2021 IEEE International Conference on Web Services (ICWS 2021)

Virtual Conference
5 – 11 September 2021
2021 IEEE International Conference on Web Services (ICWS)

ICWS 2021

Table of Contents

Message from the Steering Committee Chair ................................................................. xviii
Message from Congress General Chairs ....................................................................... xix
Message from the ICWS 2021 Chairs ............................................................................. xx
Organizing Committee .................................................................................................... xxi
Program Committee ...................................................................................................... xxiii
Reviewers ....................................................................................................................... xxvii
Message from the ISASSE Symposium Chairs ............................................................. xxxii
Message from the QSAS Symposium Chairs ............................................................... xxxiii
In Memoriam: Professor Mikio Aoyama ........................................................................ xxxiv

ICWS Papers

Invited Paper I

Hybrid Quantum Applications Need Two Orchestrations in Superposition: A Software Architecture Perspective .................................................................................................................. 1
Benjamin Weder (University of Stuttgart, Germany), Johanna Barzen (University of Stuttgart, Germany), Frank Leymann (University of Stuttgart, Germany), and Michael Zimmermann (University of Stuttgart, Germany)

Services for Zero Trust Architectures — A Research Roadmap ..................................... 14
Elisa Bertino (Purdue University, USA) and Kenneth Brancik (Cybersecurity Consultant)

SLO Script: A Novel Language for Implementing Complex Cloud-Native Elasticity-Driven SLOs .................................................................................................................. 21
Thomas Pusztai (Distributed Systems Group, TU Wien, Austria), Andrea Morichetta (Distributed Systems Group, TU Wien, Austria), Victor Casamayor Pujol (Distributed Systems Group, TU Wien, Austria), Schahram Dustdar (Distributed Systems Group, TU Wien, Austria), Stefan Nastic (Reinvent Labs GmbH, Austria), Xiaoning Ding (Futurewei Technologies, Inc., USA), Deepak Vij (Futurewei Technologies, Inc., USA), and Ying Xiong (Futurewei Technologies, Inc., USA)
Invited Paper II

A Uniform Quantum Computing Model Based on Virtual Quantum Processors ........................................... 32
Georg Gesek (QMware AG, Switzerland)

Crowd-Powered Hybrid Classification Services: Calibration is all you Need ................................................. 42
Burcu Sayin (University of Trento, Italy), Evgeny Krivosheev (University of Trento, Italy), Jorge Ramirez (University of Trento, Italy), Fabio Casati (University of Trento, Italy), Ekaterina Taran (Tomsk Polytechnic University, Russia), Verinika Malanina (Tomsk Polytechnic University, Russia), and Jie Yang (TU Delft, Netherlands)

Deserv: Decentralized Serverless Computing ........................................................................................................ 51
Samuel H. Christie V (Lancaster University, UK), Amit K. Chopra (Lancaster University, UK), and Munindar P. Singh (North Carolina State University, USA)

Services Composition I

R-CASS: Using Algorithm Selection for Self-Adaptive Service Oriented Systems ............................................. 61
Niranjana Deshpande (Rochester Institute of Technology, USA), Naveen Sharma (Rochester Institute of Technology, USA), Qi Yu (Rochester Institute of Technology, USA), and Daniel Krutz (Rochester Institute of Technology, USA)

Towards an Adaptive Curation Services Composition Based on Machine Learning .................................... 73
Firas Zouari (University Jean Moulin Lyon 3, France), Chirine Ghedira-Guegan (University Jean Moulin Lyon 3, France), Nadia Kabachi (University Claude-Bernard Lyon 1, France), and Khouloud Boukadi (University of Sfax, Tunisia)

Services Discovery, Selection and Recommendation I

TWLR: A Novel Truth Inference Approach Based on Worker Representations for Crowdsourcing in the Low Redundancy Situation ............................................................ 79
Qianli Xing (Macquarie University, Australia), Weiliang Zhao (Macquarie University, Australia), Jian Yang (Macquarie University, Australia, Dong Hua University, China), Jia Wu (Macquarie University, Australia), and Qi Wang (Macquarie University, Australia)

