Table of Contents

Main Track

Using Agent-Based Simulator to Assess Interventions Against COVID-19 in a Small Community Generated from Map Data (Page 1)
Mitsuteru Abe *(University of Tsukuba)*
Fabio Tanaka *(University of Tsukuba)*
Jair Pereira Junior *(University of Tsukuba)*
Anna Bogdanova *(University of Tsukuba)*
Tetsuya Sakurai *(University of Tsukuba)*
Claus Aranha *(University of Tsukuba)*

Multi-Objective Reinforcement Learning with Non-Linear Scalarization (Page 9)
Mridul Agarwal *(Purdue University)*
Vaneet Aggarwal *(Purdue University)*
Tian Lan *(George Washington University)*

Be Considerate: Avoiding Negative Side Effects in Reinforcement Learning (Page 18)
Parand Alizadeh Alamdari *(University of Toronto & Vector Institute)*
Toryn Q. Klassen *(University of Toronto & Vector Institute)*
Rodrigo Toro Icarte *(Pontificia Universidad Católica de Chile & Vector Institute)*
Sheila A. McIlraith *(University of Toronto & Vector Institute)*

Hacking the Colony: On the Disruptive Effect of Misleading Pheromone and How to Defend against It (Page 27)
Ashay Aswale *(Worcester Polytechnic Institute)*
Antonio López *(Worcester Polytechnic Institute)*
Aukkawut Ammartayakun *(Worcester Polytechnic Institute)*
Carlo Pinciroli *(Worcester Polytechnic Institute)*

State Supervised Steering Function for Sampling-based Kinodynamic Planning (Page 35)
Pranav Atreya *(University of Texas at Austin)*
Joydeep Biswas *(University of Texas at Austin)*

Unbiased Asymmetric Reinforcement Learning under Partial Observability (Page 44)
Andrea Baisero *(Northeastern University)*
Christopher Amato *(Northeastern University)*

Multi-Agent Heterogeneous Digital Twin Framework with Dynamic Responsibility Allocation for Complex Task Simulation (Page 53)
Adrian Simon Bauer *(German Aerospace Center (DLR) & Robotics and Mechatronics Center (RMC))*
Anne Köpken *(German Aerospace Center (DLR) & Robotics and Mechatronics Center (RMC))*
Daniel Leidner *(German Aerospace Center (DLR) & Robotics and Mechatronics Center (RMC))*

Reasoning about Human-Friendly Strategies in Repeated Keyword Auctions (Page 62)
Francesco Belardinelli *(Université d'Evry)*
Wojtek Jamroga *(University of Luxembourg & Institute of Computer Science, Polish Academy of Sciences)*
Vadim Malvone *(Télécom Paris)*
Munyque Mittelmann *(Université de Toulouse - IRIT)*
Aniello Murano *(University of Naples Federico II)*
Laurent Perrussel *(Université de Toulouse - IRIT)*

COPALZ: A Computational Model of Pathological Appraisal Biases for an Interactive Virtual Alzheimer Patient (Page 72)
Amine Benamara *(CNRS-LISN, Université Paris-Saclay)*
Jean-Claude Martin *(CNRS-LISN, Université Paris-Saclay)*
Elise Prigent *(CNRS-LISN, Université Paris-Saclay)*
Laurence Chaby *(Sorbonne Université)*
Mohamed Chetouani *(Sorbonne Université)*
Jean Zagdoun *(Sorbonne Université)*
Hélène Vanderstichel *(CIREL - EA 4354, Université de Lille)*
Sébastien Dacunha *(Hôpitaux de Paris)*
Brian Ravenet *(CNRS-LISN, Université Paris-Saclay)*

Computing Balanced Solutions for Large International Kidney Exchange Schemes (Page 82)
Márton Benedek *(KRTK, Institute of Economics)*
Péter Biró *(KRTK, Institute of Economics)*
Walter Kern *(University of Twente)*
Daniël Paulusma *(Durham University)*

Agent-based Modeling and Simulation for Malware Spreading in D2D Networks (Page 91)
Ziyad Benomar *(Orange Labs)*
Chaima Ghribi *(Orange Labs)*
Elie Cali *(Orange Labs)*
Alexander Hinsen *(Weierstrass Institute for Applied Analysis and Stochastics)*
Benedikt Jahnel *(Weierstrass Institute for Applied Analysis and Stochastics)*

Quantitative Group Trust: A Two-Stage Verification Approach (Page 100)
Jamal Bentahar *(Concordia University)*
Nagat Drawel *(Concordia University)*
Abdeladim Sadiki *(Concordia University)*

