30th IEEE/ACM International Conference on Program Comprehension ICPC 2022

Table of Contents

Message from the ICPC 2022 Chairs	xiv
Organizing Committee	xv
Steering Committee	xvii
Program Committees	xviii
Keynotes	xxiii

Session 1: Summarization

PTM4Tag: Sharpening Tag Recommendation of Stack Overflow Posts with Pre-Trained Models	1
<i>Junda He (Singapore Management University), Bowen Xu (Singapore Management University), Zhou Yang (Singapore Management University), DongGyun Han (Singapore Management University), Chengran Yang (Singapore Management University), and David Lo (Singapore Management University)</i>	
GypSum: Learning Hybrid Representations for Code Summarization	12
<i>Yu Wang (East China Normal University, China), Yu Dong (East China Normal University, China), Xuesong Lu (East China Normal University, China), and Aoying Zhou (East China Normal University, China)</i>	
M2TS: Multi-Scale Multi-Modal Approach Based on Transformer for Source Code Summarization ..	24
<i>Yuexiu Gao (Shandong Normal University, China) and Chen Lyu (Shandong Normal University, China)</i>	
Semantic Similarity Metrics for Evaluating Source Code Summarization	36
<i>Sakib Haque (University of Notre Dame, USA), Zachary Eberhart (University of Notre Dame, USA), Aakash Bansal (University of Notre Dame, USA), and Collin McMillan (University of Notre Dame, USA)</i>	
LAMNER: Code Comment Generation using Character Language Model and Named Entity Recognition	48
<i>Rishab Sharma (University of British Columbia, Canada), Fuxiang Chen (University of British Columbia, Canada), and Fatemeh Hendijani Fard (University of British Columbia, Canada)</i>	

Session 2: Program Representation 1

Zero-Shot Program Representation Learning	60
<i>Nan Cui (Shanghai Jiao Tong University, China), Yuze Jiang (Shanghai Jiao Tong University, China), Xiaodong Gu (Shanghai Jiao Tong University, China), and Beijun Shen (Shanghai Jiao Tong University, China)</i>	
On the Cross-Modal Transfer from Natural Language to Code Through Adapter Modules	71
<i>Divyam Goel (Indian Institute of Technology, India), Ramansh Grover (Delhi Technological University, India), and Fatemeh H. Fard (University of British Columbia, Canada)</i>	
Self-Supervised Learning of Smart Contract Representations	82
<i>Shouliang Yang (Shanghai Jiao Tong University, China), Xiaodong Gu (Shanghai Jiao Tong University, China), and Beijun Shen (Shanghai Jiao Tong University, China)</i>	
An Exploratory Study of Analyzing JavaScript Online Code Clones	94
<i>Md Rakib Hossain Misu (University of California Irvine, USA) and Abdus Satter (University of Dhaka, Bangladesh)</i>	
Accurate Generation of Trigger-Action Programs with Domain-Adapted Sequence-to-Sequence Learning	99
<i>Imam Nur Bani Yusuf (Singapore Management University, Singapore), Lingxiao Jiang (Singapore Management University, Singapore), and David Lo (Singapore Management University, Singapore)</i>	

Session 3: Complexity from a Cognitive Perspective

Estimating Developers' Cognitive Load at a Fine-Grained Level using Eye-Tracking Measures	111
<i>Amine Abbad-Andaloussi (University of St. Gallen, Switzerland), Thierry Sorg (University of St. Gallen, Switzerland), and Barbara Weber (University of St. Gallen, Switzerland)</i>	
So Many Brackets! An Analysis of how SQL Learners (mis)manage Complexity During Query Formulation	122
<i>Daphne Miedema (Eindhoven University of Technology, the Netherlands), George Fletcher (Eindhoven University of Technology, the Netherlands), and Efthimia Aivaloglou (Leiden Institute of Advanced Computer Science, the Netherlands)</i>	
Anchoring Code Understandability Evaluations Through Task Descriptions	133
<i>Marvin Wyrich (University of Stuttgart, Germany), Lasse Merz (University of Stuttgart, Germany), and Daniel Graziotin (University of Stuttgart, Germany)</i>	
The Effect of Information Content and Length on Name Recollection	141
<i>Asaf Etgar (The Hebrew University, Israel), Ram Friedman (The Hebrew University, Israel), Shaked Haiman (The Hebrew University, Israel), Dana Perez (The Hebrew University, Israel), and Dror G. Feitelson (The Hebrew University, Israel)</i>	

