly Unavailable Data 863
Mohsen Hajibabaei, Sina Hesarkazzazi, Mayara Lima, Florian Gschösser, and Robert Sitzenfrei

Assessing the Relationship between the Growth of Population and Crop Area with Depletion of Groundwater in Lower Bari Doab Canal 872
Binita Shrestha, Sajjad Ahmad, and Haroon Stephen

Developing Climate Adaptation Pathways with Communities Impacted by Sea-Level Rise and Industrial Development.....888
Oswald Jenewein and Michelle A. Hummel

Water Distribution Systems Analysis Symposium

A Complex Network Approach for Pareto-Optimal Design of Water Distribution Networks 901
Robert Sitzenfrei, Qi Wang, Zoran Kapelan, and Dragan Savić

Advanced Geometrical Analysis of Water Distribution Networks (WDNs): A Comparison between Standard and Minimum Capital-Cost Designs 914
Juan Carvajal, Andrés Ariza, and Juan Saldarriaga

© ASCE

Conceptualization to Development of a Decision Support Tool to Manage Building Water Quality 925
Md. Rasheduzzaman, Rajveer Singh, Lakshmi Annapoorna Madireddy, and Patrick L. Gurian

Inducing Transient Waves Interferences for Imitating Pressure Signature in Water Distribution Systems 937
M. Zeidan and A. Ostfeld

Employing Transient Wall Shear Stress for Biofilm Separation in Water Distribution Systems 943
M. Zeidan and A. Ostfeld

Considering COVID-19 Pandemic Reaction and Response Analogies in an Agent-Based Modelling Framework for Water Distribution System Contamination Response 951
Leonid Kadinski and Avi Ostfeld

Modeling the Influence of District Heating Systems on Drinking Water Temperatures in Domestic Drinking Water Systems within Domestic Properties 961
Bram Hillebrand and E. J. Mirjam Blokker

Spatiotemporal and Machine Learning-Based Time Series Assessment of Drinking Water Quality Complaints in New York City 969
Jarai Sanneh, Miah Cohall, Juneseok Lee, Yi Wang, Diego Martínez García, and Jonathan Keck

Using Graph Theory for Determining Grab Sampling Location in Real Time upon a Contamination Detection in Water Distribution System 980
Leonid Kadinski, Canilo Salcedo, Sengyub Lee, Dominic Boccelli, and Avi Ostfeld

Does the Decay Rate Matter in the Spread of Constituents in Water Distribution Systems? 986
Danielle C. Pilarski and Brian D. Barkdoll

Avoiding Pitfalls in Calibrating a Water Distribution System Model 992
Tom Walski

Water Connection Bursting and Leaks Prediction Using Machine Learning 1000
Cristiano Gonçalves Nascimento Gouveia and Alexandre Kepler Soares

CFPD Method for Consumption Pattern Changes Identification in a District Metering Area with Digital Water Meters 1014
Diogo Fidelis Costa and Alexandre Kepler Soares

A Leakage Detection System with an Efficient Prioritization at a District Meter Area Level 1023
Daniel Adanza Dopazo, Richard Everson, Sarah Rogerson, Raziyeh Farmani, and Savic Dragan

© ASCE

Water Leakage Detection Using Neural Networks 1033
Shreya Sabu, Gnanamanikam Mahinthakumar, Ranji Ranjithan, James Levis, and Downey Brill

Improving Electricity Conservation in Small-Medium Municipal Water Distribution Systems in Ontario, Canada.....1041
Rebecca Dziedzic

Impact of WDS Hydraulics on Its Energy Consumption.....1046
M. Fayzul K. Pasha, Alex Lundeen, Matthew Weathers, and Brennan Smith

Water Resources Planning and Management

Estimate of Long-Term Water Availability for a Reservoir in Texas Using a Markov Chain Monte Carlo Method with Paleo Drought and Trend Consideration 1055
John Zhu, P. G. Nelun Fernando, and Carla G. Guthrie

Design and Operation of Agricultural Water Distribution Systems as Hard and Soft Climate Change Adaptation Strategy.....1069
Mengning Qiu, Meghna Babbar-Sebens, and Avi Ostfeld

Asset Management Based Flood Resiliency of Water Infrastructure.....1081
Mohammad Karamouz and Mohammad Movahhed

Impacts of the COVID-19 Pandemic on the Brazilian Hydrothermal System 1092
Sylvia C. P. Lima, Renato C. Zambon, Mario T. L. Barros, and William W.-G. Yeh

Permeable Pavement Hydrological Model to Assess the Long-Term Efficiency of Maintenance Using High-Resolution Temperature and Rainfall Data 1103
Marcus Nóbrega Gomes Jr., Eduardo Mario Mendiondo, Fernando Dornelles, Athanassios T. Papagiannakis, and Marcio H. Giacomoni

A Feasibility Study on Harvesting Rainwater from Large Solar Panel Canopies to Supplement Makeup Water for Cooling Towers by Using Remotely Controlled and Self-Cleaning Rain Cistern 1118
Linlong Bian, Vivek Verma, Jianwei Li, Sumit R. Zanje, Alexis Vento, Ligia Filgueiras, Dogukan Ozecik, Arturo S. Leon, Biayna Bogosian, and Stuart Grant