Asynchronous Opinion Dynamics in Social Networks (Page 109)
Petra Berenbrink *(Universität Hamburg)*
Martin Hoefer *(Goethe University Frankfurt)*
Dominik Kaaser *(Universität Hamburg)*
Pascal Lenzner *(Hasso Plattner Institute)*
Malin Rau *(Universität Hamburg)*
Daniel Schmand *(Universität Bremen)*

Interpretable Preference-based Reinforcement Learning with Tree-Structured Reward Functions (Page 118)
Tom Bewley *(University of Bristol)*
Freddy Lecue *(CortAIx, Thales)*

Multivariate Algorithmics for Eliminating Envy by Donating Goods (Page 127)
Niclas Boehmer *(TU Berlin)*
Robert Bredereck *(Humboldt-Universität zu Berlin)*
Klaus Heeger *(TU Berlin)*
Dušan Knop *(Czech Technical University in Prague)*
Junjie Luo *(Nanyang Technological University)*

Proportional Representation in Matching Markets: Selecting Multiple Matchings under Dichotomous Preferences (Page 136)
Niclas Boehmer *(TU Berlin)*
Markus Brill *(TU Berlin)*
Ulrike Schmidt-Kraepelin *(TU Berlin)*

A Hierarchical Bayesian Process for Inverse RL in Partially-Controlled Environments (Page 145)
Kenneth Bogert *(University of North Carolina at Asheville)*
Prashant Doshi *(University of Georgia)*

Little House (Seat) on the Prairie: Compactness, Gerrymandering, and Population Distribution (Page 154)
Allan Borodin *(University of Toronto)*
Omer Lev *(Ben-Gurion University of the Negev)*
Nisarg Shah *(University of Toronto)*
Tyrone Strangway *(Ben-Gurion University of the Negev)*

Knowledge Transmission and Improvement Across Generations do not Need Strong Selection (Page 163)
Yasser Bourahla *(University Grenoble Alpes, Inria, CNRS, Grenoble INP, LIG)*
Manuel Atencia *(Universidad de Málaga)*
Jérôme Euzenat *(University Grenoble Alpes, Inria, CNRS, Grenoble INP, LIG)*

Explainability in Multi-Agent Path/Motion Planning: User-study-driven Taxonomy and Requirements (Page 172)
Martim Brandao *(King's College London)*
Masoumeh Mansouri *(University of Birmingham)*
Areeb Mohammed *(King's College London)*
Paul Luff *(King's College London)*
Amanda Coles *(King's College London)*

Relaxed Notions of Condorcet-Consistency and Efficiency for Strategyproof Social Decision Schemes (Page 181)
Felix Brandt *(Technical University of Munich)*
Patrick Lederer *(Technical University of Munich)*
René Romen *(Technical University of Munich)*

Fair Stable Matching Meets Correlated Preferences (Page 190)
Angelina Brilliantova *(Rochester Institute of Technology)*
Hadi Hosseini *(The Pennsylvania State University)*

Exploiting Causal Structure for Transportability in Online, Multi-Agent Environments (Page 199)
Axel Browne *(Loyola Marymount University)*
Andrew Forney *(Loyola Marymount University)*

Beyond Cake Cutting: Allocating Homogeneous Divisible Goods (Page 208)
Ioannis Caragiannis *(Aarhus University)*
Vasilis Gkatzelis *(Drexel University)*
Alexandros Psomas *(Perdue University)*
Daniel Schoepflin *(Drexel University)*

Planning, Execution, and Adaptation for Multi-Robot Systems using Probabilistic and Temporal Planning (Page 217)
Yaniel Carreno *(Heriot-Watt University & The University of Edinburgh)*
Jun Hao Alvin Ng *(Heriot-Watt University & The University of Edinburgh)*
Yvan Petillot *(Heriot-Watt University & The University of Edinburgh)*
Ron Petrick *(Heriot-Watt University & The University of Edinburgh)*

Bayesian Persuasion Meets Mechanism Design: Going Beyond Intractability with Type Reporting (Page 226)
Matteo Castiglioni *(Politecnico di Milano)*
Alberto Marchesi *(Politecnico di Milano)*
Nicola Gatti *(Politecnico di Milano)*

Best-Response Bayesian Reinforcement Learning with Bayes-adaptive POMDPs for Centaurs (Page 235)
Mustafa Mert Çelikok *(Aalto University)*
Frans A. Oliehoek *(Delft University of Technology)*
Samuel Kaski *(Aalto University & University of Manchester)*

