2021 IEEE Sixth International Conference on Data Science in Cyberspace (DSC 2021)

Shenzhen, China
9 – 11 October 2021
2021 IEEE Sixth International Conference on Data Science in Cyberspace (DSC)
DSC 2021

Table of Contents

Message from the General Chairs ................................................................. xxii
Conference Organization ............................................................................. xxi
Program Committee .................................................................................. xxi

Main Conference

The Survey on the Development of Secure Multi-Party Computing in the Blockchain ............ 1
Songqi Wu (Beijing University of Posts and Telecommunications, China), Jin Li (Beijing University of Posts and Telecommunications, China), Fenghui Duan (Beijing University of Posts and Telecommunications, China), Yueming Lu (Beijing University of Posts and Telecommunications, China), Xu Zhang (Beijing University of Posts and Telecommunications, China), and Jiefu Gan (China Cyber Security Review Technology and Certification Center, China)

Modeling Connection Strength in Graph Neural Networks for Social Influence Prediction ........ 8
Hongwu Zhuang (National University of Defense Technology, China), Bin Zhou (National University of Defense Technology, China), Wen Xi (National University of Defense Technology, China), Liqun Gao (National University of Defense Technology, China), and Haiyang Wang (National University of Defense Technology, China)

Rumor Detection on Social Media using Temporal Dynamic Structure and Emotional Information ... 16
Chenming Wang (National University of Defense Technology, China), Bin Zhou (National University of Defense Technology, China), Hongkui Tu (National University of Defense Technology, China), and Yujia Liu (National University of Defense Technology, China)

Network Security Situation Prediction Model Based on Security Situation Factors .................. 23
Wei Hu (State Grid Information & Telecommunication Branch Beijing, China), Jianyi Liu (Beijing University of Posts and Telecommunications Beijing, China), Han Guo (State Grid Information & Telecommunication Branch Beijing, China), Jing Li (State Grid Information & Telecommunication Branch Beijing, China), Xinjian Zhao (Information & Telecommunication Branch, State Grid Jiangsu Electric Power Co. Ltd Nanjing, China), and Mingyang Zhang (Beijing University of Posts and Telecommunications Beijing, China)
Sampled Data Debugging via Fuzzy C-Means ................................................................. 32
Xiayu Xiang (Beijing University of Posts and Telecommunications, China), Shaoming Duan (Harbin Institute of Technology (Shenzhen), China), Hezhong Pan (Beijing University of Posts and Telecommunications, China), Peiyi Han (Harbin Institute of Technology (Shenzhen), China), and Chuanyi Liu (Harbin Institute of Technology (Shenzhen), China)

Adversarial Residual Variational Graph Autoencoder with Batch Normalization .................. 40
Qisheng Liao (Beijing University of Posts and Telecommunications, China; Key Laboratory of Trustworthy Distributed Computing and Service, Ministry of Education, China), Xu Wu (Beijing University of Posts and Telecommunications, China; Key Laboratory of Trustworthy Distributed Computing and Service, Ministry of Education, China), Xiaqing Xie (Beijing University of Posts and Telecommunications, China; Key Laboratory of Trustworthy Distributed Computing and Service, Ministry of Education, China), Jingchen Wu (Beijing University of Posts and Telecommunications, China; Key Laboratory of Trustworthy Distributed Computing and Service, Ministry of Education, China), Lirong Qiu (Beijing University of Posts and Telecommunications, China; Key Laboratory of Trustworthy Distributed Computing and Service, Ministry of Education, China), and Lijuan Sun (Beijing University of Posts and Telecommunications, China; Key Laboratory of Trustworthy Distributed Computing and Service, Ministry of Education, China)

Sensitive Image Information Recognition Model of Network Community Based on Content Text .... 47
Li Gao (Key Laboratory of Trustworthy Distributed Computing and Service; Beijing University of Posts and Telecommunications, China), Xu Wu (Key Laboratory of Trustworthy Distributed Computing and Service; Beijing University of Posts and Telecommunications, China), Jingchen Wu (Key Laboratory of Trustworthy Distributed Computing and Service; Beijing University of Posts and Telecommunications, China), Xiaqing Xie (Key Laboratory of Trustworthy Distributed Computing and Service; Beijing University of Posts and Telecommunications, China), Lirong Qiu (Key Laboratory of Trustworthy Distributed Computing and Service; Beijing University of Posts and Telecommunications, China), and Lijuan Sun (Key Laboratory of Trustworthy Distributed Computing and Service; Beijing University of Posts and Telecommunications, China)

