2022 IEEE Conference on Software Testing, Verification and Validation (ICST 2022)

Virtual Conference
4-13 April 2022
# Table of Contents

Message from the General Chairs ................................................................. xi  
Message from the Program Chairs .............................................................. xiii  
Organizing Committee .................................................................................. xiv  
Program Committee ..................................................................................... xvi  
Keynotes ........................................................................................................... xix  
Sponsors ........................................................................................................... xxii  

## Research Track

GUI Test Transfer from Web to Android .......................................................... 1  
*Jun-Wei Lin (University of California, Irvine, USA) and Sam Malek*  
(University of California, Irvine, USA)  

Machine Learning Based Invariant Generation: A Framework and Reproducibility Study .................... 12  
*Jan Haltermann (University of Oldenburg, Germany) and Heike Wehrheim*  
(University of Oldenburg, Germany)  

IFRIT: Focused Testing through Deep Reinforcement Learning ......................................................... 24  
*Andrea Romdhana (University of Genoa, Italy; Security & Trust Unit, Italy), Mariano Ceccato (University of Verona, Italy), Alessio Merlo (University of Genoa, Italy), and Paolo Tonella (Università della Svizzera Italiana, Switzerland)*

Metamorphic Fuzzing of C++ Libraries .................................................................................. 35  
*Andrei Lascu (Imperial College London, United Kingdom), Alastair F Donaldson (Imperial College London, United Kingdom), Tobias Grosser (University of Edinburgh, United Kingdom), and Torsten Hoefler (ETH Zurich, Switzerland)*

Smoke Testing of Cloud Systems .................................................................................. 47  
*Cecilio Cannavacciuolo (Anoki and University of Milano-Bicocca) and Leonardo Mariani (University of Milano-Bicocca)*

Testing Software in Production Environments with Data from the Field ........................................... 58  
*Luca Gazzola (University of Milan-Bicocca, Italy), Leonardo Mariani (University of Milan-Bicocca, Italy), Matteo Orrú (University of Milan-Bicocca, Italy), Mauro Pezzè (Università della Svizzera Italiana, Switzerland; SIT Schaffhausen Institute of Technology, Switzerland), and Martin Tappler (Graz University of Technology, Austria; Silicon Austria Labs, TU Graz - SAL DES Lab, Austria)*
Applying Symbolic Execution to Test Implementations of a Network Protocol Against Its Specification ................................................................. 70
Hooman Asadian (Uppsala University, Sweden), Paul Fiterău-Broștean (Uppsala University, Sweden), Bengt Jonsson (Uppsala University, Sweden), and Konstantinos Sagonas (Uppsala University, Sweden)

A Survey on How Test Flakiness Affects Developers and What Support They Need to Address It... 82
Martin Gruber (University of Passau, Germany) and Gordon Fraser (University of Passau, Germany)

Evaluating Features for Machine Learning Detection of Order- and Non-Order-Dependent Flaky Tests ........................................................................................................................................ 93
Owain Parry (University of Sheffield), Gregory M. Kapfhammer (Allegheny College), Michael Hilton (Carnegie Mellon University), and Phil McMinn (University of Sheffield)

JavaScript Instrumentation for Search-Based Software Testing: A Study with RESTful APIs ........ 105
Man Zhang (Kristiania University College, Norway), Asma Belhadi (Kristiania University College, Norway), and Andrea Arcuri (Kristiania University College and OsloMet, Norway)

Patterns of Code-to-Test Co-Evolution for Automated Test Suite Maintenance ........................................... 116
Samih Shimmi (Northern Illinois University) and Mona Rahimi (Northern Illinois University)

An Empirical Study of IR-Based Bug Localization for Deep Learning-based Software .................. 128
Misoo Kim (Sungkyunkwan University, Republic of Korea), Youngkyoung Kim (Sungkyunkwan University, Republic of Korea), and Eunseok Lee (Sungkyunkwan University, Republic of Korea)

Automated Repair of Responsive Web Page Layouts ........................................................................ 140
Ibrahim Althomali (University of Sheffield), Gregory M. Kapfhammer (Allegheny College), and Phil McMinn (University of Sheffield)

To Seed or Not to Seed? An Empirical Analysis of Usage of Seeds for Testing in Machine Learning Projects .................................................................................................................. 151
Saikat Dutta (University of Illinois at Urbana-Champaign, USA), Anshul Arunachalam (University of Illinois at Urbana-Champaign, USA), and Sasa Misailovic (University of Illinois at Urbana-Champaign, USA)

Learning Realistic Mutations: Bug Creation for Neural Bug Detectors ............................................. 162
Cedric Richter (University of Oldenburg, Germany) and Heike Wehrheim (University of Oldenburg, Germany)

