

Animal Nutrition Conference of Canada (ANCC 2022)

Feed Production and Formulation
Technologies: Considerations for a
Sustainable Industry

Saskatchewan, Canada
10 – 12 May 2022

ISBN: 978-1-7138-5548-4

Printed from e-media with permission by:

Table of Contents / *Table des matières*

Welcome from ANAC / <i>Bienvenue de l'ANAC</i>	3
Organizing Committee / <i>Comité organisateur</i>	5
Conference Program / <i>Programme de colloque</i>	12-14

Pre-conference Symposium / *Symposium pré-colloque*

Influence of Antibiotic Alternatives on Immunity and Microflora in Support of Poultry Gut Health
Influence des solutions de remplacement aux antibiotiques sur l'immunité et la microflore pour favoriser la santé intestinale chez les volailles

Dr. Morgan Farnell - Texas A&M University17

Intestinal Permeability, Immune Response and Inflammation in Dairy - Nutritional Modulations
Perméabilité intestinale, réponse immunitaire et inflammation chez les animaux laitiers - modulations nutritionnelles

Dr. Lance Baumgard - Iowa State University27

Viral Viability and Infectivity in Contaminated Feed and Opportunities for Feed Additives to Mitigate the Challenge

Viabilité et infectiosité virales dans les aliments du bétail contaminés et possibilités d'atténuer le problème grâce aux additifs alimentaires pour le bétail

Dr. Scott Dee - Pipestone Veterinary Services42

Moderating the Effect of Coccidia and Necrotic Enteritis Challenge Using Non-Pharmaceutical Means
Modérer l'effet d'une exposition aux coccidies et à l'entérite nécrotique par l'emploi de solutions non pharmaceutiques

Dr. Milan Hruby & Dr. Mohamad Mortada - ADM Animal Nutrition.....47

Methane, Cows, and Climate Change: California Dairy's Path to Climate Neutrality

Méthane, vaches et changement climatique : La filière laitière californienne sur la voie de la neutralité climatique

Dr. Frank Mitloehner - University of California Davis.....60

Conference / *Colloque*

JM Bell Memorial Lecture: Prospects for Climate Neutral Beef and Dairy Production in Canada

Conférence JM Bell : Perspectives pour une production bovine et laitière sans impact climatique au Canada

Dr. Karen Beauchemin - Agriculture and Agri-Food Canada.....72

Sustainable Livestock Feeding and Management: What Changes are Needed?

Alimentation et gestion durables en production animale : quels changements sont nécessaires?

Dr. Donald Broom - University of Cambridge87

On the Development of Online Tools to Support the Production of Sustainable Animal Feeds <i>À propos de la création d'outils en ligne pour soutenir la production d'aliments durables pour les animaux</i> Dr. Dominique Bureau - University of Guelph	99
Feed Processing for a Profitable and Sustainable Feed Business <i>La transformation des aliments dans un contexte d'activité commerciale rentable et durable</i> Dr. Menno Thomas - Wageningen University & Research	108
ANAC Scholarship Lecture: The Influence of Transition Diet Energy and Protein Content on Colostrum and Early Lactation Milk Composition and Bioactive Compound Concentrations in Holstein Dairy Cattle Conférence de la bourse d'études de l'ANAC : <i>Influence de la teneur en énergie et en protéines de la ration de transition sur la composition et les concentrations en composés bioactifs du colostrum et du lait de début de lactation chez les vaches laitières Holstein</i> Amanda Fischer-Tlustos - Graduate Student / Étudiante diplômée, University of Guelph	124
Intersection of the Nutritive Value and Bioactive Potential of Two Emerging Classes of Novel Feed Ingredients: Insect and Algae Products <i>Intersection de la valeur nutritive et du potentiel bioactif de deux classes émergentes d'ingrédients alimentaires nouveaux : les produits à base d'insectes et les produits à base d'algues</i> Dr. Stephanie Collins - Dalhousie University	132
Viral Transmission Through Feed <i>Transmission virale par l'intermédiaire des aliments</i> Dr. Chad Paulk - Kansas State University	141
Appreciating the Dynamics of Pellet Quality Improvements to Nutrient Segregation in Poultry Houses <i>Appréciation de la dynamique de l'amélioration de la qualité des granulés dans un contexte de ségrégation des nutriments dans les poulaillers</i> Dr. John Boney - Pennsylvania State University	148
The Potential for Feed Processing to Reduce Ergot Toxicity <i>Possibilité de réduire la toxicité de l'ergot par le traitement des aliments</i> Dr. Denise Beaulieu - University of Saskatchewan	156
Growth Performance, Digesta pH and Organ Weight of Weaned Pigs Fed Barley Grain Differing in Fermentable Starch <i>Performances de croissance, pH du digesta et poids des organes chez des porcs sevrés nourris avec des grains d'orge de teneurs différentes en amidon et en fibres fermentescibles</i> Joaquin Sanchez Zannatta - Graduate Student / Étudiant diplômé, University of Alberta	169
Feed Formulation for Sustainable Agriculture <i>La formulation des aliments dans un contexte d'agriculture durable</i> Dr. Greg Thoma - University of Arkansas	177

