Content

Preface	07
IAPRI Welcome	09
Content	12
Chapter 1 – Industry 4.0	15
Deployable kirigami cushioning design for e-commerce packaging (OP) ^[9]	17
Carbon dioxide concentration in carbonated beverages: a comparison between Zahm & Nagel e LAB.CO methods (OP) ^[50]	22
E-commerce packaging: Challenges, opportunities, and trends (OP) ^[69]	29
Chapter 2 – Sustainability, recycling and renewable materials	31
Improved recyclability of multi-layer, dyed, and contaminated packaging by plasma processing (OP) ^[6]	33
Recyclable mono materials for packaging of fresh chicken filets- new design for recycling in circular economy (OP) ^[12] PTS	34
Flexible plastic packaging for instant coffee: Product characteristics and packaging properties (OP) ^[27]	35
Development of peach pit waste-filled polyolefin biocomposite with maleic anhydride coupling agent (PP) ^[40]	36
Packaging and its impact on the value chain towards circular models (PP) [44]	38
A forensic approach to Life Cycle Assessment (OP) ^[47]	44
Be careful what you ask for; communicating to citizens how to make packaging waste separation decisions in two regions in Sweden and The Netherlands (OP) ^[54]	45
Circular “on the go” packaging and disposables through increased reuse and recycling (PP) ^[53]	61
Plastic degradation through mycelium (filamentous fungi) for sustainable packaging applications (PP) ^[68]	63
Chapter 3 – Packaging dynamics (vibrations and shocks)	69
ISTA Distribution Environment Data Collection Program update (OP) ^[6]	71
Estimation method for velocity on truck bed (OP) ^[19]	76
Transmissivity in broadband random vibration testing (OP) ^[21]	81
Kurtosis response spectrum analysis of Gaussian random vibration derived from vehicle vibration (PP) ^[22]	82
Service life prediction of expanded polystyrene foam based on Bayesian inference (OP) ^[59]	85
Correlation between horizontal acceleration testing and tilt testing for load stability (OP) ^[72]	90
Chapter 4 – Packaging materials	91
Estimating method of compression strength for regular slotted container of any size (OP) ^[5]	93
Thermoformed containers based on starch and starch/biochar composites (OP) ^[4]	99
Study and characterisation of palletizing films used in the field of freight transport (PP) ^[15]	103
Study on adhesion properties of superhydrophobic coatings on aluminum substrates (PP) ^[51]	106
Flexible recyclable packaging materials for the food industry (OP) ^[62]	110
Chapter 5 – Active and intelligent packaging	111
Implementation of cellulose-based antimicrobial packaging with enhanced barrier performance (OP) ^[53]	113
Evaluation of two intelligent packaging prototypes with a pH indicator to determine spoilage of cow milk (OP) ^[75]	117
Encapsulation of Hexanal in γ -CDMOF for active packaging applications (PP) ^[79]	118
Incorporation of orange blossom essential oil (Citrus aurantium) in polyethylene films to fabricate antimicrobial active packaging for corn tortillas (OP) ^[81]	120

Evaluation of the potential of functionalised calcium carbonate as carrier for essential oils with regard to antimicrobial packaging applications (OP) ^[90] PTS	121
Chapter 6 - Packaging design and innovations	123
Development of a heuristic guide for packaging design (OP) ^[70]	125
Design heuristics for innovative packaging ideation (OP) ^[71]	138
Leveraging relational database management systems to improve packaging design (OP) ^[86]	150
Chapter 7 - Food packaging, barrier properties and migration	155
Influence of water vapor pressure on the measured WVTR of high barrier polymer dispersion coated paper (OP) ^[13]	157
Effects of polymer structure and temperature on the permeability of key aroma compound in fresh-cut durian (OP) ^[55]	163
Inhibitory effect of visible light on sitophilus oryzae in rice packaging (OP) ^[56]	170
Inverse method for estimating diffusion coefficient of oxygen in different polymeric packaging materials (PP) ^[58]	176
Overall and specific migration of phthalates from cling films available on the Mexican market (OP) ^[82]	177
Chapter 8 - Packaging logistics	179
Analysis to develop a packaging engineering model for e-commerce in the grocery market (OP) ^[32]	181
The effect of pallet top deck stiffness on the compression strength of asymmetrically supported corrugated boxes (OP) ^[49]	198
The effect of storage conditions on stretch film containment force (OP) ^[66]	199
Wood pallet performance analysis with palletized drums in distribution and warehousing (OP) ^[87]	203
Chapter 9 - Consumer research and marketing	213
Packaging value for the consumer - Findings of the Finnish LOHAS2020 Study (OP) ^[52]	215
Chapter 10 - Testing analysis and quality control	225
A novel mechanical-shock fragility test of a product for simple stochastic cushioning design (OP) ^[11]	227
Industrial leak testing of dangerous goods packagings (OP) ^[46] PTS	228
Chapter 11 - Packaging education	229
Mapping Class Learning Outcomes to University Learning Goals at Michigan State University's School of Packaging (OP) ^[48]	231
Chapter 12 - Posters	239
Study and characterisation of palletizing films used in the field of freight transport ^[15]	241
Kurtosis response spectrum analysis of Gaussian random vibration derived from vehicle vibration ^[22]	242
Inverse method for estimating diffusion coefficient of oxygen in different polymeric packaging materials ^[58]	243
Development of peach pit waste-filled polyolefin biocomposite with maleic anhydride coupling agent ^[40]	244
Packaging and its impact on the value chain towards circular models ^[44]	245
Study on adhesion properties of superhydrophobic coatings on aluminum substrates ^[51]	246
Circular "on the go" packaging and disposables through increased reuse and recycling ^[63]	247
Encapsulation of Hexanal in γ -CDMOF for active packaging applications ^[79]	248
Plastic degradation through mycelium (filamentous fungi) for sustainable packaging applications ^[88]	249