SRaSLR: A Novel Social Relation Aware Service Label Recommendation Model ........................................... 87
Yeqi Zhu (Harbin Institute of Technology, China), Mingyi Liu (Harbin Institute of Technology, China), Zhiying Tu (Harbin Institute of Technology (Weihai)), Tonghua Su (Harbin Institute of Technology, China), and Zhongjie Wang (Harbin Institute of Technology, China)

ServeNet-LT: A Normalized Multi-head Deep Neural Network for Long-Tailed Web Services Classification .............................................................. 97
Jing Zhang (Beihang University, China), Yang Chen (Beihang University, China), Yilong Yang (Beihang University, China, State Key Laboratory of Software Development Environment, China), Changran Lei (Beihang University, China), and Deqiang Wang (Beihang University, China)
Services Discovery, Selection and Recommendation II

Intention-Oriented Hierarchical Bundle Recommendation with Preference Transfer ........................................... 107
Meng Tan (Soochow University, China), Wei Chen (Soochow University, China), Weiqing Wang (Monash University, Australia), An Liu (Soochow University, China), and Lei Zhao (Soochow University, China)

Sequence and Distance Aware Transformer for Recommendation Systems .......................................................... 117
Runqiang Zang (Renmin University of China, China), Meiyun Zuo (Renmin University of China, China), Jilei Zhou (Renmin University of China, China), Yining Xue (Renmin University of China, China), and Keman Huang (Renmin University of China, China)

Time-Aware User Modeling with Check-in Time Prediction for Next POI Recommendation .......................... 125
Xin Wang (Wuhan University, Wuhan, China), Xiao Liu (Deakin University, Geelong, Australia), Li Li (Monash University, Melbourne, Australia), Xiao Chen (Monash University, Melbourne, Australia), Jin Liu (Wuhan University, Wuhan, China), and Hao Wu (Yunnan University, Kunming, China)

Services Discovery, Selection and Recommendation III

WSGCN4SLP: Weighted Signed Graph Convolutional Network for Service Link Prediction .................. 135
Yong Xiao (Hunan University of Science and Technology, China), Guosheng Kang (Hunan University of Science and Technology, China), Jianxun Liu (Hunan University of Science and Technology, China), and Linghang Ding (Hunan University of Science and Technology, China)

MatTrip: Multi-Functional Attention-Based Neural Network for Semantic Travel Route Recommendation ................................................................................................................. 145
Chenxiao Yang (Shanghai Jiao Tong University, China), Jiale Zhang (Shanghai Jiao Tong University, China), Xiaofeng Gao (Shanghai Jiao Tong University, China), and Guihai Chen (Shanghai Jiao Tong University, China)

To Wait or To Buy: A Recommendation Service for Airline Ticket Purchase Timing ............................. 155
Jian Cao (Shanghai Jiaotong University, China) and Yuchang Xu (Shanghai Jiaotong University, China)

Services Discovery, Selection and Recommendation IV

WorP: A Novel Worker Performance Prediction Model for General Tasks on Crowdsourcing Platforms ........................................................................................................... 161
Qianli Xing (Macquarie University, Australia), Weiliang Zhao (Macquarie University, Australia), Jian Yang (Macquarie University, Australia), Dong Hua University, China), Jia Wu (Macquarie University, Australia), and Qi Wang (Macquarie University, Australia)

Relational Graph Neural Network with Neighbor Interactions for Bundle Recommendation Service ................................................................................................................ 167
Xin Wang (Wuhan University, China), Xiao Liu (Deakin University, Australia), Jin Liu (Wuhan University, China), and Hao Wu (Yunnan University, China)
Alleviating the Matthew Effect in O2O Service Matching Process .................................................. 173
Yuying Yang (Tianjin University, China), Xiao Xue (Tianjin University, China), Fozhi Hou (Tianjin University, China), Shizhan Chen (Tianjin University, China), Zhiyong Feng (Tianjin University, China), and Lejun Zhang (Yangzhou University, China)