Session 4: Understanding Development Practices and Challenges 1

Understanding Code Snippets in Code Reviews: A Preliminary Study of the OpenStack Community	152
<i>Liming Fu (Wuhan University, China), Peng Liang (Wuhan University, China), and Beiqi Zhang (Wuhan University, China)</i>	
GitQ- Towards using Badges as Visual Cues for GitHub Projects	157
<i>Akhila Sri Manasa Venigalla (Indian Institute of Technology Tirupati, Tirupati, India), Kowndinya Boyalakuntla (Indian Institute of Technology Tirupati, Tirupati, India), and Sridhar Chimalakonda (Indian Institute of Technology Tirupati, Tirupati, India)</i>	
Revisiting the Effect of Branch Handling Strategies on Change Recommendation	162
<i>Keisuke Iemoto (Tokyo Institute of Technology, Japan), Takashi Kobayashi (Tokyo Institute of Technology, Japan), and Shinpei Hayashi (Tokyo Institute of Technology, Japan)</i>	
pycefr: Python Competency Level Through Code Analysis	173
<i>Gregorio Robles (Universidad Rey Juan Carlos, Spain), Raula Gaikovina Kula (NAIST, Japan), Chaiyong Ragkhitwetsagul (Mahidol University, Thailand), Tattiya Sakulniwat (NAIST, Japan), Kenichi Matsumoto (NAIST, Japan), and Jesus M. Gonzalez-Barahona (Universidad Rey Juan Carlos, Spain)</i>	

Session 5: Security

Automated Identification of Libraries from Vulnerability Data: Can We Do Better?	178
<i>Stefanus A. Haryono (Singapore Management University, Singapore), Hong Jini Kang (Singapore Management University, Singapore), Abhishek Sharma (Veracode, Singapore), Asankhaya Sharma (Veracode, Singapore), Andrew Santosa (Veracode, Singapore), Ang Ming Yi (Veracode, Singapore), and David Lo (Singapore Management University, Singapore)</i>	
Example-Based Vulnerability Detection and Repair in Java Code	190
<i>Ying Zhang (Virginia Tech, USA), Ya Xiao (Virginia Tech, USA), Md Mahir Asef Kabir (Virginia Tech, USA), Daphne Yao (Virginia Tech, USA), and Na Meng (Virginia Tech, USA)</i>	

Session 6: Measuring and Improving Quality

An Approach to Automatically Assess Method Names	202
<i>Reem S. Alsuhaibani (Kent State University, USA), Christian D. Newman (Rochester Institute of Technology, USA), Michael J. Decker (Bowling Green State University, USA), Michael L. Collard (The University of Akron, USA), and Jonathan I. Maletic (Kent State University, USA)</i>	
An Empirical Investigation on the Trade-off Between Smart Contract Readability and Gas Consumption	214
<i>Anna Vacca (University of Sannio, Italy), Michele Fredella (University of Sannio, Italy), Andrea Di Sorbo (University of Sannio, Italy), Corrado A. Visaggio (University of Sannio, Italy), and Gerardo Canfora (University of Sannio, Italy)</i>	

CodePanorama: A Language Agnostic Tool for Visual Code Inspection	225
<i>Marc Etter (OST Eastern Switzerland University of Applied Sciences, Switzerland) and Farhad Mehta (OST Eastern Switzerland University of Applied Sciences, Switzerland)</i>	
Simple or Complex? Together for a More Accurate Just-in-Time Defect Predictor	229
<i>Xin Zhou (Singapore Management University, Singapore), DongGyun Han (Singapore Management University, Singapore), and David Lo (Singapore Management University, Singapore)</i>	

Session 7: Debugging 1

Causette: User-Controlled Rearrangement of Causal Constructs in a Code Editor	241
<i>Alice Martin (ENAC, Université de Toulouse, France), Mathieu Magnaudet (ENAC, Université de Toulouse, France), and Stéphane Conversy (ENAC, Université de Toulouse, France)</i>	
Error Identification Strategies for Python Jupyter Notebooks	253
<i>Derek Robinson (University of Victoria, Canada), Neil A. Ernst (University of Victoria, Canada), Enrique Larios Vargas (University of Victoria, Canada), and Margaret-Anne D. Storey (University of Victoria, Canada)</i>	
Performance Anomaly Detection Through Sequence Alignment of System-Level Traces	264
<i>Madeline Janecek (Brock University, Canada), Naser Ezzati-Jivan (Brock University, Canada), and Abdelwahab Hamou-Lhadj (Concordia University, Canada)</i>	
QuLog: Data-Driven Approach for Log Instruction Quality Assessment	275
<i>Jasmin Bogatinovski (Technical University Berlin, Germany), Sasho Nedelkoski (Technical University Berlin, Germany), Alexander Acker (Technical University Berlin, Germany), Jorge Cardoso (Huawei Munich Research Center, Germany), and Odej Kao (Technical University Berlin, Germany)</i>	
Fixing Continuous Integration Tests From Within the IDE With Contextual Information	287
<i>Casper Boone (Delft University of Technology, The Netherlands), Carolin Brandt (Delft University of Technology, The Netherlands), and Andy Zaidman (Delft University of Technology, The Netherlands)</i>	
Shape-Analysis Driven Memory Graph Visualization	298
<i>Jan H. Boockmann (University of Bamberg, Germany) and Gerald Lüttgen (University of Bamberg, Germany)</i>	

