

# **20th International Conference on Modeling and Applied Simulation (MAS 2021)**

Held at the 18th International Multidisciplinary Modeling and  
Simulation Multiconference (I3M 2021)

Online

15 – 17 September 2021

## **Editors:**

**Agostino G. Bruzzone**  
**Fabio De Felice**

**Marina Massei**  
**Adriano O. Solis**

ISBN: 978-1-7138-3856-2

## **Index**

|                                                                                                                                                                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>A hybrid heuristic algorithm for solving the Traveling Salesman Problem with Time Windows</b><br>M. Neroni, L. Tebaldi                                                                                                                                                | 1   |
| <b>A Model-Driven Design Approach For Ro-Ro And Container Terminals: From Requirements Analysis Down To Simulation Model Implementation</b><br>M.N. Abourraja, S. Meijer, J. Boukachour                                                                                  | 9   |
| <b>Analytical Method to Determine the Test Positions for Validation of a Two-Dimensional Shuttle System Model</b><br>G. Siciliano, C.U.Schuster, J. Fottner                                                                                                              | 21  |
| <b>Computing Similarities Between Virtual Laboratory Experiments Models using Petri Nets</b><br>A. Sypsas, D. Kalles                                                                                                                                                     | 29  |
| <b>A simulation-based decision-support system for integration of human cognition into construction operation planning</b><br>A. Golabchi, S. RazaviAlavi, S. AbouRizk                                                                                                    | 38  |
| <b>Approach of flexible log yard design using discrete event simulation</b><br>M. Trzcianowska, D. Beaudoin, L. LeBel                                                                                                                                                    | 48  |
| <b>Exploiting Machine Learning and Industry 4.0 traceability technologies to re-engineering the seasoning process of traditional Parma's Ham</b><br>D. Mezzogori, F. Zammori                                                                                             | 57  |
| <b>A new compact training simulator for Paks Nuclear Power Plant</b><br>J. Páles, G. Házi, T. Fogd                                                                                                                                                                       | 65  |
| <b>SURET calculation of a new type of nuclear fuel assembly having spacer grid with mixing vane</b><br>A. Vécsi, G. Házi                                                                                                                                                 | 72  |
| <b>Forecast of the optimal activation function for the stablecoins using neural network</b><br>A.E. Benitez Gasca, R. Torres Mendoza, J. Nosedal-Sanchez                                                                                                                 | 77  |
| <b>A Flexible and Generic Simulation Model for in-Bound Transport Systems</b><br>S. Mestiri, J. Jamil, J. Fottner                                                                                                                                                        | 85  |
| <b>A Multi-Criteria Cost-Benefit Analysis to optimize the oil supply networks</b><br>M. Bilal, Y. Ali, M. Sabir, A. Petrillo, F. De Felice                                                                                                                               | 91  |
| <b>Maven: A first step towards a digital twin for synchronous logistics in the automotive industry</b><br>D. Crespo-Pereira, A. Pérez-Rodríguez, A. Carballo-Alonso, D. Costas-Freire, A. Rodal-Salgueiro, S. Iglesias-Fernández, D. del-Río-Vilas, A. Carrillo-Lasheras | 104 |
| <b>Prediction of steel coils mechanical properties and microstructure by using deep learning and advanced data preprocessing techniques</b><br>M. Vannucci, V. Colla, C. Mocci, F. Van Den Berg, D. Fintelman, H. Yang                                                   | 111 |
| <b>Feasibility of An Origami Pattern Folding for Continuous Manufacturing Process</b><br>P. Muthukrishnan, Z.J. Pasek                                                                                                                                                    | 120 |

|                                                                                                                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Designing a RFID/IoT prototype for improving COVID19 test centers daily operations</b><br>Y. Maïzi, Y. Bendavid                                                                                                                     | 127 |
| <b>Unity3D-based Simulation for Operations Management Teaching</b><br>J. Pernas-Álvarez, D. Crespo-Pereira                                                                                                                             | 136 |
| <b>Queueing, Simulation and Optimization for Performance-oriented Design of Warehouse Systems</b><br>P. Legato, R.M. Mazza, F. Vocaturo                                                                                                | 141 |
| <b>Decentralized navigation control of multiple vehicles with obstacle avoidance</b><br>M.M. Mohamed-Ahmed, A. Naamane                                                                                                                 | 152 |
| <b>A novel approach to handle intransitive judgements in industrial control problems</b><br>S. Carpitella, M. Pištěk, M. Inuiguchi, V. Kratochvíl                                                                                      | 162 |
| <b>Fermentation of glycerol using Clostridium butyricum for the production of 1,3-Propanediol in a Fed-batch bioreactor using advanced controllers</b><br>T. Pröschle, D. Ávalos, A. Sepúlveda, F. Llull, F. Ibáñez, J.R. Pérez-Correa | 170 |
| <b>Synthesis of Petri Nets based controllers for the automation of train routing in a railway node</b><br>A. Toguyéni                                                                                                                  | 176 |
| <b>Machine Learning and Genetic Algorithms to Improve Strategic Retail Management</b><br>A.G. Bruzzone, K. Sinelshchikov, M. Massei, W. Schmidt                                                                                        | 186 |
| <b>Interoperable Simulation for Space Logistics &amp; Operations for a Moon Base</b><br>A.G. Bruzzone, K. Sinelshchikov, J. Pernas-Álvarez, A. Giovannetti, R. Ferrari, B. Gadupuri                                                    | 190 |
| <b>Models to apply Strategic Engineering at Digitalization Initiatives in Large Engineering Companies</b><br>A.G. Bruzzone, Chervisari L.M., F. Faccio, M. Massei, M. Cardelli                                                         | 194 |
| <b>Dynamic Problem Solving for Assessment of Strategic Engineering Capabilities</b><br>A.G. Bruzzone, M. Massei, A.F. Sciomachen, J. Mazal, P. Scotto di Castelbianco, E.M. Cepolina                                                   | 199 |
| <b>Strategic Engineering for Marine Logistics for Chemical Plants</b><br>E.M. Cepolina                                                                                                                                                 | 205 |
| <b>Serious Game for SWOT Analysis of EPC Main Contractors</b><br>J. Pernas-Álvarez, E.M. Cepolina, M. Massei                                                                                                                           | 215 |
| <b>RFID and logistics: a cost-benefit analysis to design the most cost-effective RFID set-up for an air cargo handler's warehouse</b><br>E.M. Cepolina, D. Aquaro                                                                      | 220 |