Anomaly Guided Policy Learning from Imperfect Demonstrations (Page 244)
Zi-Xuan Chen *(Nanjing University)*
Xin-Qiang Cai *(Nanjing University)*
Yuan Jiang *(Nanjing University)*
Zhi-Hua Zhou *(Nanjing University)*

Individual-Level Inverse Reinforcement Learning for Mean Field Games (Page 253)
Yang Chen *(The University of Auckland)*
Libo Zhang *(The University of Auckland)*
Jiamou Liu *(The University of Auckland)*
Shuyue Hu *(National University of Singapore)*

Simulating Multiwinner Voting Rules in Judgment Aggregation (Page 263)
Julian Chingoma *(University of Amsterdam)*
Ulle Endriss *(University of Amsterdam)*
Ronald de Haan *(University of Amsterdam)*

Coordinated Multi-Agent Pathfinding for Drones and Trucks over Road Networks (Page 272)
Shushman Choudhury *(Stanford University)*
Kiril Solovey *(Stanford University)*
Mykel Kochenderfer *(Stanford University)*
Marco Pavone *(Stanford University)*

Pippi: Practical Protocol Instantiation (Page 281)
Samuel H. Christie *(North Carolina State University)*
Amit K. Chopra *(Lancaster University)*
Munindar P. Singh *(North Carolina State University)*

Optimizing Multi-Agent Coordination via Hierarchical Graph Probabilistic Recursive Reasoning (Page 290)
Saar Cohen *(Bar-Ilan University)*
Noa Agmon *(Bar-Ilan University)*

Pareto Optimal and Popular House Allocation with Lower and Upper Quotas (Page 300)
Ágnes Cseh *(Institute of Economics, Centre for Economic and Regional Studies)*
Tobias Friedrich *(Hasso Plattner Institute, University of Potsdam)*
Jannik Peters *(TU Berlin)*

Three-Dimensional Popular Matching with Cyclic Preferences (Page 309)
Ágnes Cseh *(Institute of Economics, Centre for Economic and Regional Studies)*
Jannik Peters *(TU Berlin)*

Poincaré-Bendixson Limit Sets in Multi-Agent Learning (Page 318)
Aleksander Czechowski *(Delft University of Technology)*
Georgios Piliouras *(Singapore University of Technology and Design)*

A Distributed Differentially Private Algorithm for Resource Allocation in Unboundedly Large Settings (Page 327)
Panayiotis Danassis *(École Polytechnique Fédérale de Lausanne (EPFL))*
Aleksei Triastcyn *(École Polytechnique Fédérale de Lausanne (EPFL))*
Boi Faltings *(École Polytechnique Fédérale de Lausanne (EPFL))*

Computation and Bribery of Voting Power in Delegative Simple Games (Page 336)
Gianlorenzo D'Angelo *(Gran Sasso Science Institute)*
Esmaeil Delfaraz *(Gran Sasso Science Institute)*
Hugo Gilbert *(Université Paris-Dauphine, Université PSL, CNRS, LAMSADE)*

Budgeted Combinatorial Multi-Armed Bandits (Page 345)
Debojit Das *(International Institute of Information Technology, Hyderabad)*
Shweta Jain *(Indian Institute of Technology, Ropar)*
Sujit Gujar *(International Institute of Information Technology, Hyderabad)*

Efficient Approximation Algorithms for the Inverse Semivalue Problem (Page 354)
Ilias Diakonikolas *(University of Wisconsin-Madison)*
Chrystalla Pavlou *(TurinTech AI)*
John Peebles *(Princeton University)*
Alistair Stewart *(Web 3 Foundation)*

Multiagent Dynamics of Gradual Argumentation Semantics (Page 363)
Louise Dupuis de Tarlé *(Université Paris-Dauphine)*
Elise Bonzon *(Université de Paris)*
Nicolas Maudet *(Sorbonne Université, CNRS)*

How to Fairly Allocate Easy and Difficult Chores (Page 372)
Soroush Ebadian *(University of Toronto)*
Dominik Peters *(University of Toronto)*
Nisarg Shah *(University of Toronto)*

Scalable Multi-Agent Model-Based Reinforcement Learning (Page 381)
Vladimir Egorov *(JetBrains Research & HSE University)*
Alexei Shpilman *(JetBrains Research & HSE University)*

Facility Location With Approval Preferences: Strategyproofness and Fairness (Page 391)
Edith Elkind *(University of Oxford)*
Minming Li *(City University of Hong Kong)*
Houyu Zhou *(City University of Hong Kong)*