Malware Classification Based on Visualization and Feature Fusion ........................................ 53
Zilin Zhao (Shandong Provincial Key Laboratory of Computer Networks Shandong Computer Science Center (National Supercomputer Center in Jinan), Qilu University of Technology (Shandong Academy of Sciences), China), Dawei Zhao (Shandong Provincial Key Laboratory of Computer Networks Shandong Computer Science Center (National Supercomputer Center in Jinan), Qilu University of Technology (Shandong Academy of Sciences), China), Shudong Li (Cyberspace Institute of Advanced Technology Guangzhou University, China), and Shumian Yang (Shandong Provincial Key Laboratory of Computer Networks Shandong Computer Science Center (National Supercomputer Center in Jinan), Qilu University of Technology (Shandong Academy of Sciences), China)
Bit-FP: A Traffic Fingerprinting Approach for Bitcoin Hidden Service Detection
Kexin Zou (Beijing University of Posts and Telecommunications, China),
Jinqiao Shi (Beijing University of Posts and Telecommunications,
China), Yue Gao (Institute of Information Engineering Chinese Academy
of Sciences, China), Xuebin Wang (Institute of Information Engineering
Chinese Academy of Sciences, China), Meiqi Wang (Institute of
Information Engineering Chinese Academy of Sciences, China), Zeyu Li
(Beijing University of Posts and Telecommunications, China), and
Majing Su (The 6th Research Institute of China Electronice Corporation
China Electronics Corporation, China)

TCABRS: An Efficient Traceable Constant-Size Attribute-Based Ring Signature Scheme for
Electronic Health Record System
Aoran Lu (University of Science and Technology of China, China),
Weihai Li (University of Science and Technology of China, China),
Yuanzhi Yao (University of Science and Technology of China, China),
and Nenghai Yu (University of Science and Technology of China, China)

Bow-tie Technology Analysis of Safety Risks of Lithium-ion Battery in Air Transport
Yan Zhang (Civil Aviation Management Institute of China, China),
Hongli Zhao (Civil Aviation Management Institute of China, China), and
Bin Li (Civil Aviation Management Institute of China, China)

LoginSoEasy: A System Enabling both Authentication and Protection of Personal Information
Based on Trusted User Agent
Wenyin Liu (Guangdong University of Technology, China), Yin Lin
(Guangdong University of Technology, China), Zongcheng Qi (Guangdong
University of Technology, China), Zekai Wu (Guangdong University of
Technology, China), Guipeng Zhang (Guangdong University of Technology,
China), Kai Wang (Guangdong University of Technology, China), Shuai
Fan (Guangdong University of Technology, China), and Zhenguo Yang
(Guangdong University of Technology, China)

ResNet Approach for Coding Unit Fast Splitting Decision of HEVC Intra Coding
Yixiao Li (Beijing University of Posts and Telecommunications, China;
National Engineering Laboratory for Disaster Backup Recovery, China),
Lixiang Li (Beijing University of Posts and Telecommunications, China;
National Engineering Laboratory for Disaster Backup Recovery, China),
Zirui Zhuang (Beijing University of Posts and Telecommunications,
China), Yuan Fang (Beijing University of Posts and Telecommunications,
China; National Engineering Laboratory for Disaster Backup Recovery,
China), and Yixian Yang (Beijing University of Posts and
Telecommunications, China; National Engineering Laboratory for
Disaster Backup Recovery, China)

MilKBQA: A Complex Knowledge Base Question Answering Dataset on Chinese Military Field
Pike Xu (National University of Defense Technology, China), Tiejun Li
(National University of Defense Technology, China), Zhen Huang
(National University of Defense Technology, China), Min Guo (National
University of Defense Technology, China), Jiezhong He (National
University of Defense Technology, China), and Ding Sun (National
University of Defense Technology, China)
A Review of Entity Alignment Based on Graph Convolutional Neural Network .......................... 144
Zeshi Wang (Cyberspace Institute of Advance Technology, Guangzhou University, China), Mohan Li (Cyberspace Institute of Advance Technology, Guangzhou University, China), and Zhaoquan Gu (Pengcheng Laboratoy, China)

