

13th International Conference on Solar Energy for Buildings and Industry (EuroSun2020)

Online

1 – 3 September 2020

Volume 1 of 2

ISBN: 978-1-7138-3494-6

Printed from e-media with permission by:

Curran Associates, Inc.

Editorial

Editorial

Charalambides, A.G. 1

01. Solar Buildings

Integrated Daylight and Energy Evaluation of Passive Solar Shadings in a Nordic Climate

Czachura, A.3

Development of Indexes for the Form and Layout Design of Urban Residential Settlements in the West Plateau Region of China

Liu, Y.12

Numerical Analysis of Solar Radiation Effects At Indoors with Internal Partitions and External Solar Shades

Yelekci, A.C.21

Impact of Non-Residential Load Profiles on the Grid-Integration of Building Integrated Photovoltaic (bipv) Systems in Two Different Climate Conditions

Poormohammadi, F.32

The Application of Solar Envelope Zoning for the Enhancement of Solar Access in a Densely Populated Neighborhood

Hasan, J.40

Study of the Influence of the Vertical/Horizontal Series Connections on the Photovoltaic Power Generation Potential on Building's Facades

Govehovitch, B.52

Validation process of a multifunctional and autonomous solar window block for residential buildings retrofit

Minguez, L.62

The role of renewable energy technologies in the energy renovation of residential buildings

Dipasquale, C.74

Facade Integrated PV system uptake in Non-domestic Buildings: A Sensitivity Analysis of Multi-criteria Performance Analysis

Weerasinghe, N.84

OPV-Façades – Students design concepts of multi-functional solar façades

Krippner, R.96

Cleanvelope – Students concepts of refurbishment with solar energy and façade greening

Krippner, R.108

Evaluating the solar potential of rooftops on campus San Joaquín, Santiago - Chile using opensource GIS

García, R.120

Cooling Potential of Solar-Ice Systems in Multi-Family Buildings

Carbonell, D.129

Solar Steel Sandwich Panels for Industrial and Commercial Buildings: System Simulations and Potential Analysis

Weiland, F.139

02. Solar Assisted District Heating and Cooling

German Cities Towards 100 % Renewable Energy Heat Hub Hennigsdorf

Berberich, M.150

Designing District Heating Systems for an Improved Economic Efficiency: A Case Study of a Renewable Rural District Heating Network

Zipplies, J.161

EnRSim - A simple calculation tool for renewable based heating networks plant

Lamaison, N.171

Smart Urban Energy Concept: Integration of Heat Pumps, PV, Cogeneration, and District Heating in existing Multi-Family Buildings

Lämmle, M.183

Using existing infrastructure to transform urban district heating systems to renewable energy supply

Trabert, U.188

Measurement Results of a District Heating System with Decentralized Incorporated Solar Thermal Energy for an Energy, Cost Effective and Electricity Grid Favourable Intermitting Operation

Lämmle, M.200

Analysis of Heat Pumps Operated by Solar Photovoltaic Systems for District Heating Systems in Lithuania

Valancius, R.211

Solar Cooling for the Sunbelt Regions – a new IEA SHC Task

Neyer, D.219

Desiccant Based Evaporative Air Condition System for Hot and Humid Climate

Abd ur Rehman, H.M.227

Renewable-Energy-Driven Heat Pumps for Districts to Reduce Primary Energy Demand

Schneider, E.234

03. Solar Heat for Industrial Processes

Assessment of Process Heating and Cooling Potential for Solar System Installation at Typical Industries in Ethiopia

Hiben, Y.G.244

Real-Time Multiobjective Optimization in Solar Membrane Distillation Processes

Gil, J.D.254

A Novel Effluent Evaporation System for Industrial Applications

Saini, P.266

Performance Enhancement of a Chimney Operated Passive Solar Dryer

Gebremicheal, G.H.278

Hybrid Solar Heat Generation Modelling and Cases

Kurup, P.286

Industrial Turbo-Assisted Direct Solar Air Heater Using Linear Fresnel Concentrating Collectors

Famiglietti, A.300

Cost Reduction by Combining Solar Thermal Technologies for a Dispatchable Steam Generation

Ürlings, N.310

Integrated Platform for Rooftop Installations of Fresnel Collectors for Solar Process Heat Generation