Betweenness Centrality in Multi-Agent Path Finding (Page 400)
Eric Ewing *(University of Southern California)*
Jingyao Ren *(University of Southern California)*
Dhvani Kansara *(University of Southern California)*
Vikraman Sathiyanarayanan *(University of Southern California)*
Nora Ayanian *(University of Southern California)*

Welfare vs. Representation in Participatory Budgeting (Page 409)
Roy Fairstein *(Ben Gurion University of the Negev)*
Dan Vilenchik *(Ben Gurion University of the Negev)*
Reshef Meir *(Technion-Israel Institute of Technology)*
Kobi Gal *(Ben Gurion University of the Negev & University of Edinburgh)*

A Path-following Polynomial Equations Systems Approach for Computing Nash Equilibria (Page 418)

Hélène Fargier *(Université de Toulouse, IRIT)*
Paul Jourdan *(Université de Toulouse, INRAE-MIAT)*
Régis Sabbadin *(Université de Toulouse, INRAE-MIAT)*

Ensemble and Incremental Learning for Norm Violation Detection (Page 427)
Thiago Freitas dos Santos *(Artificial Intelligence Research Institute (IIIA-CSIC) & Universitat Autònoma de Barcelona)*
Nardine Osman *(Artificial Intelligence Research Institute (IIIA-CSIC))*
Marco Schorlemmer *(Artificial Intelligence Research Institute (IIIA-CSIC))*

The Price of Majority Support (Page 436)
Robin Fritsch *(ETH Zürich)*
Roger Wattenhofer *(ETH Zürich)*

A Symbolic Representation for Probabilistic Dynamic Epistemic Logic (Page 445)
Sébastien Gamblin *(Normandie University, UNICAEN, ENSICAEN, CNRS, GREYC)*
Alexandre Niveau *(Normandie University, UNICAEN, ENSICAEN, CNRS, GREYC)*
Maroua Bouzid *(Normandie University, UNICAEN, ENSICAEN, CNRS, GREYC)*

Fully-Autonomous, Vision-based Traffic Signal Control: From Simulation to Reality (Page 454)
Deepeka Garg *(Aston University)*
Maria Chli *(Aston University)*
George Vogiatzis *(Aston University)*

One-Sided Matching Markets with Endowments: Equilibria and Algorithms (Page 463)
Jugal Garg *(University of Illinois at Urbana-Champaign)*
Thorben Tröbst *(University of California, Irvine)*
Vijay V. Vazirani *(University of California, Irvine)*

Negotiated Path Planning for Non-Cooperative Multi-Robot Systems (Page 472)
Anna Gautier *(University of Oxford)*
Alex Stephens *(University of Oxford)*
Bruno Lacerda *(University of Oxford)*
Nick Hawes *(University of Oxford)*
Michael Wooldridge *(University of Oxford)*

Refined Hardness of Distance-Optimal Multi-Agent Path Finding (Page 481)
Tzvika Geft *(Tel Aviv University)*
Dan Halperin *(Tel Aviv University)*

Concave Utility Reinforcement Learning: The Mean-field Game Viewpoint (Page 489)
Matthieu Geist *(Google)*
Julien Pérolat *(Deepmind)*
Mathieu Laurière *(Google)*
Romuald Elie *(Deepmind)*
Sarah Perrin *(Univ. Lille, CNRS, Inria, Centrale Lille)*
Oliver Bachem *(Google)*
Rémi Munos *(Deepmind)*
Olivier Pietquin *(Google)*

D3C: Reducing the Price of Anarchy in Multi-Agent Learning (Page 498)
Ian Gemp *(DeepMind)*
Kevin R. McKee *(DeepMind)*
Richard Everett *(DeepMind)*
Edgar Duéñez-Guzmán *(DeepMind)*
Yoram Bachrach *(DeepMind)*
David Balduzzi *(XTX Markets)*
Andrea Tacchetti *(DeepMind)*

Sample-based Approximation of Nash in Large Many-Player Games via Gradient Descent (Page 507)
Ian Gemp *(DeepMind)*
Rahul Savani *(University of Liverpool)*
Marc Lanctot *(DeepMind)*
Yoram Bachrach *(DeepMind)*
Thomas Anthony *(DeepMind)*
Richard Everett *(DeepMind)*
Andrea Tacchetti *(DeepMind)*
Tom Eccles *(DeepMind)*
János Kramár *(DeepMind)*