Survey on Knowledge Graph Embedding Based on Hyperbolic Geometry ............................ 152
Mengqi Lin (Harbin Institute of Technology (Shenzhen), China), Qing Liao (Harbin Institute of Technology (Shenzhen), China), Yan Jia (Harbin Institute of Technology (Shenzhen), China), and Ye Wang (Harbin Institute of Technology (Shenzhen), China)

Survey on Social Event Detection .................................................................................. 159
Yutao Huang (Harbin Institute of Technology (Shenzhen), China), Qing Liao (Harbin Institute of Technology (Shenzhen), China), Yan Jia (Harbin Institute of Technology (Shenzhen), China), and Ye Wang (Harbin Institute of Technology (Shenzhen), China)

A Proxy-Protected Proxy Signature Based on SM9 ................................................................ 166
Xiaodong Yang (Northwest Normal University, China), Sen Yuan (Northwest Normal University, China), Hang Zhou (Northwest Normal University, China), and Binbin Ding (Northwest Normal University, China)

APT Behaviors Detection Based on Email Business Scenarios ............................................. 171
Bo Bai (Institute of Information Engineering, China; Beijing Institute of Network Data, China; University of Chinese Academy of Sciences, China), Yun Feng (Institute of Information Engineering, China; University of Chinese Academy of Sciences, China), Baoxu Liu (Institute of Information Engineering, China; University of Chinese Academy of Sciences, China), Xutong Wang (Institute of Information Engineering, China; University of Chinese Academy of Sciences, China), Jiaxi Liu (Institute of Information Engineering, China; University of Chinese Academy of Sciences, China), Qingyue Liu (Institute of Information Engineering, China; University of Chinese Academy of Sciences, China), Qixu Liu (Institute of Information Engineering, China; University of Chinese Academy of Sciences, China), and Shuang Zhao (Beijing Institute of Network Data, China)

A Universal Targeted Attack Method Against Image Classification .................................... 179
Huili Luo (Guangzhou University, China), Zhaoquan Gu (Guangzhou University, China), Chunajing Zhang (Guangzhou University, China), Le Wang (Guangzhou University, China), Shuhao Li (Guangzhou University, China), and Zhiqin Chen (Guangzhou University, China)

A Survey on Translating Embedding Based Entity Alignment in Knowledge Graphs ............ 187
Jin Jiang (Cyberspace Institute of Advance Technology, Guangzhou University, China), Mohan Li (Cyberspace Institute of Advance Technology, Guangzhou University, China), and Zhaoquan Gu (Cyberspace Institute of Advance Technology, Guangzhou University, China)

FedDeepFM: Ad CTR Prediction Based on Federated Factorization Machine ....................... 195
Chenjia Yu (Harbin Institute of Technology, Shenzhen, Guangdong), Shuhan Qi (Harbin Institute of Technology, Shenzhen, Guangdong), and Yang Liu (Harbin Institute of Technology, Shenzhen, Guangdong)
FIGAT: Accurately Predict Individual Crime Risks with Multi-Information Fusion .......................... 248  
Xianzhe Yu (Harbin Institute of Technology (Shenzhen), China), Peiyi Han (Harbin Institute of Technology (Shenzhen), China; Cyberspace Security Research Center, Peng Cheng Laboratory, China), Chuanyi Liu (Harbin Institute of Technology (Shenzhen), China; Cyberspace Security Research Center, Peng Cheng Laboratory, China), Shaoming Duan (Harbin Institute of Technology (Shenzhen), China), Hezhong Pan (Beijing University of Posts and Telecommunications, China), and Xiayu Xiang (Beijing University of Posts and Telecommunications, China)