Services Discovery, Selection and Recommendation V

Heterogeneous Graph Attention Network-Enhanced Web Service Classification .......................... 179
Mi Peng (Hunan University of Science and Technology, China), Buqing Cao (Hunan University of Science and Technology, China), Junjie Chen (Hunan University of Science and Technology, China), Guosheng Kang (Hunan University of Science and Technology, China), Jianxun Liu (Hunan University of Science and Technology, China), and Yiping Wen (Hunan University of Science and Technology, China)

Transfer Learning for Web Services Classification ........................................................................ 185
Yilong Yang (Beihang University, China), Zhaotian Li (Beihang University, China), Jinqing Zhang (Beihang University, China), and Yang Chen (Beihang University, China)

Proactive Composition of Mobile IoT Energy Services ................................................................. 192
Abdallah Lakhdari (The University of Sydney, Australia) and Athman Bouguettaya (The University of Sydney, Australia)

Service Applications beyond the Web I

NETR-Tree: An Efficient Framework for Social-Based Time-Aware Spatial Keyword Query .......... 198
Xiuqi Huang (Shanghai Jiao Tong University, China), Yuanning Gao (Shanghai Jiao Tong University, China), Xiaofeng Gao (Shanghai Jiao Tong University, China), and Guihai Chen (Shanghai Jiao Tong University, China)

CUBIST: High-Quality 360-Degree Video Streaming Services via Tile-Based Edge Caching and FoV-Adaptive Prefetching ................................................................. 208
Dongbiao He (Tsinghua University, China, Sangfor Inc, China), Jinlei Jiang (Tsinghua University, China, Research Institute of Tsinghua University in Shenzhen, China), Teng Ma (Tsinghua University, China, Alibaba Inc., China), Guangfei Yang (Tsinghua University, China), Cedric Westphal (Futurewei Technologies, Inc., USA), JJ Garcia-Luna-Aceves (University of California, Santa Cruz, USA), and Shu-Tao Xia (Tsinghua University, China)

Energy-Effective IoT Services in Balanced Edge-Cloud Collaboration Systems ............................. 219
Zhengzhe Xiang (Zhejiang University City College, China), Shuiguan Deng (Zhejiang University, China), Yuhang Zheng (Zhejiang University, China), Dongjing Wang (Hangzhou Dianzi University, China), Javid Tehari (Karlstad University, Sweden), and Zengwei Zheng (Zhejiang University City College, China)
Service Applications beyond the Web II

Provider-Centric Allocation of Drone Swarm Services .................................................. 230
Balsam Alkouz (The University of Sydney, Australia) and Athman Bouguettaya (The University of Sydney, Australia)

SiaSL: A Siamese Neural Network for Service Level Prediction .................................. 240
Chenyu Hou (Zhejiang University of Technology, China) and Bin Cao (Zhejiang University of Technology, China)

An API Learning Service for Inexperienced Developers Based on API Knowledge Graph ........ 251
Hang Yin (Peking University, China), Yuanhao Zheng (Peking University, China), Yanchun Sun (Peking University, China), and Gang Huang (Peking University, China)

Service Applications beyond the Web III

CONFECT: Computation Offloading for Tasks with Hard / Soft Deadlines in Edge Computing ..... 262
Xin He (Nanjing University, China), Jiaqi Zheng (Nanjing University, China), Qiang He (Swinburne University of Technology, Australia), Haipeng Dai (Nanjing University, China), Bowen Liu (Nanjing University, China), Wanchun Dou (Nanjing University, China), and Guihai Chen (Nanjing University, China)

Optimal User Migration upon Server Failures in Edge Computing Environment .................. 272
Wei Du (Wuhan University of Technology, China), Qiang He (Swinburne University of Technology, Australia), Yuan Ji (Wuhan University of Technology, China), Chenran Cai (Wuhan University of Technology, China), and Xiaoyong Zhao (Wuhan University of Technology, China)

Lightweight and Context-Aware Modeling of Microservice-Based Internet of Things .............. 282
Zhen Wang (University of Science and Technology Beijing, China), Chang-ai Sun (University of Science and Technology Beijing, China), and Marco Aiello (University of Stuttgart, Germany)