Nutritional Strategies to Mitigate Enteric Methane Emissions from Dairy Cows: State of Knowledge and New Perspectives <i>Possibilité de réduire la toxicité de l'ergot par le traitement des aliments</i>	
Dr. Chaouki Benchaar* Agriculture and Agri-Food Canada	184
Understanding Feed Efficiency in the Feedlot <i>Comprendre l'efficacité alimentaire au parc d'engraissement</i>	
Dr. Katie Wood - University of Guelph	201
Precision Mineral Nutrition for Dairy Cows <i>Nutrition minérale de précision chez les vaches laitières</i>	
Dr. William Weiss - Ohio State University	209
High mycotoxin levels in wheat grain and their effects on beef cattle ruminal fermentation, performance, and carcass traits <i>Teneurs élevées en mycotoxines dans le grain de blé et effets sur la fermentation ruminale, les performances et les caractéristiques de carcasse chez les bovins de boucherie</i>	
Renée Bierworth, Graduate Student / Étudiante diplômée - University of Saskatchewan	217
Feed Formulation in The Future: Quantum Change or Incremental Steps Forward <i>La formulation des aliments du futur : changement radical ou avancées progressives</i>	
Dr. John Patience - Iowa State University	225
Graduate Student Posters / Affiches des étudiants diplômés	
<u>Monogastric</u>	
Application of Near-infrared Spectroscopy for Rapid Analysis of Glucosinolate Content in Canola Meal Andy Q. Che, Anna Rogiewicz, Veronique J. Barthet and Bogdan A. Slominski - University of Manitoba	
.....	243
Apparent Metabolizable Energy and Plasma Biochemical Profile in Broiler Chickens Fed Diets Containing Grape (<i>Vitis vinifera</i>), Cranberry (<i>Vaccinium macrocarpon</i>), Wild Blueberry (<i>Vaccinium angustifolium</i>) and Apple (<i>Malus pumila/domestica</i>) Pomaces Without or With Multi-Enzymes Supplement Munene Kithama, Kelly Ross, Moussa S. Diarra, and Elijah G. Kiarie – University of Guelph	244
Effects of in ovo Seaweed Polyphenols and Fucoidans on Performance and Gut Health of Broiler Chickens Challenged with Diet-induced Oxidative Stress Jing Lu and Stephanie Collins – Dalhousie University	245
The Prebiotic Effect of Enzymatically Released Bioactive Components of Canola Meal Fibre on Gut Health and Growth Performance of Broiler Chickens Yanxing Niu, Anna Rogiewicz, Joao Ferreira, Rob Patterson, and Bogdan A. Slominski - University of Manitoba	246

Research on Evaluation of Expeller/Cold-pressed Canola (EPC) as a Valuable Feed Ingredient for Poultry
Tetiana Sessingnong, Oluwakemi Omotosho, Anna Rogiewicz, Yanxing Niu, Joao Ferreira, Rob Patterson, and Bogdan A. Slominski - University of Manitoba247

Ruminant

Effects of Substituting Barley Grain and Silage with High-moisture Corn Products in Western Canadian Beef Finishing Diets on Ruminal Fermentation Patterns and Site and Extent of Starch Digestibility
Rachel E. Carey, Mikaela G. Evans, Gabriel O. Ribeiro, Diego Moya, Herbert (Bart) A. Lardner, Zachary D. Paddock, Timothy A. McAllister, and Gregory B. Penner – University of Saskatchewan248

Feeding Supplemental Energy to Pregnant Beef Cows During Late Gestation to Support Cow-Calf Performance
E. Croft, K. Hare, K. M. Wood, M. Steele - University of Guelph.....249

Using Synchrotron-based on X-ray Fluorescence to Study Oat Varieties Impact on Minerals Distribution
Ganqi Deng, Miranda Lavier, Gosia Malgorzata Korbas, Viorica F. Bondici, Chithra Karunakaran, David Christensen, Bart Lardner, and Peiqiang Yu - University of Saskatchewan.....250

Effect of Dry or Temper Rolling of High or Low Protein Wheat and its Impact on Rumen Parameters, Liver Abscesses, and Growth Performance of Feedlot Cattle
A.C. Meadows, S.A. Terry, G.B. Penner, T.A. McAllister, and G.O. Ribeiro – University of Saskatchewan251

Complete Replacement of Inorganic Sources of Supplementary Trace Minerals by Organic Sources Alters Systemic Trace Mineral Status, Rumen Fermentation, and Energy Balance in Dairy Cows
Bruna Mion, Bryn Van Winters, Kristina King, Jose F. W. Spricigo, Lori Ogilvie, Leluo Guan, Trevor J. DeVries, Michael A. Steel¹, Stephen J. LeBlanc, and Eduardo S. Ribeiro - University of Guelph.....252

Assessment of Rumen and Fecal Short Chain Fatty Acids Profiles and Microbial Populations in Rumen Fluid and Feces of Beef Cows Under Two Different Feeding Regimes
Sang Weon Na, Mi Zhou, Edward Bork, Carolyn Fitzsimmons, and Leluo Guan - University of Alberta.....253

Predicting Composition, Intake, and Digestibility of Nutrients in Grazing Cattle Using Near Infrared Spectroscopy (NIRS) of Feces
J. F. Peters, M. L. Swift, G. B. Penner, H. A. Lardner, T. A. McAllister, and G. O. Ribeiro - University of Saskatchewan254

In-vitro Dry Matter Digestibility, an Alternative Method for Silage Quality Assessment
C. Plett, N. Mclean, C. Lafrenière, S. Bittman, K. Ominski, and J.C. Plaizier - University of Manitoba.....255

Feeding Trial and Dairy Performance Evaluation Using Faba Bean Seeds: Effects of Raw and Steamed Pressured Faba Bean Seeds in Diets of High Producing Dairy Cows María E. Rodríguez Espinosa, Dave Christensen, Rex Newkirk, Yongfeng Ai, Victor H. Guevara Oquendo, and Peiqiang Yu - University of Saskatchewan	256