Audio Steganography with Speech Recognition System ............................................................... 256  
Hao Tan (Cyberspace Institute of Advanced Technology Guangzhou University, China), Chenwei Liu (Cyberspace Institute of Advanced Technology Guangzhou University, China), Yinyu Lyu (Cyberspace Institute of Advanced Technology Guangzhou University, China), Xiao Zhang (Cyberspace Institute of Advanced Technology Guangzhou University, China), Denghui Zhang (Cyberspace Institute of Advanced Technology Guangzhou University, China), and Zhaoquan Gu (Cyberspace Institute of Advanced Technology Guangzhou University, China)

PRFP: Privacy-Respecting and Accurate Device Fingerprint Identification .................................... 264  
Xunan Gao (Harbin Institute of Technology (Shenzhen), China), Peiyi Han (Harbin Institute of Technology (Shenzhen), China; Cyberspace Security Research Center, Peng Cheng Laboratory, China), Chuanyi Liu (Harbin Institute of Technology (Shenzhen), China; Cyberspace Security Research Center, Peng Cheng Laboratory, China), Shaoming Duan (Harbin Institute of Technology (Shenzhen), China), Hezhong Pan (Beijing University of Posts and Telecommunications, China), and Xiayu Xiang (Beijing University of Posts and Telecommunications, China)

Generate Adversarial Examples Combined with Image Entropy Distribution .................................. 272  
Wenrong Xie (Guangzhou University, China), Fashan Dong (Guangzhou University, China), Haiyang Yu (Guangzhou University, China), Zhaquan Gu (Guangzhou University, China), Le Wang (Guangzhou University, China), and Zhihong Tian (Guangzhou University, China)

Attack-Words Guided Sentence Generation for Textual Adversarial Attack .................................. 280  
Huan Zhang (Guangzhou University, China), Yushun Xie (Guangzhou University, China), Ziqi Zhu (Guangzhou University, China), Jingling Sun (Guangzhou University, China), Chao Li (Guangzhou University, China), and Zhaoquan Gu (Guangzhou University, China)

A Novel Deep Neural Network Model for Credit Risk Prediction of Chinese Farmers ..................... 288  
Yalong Xie (National University of Defense Technology, China), Aiping Li (National University of Defense Technology, China), Ziniu Liu (National University of Defense Technology, China), Kai Chen (National University of Defense Technology, China), and Hongkui Tu (National University of Defense Technology, China)
Multi-dimensional Data Association and inTelligent Analysis (MDATA 2021)

Survey on Temporal Knowledge Graph
Chong Mo (Harbin Institute of Technology (Shenzhen), China), Ye Wang (Harbin Institute of Technology (Shenzhen), China), Yan Jia (Harbin Institute of Technology (Shenzhen), China), and Qing Liao (Harbin Institute of Technology (Shenzhen), China)

Hierarchical Cooperative Social Spider Algorithm for Community Detection in Large Network
Peng Chen (Anhui Normal University, China), Jun Zhang (Wuhu Institute of Technology, China), Yang Wang (Anhui Normal University, China), Jiawei Xu (Anhui Normal University, China), and Shenghao Cao (Anhui Normal University, China)

RanPAS: A Behavior-Based System for Ransomware Detection
Bidong Wang (College of Computer, National University of Defense Technology, China), Hui Liu (College of Computer, National University of Defense Technology, China), Xinli Han (China South Industrial Research Institute, China), and Dongliang Xuan (College of Computer, National University of Defense Technology, China)

Dynamic Topic Model for Tracking Topic Evolution and Measuring Popularity of Scientific Literature
Yezheng Liu (Hefei University of Technology, China; National Engineering Laboratory for Big Data Distribution and Exchange Technologies; Key Laboratory of Process Optimization and Intelligent Decision Making, Ministry of Education), Jicheng Wang (Hefei University of Technology, China; Key Laboratory of Process Optimization and Intelligent Decision Making, Ministry of Education), Yang Qian (Hefei University of Technology, China; Key Laboratory of Process Optimization and Intelligent Decision Making, Ministry of Education), Yuanchun Jiang (Hefei University of Technology, China; Key Laboratory of Process Optimization and Intelligent Decision Making, Ministry of Education), Jianshan Sun (Hefei University of Technology, China; Key Laboratory of Process Optimization and Intelligent Decision Making, Ministry of Education), and Yidong Chai (Hefei University of Technology, China; Key Laboratory of Process Optimization and Intelligent Decision Making, Ministry of Education)