Building Contrastive Explanations for Multi-Agent Team Formation (Page 516)
Athina Georgara *(Artificial Intelligence Research Institute (IIIA-CSIC) & Enzyme Advising Group)*
Juan A. Rodriguez Aguilar *(Artificial Intelligence Research Institute (IIIA-CSIC))*
Carles Sierra *(Artificial Intelligence Research Institute (IIIA-CSIC))*

Long-Term Resource Allocation Fairness in Average Markov Decision Process (AMDP) Environment (Page 525)
Ganesh Ghalme *(Technion Israel Institute of Technology)*

Vineet Nair *(Technion Israel Institute of Technology)*
Vishakha Patil *(Indian Institute of Science)*
Yilun Zhou *(Massachusetts Institute of Technology)*

Fair and Truthful Mechanism with Limited Subsidy (Page 534)
Hiromichi Goko *(Toyota Motor Corporation)*
Ayumi Igarashi *(National Institute of Informatics)*
Yasushi Kawase *(University of Tokyo)*
Kazuhisa Makino *(Kyoto University)*
Hanna Sumita *(Tokyo Institute of Technology)*
Akihisa Tamura *(Keio University)*
Yu Yokoi *(National Institute of Informatics)*
Makoto Yokoo *(Kyushu University)*

Robust No-Regret Learning in Min-Max Stackelberg Games (Page 543)
Denizalp Goktas *(Brown University)*
Jiayi Zhao *(Pomona College)*
Amy Greenwald *(Brown University)*

Multi-Agent Curricula and Emergent Implicit Signaling (Page 553)
Niko A. Grupen *(Cornell University)*
Daniel D. Lee *(Cornell Tech)*
Bart Selman *(Cornell University)*

Intention-Aware Navigation in Crowds with Extended-Space POMDP Planning (Page 562)
Himanshu Gupta *(University of Colorado Boulder)*
Bradley Hayes *(University of Colorado Boulder)*
Zachary Sunberg *(University of Colorado Boulder)*

Multiagent Model-based Credit Assignment for Continuous Control (Page 571)
Dongge Han *(University of Oxford)*
Chris Xiaoxuan Lu *(University of Edinburgh)*
Tomasz Michalak *(University at Warsaw & IDEAS NCBR)*
Michael Wooldridge *(University of Oxford)*

Hierarchical Value Decomposition for Effective On-demand Ride-Pooling (Page 580)
Jiang Hao *(Singapore Management University)*
Pradeep Varakantham *(Singapore Management University)*

Computing Nash Equilibria for District-based Nominations (Page 588)
Paul Harrenstein *(University of Oxford)*
Paolo Turrini *(University of Warwick)*

Ordinal Maximin Share Approximation for Chores (Page 597)
Hadi Hosseini *(The Pennsylvania State University)*
Andrew Searns *(Johns Hopkins University)*
Erel Segal-Halevi *(Ariel University)*

A Mean Field Game Model of Spatial Evolutionary Games (Page 606)
Vincent Hsiao *(University of Maryland)*
Dana Nau *(University of Maryland)*

The Dynamics of Q-learning in Population Games: A Physics-inspired Continuity Equation Model (Page 615)
Shuyue Hu *(National University of Singapore)*
Chin-Wing Leung *(The Chinese University of Hong Kong)*
Ho-fung Leung *(The Chinese University of Hong Kong)*
Harold Soh *(National University of Singapore)*

Reduction-based Solving of Multi-agent Pathfinding on Large Maps Using Graph Pruning (Page 624)
Matej Husár *(Charles University)*
Jiří Švancara *(Charles University)*
Philipp Obermeier *(University of Potsdam)*
Roman Barták *(Charles University)*
Torsten Schaub *(Potassco Solutions & University of Potsdam)*

Autonomous Swarm Shepherding Using Curriculum-Based Reinforcement Learning (Page 633)
Aya Hussein *(University of New South Wales)*
Eleni Petraki *(University of Canberra)*
Sondoss Elsawah *(University of New South Wales)*
Hussein A. Abbass *(University of New South Wales)*

Cascades and Overexposure in Social Networks: The Budgeted Case (Page 642)
Mohammad T. Irfan *(Bowdoin College)*
Kim Hancock *(IBM)*
Laura M. Friel *(Bowdoin College)*

Being Central on the Cheap: Stability in Heterogeneous Multiagent Centrality Games (Page 651)

Gabriel Istrate *(West University of Timişoara)*
Cosmin Bonchiş *(West University of Timişoara)*