Session 8: Search and Reuse: Libraries & APIs

On the Effectiveness of Pretrained Models for API Learning	309
<i>Mohammad Hadi (University of British Columbia, Canada), Imam Nur Bani Yusuf (Singapore Management University, Singapore), Ferdian Thung (Singapore Management University, Singapore), Kien Gia Luong (Singapore Management University, Singapore), Jiang Lingxiao (Singapore Management University, Singapore), Fatemeh H. Fard (University of British Columbia, Canada), and David Lo (Singapore Management University, Singapore)</i>	

Deep API Learning Revisited	321
<i>James Martin (McGill University, Canada) and Jin L.C. Guo (McGill University, Canada)</i>	
ARSeek: Identifying API Resource using Code and Discussion on Stack Overflow	331
<i>Kien Luong (Singapore Management University), Mohammad Hadi (University of British Columbia), Ferdian Thung (Singapore Management University), Fatemeh Fard (University of British Columbia), and David Lo (Singapore Management University)</i>	
Benchmarking Library Recognition in Tweets	343
<i>Ting Zhang (Singapore Management University), Divya Prabha Chandrasekaran (Singapore Management University), Ferdian Thung (Singapore Management University), and David Lo (Singapore Management University)</i>	

Session 9: Program Representation 2Research

HELoC: Hierarchical Contrastive Learning of Source Code Representation	354
<i>Xiao Wang (Shandong Normal University, China), Qiong Wu (Shandong Normal University, China), Hongyu Zhang (The University of Newcastle, Australia), Chen Lyu (Shandong Normal University, China), Xue Jiang (Shandong Normal University, China), Zhuoran Zheng (Nanjing University of Science and Technology, China), Lei Lyu (Shandong Normal University, China), and Songlin Hu (Institute of Information Engineering, Chinese Academy of Sciences, China)</i>	
Exploring GNN Based Program Embedding Technologies for Binary Related Tasks	366
<i>Yixin Guo (Peking University, China), Pengcheng Li (TikTok Inc, USA), Yingwei Luo (Peking University, China), Xiaolin Wang (Peking University, China), and Zhenlin Wang (Michigan Tech, USA)</i>	
Learning to Represent Programs with Heterogeneous Graphs	378
<i>Kechi Zhang (Peking University, China), Wenhan Wang (Nanyang Technological University, Singapore), Huangzhao Zhang (Peking University, China), Ge Li (Peking University, China), and Zhi Jin (Peking University, China)</i>	
Unified Abstract Syntax Tree Representation Learning for Cross-Language Program Classification	390
<i>Kesu Wang (Nanjing University, China), Meng Yan (Chongqing University, China), He Zhang (Nanjing University, China), and Haibo Hu (Chongqing University, China)</i>	
On the Transferability of Pre-Trained Language Models for Low-Resource Programming Languages	401
<i>Fuxiang Chen (University of British Columbia, Canada), Fatemeh H. Fard (University of British Columbia, Canada), David Lo (Singapore Management University, Singapore), and Timofey Bryksin (JetBrains Research, Republic of Cyprus)</i>	