Identifying Reply Relationships from Telegram Groups using Multi-Features Fusion
Panpan Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Yao Qi (Institute of Information Engineering, Chinese Academy of Sciences, China), Yanzeng Li (Institute of Information Engineering, Chinese Academy of Sciences, China), Jing Ya (Institute of Information Engineering, Chinese Academy of Sciences, China), Xuebin Wang (Institute of Information Engineering, Chinese Academy of Sciences, China), Tingwen Liu (Institute of Information Engineering, Chinese Academy of Sciences, China), University of Chinese Academy of Sciences, China), and Jinqiao Shi (Beijing University of Posts and Telecommunications, China)
A Manifold Learning Method to Passage Retrieval for Open-Domain Question Answering .......... 328
Ruidong Ding (National University of Defense Technology, China), Bin Zhou (National University of Defense Technology, China), and Hongkui Tu (National University of Defense Technology, China)

A Method for Discovering Hidden Patterns of Cybersecurity Knowledge Based on Hierarchical Clustering ................................................................. 334
Zhaoyun Ding (National University of Defense Technology, China), Deqi Cao (National University of Defense Technology, China), Lina Liu (Soochow University, China), Donghua Yu (Shaoxing University, China), Haoyang Ma (National University of Defense Technology, China), and Fei Wang (National University of Defense Technology, China)

An Overview of Entity Alignment: Cross-Lingual and Graph Approaches .................................. 339
Fang Wang (Academy of Military Sciences, China), Yongqiang Xie (Academy of Military Sciences, China), and Kai Zhang (Academy of Military Sciences, China)

BDCP: An Improved Nested Named Entity Recognition Model Based on LSTM .................. 346
Ling Zhou (Guangzhou University, China), Tianjiao Luan (China Academy of Launch Vehicle Technology, China), Na Yao (Beijing Aerospace Automatic Control Institute, China), Jianming Li (Guangzhou University, China), and Jie Ding (Guangzhou University, China)

Vulnerability Analysis and Adversarial Learning (VAAL 2021)

Gradient-Oriented Gray-Box Protocol Fuzzing ............................................................ 353
Yinfan Qin (Institute Of System Engineering AMS.PLA, National Key Laboratory of Science and Technology on Information System Security, China), Xiang Li (Institute Of System Engineering AMS.PLA, National Key Laboratory of Science and Technology on Information System Security, China), Jianwen Tian (Institute Of System Engineering AMS.PLA, National Key Laboratory of Science and Technology on Information System Security, China), Taotao Gu (Institute Of System Engineering AMS.PLA, National Key Laboratory of Science and Technology on Information System Security, China), and Xiaohui Kuang (Institute Of System Engineering AMS.PLA, National Key Laboratory of Science and Technology on Information System Security, China)

Software Misconfiguration Troubleshooting Based on State Analysis .................................. 361
Ke Li (Beijing Institute of Technology, China), Yuan Xue (Academy of Military Science, China), Yujie Shao (Beijing Institute of Technology, China), Bing Su (Beijing Institute of Technology, China), Yu-an Tan (Beijing Institute of Technology, China), and Jingjing Hu (Beijing Institute of Technology, China)

A Multilevel Non-Interference Vulnerability Analysis Method for Information Leakage Problem ................................................................. 367
Wenjing Zhong (National Key Laboratory of Science and Technology on Information System Security, China; Xidian University, China), Jinjing Zhao (National Key Laboratory of Science and Technology on Information System Security, China), and Hesuan Hu (Xidian University, China, Xi’an Jiaotong University, China; Nanyang Technological University, Singapore)
Artificial Intelligence Security for Hydraulic Machinery System ........................................ 413  
Lei Wang (State Grid Liaoning Electric Power Co., Ltd. LiaoNing, China), Shuai Ren (State Grid Liaoning Electric Power Research Institute, LiaoNing, China), Guangao Li (State Grid Liaoning Electric Power Co., Ltd. LiaoNing, China), Yang Liu (State Grid Liaoning Electric Power Research Institute, LiaoNing, China), Gang Wang (State Grid Liaoning Electric Power Research Institute, LiaoNing, China), and Qian Sun (State Grid Liaoning Electric Power Research Institute, LiaoNing, China)

