Table of Contents

PACRIM Plenary Lectures

Plenary Session	17
-----------------------	----

PACRIM Symposium 4: Novel, Green, and Strategic Processing and Manufacturing Technologies

Novel, Green, and Strategic Processing I.....	17
---	----

PACRIM Symposium 6: Advanced Powder Processing and Manufacturing Technologies

Advanced Recycling Technology and Energy-saving Processes	19
---	----

Novel Forming and Sintering Technology	20
--	----

PACRIM Symposium 20: Multiferroic Materials, Devices, and Applications

Multiferroic Materials, Devices, and Applications I	21
---	----

Multiferroic Materials, Devices, and Applications II.....	21
---	----

PACRIM Symposium 22: Microwave Dielectric Materials and Their Applications

Millimeter-wave Materials for 5G Applications.....	22
--	----

PACRIM Symposium 24: Solid Oxide Fuel Cells and Hydrogen Technologies

Proton Conducting SOFC I.....	24
-------------------------------	----

Proton Conducting SOFC II	24
---------------------------------	----

PACRIM Symposium 27: Advanced Materials and Technologies for Electrochemical Energy Storage Systems

Materials Design, Screening and Electrode Architecture	26
--	----

PACRIM Symposium 29: Ceramics and Ceramic Matrix Composites for Next Generation Nuclear Energy

Ceramics and Ceramic Matrix Composites for Next Generation Nuclear Energy	26
---	----

PACRIM Symposium 31: Advanced Functional Materials, Devices, and Systems for Environmental Conservation, Pollution Control, and Critical Materials

Phosphors and Optical Ceramics for LEDs 28
Critical Materials / Recovery and Recycling of Rare Metals..... 28

PACRIM Symposium 35: Advanced Additive Manufacturing Technologies for Bio-applications; Materials, Processes, and Systems

Advanced Additive Manufacturing Technologies for Bio-applications; Materials, Processes, and Systems I..... 29
Advanced Additive Manufacturing Technologies for Bio-applications; Materials, Processes, and Systems II..... 30

PACRIM Symposium 38: Nanotechnology in Medicine

Nanotechnology in Medicine I..... 32
Nanotechnology in Medicine II 32

PACRIM Symposium 39: Biomimetics and Bioinspired Processing of Advanced Materials

Biomimetics and Bioinspired Processing 33

PACRIM Symposium 40: 6th International Richard M. Fulrath Symposium, "Frontiers of Ceramics for a Sustainable Society"

Ceramics for Sustainable Energy and Environmental Systems I..... 35
Ceramics for Sustainable Energy and Environmental Systems II 35
Advanced Ceramic Technologies in AI, IoT, and Big Data..... 36

PACRIM Symposium 42: Young Investigator Forum - Next-Generation Materials for Multifunctional Applications and Sustainable Development, and Concurrent Societal Challenges in the New Millennium

Energy: Advances in Fundamental Science of Emerging Energy Materials I 36
Energy: Advances in Fundamental Science of Emerging Energy Materials II..... 37

PACRIM Symposium 4: Novel, Green, and Strategic Processing and Manufacturing Technologies

Novel, Green, and Strategic Processing II 38

PACRIM Symposium 6: Advanced Powder Processing and Manufacturing Technologies

Controlled Composites or Pore Structure 40
Particle and Powder Design and Synthesis 40

PACRIM Symposium 10: Sol-Gel Processing and Related Liquid-Phase Synthesis of Ceramics

Liquid-Phase Synthesis/Sol-Gel Process 42

PACRIM Symposium 15: Engineering Ceramics and Ceramic Matrix Composites: Design, Development, and Applications

Advanced Processing of Ceramic Matrix Composites 43
Mechanical Properties of Ceramic Matrix Composites. 43

PACRIM Symposium 20: Multiferroic Materials, Devices, and Applications

Multiferroic Materials, Devices, and Applications III 44
Multiferroic Materials, Devices, and Applications IV 45

PACRIM Symposium 21: Crystalline Materials for Electrical, Optical, and Medical Applications

