Technical Papers

An Architecture Smell Knowledge Base for Managing Architecture Technical Debt ......................... 1
Paula Rachow (Universität Hamburg, Germany) and Matthias Riebisch (Universität Hamburg, Germany)

Production Codebases ........................................................................................................................................ 11
Adam Tornhill (CodeScene, Sweden) and Markus Borg (RISE Research Institutes of Sweden, Sweden)

Comprehending the Use of Intelligent Techniques to Support Technical Debt Management .......... 21
Danyllo Albuquerque (Federal University of Campina Grande, Brazil), Everton Guimaraes (Pennsylvania State University, USA), Graziela Tonin (Federal University of Fronteira Sul, Brazil), Mirko Perkusich (Federal University of Campina Grande, Brazil), Hyggo Almeida (Federal University of Campina Grande, Brazil), and Angelo Perkusich (Federal University of Campina Grande, Brazil)

Investigating the Point of View of Project Management Practitioners on Technical Debt — A Preliminary Study on Stack Exchange .............................................................. 31
Felipe Gomes (Federal University of Bahia, Brazil), Eder Pereira dos Santos (Federal University of Bahia, Brazil), Sávio Freire (Federal University of Bahia and Federal Institute of Ceará, Brazil), Manoel Mendonça (Federal University of Bahia, Brazil), Thiago Souto Mendes (Federal Institute of Bahia, Brazil), and Rodrigo Spinola (Salvador University and State University of Bahia, Brazil)

PILOT: Synergy Between Text Processing and Neural Networks to Detect Self-Admitted Technical Debt ................................................................................................................................. 41
Amleto Di Salle (University of L’Aquila, Italy), Alessandra Rota (University of Milano-Bicocca, Italy), Phuong T. Nguyen (University of L’Aquila, Italy), Davide Di Ruscio (University of L’Aquila, Italy), Francesca Arcelli Fontana (University of Milano-Bicocca, Italy), and Irene Sala (University of Milano-Bicocca, Italy)

Technical Debt Prioritization: A Developer’s Perspective ................................................................. 46
Diogo Pina (University of São Paulo, Brazil), Carolyn Seaman (University of Maryland, Baltimore County), and Alfredo Goldman (University of São Paulo, Brazil)
Towards Measuring the Aggregated Debt of Trustworthiness Level ........................................ 56
Imanol Urretavizcaya (TECNALIA, Basque Research & Technology Alliance (BRTA), Spain), Nuria Quintano (TECNALIA, Basque Research & Technology Alliance (BRTA), Spain), and Jabier Martinez (TECNALIA, Basque Research & Technology Alliance (BRTA), Spain)

Tools Papers

Merging Smell Detectors: Evidence on the Agreement of Multiple Tools ........................................ 61
Apostolos Ichtsis (University of Macedonia), Nikolaos Mittas (International Hellenic University), Apostolos Ampatzoglou (University of Macedonia), and Alexander Chatzigeorgiou (University of Macedonia)

MultiDimEr: A Multi-dimensional bug Analyzer ............................................................................. 66
Lakmal Silva (Blekinge Institute of Technology, Sweden, Ericsson AB, Sweden), Michael Unterkalmsteiner (Blekinge Institute of Technology, Sweden), and Krzysztof Wnuk (Blekinge Institute of Technology, Sweden)

Sonarlizer Xplorer: A Tool to Mine Github Projects and Identify Technical Debt Items using SonarQube ................................................................................................................................. 71
Diogo Pina (University of São Paulo, Brazil), Alfredo Goldman (University of São Paulo, Brazil), and Carolyn Seaman (University Maryland, Baltimore County)

TD Classifier: Automatic Identification of Java Classes with High Technical Debt ................................ 76
Dimitrios Tsoukalas (Centre for Research and Technology Hellas, Thessaloniki, Greece; University of Macedonia, Thessaloniki, Greece), Alexander Chatzigeorgiou (University of Macedonia, Thessaloniki, Greece), Apostolos Ampatzoglou (University of Macedonia, Thessaloniki, Greece), Nikolaos Mittas (International Hellenic University, Thessaloniki, Greece), and Dionysios Kehagias (Centre for Research and Technology Hellas, Thessaloniki, Greece)