Investigations on Answer Selection Based on Co-Attention Guided Stacked BiLSTM with BERT .... 420  
Mingli Wu (North China University of Technology, China), Shuaibo Li (North China University of Technology, China), Ke Teng (North China University of Technology, China), Chunlai Du (North China University of Technology, China), and Jianyong Duan (North China University of Technology, China)

A Joint Warning and Notification Mechanism for Cybersecurity Incidents ............................. 428  
Zhenhuan Zhang (First Research Institute of the Ministry of Public Security of PRC, China), Hongmei Li (First Research Institute of the Ministry of Public Security of PRC, China), Yulin Zheng (First Research Institute of the Ministry of Public Security of PRC, China), Wenbo Guan (North China University of Technology, China), and Binghao Jia (North China University of Technology, China)

Review on Fuzz Testing for Protocols in Industrial Control Systems ........................................ 433  
Huiying Lan (Guangzhou University, China) and Yanbin Sun (Guangzhou University, China)

A Survey of Cyber Security Approaches for Prediction ............................................................... 439  
Haitian Liu (National University of Defense Technology, China), Rong Jiang (National University of Defense Technology, China), Bin Zhou (National University of Defense Technology, China), Xing Rong (China Electronic Device Systems Engineering Corporation, China), Juan Li (China Information Technology Security Evaluation Center, China), and Aiping Li (College of Computer National University of Defense, China)

Focus on the Stability of Large Systems: Toward Automatic Prediction and Analysis of Vulnerability Threat Intelligence ................................................................. 445  
Shiwen Song (Institute of Information Engineering, Chinese Academy of Sciences, China), Qiong Wu (Bag Data Academy, Zhonghe, China), Xin Zheng (Institute of Information Engineering, Chinese Academy of Sciences, China), Peng Wang (Institute of Information Engineering, Chinese Academy of Sciences, China), Yuchen Dou (Institute of Information Engineering, Chinese Academy of Sciences, China), Zhongwen Li (Institute of Information Engineering, Chinese Academy of Sciences, China), and Lidong Zhai (Institute of Information Engineering, Chinese Academy of Sciences, China)

Digital Humanities and Computer Arts (DHCA 2021)

User Experience Based Perspective Guidance Method for Immersive Interactive Video ............... 450  
Ling Zou (Beijing Film Academy, China) and Hongxi Li (Beijing Film Academy, China)
Art Experience Innovation Design in Digital Media Era ................................................................. 454
Feng Ye (Beijing Film Academy, China) and Yong Liang (Phoenix Publishing & Media Group, China)

Analysis of Visual Subject Types in Immersive Image ................................................................. 458
Songheng Wang (Guangdong Polytechnic Normal University, China)

Research on the Application of Digital Media Technology in Media Convergence .................. 462
Jing Li (Beijing Film Academy, China) and Yong Liang (Phoenix Publishing & Media Group, China)

Big Data Mining for Cyberspace (BDMC 2021)

Generating Highly Structured Inputs: A Survey ................................................................. 466
Yabin Li (Beijing University of Posts and Telecommunications, China), Yinfan Qin (Academy of Military Sciences, China), Jianwen Tian (Academy of Military Sciences, China), Taotao Gu (Academy of Military Sciences, China), Yuanping Nie (National Key Laboratory of Science and Technology on Information System, China), and Xiaohui Kuang (National Key Laboratory of Science and Technology on Information System, China)

A Survey of DeepFakes Generation and Detection ................................................................. 474
Kaihan Lin (Guangzhou University, China), Weihong Han (Guangzhou University, China), Zhaquan Gu (Guangzhou University, China), and Shudong Li (Guangzhou University, China)

Research on Strategy Selection of Dynamic Defense Based on Game Theory .................. 479
Tong Peng (Beijing University of Posts and Telecommunications, China), Yueming Lu (Beijing University of Posts and Telecommunications, China), Jinxin Zuo (Beijing University of Posts and Telecommunications, China), and Jiefu Gan (China Cyber security Review Technology and Certification Center, China)