Piezo/Ferro-electric Materials 46
Semiconductors. 46

PACRIM Symposium 22: Microwave Dielectric Materials and Their Applications

Dielectric Materials and Metamaterials for Microwave Applications 47

PACRIM Symposium 24: Solid Oxide Fuel Cells and Hydrogen Technologies

Electrode Materials and Degradation/Oxygen Ion and Mixed Conductors 48

PACRIM Symposium 27: Advanced Materials and Technologies for Electrochemical Energy Storage Systems

Electrode/Electrolyte Interphase 48
Solid Electrolytes 49

PACRIM Symposium 31: Advanced Functional Materials, Devices, and Systems for Environmental Conservation, Pollution Control, and Critical Materials

VOCs / Ion-conducting Ceramics I. 50

PACRIM Symposium 34: Glass and Ceramics for Nuclear Waste Treatment and Sequestration

Waste Form Matrices-Synthesis and Characterization I..... 51
Waste Form Matrices-Synthesis and Characterization II 51

PACRIM Symposium 36: Advanced Multifunctional Bioceramics and Clinical Applications

Bioceramic Coatings / Bioglass..... 52

PACRIM Symposium 37: Material and Technology Needs for Medical Devices, Sensors, and Tissue Regeneration

Device, Sensor, and Tissue Regeneration I..... 53
Device, Sensor, and Tissue Regeneration II 54

PACRIM Symposium 40: 6th International Richard M. Fulrath Symposium, "Frontiers of Ceramics for a Sustainable Society"

Emerging Ceramic Materials and Technologies I..... 54
Emerging Ceramic Materials and Technologies II 55

PACRIM Symposium 42: Young Investigator Forum - Next-Generation Materials for Multifunctional Applications and Sustainable Development, and Concurrent Societal Challenges in the New Millennium

Computational Materials Prediction and Design Toward New Functional Materials 55
Health: Diagnostics and Therapy Towards Multifunctional Theranostics I..... 56

PACRIM Symposium 4: Novel, Green, and Strategic Processing and Manufacturing Technologies

Novel, Green, and Strategic Processing III 57

PACRIM Symposium 10: Sol-Gel Processing and Related Liquid-Phase Synthesis of Ceramics

Powders, Fibers, Films, Monoliths, and Gels 59
Nanoparticles, Nanofibers, Nanorods, and Nanosheets 59

PACRIM Symposium 15: Engineering Ceramics and Ceramic Matrix Composites: Design, Development, and Applications

Polymer-Derived Ceramic Matrix Composites 61
Sintering and Properties of Engineering Ceramics 61

PACRIM Symposium 20: Multiferroic Materials, Devices, and Applications	
Multiferroic Materials, Devices, and Applications V	62
PACRIM Symposium 21: Crystalline Materials for Electrical, Optical, and Medical Applications	
Scintillation Materials.....	63
PACRIM Symposium 22: Microwave Dielectric Materials and Their Applications	
Microwave Dielectric Materials and Applications	64
PACRIM Symposium 24: Solid Oxide Fuel Cells and Hydrogen Technologies	
Proton Conducting SOFC III.....	65
Proton Conducting SOFC IV	65
PACRIM Symposium 25: Direct Thermal to Electrical Energy Conversion Materials, Applications, and Thermal Energy Harnessing Challenges	
Computation and Theories	66
Oxides, Nitrides, Sulfides	67
PACRIM Symposium 27: Advanced Materials and Technologies for Electrochemical Energy Storage Systems	
Advanced Anode and Cathode Materials/Supercapacitors.....	68
Na/K/Mg Batteries.....	68
PACRIM Symposium 31: Advanced Functional Materials, Devices, and Systems for Environmental Conservation, Pollution Control, and Critical Materials	
Automotive Ceramic Sensors / Critical Materials.....	69
OCs / Ion-conducting Ceramics II	69
PACRIM Symposium 34: Glass and Ceramics for Nuclear Waste Treatment and Sequestration	
Waste Form Matrices-Synthesis and Characterization III.....	70
Waste Form Matrices-Synthesis and Characterization IV	71