Session 10: Code Clones

C4: Contrastive Cross-Language Code Clone Detection	413
<i>Chenning Tao (Zhejiang University, China), Qi Zhan (Zhejiang University, China), Xing Hu (Zhejiang University, China), and Xin Xia (Software Engineering Application Technology Lab, China)</i>	
Predicting Change Propagation Between Code Clone Instances by Graph-Based Deep Learning	425
<i>Bin Hu (Fudan University, China), Yijian Wu (Fudan University, China), Xin Peng (Fudan University, China), Chaofeng Sha (Fudan University, China), Xiaochen Wang (Fudan University, China), Baiqiang Fu (Fudan University, China), and Wenyun Zhao (Fudan University, China)</i>	
An Exploratory Study on Code Attention in BERT	437
<i>Rishab Sharma (University of British Columbia, Canada), Fuxiang Chen (University of British Columbia, Canada), Fatemeh Hendijani Fard (University of British Columbia, Canada), and David Lo (Singapore Management University, Singapore)</i>	
Exploring and Understanding Cross-Service Code Clones in Microservice Projects	449
<i>Yang Zhao (Central China Normal University, China), Ran Mo (Central China Normal University, China), Yao Zhang (Central China Normal University, China), Siyuan Zhang (Central China Normal University, China), and Pu Xiong (Central China Normal University, China)</i>	
MSCCD: Grammar Pluggable Clone Detection Based on ANTLR Parser Generation	460
<i>Wenqing Zhu (Nagoya University, Japan), Norihiro Yoshida (Nagoya University, Japan), Toshihiro Kamiya (Shimane University, Japan), Eunjong Choi (Kyoto Institute of Technology, Japan), and Hiroaki Takada (Nagoya University, Japan)</i>	
Algorithm Identification in Programming Assignments	471
<i>Pranshu Chourasia (IIT Bombay, India), Ganesh Ramakrishnan (IIT Bombay, India), Varsha Apte (IIT Bombay, India), and Suraj Kumar (IIT Bombay, India)</i>	

Session 11: Debugging 2

Context-Based Cluster Fault Localization	482
<i>Junji Yu (Chongqing University, China), Yan Lei (Chongqing University, China), Huan Xie (Chongqing University, China), Lingfeng Fu (Chongqing University, China), and Chunyan Liu (Chongqing University, China)</i>	
A Study of Single Statement Bugs Involving Dynamic Language Features	494
<i>Li Sui (Massey University, New Zealand), Shawn Rasheed (Massey University, New Zealand), Amjed Tahir (Massey University, New Zealand), and Jens Dietrich (Victoria University of Wellington, New Zealand)</i>	

XAI4FL: Enhancing Spectrum-Based Fault Localization with Explainable Artificial Intelligence	499
<i>Ratnadira Widyasari (Singapore Management University, Singapore), Gede Artha Azriadi Prana (Singapore Management University, Singapore), Stefanus A. Haryono (Singapore Management University, Singapore), Yuan Tian (Queens's University, Canada), Hafil Noer Zachary (Singapore Management University, Singapore), and David Lo (Singapore Management University, Singapore)</i>	
Do Visual Issue Reports Help Developers Fix Bugs? – A Preliminary Study of using Videos and Images to Report Issues on GitHub-	511
<i>Hiroki Kuramoto (Kyushu University, Japan), Masanari Kondo (Kyushu University, Japan), Yutaro Kashiwa (Kyushu University, Japan), Yuta Ishimoto (Kyushu University, Japan), Kaze Shindo (Kyushu University, Japan), Yasutaka Kamei (Kyushu University, Japan), and Naoyasu Ubayashi (Kyushu University, Japan)</i>	
Find Bugs in Static Bug Finders	516
<i>Junjie Wang (Laboratory for Internet Software Technologies; Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Yuchao Huang (Laboratory for Internet Software Technologies; University of Chinese Academy of Sciences, China), Song Wang (York University, Canada), and Qing Wang (Laboratory for Internet Software Technologies; Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)</i>	
didiff: A Viewer for Comparing Changes in both Code and Execution Traces	528
<i>Tetsuya Kanda (Osaka University, Japan), Kazumasa Shimari (Osaka University, Japan), and Katsuro Inoue (Osaka University, Japan)</i>	

Session 12: Search and Reuse: Code

CSRS: Code Search with Relevance Matching and Semantic Matching	533
<i>Yi Cheng (Central South University, China) and Li Kuang (Central South University, China)</i>	
Clone-Based Code Method Usage Pattern Mining	543
<i>Zhipeng Xue (National University of Defense Technology, China), Yuanliang Zhang (National University of Defense Technology, China), and Rulin Xu (National University of Defense Technology, China)</i>	
Towards Exploring the Code Reuse from Stack Overflow During Software Development	548
<i>Yuan Huang (Sun Yat-sen University, China), Furen Xu (Sun Yat-sen University, China), Haojie Zhou (Sun Yat-sen University, China), Xiangping Chen (Sun Yat-sen University, China), Xiaocong Zhou (Sun Yat-sen University, China), and Tong Wang (Sun Yat-sen University, China)</i>	