Research on Requirements Recommendation Method for High-end Equipment Based on Generative Adversarial Networks ................................................................. 485
Zeshui Liu (College of Systems Engineering National University of Defense Technology, China), Xiangqian Xu (College of Systems Engineering National University of Defense Technology, China), Nan Xiang (College of Systems Engineering National University of Defense Technology, China), Zhuoqian Li (College of Systems Engineering National University of Defense Technology, China), Yajie Dou (College of Systems Engineering National University of Defense Technology, China), and Yuejin Tan (College of Systems Engineering National University of Defense Technology, China)

Self-Attention U-Net Model for Radar Based Precipitation Nowcasting ............................ 493
Tengfei Nie (National University of Defense Technology, China), Kefeng Deng (National University of Defense Technology, China), Chengcheng Shao (National University of Defense Technology, China), Chengwu Zhao (National University of Defense Technology, China), Kaijun Ren (National University of Defense Technology, China), and Junqiang Song (National University of Defense Technology, China)
Cybersecurity for Critical Infrastructure Systems (CCIS 2021)

A Honeypot-Enabled SDN-Based Selector for Industrial Device Access Control ........................................ 523
Jun Li (China Industrial Control Systems Cyber Emergency Response Team, China), Chunhui Wang (Guilin University of Electronic Technology, China), Zhenyu Li (Guilin University of Electronic Technology, China), and Yong Ding (Guilin University of Electronic Technology, China)

Differential Cryptanalysis of TweGIFT-128 Based on Neural Network ..................................................... 529
Runlian Zhang (Guilin University of Electronic Technology, China), Mi Zhang (Guilin University of Electronic Technology, China), Jiaxu Yan (Guilin University of Electronic Technology, China), Yixing Li (Guilin University of Electronic Technology, China), Xiaonian Wu (Guilin University of Electronic Technology, China), and Lingchen Li (Guilin University of Electronic Technology, China)

Enhancing Continuous Service of Information Systems Based on Cyber Resilience .................................. 535
Jinxin Zuo (Beijing University of Posts and Telecommunications, China), Ziyu Guo (Beijing University of Posts and Telecommunications, China), Jiefu Gan (China Cyber Security Review Technology and Certification Center, China), and Yueming Lu (Beijing University of Posts and Telecommunications, China)

Networked Device Identification: A Survey ................................................................................................. 543
Yu Jiang (Guangzhou University, China), Yuqing Li (Guangzhou University, China), Key laboratory of Ministry of Industry and Information Technology, China), and Yanbin Sun (Guangzhou University, China)
Information Security Detection Technology for Industrial Control Equipment Modeling
Generated by Excitation Traversal Test Based on Big Data .................................................. 549
Chen Cui (Shenzhen Y&D Electronics Information Co., Ltd., China),
Jianhuai Qi (Shenzhen Y&D Electronics Information Co., Ltd., China),
Jing Song (Shenzhen Y&D Electronics Information Co., Ltd., China),
Peng Luo (Shenzhen Y&D Electronics Information Co., Ltd., China), and
Juan Tang (Shenzhen Y&D Electronics Information Co., Ltd., China)

Review of Firmware Homology Detection: A System Aspect ........................................... 556
Song Yan (State Grid Shanghai Municipal Electrical Power Research
Institute, China), Wang Binbin (State Grid Shanghai Municipal
Electrical Power Research Institute, China), Yu Xiaohu (East China
Normal University, China), Li Tinghui (East China Normal University,
China), Zhu Shanshan (East China Normal University, China), He Daojing
(East China Normal University, China), Yang Guisong (University of
Shanghai for Science and Technology, China), and Chan Sammy (City
University of Hong Kong, China)

Big Data and Business Analytics (BDBA 2021) & Multi-Source Network
Fusion and Analysis (MSNFA 2021)

