Contents

DAY ONE:

COMMERCIAL APPLICATIONS

- 1** **Technical and economic feasibility of an unmanned cargo ship powered by electrical propulsion**
Dr R W G Bucknall, P E M Freire, University College London, UK
- 16** **First electric propulsion for LNG tanker**
V Sekula, ALSTOM, France
- 27** **CEFAS Endeavour**
J W Forbes, Eur Ing G Evans, BAE SYSTEMS, UK
- 41** **Stolt Innovation Class – five year’s experience with the first diesel-electric chemical parcel tanker**
S Nyström, Stolt-Nielsen Transportation Group BV, The Netherlands

SIMULATION

- 65** **Modelling of a warship’s electrical power generation and propulsion system, and practical implications for supporting the acquisition process**
P Deverill, Ministry of Defence, UK; Cdr J Newell, HMS ALBION, UK; P Rottier, A Bennett, N Healey, S Bryce, The MathWorks Ltd, UK
- 77** **The use of numeric simulation for the studies of the all electric ship**
D Monterrain, DCN Nantes Indret, France
- 88** **The impact of RM&A simulation-based analysis during conceptual design – notional Integrated Power System (IPS) case study**
J Grizzard, P Lopez, J Edyvane, Syntek Technologies Inc, USA
- 99** **Active power filter – new control system and topology**
Dr G Benysek, M Jarnut, J Rusinski, Prof R Strzelecki, University of Zielona Góra, Poland; M Grzegorz, University of Technology and Agriculture, Poland

INLAND APPLICATIONS

- 107** **Electric boats in the small craft leisure market**
J M Hustwick, Electric Boat Association, UK
- 113** **Electric propulsion developments at British Waterways**
S M Hames, British Waterways, UK
- 117** **Diesel-electric propulsion of the reconstructed paddle wheel river ship “Krajina”**
Dr Z M Nikolic, B M Stamenovic, M P Marinkovic, Institute of Technical Sciences of the Serbian Academy of Sciences and Arts, Yugoslavia

POWER ELECTRONIC APPLICATIONS

- 124** **Active filters in marine applications**
S R Jones, P Manuelle, R Baumgartner, ALSTOM, France; S Bower, M A Leppard, ALSTOM, UK
- 133** **Potential use of matrix converters in marine propulsion applications**
Dr R W G Bucknall, K M Ciaramella, University College London, UK

- 143 Matrix converter solution for aircraft starting**
Lt S Large, Ministry of Defence, UK; A Green, S Bhatia, S C Mason, Ultra Electronics PMES, UK; Dr J C Clare, Dr P Zanchetta, Dr L Empringham, Dr P W Wheeler, The University of Nottingham, UK

NAVAL APPLICATIONS

- 159 Applying technology forecasting and selection to the all electric ship**
P Lopez, A Baker, V Stammnitz, J Grizzard, Syntek Technologies Inc, USA
- 177 Perspectives of enhanced survivability on AES**
Prof Dr Ing I K Hatzilau, Hellenic Naval Academy, Greece; Lt Cdr I K Gypris, Cdr S Perros, Lt Cdr A Dalakos, Hellenic Navy, Greece; Dr J Prousalidis, National Technical University of Athens, Greece
- 188 Managing the UK Electric Ship Programme, a review and look to the future of deciding where to invest**
Lt Cdr T Drywood, Cdr P A Erskine, Ministry of Defence, UK
- 198 The Type 45 Destroyer – powering to success**
C Lloyd, G G Reid, R Simpson, BAE SYSTEMS, UK