A Declarative Framework for Maximal *k*-plex Enumeration Problems (Page 660)
Said Jabbour *(CRIL CNRS - Université d'Artois)*
Nizar Mhadhbi *(INSY2S)*
Badran Raddaoui *(Télécom SudParis & Institut Polytechnique de Paris)*
Lakhdar Sais *(CRIL CNRS - Université d'Artois)*

Lazy-MDPs: Towards Interpretable RL by Learning When to Act (Page 669)
Alexis Jacq *(Google Research)*
Johan Ferret *(Google Research, Inria, & Université de Lille)*
Olivier Pietquin *(Google Research)*
Matthieu Geist *(Google Research)*

Balancing Fairness and Efficiency in Traffic Routing via Interpolated Traffic Assignment (Page 678)
Devansh Jalota *(Stanford University)*
Kiril Solovey *(Technion - Israel Institute of Technology)*
Matthew Tsao *(Stanford University)*
Stephen Zoepf *(Lacuna AI)*
Marco Pavone *(Stanford University)*

Selecting PhD Students and Projects with Limited Funding (Page 687)
Jatin Jindal *(Google)*
Jérôme Lang *(CNRS, PSL)*
Katarína Cechlárová *(Pavol Jozef Šafárik University)*
Julien Lesca *(Huawei Technologies)*

Optimal Matchings with One-Sided Preferences: Fixed and Cost-Based Quotas (Page 696)
Santhini K. A. *(Indian Institute of Technology Madras)*
Govind S. Sankar *(Duke University)*
Meghana Nasre *(Indian Institute of Technology Madras)*

Planning Not to Talk: Multiagent Systems that are Robust to Communication Loss (Page 705)
Mustafa O. Karabag *(The University of Texas at Austin)*
Cyrus Neary *(The University of Texas at Austin)*
Ufuk Topcu *(The University of Texas at Austin)*

How Hard is Safe Bribery? (Page 714)
Neel Karia *(Microsoft Research)*
Faraaz Mallick *(Indian Institute of Technology, Kharagpur)*
Palash Dey *(Indian Institute of Technology, Kharagpur)*

BADDr: Bayes-Adaptive Deep Dropout RL for POMDPs (Page 723)
Sammie Katt *(Northeastern University)*
Hai Nguyen *(Northeastern University)*
Frans A. Oliehoek *(Delft University of Technology)*
Christopher Amato *(Northeastern University)*

Translating Omega-Regular Specifications to Average Objectives for Model-Free Reinforcement Learning (Page 732)
Milad Kazemi *(Newcastle University)*
Mateo Perez *(University of Colorado Boulder)*
Fabio Somenzi *(University of Colorado Boulder)*
Sadegh Soudjani *(Newcastle University)*
Ashutosh Trivedi *(University of Colorado Boulder)*
Alvaro Velasquez *(Air Force Research Laboratory)*

Tactile Pose Estimation and Policy Learning for Unknown Object Manipulation (Page 742)
Tarik Kelestemur *(Northeastern University)*
Robert Platt *(Northeastern University)*
Taskin Padir *(Northeastern University)*

Disentangling Successor Features for Coordination in Multi-agent Reinforcement Learning (Page 751)
Seung Hyun Kim *(University of Illinois at Urbana Champaign)*
Neale Van Stralen *(University of Illinois at Urbana-Champaign)*
Girish Chowdhary *(University of Illinois at Urbana-Champaign)*
Huy T. Tran *(University of Illinois at Urbana-Champaign)*

Equilibria in Schelling Games: Computational Hardness and Robustness (Page 761)
Luca Kreisel *(TU Berlin)*
Niclas Boehmer *(TU Berlin)*
Vincent Froese *(TU Berlin)*
Rolf Niedermeier *(TU Berlin)*

Multimodal Analysis of the Predictability of Hand-gesture Properties (Page 770)
Taras Kucherenko *(KTH Royal Institute of Technology)*
Rajmund Nagy *(KTH Royal Institute of Technology)*

Michael Neff *(University of California, Davis)*
Hedvig Kjellström *(KTH Royal Institute of Technology)*
Gustav Eje Henter *(KTH Royal Institute of Technology)*

Towards Pluralistic Value Alignment: Aggregating Value Systems Through l_p-Regression (Page 780)
Roger Lera-Leri *(IIIA-CSIC)*
Filippo Bistaffa *(IIIA-CSIC)*
Marc Serramia *(IIIA-CSIC)*
Maite Lopez-Sanchez *(Universitat de Barcelona)*
Juan Rodriguez-Aguilar *(IIIA-CSIC)*