Insider Threat Detection Based on User Historical Behavior and Attention Mechanism ........... 564
Weiyu He (Key Laboratory of Trustworthy Distributed Computing and
Service, Ministry of Education; Beijing University of Posts and
Telecommunications, China), Xu Wu (Key Laboratory of Trustworthy
Distributed Computing and Service, Ministry of Education; Beijing
University of Posts and Telecommunications, China), Jincheng Wu (Key
Laboratory of Trustworthy Distributed Computing and Service, Ministry
of Education; Beijing University of Posts and Telecommunications, China),
Xiaqing Xie (Key Laboratory of Trustworthy Distributed Computing and Service, Ministry of Education;
Beijing University of Posts and Telecommunications, China), Lirong Qiu (Key Laboratory of
Trustworthy Distributed Computing and Service, Ministry of Education;
Beijing University of Posts and Telecommunications, China), and Lijuan
Sun (Key Laboratory of Trustworthy Distributed Computing and Service, Ministry of Education;
Beijing University of Posts and Telecommunications, China)

Graph Neural Network Based User Group Comments Interaction Behavior Prediction on
Microblog Websites ................................................................. 570
Yisen Chen (Beijing University of Posts and Telecommunications, China;
Key Laboratory of Trustworthy Distributed Computing and Service,
Ministry of Education, China), Xu Wu (Beijing University of Posts and
Telecommunications, China; Key Laboratory of Trustworthy Distributed
Computing and Service, Ministry of Education, China), Xiaqing Xie
(Beijing University of Posts and Telecommunications, China; Key
Laboratory of Trustworthy Distributed Computing and Service, Ministry
of Education, China), Jingchen Wu (Beijing University of Posts and
Telecommunications, China; Key Laboratory of Trustworthy Distributed
Computing and Service, Ministry of Education, China), Lirong Qiu
(Beijing University of Posts and Telecommunications, China; Key
Laboratory of Trustworthy Distributed Computing and Service, Ministry
of Education, China), and Lijuan Sun (Beijing University of Posts and
Telecommunications, China; Key Laboratory of Trustworthy Distributed
Computing and Service, Ministry of Education, China)
An APT Malware Classification Method Based on Adaboost Feature Selection and LightGBM
Na Xu (Guangzhou University Guangzhou, China), Shudong Li (Guangzhou University Guangzhou, China), Xiaobo Wu (Guangzhou University Guangzhou, China), Weihong Han (Guangzhou University Guangzhou, China), and Xiaojing Luo (Guangzhou University Guangzhou, China)

Smart grid Terminal Security Assessment Method Based on Subjective and Objective Comprehensive Weighting
Shaocheng Wu (Shenzhen Power Supply Co., Ltd., China), Yue Ma (Shenzhen Power Supply Co., Ltd., China), Hefang Jiang (Shenzhen Power Supply Co., Ltd., China), Tao Liu (Shenzhen Power Supply Co., Ltd., China), Jinxin Zuo (Beijing University of Posts and Telecommunications, China), and Tong Peng (Beijing University of Posts and Telecommunications, China)

Intelligent Device Identification Method Based on Network Packet Fingerprint
Le Yao (Institute of System Engineering. AMS. PLA, China), Honglin Zhuang (National Key Laboratory of Science and Technology on Information System Security, China), Zhechao Lin (National Key Laboratory of Science and Technology on Information System Security, China), and Jiaxiang Gu (Institute of System Engineering. AMS. PLA, China)

The Overview of SPIN in Software Model Checking
Yaning Zheng (National Key Laboratory of Science and Technology on Information System Security, China), Kaiqi Ru (National Key Laboratory of Science and Technology on Information System Security, China), Xuewei Feng (National Key Laboratory of Science and Technology on Information System Security, China), and Dongxia Wang (National Key Laboratory of Science and Technology on Information System Security, China)

Detecting Adversarial Samples in Neural Network with Statistical Metrics: A Practical Approach
Wei Kong (National Key Laboratory of Science and Technology on Information System Security, China), Huayang Cao (National Key Laboratory of Science and Technology on Information System Security, China), Jianwen Tian (National Key Laboratory of Science and Technology on Information System Security, China), and Xiaohui Kuang (National Key Laboratory of Science and Technology on Information System Security, China)

High Efficient and Secure Chaos-Based Compressed Spectrum Sensing in Cognitive Radio IoT Network
Yuan Fang (Beijing University of Posts and Telecommunications, China), Lixiang Li (Beijing University of Posts and Telecommunications, China), Yixiao Li (Beijing University of Posts and Telecommunications, China), and Haipeng Peng (Beijing University of Posts and Telecommunications, China)

Author Index