Service Applications beyond the Web IV

Mixed Priority Queue Scheduling Based on Spectral Clustering in Spatial Crowdsourcing ........ 293
Yue Ma (Shanghai Jiao Tong University, China), Runbo Ni (Shanghai Jiao Tong University, China), Xiaofeng Gao (Shanghai Jiao Tong University, China), and Guihai Chen (Shanghai Jiao Tong University, China)

Conflict Detection in IoT-Based Smart Homes ..................................................................... 303
Bing Huang (The University of Sydney, Australia), Hai Dong (RMIT University, Australia), and Athman Bouguettaya (The University of Sydney, Australia)

GHTRec: A Personalized Service to Recommend GitHub Trending Repositories for Developers .... 314
Yuqi Zhou (Peking University), Jiawei Wu (Key Laboratory of High Confidence Software Technologies, Ministry of Education, Peking University), and Yanchun Sun (Key Laboratory of High Confidence Software Technologies, Ministry of Education, Peking University)
Service Applications beyond the Web V

QoE-Aware Data Caching Optimization with Budget in Edge Computing .......................... 324
Ying Liu (Northeastern University, China), Yuzheng Han (Northeastern University, China), Ao Zhang (Northeastern University, China), Xiaoyu Xia (Deakin University, Australia), Feifei Chen (Deakin University, Australia), Mingwei Zhang (Northeastern University, China), and Qiang He (Swinburne University of Technology, Australia)

DGPF: A Dialogue Goal Planning Framework for Cognitive Service Conversational Bot ........ 335
Bolin Zhang (Harbin Institute of Technology, China), Zhiying Tu (Harbin Institute of Technology, China), Yangqin Jiang (Harbin Institute of Technology, China), Shufan He (Harbin Institute of Technology, China), Guoqing Chao (Harbin Institute of Technology, China), Dianhui Chu (Harbin Institute of Technology, China), and Xiaofei Xu (Harbin Institute of Technology, China)

Game Theory-Based Task Offloading and Resource Allocation for Vehicular Networks in Edge-Cloud Computing ........................................................................................................ 341
Qinting Jiang (Nanjing University of Information Science and Technology, China), Xiaolong Xu (Nanjing University of Information Science and Technology, China; Soochow University, China), Qiang He (Swinburne University of Technology, Australia), Xuyun Zhang (Macquarie University, Australia), Fei Dai (Southwest Forestry University, China), Lianyong Qi (Qufu Normal University, China), and Wanchun Dou (Nanjing University, China)

Semantic Services I

Dealing with Label Uncertainty in Web Service Anti-Patterns Detection using a Possibilistic Evolutionary Approach ................................................................. 347
Sofien Boutaib (University of Tunis, Tunisia), Maha Elarbi (University of Tunis, ISG, Tunisia), Slim Bechikh (University of Tunis, ISG, Tunisia), Mohamed Makhlouf (Kedge Business School, France), and Lamjed Ben Said (University of Tunis, Tunisia)

Combining Label-Wise Attention and Adversarial Training for Tag Prediction of Web Services ...... 358
Qunbo Wang (Beihang University, China), Wenjun Wu (Beihang University, China), Yongchi Zhao (Beihang University, China), Yuzhang Zhuang (Beihang University, China), and Yanni Wang (Capital University of Physical Education And Sports, China)

A Generic Method to Rapidly Release Internet Services on Commercial Platforms ....................... 364
Xinyue Zhou (Tianjin University, China), Zhiyong Feng (Tianjin University, China), Jianmao Xiao (Tianjin University, China), Shizhan Chen (Tianjin University, China), Xiao Xue (Tianjin University, China), and Hongyue Wu (Tianjin University, China)
Services Composition II

Service Composition Considering QoS Fluctuations and Anchoring Cost ............................................. 370
Haomai Shi (Harbin Institute of Technology, China), Hanchuan Xu (Harbin Institute of Technology, China), Xiaofei Xu (Harbin Institute of Technology, China), and Zhongjie Wang (Harbin Institute of Technology, China)