Burger, A.318

Decarbonization of industrial processes: technologies, applications and perspectives of low-temperature solar heat (80-150°C)

Bartali, R.327

Billy Solar: Scalable and Cost-Effective Solar Heating Units for Industry

Rittmann-Frank, M.340

Water Sludge Drying: modelling of solar thermal plant for solar vacuum dryer

Bartali, R.345

04. Domestic Hot Water and Space Heating

Photovoltaic heat pump system for renovated buildings - measures for increased efficiency

Heinz, A.354

Fault Detection for Solar Thermal Systems - Overall System Evaluation or Component-Oriented Approach

Schmelzer, C.366

A Parametric Study on the Feasibility of Solar-thermal Space Heating and Hot Water Preparation under Cold Climates in Central Asian Rural Areas

Mehta, K.374

Impact of Locally Available Thermal Insulation Structures on Space Heating Demand of High-altitude Rural Buildings: A Case Study of Kyrgyzstan

Mehta, K.386

Design and Monitoring of a Solar Thermal, PV and Heat Pump System

Dermentzis, G.398

Parameter study of four different instantaneous water heaters in a solar assisted multi-family-house with TRNSYS

Pärisch, P.408

Four Innovative Solar Coupled Heat Pump Solutions for Building Heating and Cooling

Chèze, D.419

Modelling of Inverter Heat Pumps in TRNSYS

Hüsing, F.431

05. PV and PVT Systems for Buildings and Industry

Innovative Coupling of PVT Collectors with Electric-Driven Heat Pumps for Sustainable Buildings

Kosmadakis, G.440

Performance assessment of an LCPV/T solar hybrid plant for a wellness center building in Mexico

Acosta, I.452

Assessing the Long-Term Performance Degradation of PV Modules in the Sub-Saharan Environment

Atsu, D.460

Digital mapping of techno-economic performance of a water-based solar photovoltaic/thermal (PVT) system for buildings over large geographical cities

Penaka, S.R.470

Photovoltaic Self-Consumption in Electric Vehicle Charging Stations

Alcover Comas, J.E.484

Performance Evaluation of a Hybrid PVT Solar Installation with Phase Change Material

Simón-Allué, R.496

Design Concepts for a Spectral Splitting CPVT Receiver

Resch, A.508

The Concept of Zero-Emission Cooling

Resch, A.520

Mathematical Modelling of Power to heat Strategies to support Sector Coupling

Daborer-Prado, N.530

Solar Assisted Heat Pump Systems Based on Hybrid PVT Collectors for the Provision of Hot Water, Cooling and Electricity in Buildings

Herrando, M.540

High Market Potential Applications for PVT with Heat Pumps

Sommerfeldt, N.551

PV power operation of a solar driven cooling compressor cluster - Battery charging level controlled PV electric energy self-consumption

Omlin, L.558

Model Validation and Performance Assessment of Unglazed Photovoltaic-Thermal Collectors with Heat Pump Systems

Chhugani, B.564

The European Commission Policy towards the Key Enabling Technology in Photovoltaics - the Perovskite Solar Cell and its Urban Applications Potential for Buildings

Rzdkowska, A.576

An innovative plant integrating PVT and geothermal reversible heat pump for heating and cooling in residential applications

Pellegrini, M.586

An Optimization Approach to Control the Energy Flows in Renewable Energy Communities

Steinmaurer, G. **594**

06. Solar Thermal Collectors and Solar Loop Components

Combining Radiative Collector and Emitter with Compression Heat Pump: Numerical Analysis

Medrano, M.604

Transmittance analysis for materials suitable as radiative cooling windshield and aging study for polyethylene

Medrano, M.611

Experimental Study of a Combined Solar Heating and Radiative Cooling Device with an Adaptive Cover

Medrano, M.620

Optimal Characteristics of an Adaptive Windshield for a Solar Collector and Radiative Cooling Combined System

Medrano, M.630

Energy Assessment of Façade-Integrated Solar Thermal Collectors in Multi-floor Buildings

Bonato, P.638

Experimental evaluation of stagnation-safe flat plate collectors with heat pipes for domestic hot water preparation in thermosiphon systems

Schiebler, B.647

Electrodeposited and Sputtered Selective Coatings for Solar-to-Thermal Energy Conversion