PACRIM Symposium 36: Advanced Multifunctional Bioceramics and Clinical Applications

Biological Cell Response / Clinical Research / Calcium Phosphates 72

PACRIM Symposium 37: Material and Technology Needs for Medical Devices, Sensors, and Tissue Regeneration

Device, Sensor, and Tissue Regeneration III..... 73

Device, Sensor, and Tissue Regeneration IV 73

PACRIM Symposium 40: 6th International Richard M. Fulrath Symposium, “Frontiers of Ceramics for a Sustainable Society”

Global Human Health Challenges 74

Emerging Ceramic Materials and Technologies III..... 75

PACRIM Symposium 42: Young Investigator Forum - Next-Generation Materials for Multifunctional Applications and Sustainable Development, and Concurrent Societal Challenges in the New Millennium

Health: Diagnostics and Therapy Towards Multifunctional Theranostics II 76

Health: Diagnostics and Therapy Towards Multifunctional Theranostics III..... 76

PACRIM Symposium 2: Frontier of Modeling and Design of Ceramics and Composites

Modeling and Design of Ceramics and Composites..... 77

PACRIM Symposium 4: Novel, Green, and Strategic Processing and Manufacturing Technologies

Novel, Green, and Strategic Processing IV 79

PACRIM Symposium 7: Synthesis, Processing, and Micro-structural Control of Materials using Electric Currents, Magnetic fields and/or Pressures

Synthesis, Processing, and Micro-structural Control of Materials using Electric Currents, Magnetic fields and/or Pressures 80

PACRIM Symposium 8: Porous Ceramics: Innovative Processing and Advanced Applications

Additive Manufacturing for Porous Ceramics..... 81

Catalytic Performances of Porous Ceramics 81

PACRIM Symposium 10: Sol-Gel Processing and Related Liquid-Phase Synthesis of Ceramics

Hierarchical Structuring Method 82
Porous Low-density Materials (Aerogels) 82

PACRIM Symposium 12: Specific Reaction Field and Material Fabrication Design

Specific Reaction Field and Material Fabrication Design 83

PACRIM Symposium 14: Functional Nanomaterials for Energy Harvesting and Solar Fuels

Functional Metal Oxide Nano- and Heterostructures for Photocatalysis and Solar Fuels 84

PACRIM Symposium 17: Multifunctional Coatings for Structural, Energy, and Environmental Applications

Multifunctional Coatings 85

PACRIM Symposium 19: Geopolymers: Low Energy and Environmentally Friendly Ceramics

Geopolymers 86

PACRIM Symposium 21: Crystalline Materials for Electrical, Optical, and Medical Applications

Optical Materials I 87
Optical Materials II 87

PACRIM Symposium 24: Solid Oxide Fuel Cells and Hydrogen Technologies

Electrode Materials 88
Electrode Materials and Interconnects 89

PACRIM Symposium 25: Direct Thermal to Electrical Energy Conversion Materials, Applications, and Thermal Energy Harnessing Challenges

Tellurides 90
Emerging Materials 91

PACRIM Symposium 26: Materials for Solar Thermal Energy Conversion and Storage

Materials to Produce Synthetic Fuels 91

PACRIM Symposium 27: Advanced Materials and Technologies for Electrochemical Energy Storage Systems

All Solid State Batteries/Li/Na-Sulfur Batteries 92

PACRIM Symposium 34: Glass and Ceramics for Nuclear Waste Treatment and Sequestration

Waste Form Matrices-Synthesis and Characterization V 93

Waste Form Matrices-Synthesis and Characterization VI 94

PACRIM Symposium 1: Characterization and Modeling of Ceramic Interfaces: Structure, Bonding, and Grain Growth

Correlation of Interfaces with Macroscopic Properties / Grain Boundary and Interface Structures 95

PACRIM Symposium 3: Advanced Structure Analysis and Characterization of Ceramics

Electron Microscopy and Probe Microscopy 96

PACRIM Symposium 5: Polymer Derived Ceramics (PDCs) and Composites

Precursors and Properties 97

Processing and Simulations 98

PACRIM Symposium 8: Porous Ceramics: Innovative Processing and Advanced Applications