CTL-Based Dynamic IoT Service Composition ........................................................................................ 381
Deng Zhao (China University of Geosciences (Beijing), China), Zhangbing Zhou (China University of Geosciences (Beijing), TELECOM SudParis, France), Xiao Xue (Tianjin University, China), Zhuofeng Zhao (Beijing Key Laboratory on Integration and Analysis of Large-scale Stream Data, China), Walid Gaaloul (TELECOM SudParis, France), and Wenbo Zhang (Chinese Academy of Sciences, China)

Data & Computation-Intensive Service Re-Scheduling In Edge Networks ............................................. 389
Xiaocui Li (China University of Geosciences, China), Zhangbing Zhou (China University of Geosciences, China, TELECOM SudParis, France), Zhuofeng Zhao (Beijing Key Laboratory on Integration and Analysis of Large-scale Stream Data, China), Sami Yangui (LAAS-CNRS Universite de Toulouse INSA, France), and Wenbo Zhang (Institute of Software, Chinese Academy of Sciences, China)

Services Composition III

Service Recommendation for Composition Creation Based on Collaborative Attention Convolutional Network .......................................................... 397
Ruyu Yan (Tsinghua University, USA), Yushun Fan (Tsinghua University, USA), Jia Zhang (Southern Methodist University, USA), Junqi Zhang (Tsinghua University, USA), and Haozhe Lin (Tsinghua University, USA)

Alliance-Aware Service Composition with Efficient Matching Search ................................................. 406
Yanmei Zhang (Central University of Finance and Economics, China), Chong Zhu (Central University of Finance and Economics, China), Xiaoyi Tang (Central University of Finance and Economics, China), Hengyue Jia (Central University of Finance and Economics, China), and Xiuli Wang (Central University of Finance and Economics, China)

COPA: A Combined Autoscaling Method for Kubernetes ...................................................................... 416
Zhijun Ding (Tongji University, China) and Qichen Huang (Tongji University, China)

Services QoS Management I

An Efficient Algorithm for Service Function Chains Reconfiguration in Mobile Edge Cloud Networks .......................................................... 426
Biyi Li (Beijing University of Posts and Telecommunications, China), Bo Cheng (Beijing University of Posts and Telecommunications, China), and Junliang Chen (Beijing University of Posts and Telecommunications, China)
Sieve: Attention-Based Sampling of End-to-End Trace Data in Distributed Microservice Systems ........................................... 436
Zicheng Huang (SUN YAT-SEN University, China), Pengfei Chen (SUN YAT-SEN University, China), Guangba Yu (SUN YAT-SEN University, China), Hongyang Chen (SUN YAT-SEN University, China), and Zibin Zheng (SUN YAT-SEN University, China)

User Allocation in Mobile Edge Computing: A Deep Reinforcement Learning Approach .......... 447
Arani Bhattacharya (IIIT-Delhi, India), Subrat Prasad Panda (Indian Statistical Institute, India), and Ansuman Banerjee (Indian Statistical Institute, India)

Services QoS Management II

LETO: An Efficient Load Balanced Strategy for Task Offloading in IoT-Fog Systems .................. 459
Chittaranjan Swain (National Institute of Technology, India), Manmath Narayan Sahoo (National Institute of Technology, India), and Anurag Satpathy (National Institute of Technology, India)

QoA4ML – A Framework for Supporting Contracts in Machine Learning Services .................. 465
Hong-Linh Truong (Aalto University, Finland) and Tri-Minh Nguyen (Aalto University, Finland)

QoS-Based Trust Evaluation for Data Services as a Black Box ................................................. 476
Senda Romdhani (Univ. of Lyon, CNRS, Univ. of Lyon 3, France), Genoveva Vargas-Solar (CNRS, LIRIS, France), Nadia Bennani (Univ. of Lyon, CNRS, INSA-Lyon, LIRIS, France), and Chirine Ghedira-Guegan (Univ. of Lyon, CNRS, iaelyon - Univ. of Lyon 3, LIRIS, France)

