2022 4th International Conference on Process Mining (ICPM 2022)

Bolzano, Italy
23-28 October 2022
2022 4th International Conference on Process Mining
ICPM 2022

Table of Contents

Message from the General Chair ............................................................................. 7
Message from the Program Chairs ........................................................................... 8
Conference Organization ........................................................................................... 9
Program Committee .................................................................................................. 11
Additional Reviewers ............................................................................................... 13
Sponsors .................................................................................................................... 14
Keynote: Complex-Event Mining Over Centralized and Distributed Data Streams .......... 15

Explainability

Explainable Process Prescriptive Analytics ............................................................... 16
   Alessandro Padella, Massimiliano de Leoni, Onur Dogan and Riccardo Galanti
Improving Accuracy and Explainability in Event-Case Correlation via Rule Mining ....................... 24
   Dina Bayomie, Kate Revoredo, Claudio Di Cicco and Jan Mendling
Mining Statistical Relations for Better Decision Making in Healthcare Processes .................... 32
   Jelmer J. Koorn, Xixi Lu, Henrik Leopold, Niels Martin, Sam Verboven and Hajo A. Reijers

Predictive Process Monitoring

Towards Next-Location Prediction for Process Executions ........................................ 40
   Andrea Chiorrini, Claudia Diamantini, Laura Genga, Martina Pioli and Domenico Potena
Encoding High-Level Control-Flow Construct Information for Process Outcome Prediction .................. 48
   Mozghan Vazifehdoostirani, Laura Genga and Remco Dijkman
Assessing the Robustness in Predictive Process Monitoring Through Adversarial Attacks .................. 56
   Alexander Stevens, Johannes De Smedt, Jari Peeperkorn and Jochen De Weerdt

Process Discovery

Discovering an S-Coverable WF-net Using DiSCover ............................................... 64
   Eric Verbeek
Modeling Extraneous Activity Delays in Business Process Simulation .............................. 72
   David Chapela-Campa and Marlon Dumas

Stochastic Process Mining

Stochastic Process Model-Log Quality Dimensions: An Experimental Study ................... 80
   Adam T. Burke, Sander J.J. Leemans, Moe T. Wynn, Wil M.P. van der Aalst and Arthur H.M. ter Hofstede
Grammar-Based Process Model Representation for Probabilistic Conformance Checking .......... 88
   Akio Watanabe, Yousuke Takahashi, Hiroki Ikeuchi and Kotaro Matsuda
Measurement of Rule-Based LTLf Declarative Process Specifications ............................. 96
   Alessio Cecconi, Claudio Di Cicco and Arik Senderovich