Ceramic Membranes 99

Properties of Porous Ceramics 99

PACRIM Symposium 9: Additive Manufacturing and 3D Printing Technologies

Emerging Technology 100

Slurry-Based Technique 101

PACRIM Symposium 13: Novel Nanocrystal Technologies for Advanced Ceramic Materials & Devices

Synthesis of Nanocrystals and Nanocomposites 102

Fabrication of 1D-, 2D-, and 3D-Assemblies, Coating Films, and Bulk Ceramics by using Nanocrystals 102

Applications and Functional Devices using Nanocrystals and Characterizations 103

PACRIM Symposium 14: Functional Nanomaterials for Energy Harvesting and Solar Fuels

Innovative Processing of Functional Nanomaterials for Optoelectronic Devices / Advanced Materials for Next Generation Photovoltaic Devices 103

PACRIM Symposium 16: Advanced Structural Ceramics for Extreme Environments

Advanced Structural Ceramics for Extreme Environments..... 104

PACRIM Symposium 18: Advanced Wear Resistant Materials: Tribology and Reliability

Mechanical and Tribological Behavior of Advanced Materials 106

PACRIM Symposium 23: Transparent Ceramic Materials and Devices

Transparent Ceramic Materials I..... 107

PACRIM Symposium 24: Solid Oxide Fuel Cells and Hydrogen Technologies

High Temperature Electrolysis and Electrodes 108

PACRIM Symposium 28: Atomic Structure and Electrochemical Property Diagnosis Toward Full Crystal Rechargeable Batteries

All Solid-state Battery System..... 109

Solid-state Electrolytes 110

PACRIM Symposium 32: Ceramics for Enabling Environmental Protection: Clean Air and Water

Ceramics for Enabling Environmental Protection: Clean Air and Water 111

PACRIM Symposium 1: Characterization and Modeling of Ceramic Interfaces: Structure, Bonding, and Grain Growth

Microstructure Evolution and Grain Growth / Advances in Interface Characterization and Modeling 111

PACRIM Symposium 3: Advanced Structure Analysis and Characterization of Ceramics

Spectroscopic and Scattering Methods 112

PACRIM Symposium 5: Polymer Derived Ceramics (PDCs) and Composites	
Processing and Applications I.....	114
Processing and Applications II	115
PACRIM Symposium 8: Porous Ceramics: Innovative Processing and Advanced Applications	
Innovative Processing Route for Porous Ceramics	115
Porous Ceramics for Thermal Management	116
PACRIM Symposium 9: Additive Manufacturing and 3D Printing Technologies	
Multi-Material Process.....	116
Laser Processing	117
PACRIM Symposium 13: Novel Nanocrystal Technologies for Advanced Ceramic Materials & Devices	
Applications and Functional Devices using Nanocrystals.....	118
PACRIM Symposium 18: Advanced Wear Resistant Materials: Tribology and Reliability	
Design of Novel Functional Materials	118
PACRIM Symposium 23: Transparent Ceramic Materials and Devices	
Transparent Ceramic Materials II.....	119
PACRIM Symposium 24: Solid Oxide Fuel Cells and Hydrogen Technologies	
Reliability and Degradation.....	120
SOFC Prototypes, Electrodes and Sealants.....	120
PACRIM Symposium 28: Atomic Structure and Electrochemical Property Diagnosis Toward Full Crystal Rechargeable Batteries	
Characterization of Battery Materials and Interfaces I	121
Characterization of Battery Materials and Interfaces II.....	121
PACRIM Symposium 33: Photocatalysts for Energy and Environmental Applications	
Photocatalysts for Energy and Environmental Applications	123