Services Security, Privacy and Trust I

An Assurance-Based Risk Management Framework for Distributed Systems .......................... 482
Marco Anisetti (Università degli Studi di Milano, Italy), Claudio Agostino Ardagna (Università degli Studi di Milano, Italy), Nicola Bena (Università degli Studi di Milano, Italy), and Andrea Foppiani (Technology Governance Risk and Control, Cargill Inc., Italy)

PRADA-TF: Privacy-Diversity-Aware Online Team Formation ................................................... 493
Yash Mahajan (Virginia Tech) and Jin-Hee Cho (Virginia Tech, USA)

An Edge Based Federated Learning Framework for Person Re-Identification in UAV Delivery Service .............................................................. 500
Chong Zhang (Deakin University, Australia), Xiao Liu (Deakin University, Australia), Jia Xu (Anhui University, China), Tianxiang Chen (Anhui University, China), Gang Li (Deakin University, Australia), Frank Jiang (Deakin University, Australia), and Xuejun Li (Anhui University, China)
Semantic Services II

Multiple Features Driven Author Name Disambiguation ......................................................... 506
Qian Zhou (Soochow University, China), Wei Chen (Soochow University, China), Weiqing Wang (Monash University, Australia), Jiajie Xu (Soochow University, China), and Lei Zhao (Soochow University, China)

Incremental Update of Knowledge Graph Embedding by Rotating on Hyperplane ............... 516
Yuyang Wei (Soochow University, China), Wei Chen (Soochow University, China), Zhixu Li (Soochow University, China), and Lei Zhao (Soochow University, China)

Efficient Grammatical Error Correction with Hierarchical Error Detections and Correction ........ 525
Fayu Pan (Zhejiang University of Technology, China) and Bin Cao (Zhejiang University of Technology, China)

Services QoS Management III

A Holistic Auto-Scaling Algorithm for Multi-service Applications Based on Balanced Queuing Network ................................................................. 531
Jingwan Tong (Sun Yat-sen University, Guangzhou, China), Mingchang Wei (Sun Yat-sen University, Guangzhou, China), Maolin Pan (Sun Yat-sen University, Guangzhou, China), and Yang Yu (Sun Yat-sen University, Guangzhou, China)

Online Cost-Effective Edge Service Renting for Content Providers in Cloud and Edge Environments ................................................................................................. 541
Zizhe Jin (Shandong University, China), Li Pan (Shandong University, China), and Shijun Liu (Shandong University, China)

QoS Prediction for Web Services via Combining Multi-Component Graph Convolutional Collaborative Filtering and Deep Factorization Machine .................................................. 551
Linghang Ding (Hunan University of Science and Technology, China), Guosheng Kang (Hunan University of Science and Technology, China), Jianxun Liu (Hunan University of Science and Technology, China), Yong Xiao (Hunan University of Science and Technology, China), and Buqing Cao (Hunan University of Science and Technology, China)

Services QoS Management IV

Instance-Frequency-Weighted Regularized, Nonnegative and Adaptive Latent Factorization of Tensors for Dynamic QoS Analysis ................................................................. 560
Hao Wu (University of Chinese Academy of Sciences, China) and Xin Luo (University of Chinese Academy of Sciences, China)

Microservice Pre-Deployment Based on Mobility Prediction and Service Composition in Edge ...... 569
Jiale Deng (Wuhan University, China), Bing Li (Wuhan University, China), Jian Wang (Wuhan University, China), and Yuqi Zhao (Wuhan University, China)
GoDeep: Intelligent IoV Service Deployment and Execution with Privacy Preservation in Cloud-Edge Computing

Wentao Liu (Nanjing University of Information Science and Technology, China), Xiaolong Xu (Nanjing University of Information Science and Technology, Soochow University, China), Lianyong Qi (Qufu Normal University, China), Xuyun Zhang (Macquarie University, Australia), and Wanchun Dou (Nanjing University, China)