The Ineffectiveness of Domain-Specific Word Embedding Models for GUI Test Reuse	560
<i>Farideh Khalili (Sharif University of Technology, Iran), Ali Mohebbi (USI Università della Svizzera italiana, Switzerland), Valerio Terragni (University of Auckland, New Zealand), Mauro Pezzè (USI Università della Svizzera italiana & Schaffhausen Institute of Technology, Switzerland), Leonardo Mariani (University of Milano - Bicocca, Italy), and Abbas Heydarnoori (Sharif University of Technology, Iran)</i>	

Session 13: Smells, Patterns, and Refactoring

Impact of Change Granularity in Refactoring Detection	565
<i>Lei Chen (Tokyo Institute of Technology, Japan) and Shinpei Hayashi (Tokyo Institute of Technology, Japan)</i>	
On the Developers' Attitude Towards CRAN Checks	570
<i>Pranjay Kumar (RMIT University, Australia), Davin Ie (RMIT University, Australia), and Melina Vidoni (Australian National University, Australia)</i>	
Does Coding in Pythonic Zen Peak Performance? Preliminary Experiments of Nine Pythonic Idioms at Scale	575
<i>Pattara Leelaprute (Faculty of Engineering, Kasetsart University), Bodin Chinthanet (Nara Institute of Science and Technology), Supatsara Wattanakriengkrai (Nara Institute of Science and Technology), Raula Gaikovina Kula (Nara Institute of Science and Technology), Pongchai Jaisri (Faculty of Engineering, Kasetsart University), and Takashi Ishio (Nara Institute of Science and Technology)</i>	
Code Smells in Elixir: Early Results from a Grey Literature Review	580
<i>Lucas Francisco da Matta Vegi (Federal University of Minas Gerais (UFMG), Brazil) and Marco Tulio Valente (Federal University of Minas Gerais (UFMG), Brazil)</i>	

Session 14: Documentation

Fine-Grained Code-Comment Semantic Interaction Analysis	585
<i>Mingyang Geng (National University of Defense Technology, China), Shangwen Wang (National University of Defense Technology, China), Dezun Dong (National University of Defense Technology, China), Shanzhi Gu (Hunan Huishiwei Intelligent Technology, China), Fang Peng (University of Chinese Academy of Sciences, China), Weijian Ruan (Shenzhen Institutes of Advanced Technology, China), and Xiangke Liao (National University of Defense Technology, China)</i>	
Using Discord Conversations as Program Comprehension Aid	597
<i>Marco Raglianti (Università della Svizzera italiana, Switzerland), Csaba Nagy (Università della Svizzera italiana, Switzerland), Roberto Minelli (Università della Svizzera italiana, Switzerland), and Michele Lanza (Università della Svizzera italiana, Switzerland)</i>	

Demystifying Software Release Note Issues on GitHub	602
<i>Jianyu Wu (Peking University, China), Hao He (Peking University, China), Wenxin Xiao (Peking University, China), Kai Gao (Peking University, China), and Minghui Zhou (Peking University, China)</i>	
A First Look at Duplicate and Near-Duplicate Self-Admitted Technical Debt Comments	614
<i>Jerin Yasmin (Queen’s University, Canada), Mohammad Sadegh Sheikhaei (Queen’s University, Canada), and Yuan Tian (Queen’s University, Canada)</i>	
HatCUP: Hybrid Analysis and Attention Based Just-In-Time Comment Updating	619
<i>Hongquan Zhu (Nanjing University), Xincheng He (Nanjing University), and Lei Xu (Nanjing University)</i>	
Casdoc: Unobtrusive Explanations in Code Examples	631
<i>Mathieu Nassif (McGill University, Canada), Zara Horlacher (McGill University, Canada), and Martin P. Robillard (McGill University, Canada)</i>	

Session 15: Understanding Development Practices and Challenges 2

Backports: Change Types, Challenges and Strategies	636
<i>Debasish Chakroborti (University of Saskatchewan, Canada), Kevin A. Schneider (University of Saskatchewan, Canada), and Chanchal K. Roy (University of Saskatchewan, Canada)</i>	
How do I Model my System? A Qualitative Study on the Challenges that Modelers Experience	648
<i>Christopher Vendome (Miami University, USA), Eric J. Rapos (Miami University, USA), and Nick DiGennaro (Miami University, USA)</i>	
Two Approaches to Survival Analysis of Open Source Python Projects	660
<i>Derek Robinson (University of Victoria, Canada), Keanelek Enns (University of Victoria, Canada), Neha Koulecar (University of Victoria, Canada), and Manish Sihag (University of Victoria, Canada)</i>	
Author Index	671