Lizama-Tzec, F.I.655

Optimized Design of the Insulating Gas Layer in Solar Thermal Collectors

Leibbrandt, P.664

Micro-Mirror Concentrator System

Panagopoulos, O.669

07. Thermal Storage

Experimental Analysis of Latent Thermal Energy Storage Charging and Discharging

Kirincic, M.678

Exergetic performance of medium temperature metallic solder based cascaded PCM thermal energy storage systems during charging

Mawire, A.687

Packed-bed Thermocline Testing Facility with Air as HTF for Sensible Thermal Energy Storage

Alonso, E.695

Thermodynamic Analysis of a Cascaded Latent Heat Store in a Pumped Thermal Electricity Storage System

Zhao, Y.706

Comparative Study of Phase Change Material Characterization Methods

Thonon, M.717

Advances in Modeling and Evaluation of Large-Scale Hot Water Tanks and Pits in Renewable-Based District Heating

Dahash, A.728

A Combi Storage for Combination with Heat Pumps - From Simulations to the Test Bench Results

Haberl, R.740

Thermal Energy storage capacity on different types of zeolites

López Moreno, H.750

A Novel State of Charge Sensor Concept for Thermochemical Heat Storage

Kirchsteiger, H.756

Assessing the Long-Term Stability of Fatty Acids for Latent Heat Storage by Studying their Thermal Degradation Kinetics

Bayon, R.763

Desorption characteristics of a lab-scale tube-bundle heat and mass transfer unit

Daguenet, X.774

08. Testing & Certification

Soiling Effect in a Central Receiver Solar Plant under Real Outdoor Conditions

Gonzalez-Aguilar, J.783

A New Facility for Testing Line-Focus Concentrating Solar Collectors for Process Heat Applications

Domínguez-López, L.M.792

Overview on European Standards and Certification Issues for Solar Thermal Systems

Drosou, V.800

09. Solar Resource and Energy Meteorology

Radiative Cooling Potential Maps for Spain

Medrano, M.811

Photosynthetically Active Radiation Monitoring Network in Spain

Navarro, A.A.820

Evaluation of weather conditions in urban climate studies over different Madrid neighbourhoods: Influence of urban morphologies on the microclimate

López Moreno, H.826

Solar Irradiance (Global, Direct and Diffuse) Quality Control Methodologies Review: Application to Time Series Measured At LES/LNEG, Lisboa, Portugal

P. Cardoso, J.838

10. Solar Education

The challenges of Solar Energy in Saudi Arabia and The Desert Areas

Alamro, R.850

11. Renewable Energy Strategies, Policies, Scientists for Future

Concentrating Solar Thermal Systems in Greece: Current Status and Future Potential

Drosou, V.856

Lithuanian Photovoltaic Market between 2010 and 2020, European Background, Current State and Development Perspective

Valancius, R.866

How the European Commission Policy Supports Research and Development in Photovoltaics

Rzdkowska, A.872

12. Renewable Energy Solutions for Isolated Systems (i.e. Islands)

Experimental Evaluation of Low-Temperature Organic Rankine Cycle (orc) Engine Coupled with Concentrating PVT System

Golonis, C.881

Sustainable Siting of Offshore Wind Farms for an Isolated Island System

Gkeka-Serpetsidaki, P.892

Layout of island power supply based on multi-decadal meteorological sets - discussed using the case of the Faroe Islands power system

Beyer, H.902

Comparative Analysis of Hybrid Renewable Energy Systems Simulation Tools

Triantafyllou, P.909

Solar Sorption System for Extraction of Water from Desert Air Operated in Real Environment

Matu_ka, T.921

Solar Organic Rankine Cycle coupled with Reverse Osmosis and mebrane distillation towards minimizing brine discharge

Ntavou, E.926

PV-based Integrated Energy and Water Demand Fulfillment Solution for Very Small Islands

Dedes, S.937

13. Renewable Energy Systems and Spatial Energy Planning

Design and Performance of Landscape Adaptable PV Structures <i>Hachem-Vermette, C.</i>	950
Mapping Priority Energy Intervention Areas in Birmingham (UK) <i>López Moreno, H.</i>	962
A Flexible GIS-based Computational Framework for the Early Design of District Energy Networks <i>Peronato, G.</i>	974
Tyrol 2050 – Scenarios of a Fossil-Free Future <i>Streicher, W.</i>	984