Deploying Vaccine Distribution Sites for Improved Accessibility and Equity to Support Pandemic Response (Page 789)
George Z. Li *(University of Maryland)*
Ann Li *(University of Virginia)*
Madhav Marathe *(University of Virginia)*
Aravind Srinivasan *(University of Maryland)*
Leonidas Tsepenekas *(University of Maryland)*
Anil Vullikanti *(University of Virginia)*

ASM-PPO: Asynchronous and Scalable Multi-Agent PPO for Cooperative Charging (Page 798)
Yongheng Liang *(Sun Yat-sen University)*
Hejun Wu *(Sun Yat-sen University)*
Haitao Wang *(Sun Yat-sen University)*

Equilibrium Computation For Knockout Tournaments Played By Groups (Page 807)
Grzegorz Lisowski *(University of Warwick)*
M. S. Ramanujan *(University of Warwick)*
Paolo Turrini *(University of Warwick)*

Residual Entropy-based Graph Generative Algorithms (Page 816)
Wencong Liu *(Beijing Institute of Technology & Southeast Institute of Information Technology)*
Jiamou Liu *(The University of Auckland)*
Zijian Zhang *(Beijing Institute of Technology & Southeast Institute of Information Technology)*
Yiwei Liu *(Defence Industry Secrecy Examination and Certification Center)*
Liehuang Zhu *(Beijing Institute of Technology)*

The Spoofing Resistance of Frequent Call Markets (Page 825)
Buhong Liu *(King's College London)*
Maria Polukarov *(King's College London)*
Carmine Ventre *(King's College London)*
Lingbo Li *(Turing Intelligence Technology)*
Leslie Kanthan *(Turing Intelligence Technology)*
Fan Wu *(Turing Intelligence Technology)*
Michail Basios *(Turing Intelligence Technology)*

Logical Theories of Collective Attitudes and the Belief Base Perspective (Page 833)
Emiliano Lorini *(IRIT, CNRS, Toulouse University)*
Éloan Rapion *(ENS Rennes)*

Lyapunov Exponents for Diversity in Differentiable Games (Page 842)
Jonathan Lorraine *(University of Toronto)*
Paul Vicol *(University of Toronto)*
Jack Parker-Holder *(University of Oxford)*
Tal Kachman *(Radboud University)*
Luke Metz *(Google Research)*
Jakob Foerster *(University of Oxford)*

Any-Play: An Intrinsic Augmentation for Zero-Shot Coordination (Page 853)
Keane Lucas *(Carnegie Mellon University)*
Ross E. Allen *(Massachusetts Institute of Technology)*

Coalition Formation Games and Social Ranking Solutions (Page 862)
Roberto Lucchetti *(Politecnico di Milano)*
Stefano Moretti *(Université Paris-Dauphine & Université PSL)*
Tommaso Rea *(Politecnico di Milano)*

On Parameterized Complexity of Binary Networked Public Goods Game (Page 871)
Arnab Maiti *(Indian Institute of Technology Kharagpur)*
Palash Dey *(Indian Institute of Technology Kharagpur)*

Efficient Algorithms for Finite Horizon and Streaming Restless Multi-Armed Bandit Problems (Page 880)
Aditya S. Mate *(Harvard University)*
Arpita Biswas *(Harvard University)*
Christoph Siebenbrunner *(Harvard University)*
Susobhan Ghosh *(Harvard University)*

Milind Tambe *(Harvard University)*

CAPS: Comprehensible Abstract Policy Summaries for Explaining Reinforcement Learning Agents (Page 889)
Joe McCalmon *(Wake Forest University)*
Thai Le *(The Pennsylvania State University)*
Sarra Alqahtani *(Wake Forest University)*
Dongwon Lee *(The Pennsylvania State University)*

Warmth and Competence in Human-Agent Cooperation (Page 898)
Kevin R. McKee *(DeepMind)*
Xuechunzi Bai *(Princeton University)*
Susan T. Fiske *(Princeton University)*

Cooperation and Learning Dynamics under Risk Diversity and Financial Incentives (Page 908)
Ramona Merhej *(Instituto Superior Tecnico & Sorbonne University)*
Fernando P. Santos *(University of Amsterdam)*
Francisco S. Melo *(INESC-ID and Instituto Superior Tecnico, Universidade de Lisboa)*
Mohamed Chetouani *(Sorbonne University)*
Francisco C. Santos *(INESC-ID and Instituto Superior Tecnico, Universidade de Lisboa)*