TESRAC: A Framework for Test Suite Reduction Assessment at Scale ........................................ 174
João Becho (University of Lisbon), Frederico Cerveira (University of Coimbra), João Leitão (NOVA LINCS & FCT NOVA University of Lisbon), and Rui André Oliveira (NOVA University of Lisbon)

Symbolic Verification of Message Signatures in MPI ................................................................. 185
Hengbiao Yu (National University of Defense Technology, China), Banghu Yin (National University of Defense Technology, China), and Xin Yi (National University of Defense Technology, China)

Providing Real-Time Assistance for Repairing Runtime Exceptions using Stack Overflow Posts ... 196
Sonal Mahajan (Fujitsu Research of America, Inc.) and Mukul R. Prasad (Fujitsu Research of America, Inc.)
Industry Track

FAUSTA: Scaling Dynamic Analysis with Traffic Generation at WhatsApp ........................................... 267
   Ke Mao (Meta), Timotej Kapus (Meta), Lambros Petrou (Meta), Ákos Hajdu (Meta), Matteo Marescotti (Meta), Andreas Löscher (Meta), Mark Harman (Meta), and Dino Distefano (Meta)

Less is More: Simplification of Test Scenarios for Autonomous Driving System Testing ....................... 279
   Paolo Arcaini (National Institute of Informatics, Japan), Xiao-Yi Zhang (National Institute of Informatics, Japan), and Fuyuki Ishikawa (National Institute of Informatics, Japan)

Repairing Fragile GUI Test Cases Using Word and Layout Embedding ........................................... 291
   Juyeon Yoon (KAIST, Republic of Korea), Seungjoon Chung (KAIST, Republic of Korea), Kihyuck Shin (Samsung Electronics, Republic of Korea), Jinhan Kim (KAIST, Republic of Korea), Shin Hong (Handong Global University, Republic of Korea), and Shin Yoo (KAIST, Republic of Korea)

Comparing Fuzzers on a Level Playing Field with FuzzBench ......................................................... 302
   Dario Asprone (University College London, London), Jonathan Metzman (Google), Abhishek Arya (Google), Giovani Guizzo (University College London, London), and Federica Sarro (University College London, London)

Robustness Assessment and Improvement of a Neural Network for Blood Oxygen Pressure Estimation ................................................................. 312
   Paolo Arcaini (National Institute of Informatics, Japan), Andrea Bombarda (University of Bergamo, Italy), Silvia Bonfanti (University of Bergamo, Italy), Angelo Gargantini (University of Bergamo, Italy), Daniele Gamba (AI Sent S.r.l., Italy), and Rita Pedercini (AI Sent S.r.l., Italy)
Automatic Error Classification and Root Cause Determination while Replaying Recorded Workload Data at SAP HANA

Neetha Jambigi (University of Innsbruck, Austria), Thomas Bach (SAP, Germany), Felix Schabenack (SAP, Germany), and Michael Felderer (University of Innsbruck, Austria)

Testing a PL/I Compiler Using Precomputation-based Program Generation

Jesse Postema (Universiteit Van Amsterdam, The Netherlands), Johan Fabry (Raincode Labs, Belgium), Yannick Barthol (Raincode Labs, Belgium), and Ana Oprescu (Universiteit Van Amsterdam, The Netherlands)

SUPERNOVA: Automating Test Selection and Defect Prevention in AAA Video Games Using Risk Based Testing and Machine Learning

Alexander Senchenko (Electronic Arts, Canada), Jordan Patterson (Electronic Arts, Canada), Hamman Samuel (Electronic Arts, Canada), and Dan Ispir (Electronic Arts, Romania)

Translating EULYNX SysML Models into Symbolic Transition Systems for Model-Based Testing of Railway Signaling Systems

Tobias Bachmann (UvA), Djurre van Der Wal (UT), Machiel van Der Bijl (Axini), Daan van Der Meij (ProRail), and Ana Oprescu (UvA)

Harvesting Production GraphQL Queries to Detect Schema Faults

Louise Zetterlund (Redeye AB, Sweden), Deepika Tiwari (KTH Royal Institute of Technology, Sweden), Martin Monperrus (KTH Royal Institute of Technology, Sweden), and Benoit Baudry (KTH Royal Institute of Technology, Sweden)

A Framework for Automated API Fuzzing at Enterprise Scale

Riyadh Mahmood (The Aerospace Corporation, USA), Jay Pennington (The Aerospace Corporation, USA), Danny Tsang (The Aerospace Corporation, USA), Tan Tran (The Aerospace Corporation, USA), and Andrea Bogle (The Aerospace Corporation, USA)

Testing Tools

ASSESSOR: A PO-Based WebDriver Test Suites Generator from Selenium IDE Recordings

Maurizio Leotta (Università di Genova, Italy), Antonio Molinari (Università di Genova, Italy), and Filippo Ricca (Università di Genova, Italy)