Services Security, Privacy and Trust II

Incentive-Driven Edge Cooperation for Service Provision

Yishan Chen (Zhejiang University, China), Shuiguang Deng (Zhejiang University, China), and Jianwei Yin (Zhejiang University, China)

MemTrust: Find Deep Trust in Your Mind

Yanwei Xu (Tianjin University, China), Zhiyong Feng (Tianjin University, China), Xia Xue (Tianjin University, China), Shizhan Chen (Tianjin University, China), Hongyue Wu (Tianjin University, China), Xian Zhou (Tianjin University, China), Meng Xing (Tianjin University, China), and Hongqi Chen (Tianjin University, China)

Blockchain-Based Trust Information Storage in Crowdsourced IoT Services

Mohammed Bahutair (University of Sydney, Australia) and Athman Bouguettaya (University of Sydney, Australia)

Services Security, Privacy and Trust III

NPS-AntiClone: Identity Cloning Detection Based on Non-Privacy-Sensitive User Profile Data

Ahmed Alharbi (RMIT University, Australia), Hai Dong (RMIT University, Australia), Xun Yi (RMIT University, Australia), and Prabath Abeysekara (RMIT University, Australia)

Trust Management for Reliable Cross-Platform Cooperation Based on Blockchain

Chao Wang (Tianjin University, China), Shizhan Chen (Tianjin University, China), Shiping Chen (Tianjin University, China), Xiao Xue (Tianjin University, China), Hongyue Wu (Tianjin University, China), and Zhiyong Feng (Tianjin University, China)

A Certificateless Searchable Public Key Encryption Scheme for Multiple Receivers

Xiaozhuo Gu (Institute of Information Engineering, Chinese Academy of Sciences, China, University of Chinese Academy of Sciences, China), Ziliang Wang (Institute of Information Engineering, Chinese Academy of Sciences, China, University of Chinese Academy of Sciences, China), Maomao Fu (Hillstone Networks Co., Ltd., China), and Peixin Ren (Institute of Information Engineering, Chinese Academy of Sciences, China, University of Chinese Academy of Sciences, China)
Work-In-Progress

A Visualization Interface for Exploring Similar Brands on a Fashion E-Commerce Platform .......... 642
Natsuki Hashimoto (Doshisha University), Marie Katsurai (Doshisha University), and Ryosuke Goto (ZOZO Technologies, Inc.)

Automatic Control Network Anomaly Detection Based on Behavior Understanding ....................... 645
Jianhui Luo (Fudan University)

Video Quality and Popularity-Aware Video Caching in Content Delivery Networks ....................... 648
Yijun Sun (Beijing Institute of Technology), Zehua Guo (Beijing Institute of Technology), Songshi Dou (Beijing Institute of Technology), and Yuanqing Xia (Beijing Institute of Technology)

Service Applications beyond the Web VI

A Privacy-Aware Stackelberg Game Approach for Joint Pricing, Investment, Computation Offloading and Resource Allocation in MEC-Enabled Smart Cities ..................................................... 651
Hualong Huang (Huaqiao University, China), Kai Peng (Huaqiao University, China), and Peichen Liu (Huaqiao University, China)

Mining Temporal Dependency Among Proactive Data Services and Its Delivery to System-Level Anomaly Prediction .......................................................................................................................... 657
Chen Liu (North China University of Technology, China) and Xiaoqi Li (North China University of Technology, China)

Adaptive Priority-Based Conflict Resolution of IoT Services ............................................................. 663
Dipankar Chaki (University of Sydney, Australia) and Athman Bouguettaya (University of Sydney, Australia)

Service Applications beyond the Web VII

A Holistic Service Provision Strategy for Drone-as-a-Service in MEC-Based UAV Delivery ............ 669
Liju Chu (Anhui University, China), Xuejun Li (Anhui University, China), Jia Xu (Anhui University, China), Azadeh Ghar Neiat (Deakin University, Australia), and Xiao Liu (Deakin University, Australia)

Robust Composition of Drone Delivery Services Under Uncertainty .............................................. 675
Babar Shahzaad (The University of Sydney, Australia), Athman Bouguettaya (The University of Sydney, Australia), and Sajib Mistry (Curtin University, Australia)