Preference-Based Goal Refinement in BDI Agents (Page 917)
Mostafa Mohajeriparizi *(University of Amsterdam)*
Giovanni Sileno *(University of Amsterdam)*
Tom van Engers *(University of Amsterdam)*

Learning Equilibria in Mean-Field Games: Introducing Mean-Field PSRO (Page 926)
Paul Muller *(Deepmind)*
Mark Rowland *(Deepmind)*
Romuald Elie *(Deepmind)*
Georgios Piliouras *(Singapore University of Technology and Design)*
Julien Perolat *(Deepmind)*
Mathieu Lauriere *(Google Brain)*
Raphael Marinier *(Google Brain)*
Olivier Pietquin *(Google Brain)*
Karl Tuyls *(Deepmind)*

A Graph-Based Algorithm for the Automated Justification of Collective Decisions (Page 935)
Oliviero Nardi *(University of Amsterdam)*
Arthur Boixel *(University of Amsterdam)*
Ulle Endriss *(University of Amsterdam)*

Deep Reinforcement Learning for Active Wake Control (Page 944)
Grigory Neustroev *(Delft University of Technology)*
Sytze P. E. Andringa *(Delft University of Technology)*
Remco A. Verzijlbergh *(Delft University of Technology & Whiffle)*
Mathijs M. De Weerdt *(Delft University of Technology)*

Learning Theory of Mind via Dynamic Traits Attribution (Page 954)
Dung Nguyen *(Deakin University)*
Phuoc Nguyen *(Deakin University)*
Hung Le *(Deakin University)*
Kien Do *(Deakin University)*
Svetha Venkatesh *(Deakin University)*
Truyen Tran *(Deakin University)*

Learning to Transfer Role Assignment Across Team Sizes (Page 963)
Dung Nguyen *(Deakin University)*
Phuoc Nguyen *(Deakin University)*
Svetha Venkatesh *(Deakin University)*
Truyen Tran *(Deakin University)*

CTRMs: Learning to Construct Cooperative Timed Roadmaps for Multi-agent Path Planning in Continuous Spaces (Page 972)
Keisuke Okumura *(Tokyo Institute of Technology)*
Ryo Yonetani *(OMRON SINIC X)*
Mai Nishimura *(OMRON SINIC X)*
Asako Kanezaki *(Tokyo Institute of Technology)*

Factorial Agent Markov Model: Modeling Other Agents' Behavior in presence of Dynamic Latent Decision Factors (Page 982)
Liubove Orlov-Savko *(Rice University)*
Abhinav Jain *(Rice University)*
Gregory M. Gremillion *(CCDC Army Research Lab)*
Catherine E. Neubauer *(CCDC Army Research Lab)*
Jonroy D. Canady *(CCDC Army Research Lab)*
Vaibhav Unhelkar *(Rice University)*

Networked Restless Multi-Armed Bandits for Mobile Interventions (Page 1001)
Han-Ching Ou *(Harvard University)*
Christoph Siebenbrunner *(Harvard University)*
Jackson Killian *(Harvard University)*
Meredith B. Brooks *(Harvard University)*
David Kempe *(University of Southern California)*
Yevgeniy Vorobeychik *(University of Washington in St. Louis)*
Milind Tambe *(Harvard University)*

Characterizing Attacks on Deep Reinforcement Learning (Page 1010)
Xinlei Pan *(University of California, Berkeley)*
Chaowei Xiao *(NVIDIA & Arizona State University)*
Warren He *(University of California, Berkeley)*
Shuang Yang *(Alibaba)*
Jian Peng *(University of Illinois at Urbana-Champaign)*
Mingjie Sun *(Carnegie Mellon University)*
Mingyan Liu *(University of Michigan, Ann Arbor)*
Bo Li *(University of Illinois at Urbana-Champaign)*
Dawn Song *(University of California, Berkeley)*

BOID*: Autonomous Goal Deliberation through Abduction (Page 1019)
Stipe Pandžić *(Utrecht University)*
Jan Broersen *(Utrecht University)*
Henk Aarts *(Utrecht University)*

Scaling Mean Field Games by Online Mirror Descent (Page 1028)
Julien Pérolat *(DeepMind)*
Sarah Perrin *(University Lille, CNRS, Inria, Centrale Lille, UMR 9189 CRIStAL)*
Romuald Elie *(DeepMind)*
Mathieu Laurière *(Google Research)*
Georgios Piliouras *(Singapore University of Technology and Design)*
Matthieu Geist *(Google Research)*