CITRUS: Automated Unit Testing Tool for Real-World C++ Programs

Robert Sebastian Herlim (KAIST, South Korea), Yunho Kim (Hanyang University, South Korea), and Moonzoo Kim (KAIST, South Korea)

Model-based Testing of Scratch Programs

Katharina Götz (University of Passau, Germany), Patric Feldmeier (University of Passau, Germany), and Gordon Fraser (University of Passau, Germany)

RiverGame — A Game Testing Tool using Artificial Intelligence

Ciprian Paduraru (University of Bucharest, Romania), Miruna Paduraru (University of Bucharest, Romania), and Alin Stefanescu (University of Bucharest, Romania)
SIFT: A Tool for Property Directed Symbolic Execution of Multithreaded Software ........................................ 433
Tuba Yavuz (University of Florida, USA)

TACKLETEST: A Tool for Amplifying Test Generation via Type-Based Combinatorial Coverage ... 444
Rachel Tzoref-Brill (IBM Research, Israel), Saurabh Sinha (IBM T.J.
Watson Research Center, USA), Antonio Abu Nassar (IBM Research,
Israel), Victoria Goldin (IBM Research, Israel), and Haim Kermany (IBM
Research, Israel)

Tool Demo

DTLS-Fuzzer: A DTLS Protocol State Fuzzer .......................................................................................... 456
Paul Fiterău-Broștean (Uppsala University, Sweden), Bengt Jonsson
(Uppsala University, Sweden), Konstantinos Sagonas (Uppsala
University, Sweden), and Fredrik Tåquist (Uppsala University, Sweden)

Journal First

Summary of An Effective Formulation of the Multi-criteria Test Suite Minimization Problem ...... 459
Okan Örsan Özener (Ozyegin University, Turkey) and Hasan Sözer
(Ozyegin University, Turkey)

Summary of SWFC-ART: A Cost-Effective Approach for Fixed-Size-Candidate-Set Adaptive
Random Testing through Small World Graphs .............................................................. 460
Muhammad Ashfaq (Jiangsu University, China; University of Trento,
Italy), Rubing Huang (Jiangsu University, China; Macau University of
Science and Technology, China), Dave Towey (University of Nottingham
Ningbo China, China), Michael Omari (Takoradi Technical University,
Ghana), Dmitry Yashunin (Harman X, Russia), Patrick Kwaku Kudjo
(University of Professional Studies, Ghana), and Tao Zhang (Macau
University of Science and Technology, China)

Summary of Model Checking C++ Programs ............................................................................ 461
Felipe R. Monteiro (Federal University of Amazonas, Brazil), Mikhail
R. Gadelha (Igalia, Spain), and Lucas C. Cordeiro (University of
Manchester, UK)

An Experimental and Practical Study on the Equivalent Mutant Connection: An Evolutionary
Approach .......................................................................................................................... 462
Pedro Delgado-Pérez (Universidad de Cádiz, Spain) and Francisco
Chicano (Universidad de Málaga, Spain)

Documentation-based Functional Constraint Generation for Library Methods .................... 463
Renhe Jiang (Nanjing University, China), Zhengzhao Chen (Nanjing
University, China), Yu Pei (The Hong Kong Polytechnic University,
China), Minxue Pan (Nanjing University, China), Tian Zhang (Nanjing
University, China), and Xuandong Li (Nanjing University, China)

Learning-based Mutant Reduction Using Fine-grained Mutation Operators .......................... 464
Yunho Kim (Hanyang University) and Shin Hong (Handong Global
University)
Posters

Locating Code Omission Error Due to Incorrect Polymorphic Method Call ................................. 465
Sudakshina Dutta (Indian Institute of Technology Goa, India) and
Debarshi Kumar Sanyal (Indian Association for the Cultivation of
Science, India)

Poster: A gCov based New Profiler, gMCov, for MC/DC and SC-MCC ................................. 469
Monika Rani Golla (National Institute of Technology Warangal, India)
and Sangharatna Godboley (National Institute of Technology Warangal,
India)

Poster: EBFL-An Ensemble Classifier Based Fault Localization ................................. 473
Arpita Dutta (National University of Singapore, Singapore)

Doctoral Symposium

Automated GUI-Based Software-Testing Using Deep Neuroevolution ................................. 477
Daniel Zimmermann (FZI Research Center for Information Technology,
Germany)

Automated Program Repair and Test Overfitting: Measurements and Approaches using Formal
Methods ........................................................................................................................................ 480
Amirfarhad Nilizadeh (University of Central Florida, USA)

Debugger-Driven Embedded Fuzzing ......................................................................................... 483
Max Eisele (Robert Bosch GmbH, Germany)

Model-Based Testing for System-Level Safety of Autonomous Underwater Robots .................. 486
Sergio Quijano (IT University of Copenhagen, Denmark)

Author Index .................................................................................................................................. 489