POWER ELECTRONIC APPLICATIONS

- 211 The new generation of propulsion drive systems**
M Lehti, ABB Oy Marine and Turbocharging, Finland; P Hyvärinen, T Tissari, ABB Industrie AG, Switzerland
- 226 A new medium voltage IGBT Press-Pack converter: a significant step in electrical propulsion drives**
B Gollentz, N Gruau, A Mirzaian, ALSTOM, France; E Lewis, ALSTOM, UK
- 239 Modular naval switchboards with static DC breakers for application in networks up to 3.3 kV_{dc}**
A Rebora, Dr Eng S M Tenconi, F Zanzi, Dr Eng G Anzalone, C Ravera, ARI, Italy; A Ginnante, U Vianello, Fincantieri, Italy; R Drago, Cdr A Benedetti, Italian Navy, Italy; E Apak, M Gorates, Turkish Navy, Turkey, M Tiris, K Yeiman, F Akgun, MRC, Turkey
- 248 Development of integrated fight-through power modules for the US Navy Fleet**
J B Zgliczynski, General Atomics, USA; M Heiberger, SatCon Technology Corporation, USA; S I Callis, Gibbs & Cox, Inc, USA
- 257 Non-characteristic harmonics generated by frequency converters**
S Bourguet, P Guérin, R Le Doeuff, GE44, France

DAY TWO: SYSTEM DESIGN AND INTEGRATION

- 267 Down to earth or earthing of naval marine power systems**
Cdr G T Little, Ministry of Defence, UK; G G Reid, BAE SYSTEMS, UK
- 275 Cost effective “Integrated Network Solutions” for data transmission and communication on board of cruise vessels**
D Jestel, Siemens AG, Germany
- 279 Harmonic electric power quality concepts for the electrified ships (AES)**
Dr J Prousalidis, National Technical University of Athens, Greece; Prof Dr Ing I K Hatzilau, Hellenic Naval Academy, Greece; Cdr S Perros, Hellenic Navy, Greece

291 **The evolving nature of loads in an electric warship**
Cdr J V Amy Jr, Cdr T J McCoy, US Navy, USA; D H Clayton, US Navy Naval Sea Systems Command, USA

301 **The integration of marine electrical propulsion systems**
C G Hodge, D J Mattick, Rolls-Royce plc, UK; Prof J O Flower, Warwick University, UK

ELECTRIC AUXILIARIES

307 **Feasibility of electrification of auxiliary systems on a future AOR**
Eur Ing A J Blokland, Ing H van Es, Ing P J F M Kerklaan, Directorate Material Royal Netherlands Navy, The Netherlands

313 **Electric drives for submarine external handling systems**
Dr S P Tomlinson, R Cooke, J Scammell, QinetiQ, UK

323 **High-Temperature Superconductor (HTS) technology for power application on board of All Electric Ships (AES)**
P Andersen, Siemens AG Marine Solutions, Germany; Dr W Schmidt, B Wacker, Siemens AG Corporate Technology, Germany

328 **Alarm processing for Battleships using artificial intelligence techniques**
Lt M Suslu, Royal Netherlands Navy, Ministry of Defence, UK; Dr F Li, University of Bath, UK

SYSTEM DESIGN AND INTEGRATION

340 **Energy storage for US Navy integrated power system applications**
D Delisle, US Navy Naval Sea Systems Command, USA; H Robey, Anteon Corp, USA; B Desai, Consultant, USA

353 **Integrated fight through power ship design considerations**
H Hegner, K Tavener, US Navy Naval Sea Systems Command, USA; H Robey, Anteon Corp, USA

365 **HV systems in the UK naval environment**
Cdr C J Saxby, Ministry of Defence, UK; A J Whitehead, VT Controls Ltd, UK

374 **An integrated approach to the specification process for platform management systems**
R P M Hudson, P G W Webb, BMT Defence Services Ltd, UK

PROPULSION EQUIPMENT

386 **The development of a 1-2 MW Advanced Cycle Gas Turbine Alternator for naval use**
B Watier, Turbomeca Ltd, France, N M Morrish, VT Controls Ltd, UK

395 **Innovative steps in PM machines for ship propulsion and energy supply**
Dr P Ehrhart, Dipl-Ing L Lindner, Magnet-Motor GmbH, Germany

405 **Advanced induction motor operation, results and acceptance**
P T Norton, ALSTOM, UK; Lt W Uhbi, Ministry of Defence, UK

417 **Fault tolerance in multi-phase propulsion motors**
S Williamson, S Smith, UMIST, UK; C G Hodge, Rolls-Royce plc, UK

424 **Propulsor options for the AES**
Cdr J L Wood, Lt S N Day, Ministry of Defence, UK
