**Volume 11958**

Proceedings of SPIE, 1605-7422, V. 11958

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Interactions with Tissue and Cells XXXIII; and Advanced Photonics in Urology*, edited by Bennett L. Ibey, Norbert Linz, Proc. of SPIE 11958, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## NUMERICAL APPROACHES SIMULATING LASER-TISSUE INTERACTIONS AND RESPONSE

---

- 11958 02 **Two-level model of melanin absorption in picosecond laser skin treatment** [11958-4]
- 11958 03 **Optical properties of porcine skin and subcutaneous tissue following various methods of cold storage** [11958-5]

---

## ADVANCED IMAGING APPROACHES

---

- 11958 04 **Reducing racial bias in transcutaneous measurements with mobile phone camera based spatially resolved diffuse reflectance** [11958-7]

---

## NOVEL APPLICATIONS OF LASERS AND LIGHT IN BIOMEDICINE

---

- 11958 05 **Metrology of tissue pathology using optical self-healing** [11958-10]
- 11958 06 **Distinguishing photothermal from photochemical damage processes at 447 nm** [11958-12]
- 11958 07 **Femtosecond laser corneal damage thresholds at 1540 nm and 2000 nm** [11958-13]

---

## BIOMOLECULAR AND BIOPHYSICAL RESPONSE OF CELLS AND TISSUES TO ELECTROMAGNETIC WAVES

---

- 11958 08 **Biophotonics web application for computer simulations in diffuse optics: fostering multidisciplinary education and research** [11958-18]

---

## IMAGING AND DETECTION

---

- 11958 09 **Widely tunable near-infrared Raman fiber laser irradiating breast cancer cells leads to cell size reduction and increased granularity of intracellular components as a precursor to cell death** [11958-24]
- 11958 0A **Optical monitoring in kidney transplant** [11958-25]

11958 0B      **Structured illuminated microscopy virtual pathology for real-time large-specimen surgical pathology imaging using SYBR gold and eosin [11958-26]**

---

**ADVANCED LASER TREATMENT II**

---

11958 0C      **An endoscopy capsule for well-confined and angle-controlled photothermal mucosa ablation [11958-28]**

11958 0D      **Targeted MRI-guided transurethral ultrasound ablation (TULSA) treatment of prostate cancer and concordant benign prostatic hyperplasia: results of a single-center retrospective study [11958-31]**

---

**ADVANCED LASER TREATMENT III**

---

11958 0E      **Increased ablation efficiency in hard and soft tissues using an annular beam [11958-32]**

11958 0F      **MRI-guided transurethral ultrasound ablation (TULSA) targeted therapy of urinary retention due to benign prostatic obstruction (BPO) and concordant prostate cancer [11958-34]**

---

**POSTER SESSION**

---

11958 0G      **Functional optical coherence tomography in the study of plant-sound interactions [11958-37]**

11958 0H      **Optical techniques for imaging activity in fibers innervating saccular hair cells [11958-38]**

11958 0I      **Multidisciplinary teaching and learning biophotonics: assessing the effectiveness of fully online outreach events [11958-39]**