Web Page Information Extraction Service Based on Graph Convolutional Neural Network and Multimodal Data Fusion .............................................................................................................. 681
Mingzhu Zhang (North China University of Technology, China), Zhongguo Yang (North China University of Technology, China), Sikandar Ali (China University of Petroleum-Beijing, China), and Weilong Ding (North China University of Technology, China)
Special Track: QSaS

Quantum Token for Network Authentication ................................................................. 688
Huimin Chen (Central University of Finance and Economics, China),
Hengyue Jia (Central University of Finance and Economics, China), Xia
Wu (Central University of Finance and Economics, China), Xiuli Wang
(Central University of Finance and Economics, China), and Maoning Wang
(Central University of Finance and Economics, China)

Best-Approximation Error for Parametric Quantum Circuits ........................................ 693
Lena Funcke (Perimeter Institute for Theoretical Physics, Canada),
Tobias Hartung (University of Bath, United Kingdom), Karl Jansen (NIC,
DESY Zeuthen, Germany), Stefan Kühn (Computation-Based Science and
Technology Research Center, The Cyprus Institute, Cyprus), Manuel
Schneider (NIC, DESY Zeuthen, Germany), and Paolo Stornati (NIC, DESY
Zeuthen, Germany)

ISASSE Symposium Papers

ISASSE White Paper

Software Services Engineering Manifesto – A Cross-Cutting Declaration ......................... 703
Carl K. Chang (Iowa State University), Paolo Ceravolo (University of
Milan), Rong N. Chang (IBM T.J. Watson Research Center), Sumi Helal
(University of Florida), Zhi Jin (Peking University), Xuanzhe Liu
(Peking University), and Hua Ming (Oakland University)

ISASSE Invited Talks

Edge Intelligence .................................................................................................................. 710
Schahram Dustdar (TU Wien, Austria)

Service Defined Software in E-SBOT .............................................................................. 711
Xiaofei Xu (Harbin Institute of Technology, China)

ICWS Special Track on SSE

Special Track: Software Service Engineering (I)

Attaining Meta-Self-Awareness Through Assessment of Quality-of-Knowledge .................. 712
Abdessalam Elhabbash (Lancaster University, United Kingdom), Rami
Bahsoon (University of Birmingham, United Kingdom), Peter Tino
(University of Birmingham, United Kingdom), Peter R. Lewis (Ontario
Tech University, Canada), and Yehia Elkhatib (University of Glasgow,
United Kingdom)

MinerRepu: A Reputation Model for Miners in Blockchain Networks ............................... 724
Akram Alofi (University of Birmingham, United Kingdom), Rami Bahsoon
(University of Birmingham, United Kingdom), and Robert Hendley
(University of Birmingham, United Kingdom)
Efficient Penetration of API Sequences to Test Stateful RESTful Services .............................................. 734
Koji Yamamoto (Fujitsu Research, Fujitsu Ltd., Japan)

Special Track: Software Service Engineering (II)

A Measurement Study on Serverless Workflow Services ........................................................................... 741
Jinfeng Wen (Peking University, China) and Yi Liu (Peking University, China)

An Empirical Study on Underlying Correlations between Runtime Performance Deficiencies and "Bad Smells" of Microservice Systems .................................................................................. 751
Lei Liu (Harbin Institute of Technology, China), Zhiying Tu (Harbin Institute of Technology, China), Xiang He (Harbin Institute of Technology, China), Xiaofei Xu (Harbin Institute of Technology, China), and Zhongjie Wang (Harbin Institute of Technology, China)

Monolith to Microservice Candidates using Business Functionality Inference ........................................ 758
Shivali Agarwal (IBM Research), Raunak Sinha (IBM Research), Giriprasad Sridhara (IBM Research), Pratap Das (Chennai Mathematical Institute), Utkarsh Desai (IBM Research), Srikanth Tamilselvan (IBM Research), Anith Singhee (IBM Research), and Hiroaki Nakamura (IBM Research)

Author Index ................................................................................................................................................. 765
