Contents

OFFSHORE WIND: FOUNDATIONS

- 3 **An overview of the offshore wind power industry**
P van Lieshout, Sinclair Knight Merz, UK; J Waegter, Rambøll Corporation, Denmark;
R Court, NaREC, UK
- 9 **Advances in offshore foundation design for deeper water wind farms**
D Bone, D Hannevig, Ocean Synergy Ltd, UK
- 17 **Efficient offshore wind turbine foundations**
A Moller, Densit A/S, Denmark
- 27 **The effects of Scour on the design of offshore wind turbines**
J van der Tempel, M B Zaaijer, H Subroto, Delft University of Technology, The
Netherlands
- 36 **Offshore environment – developments in consenting offshore projects**
S C Holmes, Bond Pearce, UK

POLICY AND PLANNING

- 41 **The impact of energy extraction on tidal flow development**
Prof I G Bryden, Dr S J Couch, The Robert Gordon University, UK
- 48 **Optimising network integration of wave energy using geographical information
system (GIS) and power flow techniques**
S B Graham, A R Wallace, G P Harrison, University of Edinburgh, UK
- 56 **Tidal power resource analysis and the consideration of resource economics**
G T Melville, Prof I G Bryden, K G Rados, A J MacLeod, The Robert Gordon
University, UK
- 65 **The role of verification and certification**
A Mill, European Marine Energy Centre Ltd, UK

TIDAL POWER

- 73 **The use of renewable energy systems in coastal defence**
T W Thorpe, Energetech, UK
- 80 **The TidEl freestream tidal turbine**
J R Manchester, SMD Hydrovision Ltd, UK
- 87 **Marine current turbines: progress with tidal turbine development**
Prof P L Fraenkel, Marine Current Turbines Ltd, UK
- 97 **The North Wales offshore tidal impoundment scheme: a preliminary study of
requirements, constraints and opportunities**
S E Evans, K P Williams, Cardiff University, UK; Prof J E P Poole, Environment
Agency Wales and Cardiff University, UK
- 108 **Design and testing of a direct drive tidal stream generator**
J A C Orme, Dr I Masters, University of Wales Swansea, UK

ELECTRICAL TECHNOLOGIES

- 116 **Power conversion in reciprocating high force density electrical machines used
in marine energy systems**
Dr M A Mueller, University of Edinburgh, UK; Dr P R M Brooking, University of
Durham, UK
- 123 **High and low force density linear electrical machines for marine renewable
energy converters**
Dr N J Baker, University of Durham, UK; Dr M A Mueller, University of Edinburgh, UK

- 133 **Islanded operation as a means of safeguarding offshore wind turbines under fault conditions**
A Maloyd, R H Kemsley, Econnect Ltd, UK; Dr P Taylor, University of Durham,UK
- 144 **SLiM – a lightweight efficient direct-drive generator for large offshore wind turbines**
Prof E Spooner, P Gordon, Evolving Generation Ltd, UK; Dr C D French, University of Newcastle upon Tyne, UK

OFFSHORE WIND: OPERATIONAL EXPERIENCE

- 153 **Personnel transfer to offshore wind turbines**
E Morrison, Garrad Hassan and Partners Ltd, UK
- 163 **Electrical testing and commissioning of an offshore windfarm**
M Lawson, Econnect Ltd, UK
- 171 **Design methods for offshore wind turbines at exposed sites**
T R Camp, Garrad Hassan and Partners Ltd, UK; W Grainger, Amec Wind Energy Ltd, UK; R P J O M van Rooij, Delft University of Technology, The Netherlands; K Argyriadis, S Schwartz, Germanischer Lloyd WindEnergie GmbH, Germany; P H Lauritsen, Vestas Wind Systems A/S, Denmark; C Ziesler, Powergen Ltd, UK

WAVE POWER

- 180 **Mooring systems for wave energy converters: a review of design issues and choices**
Prof J Wolfram, Dr R E Harris, Dr L Johanning, Heriot-Watt University, UK
- 190 **The technical challenges in designing, building and installing a moored wave energy device at Port Kembla NSW**
S Ferrario, J Gould, D King, J P Kenny Pty Ltd, Australia
- 207 **Membranes for wave energy converters**
Dr L J Duckers, Coventry University, UK

POSTER PRESENTATIONS

- 216 **RECAL, dynamic response calculation tool for the preliminary design of offshore wind turbines**
J van der Tempel, D Cerda Salzmann, Delft University of Technology, The Netherlands
M Kempers, Infra Consult + Engineering, The Netherlands
- 223 **Development of reciprocating test-rig for wave and tidal power at the New and Renewable Energy Centre**
Dr N J Baker, P J Tavner, University of Durham, UK; M A Mueller, University of Edinburgh, UK
- 230 **CAPEX and OPEX – reduced costs by application of laminated concrete construction systems and floating moulds**
J M Pemberton, Resrock Systems Ltd, UK
- 236 **Electricity from ocean current**
Dr A Ruprecht, University of Stuttgart, Germany
- 244 **UK Marine Renewable Atlas**
W S Cooper, C L Hinton, ABP Marine Environmental Research Ltd, UK; N Ashton, A Saulter, Met Office, UK; C Morgan, Garrad Hassan and Partners Ltd, UK; R Proctor, Proudman Oceanographic Laboratory, UK; Q Huggett, Geotek, UK