PACRIM Posters	123
GOMD Award Lectures	
Opening Remarks and Otto Schott Award Presentation and Lectures (2021).....	131
GOMD Award Lectures	
George W. Morey Award Lecture (2020).....	132
GOMD Award Lectures	
The Norbert J. Kreidl Award for Young Scholars Lecture (2021).....	132
GOMD Award Lectures	
Varshneya Glass Technology Award Lecture (2021).....	132
GOMD S1: Fundamentals of the Glassy State	
Structural Characterization of Glass: Al B Silicate Glasses.....	132
Structural Characterization of Glass: Silicate Glass	133
Atomistic Simulation and Predictive Modeling of Glass I	134
Atomistic Simulation and Predictive Modeling of Glass II	135
Mechanical Properties of Glass I.....	135
Mechanical Properties of Glass II.....	136
GOMD S2: Glass and Interactions with Its Environment - Fundamentals and Applications	
Dissolution and Interfacial Reactions: Alternative Conditions	137
Dissolution and Interfacial Reactions: Long-Term Degradation.....	138
GOMD S3: Optical and Electronic Materials and Devices - Fundamentals and Applications	
Optical and Photonic Glass and Glass-Ceramics I	139
Optical and Photonic Glass and Glass-Ceramics II.....	140
GOMD S4: Glass Technology and Cross-Cutting Topics	
Challenges in Glass Manufacturing I	141
Challenges in Glass Manufacturing II.....	142

GOMD S1: Fundamentals of the Glassy State	
Structural Characterizations of Glass: Borate and Borosilicate Glasses, Phosphates.....	143
Atomistic Simulation and Predictive Modeling of Glass III.....	145
Mechanical Properties of Glass III.....	146
GOMD S2: Glass and Interactions with Its Environment - Fundamentals and Applications	
Dissolution and Interfacial Reactions: Residual Rates and Gel Layers.....	147
GOMD S3: Optical and Electronic Materials and Devices - Fundamentals and Applications	
Optical and Photonic Glass and Glass-Ceramics III.....	148
GOMD S4: Glass Technology and Cross-Cutting Topics	
Challenges in Glass Manufacturing III.....	149
GOMD S1: Fundamentals of the Glassy State	
Data-based Modeling and Machine Learning for Glass Science I.....	150
Data-based Modeling and Machine Learning for Glass Science II.....	150
Mechanical Properties of Glass IV.....	151
GOMD S2: Glass and Interactions with Its Environment - Fundamentals and Applications	
Dissolution and Interfacial Reactions: Composition Effects.....	152
GOMD S3: Optical and Electronic Materials and Devices - Fundamentals and Applications	
Optical Fibers and Waveguides I.....	153
Optical Fibers and Waveguides II.....	154
GOMD S4: Glass Technology and Cross-Cutting Topics	
3-D Printing of Glass.....	155
GOMD S1: Fundamentals of the Glassy State	
Glass Formation and Structural Relaxation I.....	156
Glass Formation and Structural Relaxation II.....	157

GOMD S3: Optical and Electronic Materials and Devices - Fundamentals and Applications

Charge and Energy Transport I 157
Charge and Energy Transport II 158
Glass-based Optical Devices I 159
Glass-based Optical Devices II 160

GOMD S5: Glass Education

Education and Professional Development 161

GOMD S1: Fundamentals of the Glassy State

Topology and Rigidity I 162
Glass under Extreme Conditions I 162

GOMD S2: Glass and Interactions with Its Environment - Fundamentals and Applications

Nuclear Waste Mobilization I 163
Surfaces and Coatings I 164

GOMD S3: Optical and Electronic Materials and Devices - Fundamentals and Applications

Laser Interactions with Glass I 164

GOMD S1: Fundamentals of the Glassy State

Glass Crystallization and Glass-Ceramics I 165
Glass Crystallization and Glass-Ceramics II 166
Topology and Rigidity II 167
Glass under Extreme Conditions II 167
Glass under Extreme Conditions III 168

GOMD S2: Glass and Interactions with Its Environment - Fundamentals and Applications

Nuclear Waste Mobilization II 169
Nuclear Waste Mobilization III 169
Surfaces and Coatings II 170
Surfaces and Coatings III 171

GOMD S3: Optical and Electronic Materials and Devices - Fundamentals and Applications

Laser Interactions with Glass II 172

Laser Interactions with Glass III..... 173

GOMD Posters..... 174
